What Is New in the Second Edition?	xxi
Option Pricing Formulas Overview	xxiii
Glossary of Notations	xxxv
1 Black-Scholes-Merton	1
1.1 Black-Scholes-Merton	2
1.1.1 The Black-Scholes Option Pricing Formula	2
1.1.2 Options on Stock Indexes	4
1.1.3 Options on Futures	4
1.1.4 Margined Options on Futures	5
1.1.5 Currency Options	6
1.1.6 The Generalized Black-Scholes-Merton Option Pricing Formula	7
1.2 Parities and Symmetries	9
1.2.1 Put-Call Parity for European Options	9
1.2.2 At-the-Money Forward Value Symmetry	10
1.2.3 Put-Call Symmetry	10
1.2.4 Put-Call Supersymmetry	11
1.2.5 Black-Scholes-Merton on Variance Form	11
1.3 Before Black-Scholes-Merton	12
1.3.1 The Bachelier Model	12
1.3.2 The Sprenkle Model	13
1.3.3 The Boness Model	14
1.3.4 The Samuelson Model	14
1.4 Appendix A: The Black-Scholes-Merton PDE	15

1.4.1	Ito's Lemma	15
1.4.2	Dynamic Hedging	16
2	Black-Scholes-Merton Greeks	21
2.1	Delta Greeks	21
2.1.1	Delta	21
2.1.2	Delta Mirror Strikes and Assets	29
2.1.3	Strike from Delta	30
2.1.4	Futures Delta from Spot Delta	31
2.1.5	DdeltaDvol and DvegaDspot	32
2.1.6	DvannaDvol	34
2.1.7	DdeltaDtime, Charm	35
2.1.8	Elasticity	36
2.2	Gamma Greeks	38
2.2.1	Gamma	38
2.2.2	Maximal Gamma and the Illusions of Risk	39
2.2.3	GammaP	42
2.2.4	Gamma Symmetry	45
2.2.5	DgammaDvol, Zomma	45
2.2.6	DgammaDspot, Speed	47
2.2.7	DgammaDtime, Color	49
2.3	Vega Greeks	50
2.3.1	Vega	50
2.3.2	Vega Symmetry	55
2.3.3	Vega-Gamma Relationship	55
2.3.4	Vega from Delta	56
2.3.5	VegaP	56
2.3.6	Vega Leverage, Vega Elasticity	57
2.3.7	DvegaDvol, Vomma	57
2.3.8	DvommaDvol, Ultima	60
2.3.9	DvegaDtime	61
2.4	Variance Greeks	62
2.4.1	Variance Vega	62
2.4.2	DdeltaDvar	63
2.4.3	Variance Vomma	63
2.4.4	Variance Ultima	63
2.5	Volatility-Time Greeks	64
2.6	Theta Greeks	64
2.6.1	Theta	64
2.6.2	Theta Symmetry	68
2.7	Rho Greeks	68
2.7.1	Rho	68
2.7.2	Phi/Rho-2	71
2.7.3	Carry Rho	73

2.8	Probability Greeks	75
2.8.1	In-the-Money Probability	76
2.8.2	DzetaDvol	79
2.8.3	DzetaDtime	80
2.8.4	Risk-Neutral Probability Density	80
2.8.5	From in-the-Money Probability to Density	80
2.8.6	Probability of Ever Getting in-the-Money	80
2.9	Greeks Aggregations	81
2.9.1	Net Weighted Vega Exposure	82
2.10	At-the-Money Forward Approximations	84
2.10.1	Approximation of the Black-Scholes-Merton Formula	84
2.10.2	Delta	84
2.10.3	Gamma	84
2.10.4	Vega	84
2.10.5	Theta	84
2.10.6	Rho	85
2.10.7	Cost-of-Carry	85
2.11	Numerical Greeks	85
2.11.1	First-Order Greeks	85
2.11.2	Second-Order Greeks	86
2.11.3	Third-Order Greeks	86
2.11.4	Mixed Greeks	87
2.11.5	Third-Order Mixed Greeks	87
2.12	Greeks from Closed-Form Approximations	89
2.13	Appendix B: Taking Partial Derivatives	90
3	Analytical Formulas for American Options	97
3.1	The Barone-Adesi and Whaley Approximation	97
3.2	The Bjerksund and Stensland (1993) Approximation	101
3.3	The Bjerksund and Stensland (2002) Approximation	104
3.4	Put-Call Transformation American Options	109
3.5	American Perpetual Options	109
4	Exotic Options—Single Asset	111
4.1	Variable Purchase Options	111
4.2	Executive Stock Options	114
4.3	Moneyness Options	114
4.4	Power Contracts and Power Options	115
4.4.1	Power Contracts	115
4.4.2	Standard Power Option	116
4.4.3	Capped Power Option	117
4.4.4	Powered Option	118
4.5	Log Contracts	119
4.5.1	Log(S) Contract	120

