<b>1</b>	<b>Asymmetric Catalysis of Diels–Alder Reaction</b>	<b>1</b>
	<i>Haijeng Du and Kuiling Ding</i>	
1.1	Introduction	1
1.2	Asymmetric Diels–Alder Reaction	2
1.2.1	Lewis Acid Catalyzed Asymmetric Diels–Alder Reaction	2
1.2.1.1	Chiral Boron, Aluminum, and Indium Complexes	2
1.2.1.2	Chiral Copper, Magnesium, and Zinc Complexes	7
1.2.1.3	Chiral Transition Metal Complexes	10
1.2.1.4	Chiral Rare Earth Metal Complexes	12
1.2.2	Organocatalysis of Asymmetric Diels–Alder Reaction	14
1.2.2.1	Chiral Secondary Amine Catalyzed Asymmetric Diels–Alder Reaction	14
1.2.2.2	Chiral Primary Amine Catalyzed Asymmetric Diels–Alder Reaction	16
1.2.2.3	Brønsted Acid Catalyzed Asymmetric Diels–Alder Reaction	17
1.2.2.4	Bifunctional Organocatalysis of Asymmetric Diels–Alder Reaction via Hydrogen Bonding	19
1.3	Asymmetric Oxa-Diels–Alder Reaction	21
1.3.1	Lewis Acid Catalyzed Asymmetric Oxa-Diels–Alder Reaction	21
1.3.1.1	Chiral Aluminum, Boron, and Indium Complexes	21
1.3.1.2	Chiral Titanium and Zirconium Complexes	23
1.3.1.3	Chiral Chromium Complexes	26
1.3.1.4	Chiral Copper and Zinc Complexes	28
1.3.1.5	Chiral Rhodium, Palladium, and Platinum Complexes	33
1.3.1.6	Chiral Rare Earth Metal Complexes	36
1.3.2	Organocatalysis of Asymmetric Oxa-Diels–Alder Reaction	37
1.3.2.1	Hydrogen Bonding Promoted Asymmetric Oxa-Diels–Alder Reaction	37

1.3.2.2	Chiral Secondary Amine Catalyzed Asymmetric Oxa-Diels–Alder Reaction	39
1.4	Representative Applications in Total Synthesis	41
1.5	Conclusion	46
1.6	Experimental: Selected Procedures	46
1.6.1	Procedure for the Preparation of Chiral Boron Complex 8b (R = o-tol, Ar = Ph) and Its Application in Asymmetric Diels–Alder Reactions	46
1.6.2	Procedure for Chiral Secondary Amine 42 Catalyzed Asymmetric Diels–Alder Reaction of Cyclopentadiene with (E)-Cinnamaldehyde	47
1.6.3	Procedure for 65/Ti/70 Catalyzed Asymmetric Hetero Diels–Alder Reaction of Benzaldehyde with Danishefsky's Diene	47
1.6.4	Procedure for the Preparation of the Chiral Chromium Complex (1S, 2R)-76a and Its Application in the Asymmetric Hetero Diels–Alder Reaction of Ethyl Vinyl Ether with Crotonaldehyde	47
1.6.5	Procedure for Chiral Copper Complex 82a Catalyzed Reaction of Asymmetric Hetero Ethyl Pyruvate with Danishefsky's Diene	48
1.6.6	Procedure for the Preparation of Chiral Dirhodium Carboxamidate Complex 95 and Its Application in the Asymmetric Hetero Diels–Alder Reaction of Phenylpropargyl Aldehyde with Danishefsky's Diene	48
1.6.7	Procedure for TADDOL 52 Promoted Asymmetric Hetero Diels–Alder reaction of Benzaldehyde with 1-(N,N-Dimethylamino)-3-tert-butyltrimethylsiloxy-1,3-Diene via Hydrogen Bonding Activation	49
1.6.8	Procedure for Chiral Amine 109 Promoted Inverse Electron Demand Hetero Diels–Alder Reaction of Butylaldehyde and Enone	49
	References	51
<b>2</b>	<b>Catalytic Asymmetric Aza Diels–Alder Reactions</b>	<b>59</b>
	<i>Yasuhiro Yamashita and Shū Kobayashi</i>	
2.1	Introduction	59
2.2	Chiral Lewis Acid Catalysis	59
2.3	Chiral Organocatalysis	76
2.4	Conclusion	82
2.5	Experimental: Selected Procedures	83
2.5.1	Typical Experimental Procedure for Asymmetric aza Diels–Alder Reactions Using A Chiral Zr Complex	83
2.5.2	Typical Experimental Procedure for Asymmetric Aza Diels–Alder Reactions Using a Chiral Ag Complex	83
	References	84
<b>3</b>	<b>1,3-Dipolar Cycloaddition</b>	<b>87</b>
	<i>Takuya Hashimoto and Keiji Maruoka</i>	
3.1	Introduction	87
3.2	Nitrones	88

