

**THE ATLAS OF
NEPAL
IN THE MODERN WORLD**

MICHAEL SILL AND JOHN KIRKBY

Earthscan Publications Ltd, London
in association with the ETC Foundation

CONTENTS

List of tables and figures 6

Foreword 9

PART 1

Nepal today 13

The political economy and development problems 18

The Nepalese environment 23

Development planning in Nepal 28

PART 2

INTRODUCTION 35

NATURAL RESOURCES AND HAZARDS 38

Geology 38

Landforms: hazards and resources 43

Soils and soil erosion 46

Ecological zones 51

Forest use and deforestation 55

The climatic resource 57

WATER AND ITS USES 61

River systems 61

Water management projects 63

Irrigation 66

TOURISM AND THE ENVIRONMENT 71

Tourism in Nepal 71

Protected landscapes and ecosystems 74

Mountain tourism and trekking in Nepal 78

PEOPLE AND LANGUAGE 80

Population distribution in Nepal 80

Nepal: population change 1971-81 82

Migration patterns within Nepal 86

Aspects of demography: fertility and mortality patterns 89

Aspects of Demography: nuptiality patterns 92

The geography of languages in Nepal 94

TOWNS AND INDUSTRY 99

Towns in Nepal 99

Manufacturing industry in Nepal 103

Developing rural technology 106

LAND MANAGEMENT 110

Terrain evaluation 110

The Koshi Hills Area Rural Development Programme 114

LAND AND FOOD 119

Population pressure on cultivated land 119

Farm size and land reform in Nepal 123

Food crops and cash crops in Nepal 126

ENERGY 132

The energy crisis in Nepal 132

The energy crisis in Dhanusha District 135

The energy economies of three villages in Dhanusha District 137

TRANSPORT 141

ASPECTS OF EDUCATION IN NEPAL 146

POSTSCRIPT 152

SELECT BIBLIOGRAPHY 153

- Table 30 Literacy levels and access to primary education, 1971–81 *page 146*

PHOTOGRAPHS

1. The school bus in a Terai town *page 13*
2. Fuel wood and water pots for sale in a Terai town *page 18*
3. Rower Pump in use for irrigation raising water about 4 metres *page 23*
4. Sinate, open-fronted self-build shops in a Terai town *page 28*
5. Annapurna massif: high altitude valley scene with river terraces to the left of the plate and a braided river channel *page 38*
6. Shaduf system of irrigation in the Terai raising water to a higher field to water winter cereals. Row of fodder/fuel

-
- wood trees on the bund in the middle ground *page 61*
7. The Janaki Temple dedicated to Sita in Janakpur in the eastern Terai : a focus for Hindu pilgrims from India as well as Nepal *page 71*
 8. A house in Penor, Terai *page 80*
 9. Street scene in old Kathmandu. Ornatly carved timber-framed houses, along a street which was on the old trade route to Tibet. Crowded with shops and hawkers *page 99*
 10. Terraced hillslopes on the northern rim of the Kathmandu valley to the north of Bhaktapur. Terracing extends to the top of the ridge, where the settlement is located. Population pressure means that little land is unused for cultivation. Fertilizer ready for spreading in the fields in the foreground *page 110*
 11. Biogas plant in the village of Mahendra Nager, north of

-
- Janakpur in Dhanusha district. The concrete dome of the digester can be seen next to the boy, as can the slurry draining into the nearby vegetable plots *page 119*
12. Every little helps – street scene, Janakpur *page 132*
 13. Crowded train on the line from Janakpur to the Indian border at Jaynager: a narrow gauge, British-built line which was built to facilitate the export of timber from Terai to India *page 141*
 14. Private primary school in Janakpur with the staff and a number of children. An increasingly common sight in Nepalese towns: uniformed children who are often transported to and from school by bicycle rickshaw *page 146*

Photographs by John Kirkby and Michael Sill.
