## Contents

Preface to the	he Fift	th Edition	xxi
List of Sym	bols		xxiii
Chapter 1	Intro	oduction to Radiative Transfer	1
	1.1	Importance of Thermal Radiation in Engineering	3
	1.2	Thermal Energy Transfer	
	1.3	Thermal Radiative Transfer.	+ 6
	1.4	Radiative Energy Exchange and Radiative Intensity	8
		1.4.1 Solid Angle	9
		1.4.2 Spectral Radiative Intensity	
	1.5	Characteristics of Emission	
		1.5.1 Perfect Emitter	
		1.5.2 Radiation Isotropy in a Black Enclosure	13
		1.5.3 Perfect Emitter in Each Direction and Wavelength	13
		1.5.4 Total Radiation into Vacuum Is a Function Only	
		of Temperature	14
		1.5.5 Blackbody Intensity and Its Directional Independence	14
		1.5.6 Blackbody Emissive Power: Cosine-Law Dependence	16
		1.5.7 Hemispherical Spectral Emissive Power of a Blackbody	16
		1.5.8 Planck's Law: Spectral Distribution of Emissive Power	17
		1.5.9 Approximations for Blackbody Spectral Distribution	20
		1.5.9.1 Wien's Formula	20
		1.5.9.2 Rayleigh-Jeans Formula	
		1.5.10 Wien's Displacement Law	
		1.5.11 Total Blackbody Intensity and Emissive Power	23
		1.5.12 Blackbody Radiation within a Spectral Band	
	16	1.5.13 Summary of Blackbody Properties	
	1.0	Radiative Energy Loss and Gain along a Line-of-Sight	
		1.6.1 Radiative Ellergy Loss due to Adsorption and Scattering	
		1.6.2 Internation Distance	
		1.6.4 Padiative Energy Coin due to Emission	
		1.6.5 Redistive Energy Coin due to In Scottering	
	17	Radiative Transfer Equation	
	1.7	Radiative Transfer in Nonparticipating Enclosures	
	1.9	Concluding Remarks and Historical Notes	
	Hom	nework	42
Chanton 2	Dafi	nitions of Properties at Interfaces	17
Chapter 2	Dem	indons of Properties at filterraces	
	2.1	Introduction	
		2.1.1 Nomenclature for Properties	
		2.1.2 Notation	
	2.2	Emissivity	50
		2.2.1 Directional Spectral Emissivity $\epsilon_{\lambda}(\theta, \phi, T)$	51