- 3.2.1 Beginning of Lewis Acid Catalyzed 1,3-DC of Nitrones 89
- 3.2.2 Chiral Lewis Acid Catalyzed 1,3-DC of Nitrones and  $\alpha,\beta$ -Unsaturated Carbonyl Compounds Bearing Ancillary Coordinating Group 91
- 3.2.3 Asymmetric 1,3-DC of Nitrones and  $\alpha,\beta$ -Unsaturated Aldehydes 95
  - 3.2.3.1 Organocatalysis 95
  - 3.2.3.2 Lewis Acid Catalysis 96
- 3.2.4 Asymmetric 1,3-DC of Nitrones and Other Electron-Deficient Olefins 101
- 3.2.5 Inverse Electron Demand 1,3-DC of Nitrones 103
- 3.2.6 Kinugasa Reaction 105
- 3.3 Azomethine Ylides 107
  - 3.3.1 Early Examples of Asymmetric 1,3-DC of *N*-Metalated Azomethine Ylides Derived from Aldimines of  $\alpha$ -Amino Acid Esters 108
  - 3.3.2 Development of Asymmetric 1,3-DC of *N*-Metalated Azomethine Ylides with  $\alpha,\beta$ -Unsaturated Carbonyl Compounds 109
  - 3.3.3 Asymmetric 1,3-DC of *N*-Metalated Azomethine Ylides with Vinyl Sulfones and Nitroalkenes 117
  - 3.3.4 Organocatalytic Asymmetric 1,3-DC of Azomethine Ylides 119
  - 3.3.5 Transition Metal Catalyzed 1,3-DC of Münchnones 121
  - 3.3.6 Lewis Acid Catalyzed 1,3-DC of Azomethine Ylide Derived from the Imidate of 2-Aminomalonate 123
  - 3.3.7 Lewis Acid Promoted Generation of Electrophilic Azomethine Ylides via C–C Bond Cleavage of Aziridines 123
  - 3.3.8 Generation and 1,3-DC of Metal-Containing Azomethine Ylide via Electrophilic Activation of Alkynes 124
- 3.4 Azomethine Imines 126
  - 3.4.1 Asymmetric 1,3-DC of Azomethine Imines: Use of 3-Oxopyrazolidin-1-ium-2-ides as a 1,3-Dipole 127
  - 3.4.2 Asymmetric [3 + 2] Cycloaddition of *N*-Acylhydrazones with Olefins 130
- 3.5 Carbonyl Ylides 134
  - 3.5.1 Dirhodium(II)-Catalyzed Asymmetric Tandem Carbonyl Ylide Formation-1,3-DC 134
  - 3.5.2 Three-Component Tandem Carbonyl Ylide Formation-1,3-DC 139
  - 3.5.3 Chiral Lewis Acid Catalyzed 1,3-DC of Carbonyl Ylides Generated by Dirhodium(II) Co-Catalyst 140
  - 3.5.4 1,3-DC of Metal-Containing Carbonyl Ylides Generated via Electrophilic Activation of Alkynes 143
- 3.6 Nitrile Oxides and Nitrile Imines 147
  - 3.6.1 Magnesium(II)-Associated Hydroxy-Directed 1,3-DC of Nitrile Oxides 148
  - 3.6.2 Catalytic Asymmetric 1,3-DC of Nitrile Oxides 152
  - 3.6.3 1,3-DC of Nitrile Imines 153
- 3.7 Diazo Compounds 154

