

For more than forty years, *A History of Mathematics* has been the reference of choice for those looking to learn about the fascinating history of humankind's relationship with numbers, shapes, and patterns. This revised edition features up-to-date coverage of topics such as Fermat's Last Theorem and the Poincaré conjecture, in addition to recent advances in areas such as finite group theory and computer-aided proofs.

Whether you're interested in the age of Plato and Aristotle or Poincaré and Hilbert, whether you want to know more about the Pythagorean theorem or the golden mean, *A History of Mathematics* is an essential reference that will help you explore the incredible history of mathematics and the men and women who created it.

UTA C. MERZBACH is Curator Emeritus of Mathematics at the Smithsonian Institution and Director of the LHM Institute.

The late **CARL B. BOYER** was a professor of mathematics at Brooklyn College and the author of several classic works on the history of mathematics.