4.5.2	Log Option	121
4.6	Forward Start Options	121
4.7	Fade-in Option	122
4.8	Ratchet Options	124
4.9	Reset Strike Options—Type 1	124
4.10	Reset Strike Options—Type 2	125
4.11	Time-Switch Options	127
4.12	Chooser Options	128
4.12.1	Simple Chooser Options	128
4.12.2	Complex Chooser Options	129
4.13	Options on Options	132
4.13.1	Put–Call Parity Compound Options	135
4.13.2	Compound Option Approximation	136
4.14	Options with Extendible Maturities	138
4.14.1	Options That Can Be Extended by the Holder	138
4.14.2	Writer-Extendible Options	140
4.15	Lookback Options	141
4.15.1	Floating-Strike Lookback Options	141
4.15.2	Fixed-Strike Lookback Options	143
4.15.3	Partial-Time Floating-Strike Lookback Options	144
4.15.4	Partial-Time Fixed-Strike Lookback Options	147
4.15.5	Extreme-Spread Options	148
4.16	Mirror Options	150
4.17	Barrier Options	152
4.17.1	Standard Barrier Options	152
4.17.2	Standard American Barrier Options	154
4.17.3	Double-Barrier Options	156
4.17.4	Partial-Time Single-Asset Barrier Options	160
4.17.5	Look-Barrier Options	163
4.17.6	Discrete-Barrier Options	164
4.17.7	Soft-Barrier Options	165
4.17.8	Use of Put-Call Symmetry for Barrier Options	167
4.18	Barrier Option Symmetries	168
4.18.1	First-Then-Barrier Options	169
4.18.2	Double-Barrier Option Using Barrier Symmetry	171
4.18.3	Dual Double-Barrier Options	172
4.19	Binary Options	174
4.19.1	Gap Options	174
4.19.2	Cash-or-Nothing Options	174
4.19.3	Asset-or-Nothing Options	175
4.19.4	Supershare Options	176
4.19.5	Binary Barrier Options	176
4.19.6	Double-Barrier Binary Options	180

4.19.7	Double-Barrier Binary Asymmetrical	181
4.20	Asian Options	182
4.20.1	Geometric Average-Rate Options	182
4.20.2	Arithmetic Average-Rate Options	186
4.20.3	Discrete Arithmetic Average-Rate Options	192
4.20.4	Equivalence of Floating-Strike and Fixed-Strike Asian Options	199
4.20.5	Asian Options with Volatility Term-Structure	199
5	Exotic Options on Two Assets	203
5.1	Relative Outperformance Options	203
5.2	Product Options	205
5.3	Two-Asset Correlation Options	205
5.4	Exchange-One-Asset-for-Another Options	206
5.5	American Exchange-One-Asset-for-Another Option	208
5.6	Exchange Options on Exchange Options	209
5.7	Options on the Maximum or the Minimum of Two Risky Assets	211
5.8	Spread-Option Approximation	213
5.9	Two-Asset Barrier Options	215
5.10	Partial-Time Two-Asset Barrier Options	217
5.11	Margrabe Barrier Options	219
5.12	Discrete-Barrier Options	221
5.13	Two-Asset Cash-or-Nothing Options	221
5.14	Best or Worst Cash-or-Nothing Options	223
5.15	Options on the Minimum or Maximum of Two Averages	224
5.16	Currency-Translated Options	226
5.16.1	Foreign Equity Options Struck in Domestic Currency	226
5.16.2	Fixed Exchange Rate Foreign Equity Options	228
5.16.3	Equity Linked Foreign Exchange Options	230
5.16.4	Takeover Foreign Exchange Options	232
5.17	Greeks for Two-Asset Options	232
6	Black-Scholes-Merton Adjustments and Alternatives	233
6.1	The Black-Scholes-Merton Model with Delayed Settlement	234
6.2	The Black-Scholes-Merton Model Adjusted for Trading Day Volatility	235
6.3	Discrete Hedging	236
6.3.1	Hedging Error	236
6.3.2	Discrete-Time Option Valuation and Delta Hedging	237
6.3.3	Discrete-Time Hedging with Transaction Cost	238