- 3.7.1 Lewis Acid Catalyzed Asymmetric 1,3-DC of Diazo Compounds with  $\alpha,\beta$ -Unsaturated Carbonyl Compounds 155
- 3.7.2 Lewis acid Catalyzed 1,3-DC of Diazo Compounds with Alkynes 157
- 3.8 Conclusions 158
- 3.9 Experimental: Selected Experimental 159
- 3.9.1 Preparation of *N*-Benzylidenebenzylamine *N*-oxide 159
- 3.9.2 General Procedure for the Preparation of the Aldimine of *N*-Arylidene Amino Acid Ester 159
- 3.9.3 Preparation of 1-Benzylidene-3-oxopyrazolidin-1-ium-2-ide 160
- 3.9.4 Preparation of *tert*-Butyl Diazoacetate 160
- References 160
  
- 4 Intramolecular 1,2-Addition and 1,4-Addition Reactions 169**  
*Xiyun Lu and Xiuling Han*
- 4.1 Introduction 169
- 4.2 Cyclization via Intramolecular 1,2-Addition Reactions 169
  - 4.2.1 1,2-Addition of Carbonyl Compounds 169
    - 4.2.1.1 1,2-Addition of Dicarboxyl Compounds (Aldol Reaction) 169
      - 4.2.1.2 Vinylogous Aldol Reaction 173
      - 4.2.1.3 1,2-Addition of Alkene-, Alkyne- or Arene-Substituted Carbonyl Compounds 177
    - 4.2.2 1,2-Addition of Imines 181
      - 4.2.2.1 1,2-Addition of Alkene or Alkyne Substituted Imino Compounds (Imino Ene Reactions) 182
      - 4.2.2.2 Nucleophilic Addition to Imino Groups 186
    - 4.2.3 1,2-Addition of Nitriles 191
      - 4.2.3.1 Acid-Catalyzed Reactions 191
      - 4.2.3.2 Base-Catalyzed Reactions 192
      - 4.2.3.3 Nucleophilic Addition to Nitriles 194
      - 4.2.3.4 Cycloaddition Mediated by a Stoichiometric Amount of Transition Metals 197
  - 4.3 Cyclization via Intramolecular 1,4-Addition Reactions 199
    - 4.3.1 General 199
    - 4.3.2 1,4-Addition of Carbanions (Michael Addition) 200
      - 4.3.2.1 1,4-Additions Mediated by Bases 200
      - 4.3.2.2 1,4-Additions Mediated by Lewis Acids 203
      - 4.3.2.3 Catalyzed 1,4-Addition Reactions 205
    - 4.3.3 1,4-Addition of Heteronucleophiles 210
    - 4.3.4 Other Acceptors for 1,4-Addition Reactions 214
    - 4.3.5 Catalytic Asymmetric Intramolecular Cyclization via 1,4-Addition 216
  - 4.4 Conclusion and Perspectives 217
  - 4.5 Experimental: Selected Procedures 217
    - 4.5.1 1,2-Addition of Alkyne Substituted Carbonyl Compounds 217
      - 4.5.1.1 General Procedure for Cyclization of 5-Yn-1-ones 217

- 4.5.2 1,2-Addition of Arene Substituted Carbonyl Compounds 218
- 4.5.2.1 Representative Procedure for Asymmetric Cyclization of *o*-(Acylmethoxy)-arylboronic Acid to Furnish the Optically Active Cycloalkanols 218
- 4.5.3 Nucleophilic Addition to Imino Groups 218
- 4.5.3.1 Typical Procedure for the Palladium-Catalyzed Indole Synthesis 218
- 4.5.4 1,2-Addition of Nitriles 218
- 4.5.4.1 Procedure for the 1.2-Addition of Nitrile 218
- 4.5.5 1,2-Addition of Nitriles 219
- 4.5.5.1 Synthesis of Enantiomerically Enriched Atropoisomers of 2-Arylpyridines 219
- 4.5.6 Catalyzed 1,4-Addition Reactions 219
- 4.5.6.1 Typical Procedure for the Phosphine-Catalyzed Tandem Nucleophilic Additions 219
- 4.5.7 Catalytic Asymmetric Intramolecular Cyclization via 1,4- Addition 219
- 4.5.7.1 General Procedure for Asymmetric 1,4-Addition 219
- References 220
  
