CONTENTS

Preface	xi
List of Acronyms	xv
Chapter 1 Introduction	1
Chapter 2 Properties of Heavy Feeds	5
2.1 Composition of heavy feeds	10
2.2 Metals in heavy feeds	17
2.3 Physical properties	20
Chapter 3 Properties of Catalysts for Hydroprocessing of Heavy Feeds	23
3.1 Chemical composition	23
3.2 Physical properties	27
3.2.1 Surface properties	28
3.2.2 Quantification of diffusion phenomena	32
3.3 Mechanical properties	38
3.4 Effect of shape and size of catalyst particles	39
Chapter 4 Selection of Reactors for Hydroprocessing Research	43
4.1 Batch reactors	43
4.2 Continuous reactors	44
4.2.1 Fixed bed reactors	44
4.2.2 Continuous stir tank reactors	46
Chapter 5 Development and Testing of Catalysts	49
5.1 Conventional catalysts	49
5.1.1 Effect of surface properties	50
5.1.2 Effect of particle size and shape	55
5.1.3 Design and testing of catalysts	58
5.1.3.1 VGOs and HGOs	59
5.1.3.2 Deasphalted oil	60
5.1.3.3 Atmospheric residues	62
5.1.3.4 Vacuum residues and heavy crudes	64

5.2	Modified conventional catalysts	71
5.2.1	Effect of alkali metals	71
5.2.2	Effect of phosphorus	72
5.2.3	Effect of borate	74
5.2.4	Effect of fluoride	75
5.2.5	Effect of support	76
5.2.5.1	VGOs and HGOs	77
5.2.5.1.1	Acidic supports	77
5.2.5.1.2	TiO ₂ -containing supports	80
5.2.5.2	Deasphalted oil	80
5.2.5.3	Atmospheric residues	81
5.2.5.3.1	Carbon supports	81
5.2.5.3.2	Acidic supports	82
5.2.5.3.3	Novel γ -Al ₂ O ₃ supports	82
5.2.5.4	Vacuum residues and heavy crudes	83
5.2.5.4.1	Carbon-containing supports	83
5.2.5.4.2	Novel γ -Al ₂ O ₃ supports	84
5.2.5.4.3	Mixed oxides supports	85
5.3	Novel catalysts	90
5.3.1	Metal carbides, nitrides and phosphides	90
5.3.2	Transition metals containing catalysts	91
5.3.3	Carbon catalysts	92
Chapter 6 Hydroprocessing Reactions		95
6.1	Kinetics of hydroprocessing reactions	95
6.1.1	VGOs and HGOs	99
6.1.1.1	Kinetics of thiophenic heterorings	99
6.1.1.2	Overall kinetics	101
6.1.1.3	Lumped kinetics	103
6.1.2	Atmospheric residues	106
6.1.2.1	Lumped kinetics	106
6.1.2.2	Overall kinetics	106
6.1.3	Vacuum residues and heavy crudes	112
6.1.3.1	Overall kinetics	113
6.1.3.2	Lumped kinetics	117
6.2	Mechanism of hydroprocessing reactions	119
6.2.1	Reactions during hydroprocessing of VGOs and HGOs	119
6.2.2	Conversion of resins	123
6.2.3	Conversion of asphaltenes	126
6.2.3.1	Thermal effects	126
6.2.3.2	Involvement of active hydrogen	127
6.2.3.3	Structural transformations	130
6.2.4	Hydrodemetallization	132
Chapter 7 Catalyst Deactivation		141
7.1	Deactivation due to structural change of catalyst	144
7.2	Deactivation by coke and nitrogen bases	145

7.2.1	VGO and HGO	145
7.2.2	Asphaltenes and metals containing feeds	148
7.3	Combined effect of coke and metals on deactivation	150
7.3.1	Deasphalted oils	153
7.3.2	Residues and heavy crudes	154
7.3.2.1	Effect of feed origin and catalyst surface	155
7.3.2.2	Effect of temperature and H ₂ pressure	162
7.4	Effect of mechanical properties of catalyst on activity loss	167
7.5	Kinetics of catalyst deactivation	168
7.5.1	Deactivation by coke	169
7.5.2	Simultaneous deactivation by coke and metals	170
7.6	Mechanism of catalyst deactivation	175
7.6.1	Mechanism of coke formation	175
7.6.1.1	Chemical aspects of coke formation	175
7.6.1.1.1	Involvement of free radicals and carbocations	176
7.6.1.1.2	Characterization of feeds and coke	178
7.6.1.2	Feed compatibility aspects	184
7.6.1.3	Microscopic phenomena	187
7.6.2	Mechanism of metal deposition	189
7.6.2.1	Deposition of inorganic solids	189
7.6.2.2	Deposits of organometallic origin	190
7.6.2.2.1	Vanadium-containing deposits	191
7.6.2.2.2	Nickel-containing deposits	193
7.6.2.2.3	Mixed deposits	194
7.7	Development of models for predicting catalyst deactivation	195
7.7.1	Modeling on catalyst activity level	196
7.7.2	Modeling on catalyst particle level	199
7.7.3	Modeling on reactor level	203
Chapter 8 Selection of catalysts for Commercial Hydroprocessing Reactors		217
8.1	Fixed bed reactors systems	219
8.2	Commercial processes employing fixed bed reactors	222
8.2.1	Mild hydrocracking process	222
8.2.2	Unibon process	223
8.2.3	HYVAHL Process	224
8.2.4	Atmospheric residue desulfurization (ARDS) process	225
8.3	Moving bed reactors	227
8.3.1	QCR reactor	228
8.3.2	Bunker reactor	228
8.4	Ebullated bed reactors	229
8.5	Slurry reactors using low-cost solids	232
8.6	Comparison of hydroprocessing reactors	234