		2.2.2	Directio	nal Total Emissivity $\epsilon(\theta, \phi, T)$	53
		2.2.3	Hemisp	herical Spectral Emissivity $\epsilon_{\lambda}(T)$	54
		2.2.4	Hemisp	herical Total Emissivity $\epsilon(T)$	55
	2.3	Absor	otivity		59
		2.3.1	Directio	nal Spectral Absorptivity $\alpha_{\lambda}(\theta_i, \phi_i, T)$	59
		2.3.2	Kirchhc	ff's Law	60
		2.3.3	Directio	nal Total Absorptivity $\alpha(\theta_i, \phi_i, T)$	61
		2.3.4	Kirchhc	ff's Law for Directional Total Properties	61
		2.3.5	Hemisp	herical Spectral Absorptivity $\alpha_{\lambda}(T)$	62
		2.3.6	Hemisp	herical Total Absorptivity $\alpha(T)$	63
		2.3.7	Diffuse	Gray Surface	65
	2.4	Reflect	tivity		66
		2.4.1	Spectral	Reflectivities	66
			2.4.1.1	Bidirectional Spectral Reflectivity $\rho(\theta_r, \phi_r, \theta_i, \phi_i)$	66
			2.4.1.2	Reciprocity for Bidirectional Spectral Reflectivity	66
			2.4.1.3	Directional Spectral Refelctivities	68
			2.4.1.4	Reciprocity for Directional Spectral Reflectivity	68
			2.4.1.5	Hemispherical Spectral Reflectivity $\rho_{\lambda}$	69
			2.4.1.6	Limiting Cases for Spectral Surfaces	69
		2.4.2	Total Re	eflectivities	71
			2.4.2.1	Bidirectional Total Reflectivity $\rho(\theta_r, \phi_r, \theta_i, \phi_i)$	71
			2.4.2.2	Reciprocity for Bidirectional Total Reflectivity	71
			2.4.2.3	Directional Total Reflectivity $\rho(\theta_i, \phi_i)$ or $\theta_r, \phi_r$ )	71
			2.4.2.4	Reciprocity for Directional Total Reflectivity	72
			2.4.2.5	Hemispherical Total Reflectivity, p	72
		2.4.3	Summar	ry of Restrictions on Reflectivity Reciprocity Relations	72
	2.5	Transn	nissivity a	an Interface	72
		2.5.1	Spectral	Transmissivities	73
			2.5.1.1	Bidirectional Spectral Transmissivity $\tau_{\lambda}(\theta_{i}, \phi_{i}, \theta_{i}, \phi_{i}, T)$	73
			2.5.1.2	Directional Spectral Transmissivities $\tau_{\lambda}(\theta_i, \phi_i)$	73
			2.5.1.3	Hemispherical Spectral Transmissivity $\tau_{\lambda}$	74
		2.5.2	Total Tr	ansmissivities	74
			2.5.2.1	Bidirectional Total Transmissivity $\tau_1(\theta_i, \phi_i, \theta_i, \phi_i)$	75
			2.5.2.2	Directional Total Transmissivities $\tau(\theta_i, \phi_i)$	75
			2.5.2.3	Hemispherical-Directional Total Transmissivity	
				$\tau(\theta_n, \phi_n)$	75
			2.5.2.4	Hemispherical Total Transmissivity $\tau$	76
	2.6	Relatio	ons among	Reflectivity, Absorptivity, Emissivity,	
		and Tr	ansmissivi	ity	76
	Hom	ework	•••••		80
Chanter 3	Padi	ative Pro	nartias of	Opeque Materiale	97
Chapter 5	Raui		per nes or	Opaque Materials	
	3.1	Introdu	action		87
	3.2	Electro	omagnetic	Wave Theory Predictions	87
		3.2.1	Dielectr	ic Materials	88
			3.2.1.1	Reflection and Refraction at the Interface between	
				Two Perfect Dielectrics $(k \rightarrow 0)$	88
			3.2.1.2	Reflectivity	90
			3.2.1.3	Emissivity	91
		3.2.2	Radiativ	e Properties of Metals	94

			3.2.2.1	Electromagnetic Relations for Incidence on an	0.4
			2222	Absorbing Medium	94
			3.2.2.2	Reflectivity and Emissivity Relations for Metals (Large k)	95
			3.2.2.3	Relations between Radiative Emission and Electrical	
				Properties	. 100
	3.3	Extens	ions of the	Theory for Radiative Properties	. 105
	3.4	Measu	red Proper	ties of Real Dielectric Materials	. 106
		3.4.1	Variatio	n of Total Properties with Surface Temperature	. 110
			3.4.1.1	Effect of Surface Roughness	. 112
		3.4.2	Properti	es of Semiconductors and Superconductors	. 116
	3.5	Measu	red Proper	ties of Metals	. 117
		3.5.1	Directio	nal and Spectral Variations	. 117
		3.5.2	Effect of	f Surface Temperature	. 118
		3.5.3	Effect of	f Surface Roughness	120
		3.5.4	Effect of	f Surface Impurities	125
		3.5.5	Molten I	Metals	.129
	3.6	Selecti	ve and Di	ectional Opaque Surfaces	131
		3.6.1	Characte	eristics of Solar Radiation	. 131
			3.6.1.1	Solar Constant	131
			3.6.1.2	Solar Radiating Temperature	. 131
		3.6.2	Modific	ation of Surface Spectral Characteristics	. 131
		3.6.3	Modific	ation of Surface Directional Characteristics	.137
	3.7	Conclu	ding Rem	arks	. 139
	Hom	ework			. 139
Chanter 4

	1	7.6.3.2 Relations for Radiative Flux	853
	1	7.6.3.3 Equation for the Source Function	854
	1	7.6.3.4 Solution Procedure and Typical Results	854
17.7	Light Pipe	es and Fiber Optics	857
Home	ework		859
Appendix A: Con	version Fa	ctors, Radiation Constants, and Blackbody Functions	867
Appendix B: Rad	iative Prop	erties	873
Appendix C: Catalog of Selected Configuration Factors			881
Appendix D: Exp	onential I	ntegral Relations and Two-Dimensional	
<b>Radiation Functi</b>	ons	_	889
Appendix E: List	of Referen	ces	895
Index			951
