

NATIONAL ATLAS OF JORDAN

Part
II

HYDROLOGY AND
AGROHYDROLOGY

First Edition
1986

ROYAL JORDANIAN
GEOGRAPHIC CENTRE

Table of Contents

Preface	
Topographic Map	1
Dams and Reservoirs	2
Simplified Hydrogeological Cross-Section	3
Isolines of Penetrated Thickness of Aquifer	4
Depth to Water in The Sandstone Aquifer Systems	5
Deep Sandstone Hydraulic Complex.(Kurnub - Zarqa-Disi)	6
Shallow Aquifer Systems Tertiary - Quaternary	7
Upper Cretaceous Limestone Hydraulic Complex	8
Mean Autumn and Spring Rainfall (mm) (1942 - 1976)	9
Mean Winter and Annual Rainfall	10
Annual Rainfall in 1959 / 1960 / 1966 / 1967	11
Number of Rainy Days	12
Rainfall Distribution - Wet Year (10 - Year Return Period)	13
Rinfall Distribution - Normal Year (Long Term Average)	14
Mean Saturation Deficit for The Day	15
Rainfall Distribution - Dry Year (10 - Year Return Period)	16
Moisture Surplus (mm)	17
Moisture Defeciency (mm)	18
Moisture Index	19
Index of Continentality	20
Index of Oceanicity	21
Temperateness of Climate	22
The Climatic Regions of Thornthwaite	23
The Climatic Regions of Koppen	24
Climatic Regions of Jordan (Emberger Classification)	25
Emberger Climatological Curve	26
Potential Evapotranspiration (mm) January	27
Potential Evapotranspiration (mm) February	28
Potential Evapotranspiration (mm) March	29
Potential Evapotranspiration (mm) April	30
Potential Evapotranspiration (mm) May	31
Potential Evapotranspiration (mm) June	32
Potential Evapotranspiration (mm) July	33
Potential Evapotranspiration (mm) August	34

Potential Evapotranspiration (mm) September	35
Potential Evapotranspiration (mm) October	36
Potential Evapotranspiration (mm) November	37
Potential Evapotranspiration (mm) December	38
Potential Evapotranspiration (mm) Mean Dry Period	39
Potential Evapotranspiration (mm) Wet Period	40
Potential Evapotranspiration (mm) Mean Annual	41
Class - A - Pan Evaporation (mm) January	42
Class - A - Pan Evaporation (mm) February	43
Class - A - Pan Evaporation (mm) March	44
Class - A - Pan Evaporation (mm) April	45
Class - A - Pan Evaporation (mm) May	46
Class - A - Pan Evaporation (mm) June	47
Class - A - Pan Evaporation (mm) July	48
Class - A - Pan Evaporation (mm) August	49
Class - A - Pan Evaporation (mm) September	50
Class - A - Pan Evaporation (mm) October	51
Class - A - Pan Evaporation (mm) November	52
Class - A - Pan Evaporation (mm) December	53
Class - A - Pan Evaporation (mm) Mean Dry Period	54
Class - A - Pan Evaporation (mm) Mean Wet Period	55
Class - A - Pan Evaporation (mm) Mean Annual	56
Measured Stream Flow (mm) January	57
Measured Stream Flow (MCM) February	58
Measured Stream Flow (MCM) March	59
Measured Stream Flow (MCM) April	60
Measured Stream Flow (MCM) May	61
Measured Stream Flow (MCM) June	62
Measured Stream Flow (MCM) July	63
Measured Stream Flow (MCM) August	64
Measured Stream Flow (MCM) September	65
Measured Stream Flow (MCM) October	66
Measured Stream Flow (MCM) November	67
Measured Stream Flow (MCM) December	68
Measured Stream Flow (MCM) Dry Period	69
Measured Stream Flow (MCM) Wet Period	70
Measured Stream Flow (MCM) Mean Total (26 Years)	71

Water Examination Samples	72
Water Potential of Different Hydrological Regions of Jordan	73
Water Potential of Different Hydrological Regions of Jordan	74
Distribution of Produced Water 1983 for Consumers	75
Monthly Water Production 1983	76
Controlled Surface Water	77
Controlled Water Import and Export in Different Hydrological Regions of Jordan	78
Utilization of Produced Water 1983 from Wells and Springs	79
Population and Municipal Water Supply Systems 1983	80
Daily Municipal Water Demand 1975 - 2000	81
Annual Municipal Unit water Demand 1975 - 2000 Domestic Unit Water Demand	82
Annual Municipal Unit water Demand 1975 - 2000	83
Industries with Independent Water Supply in Zarqa	84
Total Annual Water Production from River Flows (MCM) (Average Rainfall Year - Future Situation) WATER Production	85
Total Annual Water Production from River Flows (MCM) (Average Rainfall Year - Actual situation)	86
Total Annual Water Production from River Flows (MCM) (Dry Rainfall Year - Future Situation)	87
Total Annual Water Production from River Flows (MCM) (Dry Rainfall Year - Actual Situation)	88
Total Annual Water Production from Spring Flows (MCM) (Average Rainfall Year Actual Situation)	89
Total Annual Water Production from Spring Flows (MCM) (Average Rainfall Year Future Situation)	90
Total Annual Water Production from Spring Flows (MCM) (Dry Rainfall Year - Actual Situation)	91
Total Annual Water Production from Spring Flows (MCM) (Dry Rainfall Year - Future Situation)	92
Total Annual Water Production from Ground Water (MCM) (Average Rainfall Year - Actual Situation)	93
Total Annual Water Production from Ground Water (MCM) (Average Rainfall Year - Future Situation)	94
Total Annual Water Production from Ground Water (MCM) (Dry Rainfall Year - Actual Situation)	95
Total Annual Water Production from Ground Water (MCM) (Dry Rainfall Year - Future Situation)	96