6.4	Option Pricing in Trending Markets	240
6.5	Alternative Stochastic Processes	242
6.6	Constant Elasticity of Variance	242
6.7	Skewness-Kurtosis Models	244
6.7.1	Definition of Skewness and Kurtosis	244
6.7.2	The Skewness and Kurtosis for a Lognormal Distribution	245
6.7.3	Jarrow and Rudd Skewness and Kurtosis Model	246
6.7.4	The Corrado and Su Skewness and Kurtosis Model	247
6.7.5	Modified Corrado-Su Skewness-Kurtosis Model	250
6.7.6	Skewness-Kurtosis Put-Call Supersymmetry . . .	252
6.7.7	Skewness-Kurtosis Equivalent Black-Scholes-Merton Volatility	252
6.7.8	Gram Charlier Density	252
6.7.9	Skewness-Kurtosis Trees	253
6.8	Pascal Distribution and Option Pricing	253
6.9	Jump-Diffusion Models	253
6.9.1	The Merton Jump-Diffusion Model	253
6.9.2	Bates Generalized Jump-Diffusion Model	255
6.10	Stochastic Volatility Models	258
6.10.1	Hull-White Uncorrelated Stochastic Volatility Model	259
6.10.2	Hull-White Correlated Stochastic Volatility Model	261
6.10.3	The SABR Model	265
6.11	Variance and Volatility Swaps	271
6.11.1	Variance Swaps	271
6.11.2	Volatility Swaps	274
6.12	More Information	278
7	Trees and Finite Difference Methods	279
7.1	Binomial Option Pricing	279
7.1.1	Cox-Ross-Rubinstein American Binomial Tree . .	284
7.1.2	Greeks in CRR Binomial Tree	287
7.1.3	Rendleman Barter Binomial Tree	289
7.1.4	Leisen-Reimer Binomial Tree	290
7.1.5	Convertible Bonds in Binomial Trees	292
7.2	Binomial Model with Skewness and Kurtosis	297
7.3	Trinomial Trees	299
7.4	Exotic Options in Tree Models	303
7.4.1	Options on Options	303
7.4.2	Barrier Options Using Brownian Bridge Probabilities	305

7.4.3	American Barrier Options in CRR Binomial Tree	307
7.4.4	European Reset Options Binomial	308
7.4.5	American Asian Options in a Tree	314
7.5	Three-Dimensional Binomial Trees	315
7.6	Implied Tree Models	321
7.6.1	Implied Binomial Trees	321
7.6.2	Implied Trinomial Trees	327
7.7	Finite Difference Methods	334
7.7.1	Explicit Finite Difference	335
7.7.2	Implicit Finite Difference	338
7.7.3	Finite Difference in $\ln(S)$	340
7.7.4	The Crank-Nicolson Method	342
8	Monte Carlo Simulation	345
8.1	Standard Monte Carlo Simulation	345
8.1.1	Greeks in Monte Carlo	347
8.1.2	Monte Carlo for Callable Options	349
8.1.3	Two Assets	350
8.1.4	Three Assets	352
8.1.5	N Assets, Cholesky Decomposition	353
8.2	Monte Carlo of Mean Reversion	355
8.3	Generating Pseudo-Random Numbers	356
8.4	Variance Reduction Techniques	358
8.4.1	Antithetic Variance Reduction	358
8.4.2	IQ-MC/Importance Sampling	359
8.4.3	IQ-MC Two Correlated Assets	361
8.4.4	Quasi-Random Monte Carlo	362
8.5	American Option Monte Carlo	364
9	Options on Stocks That Pay Discrete Dividends	367
9.1	European Options on Stock with Discrete Cash Dividend	368
9.1.1	The Escrowed Dividend Model	368
9.1.2	Simple Volatility Adjustment	369
9.1.3	Haug-Haug Volatility Adjustment	369
9.1.4	Bos-Gairat-Shepeleva Volatility Adjustment	370
9.1.5	Bos-Vandermark	371
9.2	Non-Recombining Tree	372
9.3	Black's Method for Calls on Stocks with Known Dividends	375
9.4	The Roll, Geske, and Whaley Model	375
9.5	Benchmark Model for Discrete Cash Dividend	378
9.5.1	A Single Dividend	378
9.5.2	Multiple Dividends	382

