

ACS SYMPOSIUM SERIES 1024

Controlled/Living Radical Polymerization: Progress in RAFT, DT, NMP & OMRP

Krzysztof Matyjaszewski, Editor
Carnegie Mellon University

Sponsored by the
ACS Division of Polymer Chemistry, Inc.
ACS Petroleum Research Foundation
Arkena, Bayer, Boston Scientific, Ciba, CIP, Dionex, DSM,
Elsevier, Evonik, General Electric, JSR, Lion,
Mitsui Chemicals, National Starch, PPG and Sumitomo

American Chemical Society, Washington DC

Contents

Preface.....	xi
--------------	----

Kinetics & Mechanism of RAFT, DT, NMP and OMRP

1. New Features of the Mechanism of RAFT Polymerization	3
Graeme Moad, Y.K. Chong, Roger Mulder, Ezio Rizzardo, San H. Thang	
2. Influence of Molecular Weight Distribution (MWD) on k_t and the Onset of the Gel Effect using the RAFT-CLD-T Method.....	19
Michael J. Monteiro and Geoffrey Johnston-Hall	
3. RAFT Polymerization of Vinyl Acetate, Styrene and Acrylates Using <i>N,N</i> -Dithiocarbamates	37
Devon A. Shipp Vidyasagar Malepu, Christy D. Petruczok, TuTrinh Tran, Tianxi Zhang, Mahesh Thopasridharan	
4. Thiourea-Mediated Stereospecific Radical Polymerization of Acrylamides and Combination with RAFT for Simultaneous Control of Molecular Weight and Tacticity	49
Masami Kamigaito, Harumi Murayama, Kotaro Satoh	
5. Controlled Radical Polymerization of Butyl Acrylate and Methyl Methacrylate by Reverse Iodine Transfer Polymerization (RITP) in Miniemulsion: Use of Hydrogen Peroxide as Oxidant.....	65
Patrick Lacroix-Desmazes and Jeff Tonnar	
6. Current Methods for <i>N</i> -Alkoxyamine Synthesis	81
Robert B. Grubbs and Anna C. Greene	
7. New Nitroxide Mediators for Controlled Synthesis of Polystyrene, Poly(meth)acrylates and Their Copolymers	95
Dmitry F. Grishin, Elena V. Kolyakina, Marina V. Pavlovskaya, Mikhail A. Lazarev, Alexander A. Shchepalov	
8. Formation, Dissociation, and Radical Exchange of Organo-Cobalt Complexes in Mediating Living Radical Polymerization	115
Bradford B. Wayland, Chi-How Peng, Shan Li	

9. **Key Role of Metal-Coordination in Cobalt-Mediated Radical Polymerization of Vinyl Acetate** 131
Antoine Debuigne, Rinaldo Poli, Robert Jérôme, Christine Jérôme, Christophe Detrembleur
10. **Cp2TiCl-Catalyzed Controlled Radical Polymerization of Isoprene Initiated by Epoxide Radical Ring Opening** 149
Alexandru D. Asandei, Christopher P. Simpson, Hyun S. Yu, Olumide I. Adebolu, Gobinda Saha and Yanhui Chen

Macromolecular Architecture by RAFT, DT and NMP

11. **Reversible Addition Fragmentation Chain Transfer (RAFT) Mediated Polymerization of N-Vinylpyrrolidone: RAFT agent design**..... 167
Bert Klumperman and Gwenaëlle Pound-Lana
12. **Gelation Kinetics of RAFT Radical Copolymerization of Methacrylate and Dimethacrylate**..... 181
Shiping Zhu, Qiang Yu, Qian Gan, Hongwen Zhang
13. **Amphiphilic Block Copolymers Synthesized via RAFT: Stimulus-Induced Nanoscale Assembly and Cross-linking in Aqueous Media**..... 195
Charles L. McCormick, Matthew G. Kellum, Adam E. Smith, Xuewei Xu
14. **Mechanism of Z-RAFT Star Polymerization**..... 217
P. Vana, D. Boschmann, M. Mänz, M. G. Fröhlich, G. Zifferer
15. **Iodine Transfer Radical Polymerizations of Vinylidene Fluoride in Supercritical Carbon Dioxide and Polymer Functionalization via Click Chemistry** 233
Sabine Beuermann, Muhammad Imran-ul-haq, Nadja Förster, Radovan Vukicevic, Kristin Herrmann, Rebekka Siegmann
16. **SG1 and BLOCBUILDER® technology: a versatile toolbox for the elaboration of complex macromolecular architectures** 245
Denis Bertin, Didier Gigmes, Jérôme Vinas, Nelly Chagneux, Catherine Lefay, Trang N. T. Phan, Thomas Trimaille, Pierre-Emmanuel Dufils, Yohann Guillauneuf, Géraldine Carrot, François Boué

Materials Prepared by RAFT and NMP

17. **Bioconjugates of polymers and sequence-defined peptides by reversible addition fragmentation chain transfer radical polymerization**..... 265
Hans Boerner

18. **RAFT Polymerization, a Versatile Tool for the Production of Functional Soft Nanoparticles..... 279**
Sébastien Perrier, Varangkana Jitchum, Hamilton Kakwere, Vincent Ladmira
19. **Kinetics and Colloidal Stability of Raft/Miniemulsion Polymerization of MMA Using Comblike Polymeric Surfactants..... 293**
Peihong Ni, Xiulin Zhu, and Xiaodong Zhou
20. **Nitroxide-Mediated Controlled Free-Radical Copolymerization of Poly(ethylene glycol) Methyl Ether Methacrylate and Methacrylic Acid. Toward New Water-Soluble Macroinitiators 303**
Julien Nicolas, Charlotte Dire, Ségolène Brusseau, Bernadette Charleux, Stéphanie Magnet, Laurence Couvreur
21. **Synthesis and Reaction of Well-defined Copolymers with Thermally Exchangeable Dynamic Covalent Bonds in the Side Chains..... 319**
Hideyuki Otsuka, Yoshifumi Amamoto, Yasuhiro Matsuda, Takeshi Maeda, and Atsushi Takahara
22. **Borane-mediated radical polymerization; Preparation of Fluoropolymers for High Energy Density Capacitors 331**
T. C. Mike Chung and Zhi-Cheng Zhang

Industrial aspects of RAFT and NMP

23. **MADIX Technology: from Innovative Concepts to Industrialization of Block Copolymers for Emulsion Stabilization..... 347**
Mathias Destarac, Sophie Deroo, Hélène Lannibois-Dréan, Alain Sénéchal, Wojciech Bzducha
24. **Controlled Architecture Polymers at Arkema: Synthesis, Morphology and Properties of All-Acrylic Block Copolymers..... 361**
Pierre Gerard, Laurence Couvreur1, Stephanie Magnet, Jason Ness and Scott Schmidt
