Contents

Preface ix

Acknowledgments xi

1. An Introduction to the Evolution of Prehuman and Human Communication and Linguistics 1

2. Material and Methods 9

   2.1. A short methodological history of the project 9

   2.2. Phonetic premises 10

   2.3. Methods applied for the semantic fields in this work 11

   2.4. Linguistic scope 13

   2.5. Arrangement of results and premises used 14

3. Language Phyla of the World 19

4. Overview of Language Phyla 21

   4.1. The African languages 21

   4.2. Boreo-Indo-Pacific macrophylum (could also be termed Non-African macrophylum) 27

   4.3. Eurasiatic-Amerindian superphylum 27

   4.4. Austro-Dené superphylum 30

   4.5. Palaeo-Sundic 39

   4.6. Sahaulic languages 42

5. Results of the Present Study for Different Semantic Fields and Potential Psychological Background. 45
5.1. Semantic fields for the consonant pair *b* and *p*. 45
5.2. Semantic fields for the consonant pair *d* and *t* 52
5.3. Semantic fields for the velar stop *k* and the uvular stop *q*. . 60
5.4. Semantic fields for the lateral approximant *l*. 104
5.5. Semantic fields for the alveolar nasal *n*. 124
5.6. Semantic fields for the bilabial nasal *m*. 129
5.7. Semantic fields for the rhotic, often alveolar thrill *r* 144
5.8. Semantic fields for the sibilant *s*. 148
5.9. Semantic fields starting with *u*, *v*, or *w*. 158
5.10. Semantic fields with diphthongs as potential main information bearing phonetic structure 167
6. Conclusions 171
Glossary 173
Appendix. 175
Epilogue: Autobiographical Background of This Work 195
Bibliography 203
Index. 215