9.5.3	Applications	382
9.6	Options on Stocks with Discrete Dividend Yield	390
9.6.1	European with Discrete Dividend Yield	390
9.6.2	Closed-Form American Call	390
9.6.3	Recombining Tree Model	393
10	Commodity and Energy Options	397
10.1	Energy Swaps/Forwards	397
10.2	Energy Options	400
10.2.1	Options on Forwards, Black-76F	400
10.2.2	Energy Swaptions	401
10.2.3	Hybrid Payoff Energy Swaptions	405
10.3	The Miltersen-Schwartz Model	406
10.4	Mean Reversion Model	410
10.5	Seasonality	411
11	Interest Rate Derivatives	413
11.1	FRAs and Money Market Instruments	413
11.1.1	FRAs From Cash Deposits	413
11.1.2	The Relationship between FRAs and Currency Forwards	414
11.1.3	Convexity Adjustment Money Market Futures	415
11.2	Simple Bond Mathematics	417
11.2.1	Dirty and Clean Bond Price	417
11.2.2	Current Yield	417
11.2.3	Modified Duration and BPV	417
11.2.4	Bond Price and Yield Relationship	418
11.2.5	Price and Yield Relationship for a Bond	418
11.2.6	From Bond Price to Yield	419
11.3	Pricing Interest Rate Options Using Black-76	419
11.3.1	Options on Money Market Futures	420
11.3.2	Price and Yield Volatility in Money Market Futures	421
11.3.3	Caps and Floors	421
11.3.4	Swaptions	422
11.3.5	Swaption Volatilities from Caps or FRA Volatilities	424
11.3.6	Swaptions with Stochastic Volatility	425
11.3.7	Convexity Adjustments	425
11.3.8	European Short-Term Bond Options	427
11.3.9	From Price to Yield Volatility in Bonds	428
11.3.10	The Schaefer and Schwartz Model	428
11.4	One-Factor Term Structure Models	429
11.4.1	The Rendleman and Bartter Model	429
11.4.2	The Vasicek Model	430

11.4.3	The Ho and Lee Model	432
11.4.4	The Hull and White Model	433
11.4.5	The Black-Derman-Toy Model	434
12	Volatility and Correlation	445
12.1	Historical Volatility	445
12.1.1	Historical Volatility from Close Prices	445
12.1.2	High-Low Volatility	447
12.1.3	High-Low-Close Volatility	448
12.1.4	Exponential Weighted Historical Volatility	449
12.1.5	From Annual Volatility to Daily Volatility	450
12.1.6	Confidence Intervals for the Volatility Estimate	451
12.1.7	Volatility Cones	452
12.2	Implied Volatility	453
12.2.1	The Newton-Raphson Method	453
12.2.2	The Bisection Method	455
12.2.3	Implied Volatility Approximations	456
12.2.4	Implied Forward Volatility	458
12.2.5	From Implied Volatility Surface to Local Volatility Surface	458
12.3	Confidence Interval for the Asset Price	459
12.4	Basket Volatility	460
12.5	Historical Correlation	460
12.5.1	Distribution of Historical Correlation Coefficient	461
12.6	Implied Correlations	462
12.6.1	Implied Correlation from Currency Options	462
12.6.2	Average Implied Index Correlation	462
12.7	Various Formulas	463
12.7.1	Probability of High or Low, the Arctangent Rule	463
12.7.2	Siegel's Paradox and Volatility Ratio Effect	464
13	Distributions	465
13.1	The Cumulative Normal Distribution Function	465
13.1.1	The Hart Algorithm	465
13.1.2	Polynomial Approximations	467
13.2	The Inverse Cumulative Normal Distribution Function	469
13.3	The Bivariate Normal Density Function	470
13.3.1	The Cumulative Bivariate Normal Distribution Function	470
13.4	The Trivariate Cumulative Normal Distribution Function	482

14	Some Useful Formulas	487
14.1	Interpolation	487
14.1.1	Linear Interpolation	487
14.1.2	Log-Linear Interpolation	487
14.1.3	Exponential Interpolation	487
14.1.4	Cubic Interpolation: Lagrange's Formula	488
14.1.5	Cubic-Spline Interpolation	488
14.1.6	Two-Dimensional Interpolation	490
14.2	Interest Rates	491
14.2.1	Future Value of Annuity	491
14.2.2	Net Present Value of Annuity	491
14.2.3	Continuous Compounding	491
14.2.4	Compounding Frequency	491
14.2.5	Zero-Coupon Rates from Par Bonds/Par Swaps	492
14.3	Risk-Reward Measures	493
14.3.1	Treynor's Measure	493
14.3.2	Sharpe Ratio	494
14.3.3	Confidence Ratio	494
14.3.4	Sortino Ratio	495
14.3.5	Burke Ratio	495
14.3.6	Return on VaR	495
14.3.7	Jensen's Measure	496
14.4	Appendix C: Basic Useful Information	496
	The Option Pricing Software	497
	Bibliography	499
	Index	521