- 5 Cyclic Carbometallation of Alkenes, Arenes, Alkynes and Allenes 227**  
*Ron Grigg and Martyn Inman*
- 5.1 Introduction 227
- 5.2 Carbometallation of Alkenes 228
- 5.2.1 Stoichiometric Intramolecular Carbometallation of Alkenes 228
- 5.2.2 Intramolecular Heck Reactions 230
- 5.2.3 Intramolecular Catalytic Alkene Carbometallation: Other Termination Steps 233
- 5.3 Alkyne Carbometallation 238
- 5.3.1 Stoichiometric Methods 238
- 5.3.2 Catalytic Alkyne Carbometallations 239
- 5.4 Carbometallations of Arenes 243
- 5.5 Carbometallations of Allenes 243
- 5.6 Multiple Cyclization Reactions 245
- 5.6.1 Stoichiometric Polycyclization Methods 247
- 5.6.2 Fused- and Bridged-Ring Forming Catalytic Cyclizations 247
- 5.6.3 Spiro-Mode Polycyclizations 249
- 5.6.4 Transannular or "Zipper" Mode Polycyclizations 250
- 5.6.5 Circular or "Dumbbell" Polycyclizations 251
- 5.6.5.1 2 + 2 + 2 Cyclization Reactions 251
- 5.6.5.2 Cyclopropanations 255
- 5.7 Acylpalladations 257
- 5.8 Conclusion 261
- 5.9 Experimental: Selected Procedures 262
- 5.9.1 Synthesis of 11 262
- 5.9.2 Synthesis of 41 262
- 5.9.3 Synthesis of 185 262

5.9.4	Synthesis of 207	263

WILEY-VCH Verlag GmbH & Co. KGaA

## Contents

Contents to Volume 1 XIX

List of Contributors to Volume 2 XXI

- 13 **Transition-Metal-Catalyzed Cycloisomerizations and Nucleophilic Cyclization of Enynes** 625  
*Elena Herrero-Gómez and Antonio M. Echavarren*
- 13.1 Introduction 625
- 13.2 Cycloisomerizations of 1,*n*-Enynes 626
- 13.2.1 Metal-Catalyzed Alder-Ene Cycloisomerization and Related Processes 626
- 13.2.2 Cycloisomerizations of Enynes Via Propargylic 1,2- and 1,3-Acyl Migration 635
- 13.2.3 Cycloisomerizations of Hydroxy- and Alkoxy-Substituted Enynes 644
- 13.3 Addition of Nucleophiles to 1,*n*-Enynes 644
- 13.3.1 Hydroxy- and Alkoxycyclizations of 1,6- and 1,7-Enynes 644
- 13.3.2 Hydroxy- and Alkoxycyclizations of 1,5-Enynes 647
- 13.3.3 Amination of Enynes 649
- 13.3.4 Inter- and Intramolecular Additions of Carbon Nucleophiles to 1,6-Enynes 650
- 13.3.5 Other Inter- and Intramolecular Nucleophile Additions to 1,6-Enynes 654
- 13.3.6 Inter- and Intramolecular Additions of Carbon Nucleophiles to 1,5-Enynes 656
- 13.4 Skeletal Rearrangement of 1,*n*-Enynes 657
- 13.4.1 Single- and Double-Cleavage Skeletal Rearrangement of 1,6-Enynes 657
- 13.4.2 Skeletal Rearrangement of 1,7-Enynes 661
- 13.4.3 Formation of Cyclobutenes 663
- 13.4.4 Endocyclic Rearrangement of 1,6-Enynes 665
- 13.4.5 Skeletal Rearrangement of 1,5-Enynes 667
- 13.4.6 Inter- and Intramolecular Cyclopropanation of 1,6-Enynes 667

