

## Inhalt

\*Potential Health Benefits of Citrus: An Overview, Bhimanagouda S. Patil, Jennifer S. Brodbelt, Edward G. Miller, and Nancy D. Turner  
Isolation and Characterization of Citrus Bioactive Compounds: Citrus Bioactive Limonoids and Flavonoids Extraction by Supercritical Fluids: Bhimanagouda S. Patil, Jun Yu, Deepak V. Dandekar, Romeo T. Toledo, Rakesh K. Singh, and Leonard M. Pike - Methods for the Separation of Limonoids from Citrus: Guddadarangawanahally K. Jayaprakasha, Jennifer S. Brodbelt, Narayan G. Bhat, and Bhimanagouda S. Patil - Characterization of Flavonoids by Tandem Mass Spectrometry and Metal Complexation Strategies: Jennifer S. Brodbelt, Junmei Zhang, Michael Pikulski, Barry D. Davis, Basavaraj Girenavar, Guddadarangawanahally K. Jayaprakasha, and Bhimanagouda S. Patil - Powerful Analytical Tools for Citrus Characterization: LC/MS and LC/NMR Characterization of Polymethoxylated Flavones, Claus O. Schmidt, Gerhard E. Krammer, Berthold Weber, Detlef Stöckigt, Stefan Brennecke, Günter Kindel, and Heinz-Jürgen Bertram  
Bioavailability and Toxicity of Limonoids: Long-Term Screening Study on the Potential Toxicity of Limonoids: Edward G. Miller, Reed P. Gibbins, Samuel E. Taylor, Jame E. McIntosh, and Bhimanagouda S. Patil - Citrus Limonoid Bioavailability in Humans, Andrew P. Breksa III, Gary D. Manners, Robert A. Jacob, and Shin Hasegawa  
Health Properties of Bioactive Compounds in Citrus: Citrus Flavonoid Nobiletin Suppresses Azoxymethane-Induced Rat Colon Tumorigenesis: Rikako Suzuki, Hiroyuki Kohno, Shigeyuki Sugie, Akira Murakami, Masamichi Yano, Hajime Ohigashi, and Takuji Tanaka - Comparison of the Chemoprotection Conferred by Grapefruit and Isolated Bioactive Compounds against Colon Cancer: Nancy D. Turner, Jairam Vanamala, Tety Leonardi, Bhimanagouda S. Patil, Mary E. Murphy, Yingxue C. Liu, Naisyin Wang, Leonard M. Pike, Robert S. Chapkin, and Joanne R. Lupton - Citrus Limonoids and Flavonoids: Enhancement of Phase II Detoxification Enzymes and Their Potential in

Chemoprevention: Hassan Ahmad, Jiaying Li, Maria Poison, Kimberly Mackie, Walter Quiroga, and Bhimanagouda S. Patil

Prevention of Drug-Induced Programmed and Unprogrammed Cell Death by Citrus Flavonoids: Sidhartha D. Ray, Daniel Zinkovsky, Ellida Bulku, and Bhimanagouda S. Patil - Antioxidant Effects of Citrus Flavonoid Consumption, John R. Burgess and Juan E. Andrade - Citrus sp.: A Source of Flavonoids of Pharmaceutical Interest. Ana Ortuño, Pedro Gómez, Ana Báidez, Víctor Frías, and José A. Del Río - Modulation of Cholesterol and Triacylglycerol Biosynthesis by Citrus Polymethoxylated Flavones: Cholesterol-Lowering Properties of Citrus Flavonoids, John A. Manthey and Elzbieta M. Kurowska

The Health Benefits of Modified Citrus Pectin, Isaac Eliaz, John Guardino, and Kerry Hughes - Obesity, Metabolic Syndrome, and the Benefits of Citrus, Ken Fujioka and Michael W. Lee - Whither Grapefruit and Drug Interaction?, Basavaraj Girenavar, Shibu M. Poulouse, Jennifer S. Brodbelt, Guddadarangawanahally K. Jayaprakasha, Narayan G. Bhat, and Bhimanagouda S. Patil - Grapefruit and Cancer: A Review, Kristine Cuthrell and Loïc Le Marchand

Consumer Trends: Trends in Consumer Attitudes toward Food and Health: from Food Biotechnology to Personalized Nutrition, David B. Schmidt