Chapter 9	Patent Literature on Hydroprocessing Catalysts and Reactors	237
9.1	Catalyst development	237
9.1.1	Conventional catalysts	237
9.1.2	Conventional modified catalysts	240
9.1.2.1	Effect of additives	240
9.1.2.2	Effect of supports	241
9.1.3	Novel supports and catalysts	242
9.2	Configurations of catalytic reactors and systems	243
9.2.1	Guard chambers and materials	243
9.2.2	Mixed layer and multiple bed systems	244
9.2.3	Countercurrent systems	246
9.2.4	Multistage systems	247
Chapter 10	Spent Hydroprocessing Catalysts	251
10.1	Regeneration	251
10.1.1	Oxidative regeneration	252
10.1.2	Reductive regeneration	257
10.1.3	Regeneration by attrition/abrasion	258
10.2	Rejuvenation	259
10.2.1	Organic agents	260
10.2.2	Inorganic agents	262
10.2.3	Supercritical extraction	263
10.3	Metal reclamation	263
10.3.1	Leaching of metals	264
10.3.2	Roasting treatments	266
10.3.3	Chlorination	267
10.3.4	Other methods	267
10.3.5	Separation of metals from solution	268
10.4	Other potential uses of spent hydroprocessing catalysts	270
10.5	Disposal and storage	271
Chapter 11	Hydroprocessing of VGO and DAO for Production of Lubricants	273
11.1	Catalytic dewaxing	275
11.2	Hydrogenation of VGO/DAO for lube base oil	279
11.3	Design of dewaxing catalysts	280
11.4	Catalysts and catalytic systems in patent literature	281
11.4.1	Catalysts for controlling cold flow properties and VI	282
11.4.1.1	Zeolite-containing catalysts	282
11.4.1.2	Non-zeolitic catalysts	285
11.4.2	Process configurations	286
11.4.2.1	Combinations of extraction and catalytic processes	286
11.4.2.2	Catalytic processes	287
11.5	Spent catalysts from dewaxing	289

Chapter 12	Non-Conventional Catalytic Upgrading of Heavy Feeds	291
12.1	Down-hole upgrading	291
12.2	Processes using dissolved/dispersed catalysts	293
12.2.1	Soluble catalysts	295
12.2.1.1	Oil soluble precursors	295
12.2.1.2	Water soluble precursors	297
12.2.2	Finely dispersed catalysts	297
12.2.3	Recovery of dispersed/dissolved catalysts	300
12.3	Bio-catalytic upgrading of heavy feeds	300
Chapter 13	Residues Upgrading by Catalytic Cracking	305
13.1	Catalytic cracking processes	306
13.1.1	FCC/RFCC process	306
13.1.1.1	Effect of delta-coke	309
13.1.1.2	Effect of feed properties	310
13.1.1.2.1	Classification of feeds for RFCC	311
13.1.1.2.2	Pretreatment of feeds for RFCC	312
13.1.2	Asphalt residue treatment (ART) process	314
13.2	FCC/RFCC catalysts	315
13.2.1	Structure of catalysts	315
13.2.2	Selection of catalysts for RFCC	319
13.2.3	Deactivation/regeneration of RFCC catalysts	320
13.2.3.1	Effect of coke	321
13.2.3.2	Effect of metals	322
13.3	Emissions from RFCC process	324
13.3.1	Gaseous emissions	324
13.3.1.1	CO emissions	324
13.3.1.2	SO _x emissions	324
13.3.1.3	NO _x emissions	326
13.3.2	Solid emissions	328
13.3.2.1	Properties	328
13.3.2.2	Disposal and utilization	329
13.4	Patent literature	329
13.4.1	Metal passivation	330
13.4.2	Sulfur removal during FCC	331
13.4.3	Catalysts for CO and NO _x emission control	332
Chapter 14	Carbon-Rejecting Processes	335
14.1	Thermal processes	335
14.1.1	Visbreaking and hydrovisbreaking	337
14.1.2	Coking	337
14.1.2.1	Delayed coking process	339
14.1.2.2	Fluid-flexi-coking process	339
14.1.2.3	EUREKA process	340
14.2	Carbon rejection by deasphalting	340

Chapter 15	Uncommon Methods for Upgrading Heavy Feeds	345
Chapter 16	Conclusions and Future Perspectives	347