- 13.4.7 Reactions of Furans with Alkynes 671
- 13.5 Summary and Outlook 672
- 13.6 Experimental: Selected Procedures 672
- 13.6.1 Synthesis of Selected Au(I) Complexes 672
- 13.6.1.1 General Procedure for the Synthesis of Neutral Au(I) Complexes 17a–d and 18a 672
- 13.6.1.2 Synthesis of Cationic Gold(I) Complexes 17e,f 673
- 13.6.1.3 Synthesis of Cationic Gold(I) Complex 18b 673
- 13.6.1.4 Synthesis of Neutral Gold(I) Complexes 19a–d 673
- 13.6.1.5 Synthesis of Cationic Gold(I) Complexes 19e 673
- 13.6.2 Selected Procedures for Metal-Catalyzed Cycloisomerizations 673
- 13.6.2.1 Synthesis of Compounds 11 and 13 Using  $\text{PtCl}_2$  as Catalyst 673
- 13.6.2.2 Synthesis of 27 and 28 Using Catalyst 17e 673
- 13.6.2.3 Synthesis of 32a–c Using  $\text{AuCl}(\text{PPh}_3)/\text{AgSbF}_6$  as Catalyst 674
- 13.6.2.4 Synthesis of 42a Using  $\text{AuCl}(\text{PPh}_3)/\text{AgOTf}$  as Catalyst 674
- 13.6.2.5 Synthesis of Cyclopentenes from Alkynes and Enamines Formed In Situ Using  $\text{Cu}(\text{OTf})_2$  as Catalyst 674
- 13.6.2.6 Synthesis of 52 Using  $\text{AuCl}(\text{PPh}_3)/\text{AgOTf}$  as Catalyst 674
- 13.6.2.7 General Procedure for Au(I)-Catalyzed Skeletal Rearrangement of Enynes (5a–l, 6a and 213a–e) 674
- 13.6.2.8 Synthesis of Product 198 Using  $\text{GaCl}_3$  675
- 13.6.2.9 Synthesis of Product 203 with Ru(II) Catalyst 675
- 13.6.3 Selected Procedure for Metal-Catalyzed Cyclopropanation Using Propargylic Carboxylates 675
- 13.6.3.1 Synthesis of 58a,b Using  $[\text{RuCl}_2(\text{CO})_3]_2$  as Catalyst 675
- 13.6.4 Selected Procedure for Metal-Catalyzed Rautenstrauch Rearrangement 676
- 13.6.4.1 Synthesis of 65 Using  $\text{AuCl}(\text{PPh}_3)/\text{AgSbF}_6$  as Catalyst 676
- 13.6.5 Selected Procedures for the Metal-Catalyzed Inter- and Intramolecular Alkoxy cyclization 676
- 13.6.5.1 General Procedure for the Au(I)-Catalyzed Intermolecular Alkoxy cyclization to Yield Products 125a–c 676
- 13.6.5.2 General Procedure for Au(I)-Catalyzed Intramolecular Alkoxy cyclization (125d) 676
- 13.6.6 Experimental: Selected Procedure 676
- 13.6.6.1 Procedure for the for Au(I)-Catalyzed Addition of Carbon Nucleophiles to 1,6-Enynes 676
- References 678
  
- 14 Cyclopropanation, Epoxidation and Aziridination Reactions 687**  
*Song Ye and Yong Tang*
- 14.1 Introduction 687
- 14.2 Cyclopropanation 688
- 14.2.1 Cyclopropanation with Halomethylmetal Compounds 688