Total Annual Return Flow into River Flow (MCM) (Average Rainfall Year - Actual Situation)	97
Total Annual Return Flow into River Flow (MCM) (Average Rainfall Year - Future Situation)	98
Total Annual Return Flow into River Flow (MCM) (Dry Rainfall Year - Actual Situation)	99
Total Annual Return Flow into River Flow (MCM) (Dry Rainfall Year - Future Situation)	100
Total Annual Return Flow into Ground Water (MCM) (Average Rainfall Year - Actual Situation)	101
Total Annual Return Flow into Ground Water (MCM) (Average Rainfall Year - Future Situation)	102
Total Annual Return Flow into Ground Water (MCM) (Dry Rainfall Year - Actual Situation)	103
Total Annual Return Flow into Ground Water (MCM) (Dry Rainfall Year - Future Situation)	104
Total Annual Water Production for Purposes of Irrigation (MCM) (Average Rainfall Year - Actual Situation)	105
Total Annual Water Production for Purposes of Irrigation (MCM) (Average Rainfall Year - Future Situation)	106
Total Annual Water Production for Purposes of Irrigation (MCM) (Dry Rainfall Year - Actual Situation)	107
Total Annual Water Production for Purposes of Irrigation (MCM) (Dry Rainfall Year - Future Situation)	108
Annual Consumptive Water Use of Irrigation Areas (MCM) (Average Rainfall Year - Actual Situation)	109
Annual Consumptive Water Use of Irrigation Areas (MCM) (Average Rainfall Year - Future Situation)	110
Annual Consumptive Water Use of Irrigation Areas (MCM) (Dry Rainfall Year - Actual Situation)	111
Annual Consumptive Water Use of Irrigation Areas (MCM) (Dry Rainfall Year - Future Situation)	112
Total Annual Return Flow From Irrigation Areas (MCM) (Average Rainfall Year - Actual Situation)	113
Total Annual Return Flow From Irrigation Areas (MCM) (Average Rainfall Year - Future Situation)	114
Total Annual Return Flow From Irrigation Areas (MCM) (Average Rainfall Year - Future Situation)	115

Total Annual Return Flow From Irrigation Areas (MCM) (Dry Rainfall Year - Actual Situation)	116
Export From or Import Into The Area For Irrigation Purposes (MCM) (Average Rainfall Year - Actual Situation)	117
Export From or Import Into The Area For Irrigation Purposes (MCM) (Average Rainfall Year - Future Situation)	118
Export From or Import Into The Area For Irrigation Purposes (MCM) (Dry Rainfall Year - Actual Situation)	119
Export From or Import Into The Area For Irrigation Purposes (MCM) (Dry Rainfall Year - Future Situation)	120
Propability of Precipitation For Wheat	121
Propability of Precipitation For Barley	122
Wheat and Barley Planted Area and Rainfall	123
Grapes Planted Area & Rainfall (Mean / MM)	124
Area Under Wheat as a Percentage of Gross Sown Area	125
Area Under Barley as a Percentage of Gross Sown Area	126
Area Under Other Cereals as a Percentage of Gross Sown Area	127
Area Under Tomatos as a Percentage of Gross Sown Area	128
Area Under Eggplants as a Percentage of Gross Sown Area	129
Area Under Vegetables as a Percentage of Cross Sown Area	130
Area Under Fruit Trees as a Percentage of Cross Sown Area	131
Area Under Olive as a Percentage of Cross Sown Area	132
Area Under Tobacco as a Percentage of Gross Sown Area	133
Area Under Vineyard as a Percentage of Cross Sown Area	134
Area Under Citrus as a Percentage of Cross Sown Area	135
Composite Index of Agricultural Productivity of Jordan 1982 / 1983 (Cereals)	136
Composite Index of Agricultural Productivity of Jordan 1982 / 1983 (Vegetables)	137
Composite Index of Agricultural Productivity of Jordan 1982 / 1983 (Tobacco)	138
Composite Index of Agricultural Productivity of Jordan 1982 / 1983 (Fruit Trees)	139
Composite Index of Agricultural Productivity of Jordan 1982 / 1983 (All Crops)	140
Composite Index of Agricultural Efficiency	141