- 14.2.2 Cyclopropanation with Transition Metal-Catalyzed Decomposition of Diazo Compounds 690
  - 14.2.2.1 Diazoalkanes 690
  - 14.2.2.2 Diazocarbonyl Compounds 691
- 14.2.3 Cyclopropanation with Ylides,  $\alpha$ -Halocarbanions and Related Species 694
- 14.2.4 Cyclopropanation with Metalocarbenoids 698
- 14.3 Epoxidations 701
  - 14.3.1 Metal-Catalyzed Epoxidation of Alkenes 701
    - 14.3.1.1 Titanium-Catalyzed Epoxidations 701
    - 14.3.1.2 Vanadium-Catalyzed Epoxidations 702
    - 14.3.1.3 Manganese-Catalyzed Epoxidations 703
    - 14.3.1.4 Iron-Catalyzed Epoxidations 703
    - 14.3.1.5 Ruthenium and Platinum-Catalyzed Epoxidations 704
    - 14.3.1.6 Lanthanide-Catalyzed Epoxidations 705
  - 14.3.2 Organocatalytic Epoxidation of Alkenes 706
    - 14.3.2.1 Epoxidation Catalyzed by Ketones 706
    - 14.3.2.2 Epoxidation Catalyzed by Iminium Salts 707
    - 14.3.2.3 Epoxidation Catalyzed by Amines 708
    - 14.3.2.4 Phase-Transfer Catalysis 709
    - 14.3.2.5 Miscellaneous 710
  - 14.3.3 Epoxidation of Carbonyl Compounds 710
    - 14.3.3.1 Ylide Epoxidation 710
    - 14.3.3.2 Darzens Reaction 712
- 14.4 Aziridinations 713
  - 14.4.1 Aziridination of Alkenes 713
    - 14.4.1.1 Metal-Catalyzed/Mediated Aziridination 713
    - 14.4.1.2 Metal-Free Aziridination 716
  - 14.4.2 Aziridination of Imines 717
    - 14.4.2.1 With Carbenes 718
    - 14.4.2.2 With Ylides 719
- 14.5 Experimental: Selected Procedures 721
  - 14.5.1 Synthesis of Compound 14 with Catalyst 12 721
  - 14.5.2 Synthesis of Compound 27 with Catalyst 24 721
  - 14.5.3 Synthesis of Compound 56 with Sulfonium salt 54 722
  - 14.5.4 Synthesis of Compound 79 with Catalyst 76 722
  - 14.5.5 Synthesis of Compound 90 with Catalyst 88 722
  - 14.5.6 Synthesis of Compound 107 with (+)-104 722
  - 14.5.7 Synthesis of Compound 120 with catalyst 118 723
  - 14.5.8 Synthesis of Compound 141 with Catalyst 139 (General Procedure) 723
  - 14.5.9 Synthesis of Compound 157 with Catalyst 155 724
  - 14.5.10 Synthesis of Compound 162 with Catalyst 161 724
  - 14.5.11 Synthesis of Compound 174 with Sulfide 172 724

- 14.5.12 Synthesis of Compound 190 with Trichloroethyl N-tosylloxycarbamates 188 724
- 14.5.13 Synthesis of Compound 210 with Catalyst 207 725
- 14.5.14 Synthesis of Compound 219 with (S)-VAPOL Catalyst 217 725
- References 726

## 15 Cyclization of Cyclopropane- or Cyclopropene-Containing Compounds 733

*Junliang Zhang and Yuanjing Xiao*

- 15.1 Introduction 733
- 15.2 Cycloisomerization Reactions 733
  - 15.2.1 Cycloisomerization of Vinylcyclopropanes and Their Hetero-Analogues 733
    - 15.2.1.1 Cycloisomerization of Vinylcyclopropanes to Cyclopentenes 733
    - 15.2.1.2 Cycloisomerization of Hetero-Analogues of VCPs to Five-Membered Heterocycles 736
  - 15.2.2 Cycloisomerization of Vinyl-, Allenyl-, and Alkynylcyclopropanes 738
  - 15.2.3 Cycloisomerization of Other Cyclopropanes 740
  - 15.2.4 Cycloisomerization of Methylene- and Alkylidenecyclopropanes 743
    - 15.2.4.1 Cycloisomerization of Acyl Methylene- and Alkylidenecyclopropanes 744
      - 15.2.4.2 Cycloisomerization via a Cascade Process 746
    - 15.2.5 Cycloisomerization of Vinylidenecyclopropanes 749
    - 15.2.6 Cycloisomerization of Cyclopropenes 749
      - 15.2.6.1 Cycloisomerization of 3-alkoylcarbonylcyclopropenes to Furans 749
      - 15.2.6.2 Cycloisomerization of 3-acylcyclopropenes to Furans 749
      - 15.2.6.3 Cycloisomerization of Cyclopropenyl Imines to Pyrroloheterocycles 753
- 15.3 Cycloaddition Reactions 754
  - 15.3.1 [1 + 2] Cycloaddition Reaction 754
  - 15.3.2 [2 + m + n] Cycloaddition 754
  - 15.3.3 [3 + 1] cycloaddition of MCPs 755
  - 15.3.4 [3 + 2] Cycloaddition Reaction 756
    - 15.3.4.1 [3 + 2] Cycloaddition Reaction of Methylene- and Alkylidene-Cyclopropanes 756
    - 15.3.4.2 [3 + 2] Cycloaddition Reaction of Vinylidenecyclopropanes 761
    - 15.3.4.3 [3 + 2] Cycloaddition Reaction of Activated Cyclopropanes 763
    - 15.3.4.4 [3 + 2] Cycloaddition of VCPs 772
  - 15.3.5 [3 + 3] Cycloaddition of Activated Cyclopropanes 774
  - 15.3.6 [3 + 4] Cycloaddition 777
  - 15.3.7 [4 + 1] Cycloaddition 778
  - 15.3.8 [4 + 2] Cycloaddition of 1-(1-Alkynyl)cyclopropyl Ketones 780
  - 15.3.9 [5 + 1] Cycloaddition 780
  - 15.3.10 [5 + 2] Cycloaddition of VCPs 784

- 15.3.10.1 Intramolecular [5 + 2] Cycloaddition of VCPs 784
- 15.3.10.2 Intermolecular [5 + 2] Cycloaddition of VCPs with Alkynes and Allenes 791
- 15.4 Multicomponent Cyclization Reactions 794
- 15.4.1 [5 + 2 + 1] Cycloaddition of Alkene-VCPs 794
- 15.4.2 [5 + 1 + 2 + 1] Cycloaddition of Alkene-VCPs 794
- 15.4.3 [3 + 2 + 2] Cycloaddition of MCPs 794
- 15.4.4 [(3 + 3) + 1] Cycloaddition 798
- 15.5 Cyclization Involving Miscellaneous and Cascade Reactions 799
- 15.5.1 Miscellaneous Reactions Involving [4 + 2] Cycloaddition 799
- 15.5.2 Cyclization Involving a Cascade Reaction 800
- 15.6 Experimental: Selected Procedures 804
- 15.6.1 Synthesis of Compound 16 via Vinylcyclopropane–Cyclopentene Rearrangement 804
- 15.6.2 Regioselective Cycloisomerization of Cyclopropenyl Ketone 171 804
- 15.6.2.1 Isomerization under Catalysis of CuI 804
- 15.6.2.2 Isomerization under Catalysis of PdCl<sub>2</sub>(CH<sub>3</sub>CN)<sub>2</sub> 804
- 15.6.3 Synthesis of Compound 194 via [3 + 2] Cycloaddition Reaction of Alkylidenecyclopropanes with Aldehyde 804
- 15.6.4 Stereoselective Synthesis of 2, 5-*cis* or 2, 5-*trans*-pyrrolo-isoxazolidines 272 805
- 15.6.4.1 Synthesis of 2, 5-*cis*-pyrrolo-isoxazolidines *cis*-272 805
- 15.6.4.2 Synthesis of 2, 5-*trans*-pyrrolo-isoxazolidines *trans*-272 805
- 15.6.5 Synthesis of Optically Active Tetrahydrooxazines 322 805
- 15.6.6 Synthesis of 5, 7-fused Bicycles 326 via Intramolecular [3 + 4] Cycloaddition 805
- 15.6.7 [4 + 2] Cycloaddition of 1-(1-Alkynyl)cyclopropyl Ketones 346 with Aldehyde 806
- 15.6.8 Asymmetric Rh(I)-Catalyzed Intramolecular [5 + 2] Cycloaddition of Alkene-VCPs 392 806
- 15.6.9 [(5 + 2) + 1] Cycloaddition of Alkene-VCPs 435 806
- References 807

## 16 Transition Metal-Catalyzed Ring Expansion Cyclization Reactions 813

*Masahiro Yoshida and Yoshimitsu Nagao*

- 16.1 Introduction 813
- 16.2 Palladium-Catalyzed Ring Expansions 813
- 16.2.1 Reactivities of Alkenyl Substrates 813
- 16.2.2 Reactivities of Dienyl Substrates 820
- 16.2.3 Reactivities of Alkynyl Substrates 827
- 16.3 Ring Expansions with Other Transition Metals 832
- 16.3.1 Ruthenium-Catalyzed Reactions 832
- 16.3.2 Gold-Catalyzed Reactions 834
- 16.3.3 Reactions with Fischer-Carbene Complexes 835

16.4	Conclusion	837
16.5	Experimental: Selected Procedures	837
16.5.1	General	837
16.5.2	Synthesis of Compound 10	837
16.5.3	Synthesis of Compounds 24 and 25	837
16.5.4	Synthesis of Compound 32	838
16.5.5	Synthesis of Compound 71	838
16.5.6	Synthesis of Compound 91	838
16.5.7	Synthesis of Compound 105	838
16.5.8	Synthesis of Compound 118	838
16.5.9	Synthesis of Compound 141	839
16.5.10	Synthesis of Compound 156	839
16.5.11	Synthesis of Compound 162	839

## 18 Catalytic Dipolar Cycloadditions of Alkynes with Azides and Nitrile Oxides 917

*Valery V. Fokin*

- 18.1 Introduction 917
- 18.2 Azide-Alkyne Cycloaddition: Basics 919
- 18.3 Copper-Catalyzed Cycloadditions 920
  - 18.3.1 Catalysts and Ligands 920
  - 18.3.2 CuAAC with *In Situ* Generated Azides 924
  - 18.3.3 Mechanistic Aspects of the CuAAC 925
  - 18.3.4 Reactions of Sulfonyl Azides 929
  - 18.3.5 Examples of Application of the CuAAC Reaction 930
    - 18.3.5.1 Synthesis of Compound Libraries for Biological Screening 930
    - 18.3.5.2 Synthesis of Glycoconjugates 931
    - 18.3.5.3 Modification and Biological Profiling of Natural Products 932
  - 18.3.6 Copper-Catalyzed Synthesis of Isoxazoles 934
- 18.4 Ruthenium-Catalyzed Cycloadditions 935
  - 18.4.1 Ruthenium-Catalyzed Azide-Alkyne Cycloaddition 935
  - 18.4.2 Ruthenium-Catalyzed Synthesis of Isoxazoles 937
  - 18.4.3 Mechanistic Studies of the Ruthenium-Catalyzed Cycloadditions 938
- 18.5 Experimental: Selected Procedures 944
  - 18.5.1 Copper-Catalyzed Cycloadditions 944
  - 18.5.2 Ruthenium-Catalyzed Cycloadditions 945
- References 946

## 19 Electrophilic Cyclizations 951

*Félix Rodríguez and Francisco J. Fañanás*

- 19.1 Introduction 951
- 19.2 Mechanism, Regio- and Stereoselectivity 952
- 19.3 Halocyclizations 953
  - 19.3.1 Oxygen-Centered Nucleophiles 954
    - 19.3.1.1 Cyclization of Alcohols and Ethers 954

19.3.1.2	Cyclization of Carboxylic Acids and Carboxylic Acid Derivatives	958
19.3.1.3	Cyclization of Carbonates and Carbamates	962
19.3.1.4	Cyclization of Aldehydes and Ketones	963
19.3.1.5	Cyclizations with Other Oxygen-Centered Nucleophiles	964
19.3.2	Nitrogen-Centered Nucleophiles	965
19.3.2.1	Cyclization of Amines	965
19.3.2.2	Cyclization of Amides	967
19.3.2.3	Cyclization of Carbamates, Amidines, Ureas and Isoureas	967
19.3.2.4	Cyclization of Imines	968
19.3.2.5	Cyclization of Azides	969
19.3.3	Sulfur- and Selenium-Centered Nucleophiles	969
19.3.4	Carbon-Centered Nucleophiles	970
19.3.4.1	Cyclization of Compounds Containing Active Methine Groups	970
19.3.4.2	Alkynes as Nucleophiles	971
19.3.4.3	Aryl Groups as Nucleophiles	972
19.4	Selenocyclizations	972
19.4.1	Oxygen-Centered Nucleophiles	973
19.4.1.1	Cyclization of Alcohols	973
19.4.1.2	Cyclization of Aldehydes and Ketones	976
19.4.1.3	Cyclization of Carboxylic Acids and Carboxylic Acid Derivatives	977
19.4.2	Nitrogen-Centered Nucleophiles	979
19.4.2.1	Cyclization of Amines	980
19.4.2.2	Cyclization of Amides and Imidates	980
19.4.2.3	Cyclization of Imines and Oximes	981
19.4.3	Sulfur- and Selenium-Centered Nucleophiles	982
19.4.4	Carbon-Centered Nucleophiles	982
19.5	Conclusion and Perspectives	983
19.6	Experimental: Selected Procedures	984
19.6.1	Halocyclization Reactions	984
19.6.1.1	IPy <sub>2</sub> BF <sub>4</sub> -Promoted Intramolecular Addition of Anilines to Alkynes	984
19.6.2	Selenocyclization Reactions	984
19.6.2.1	PhSeCl-Promoted Intramolecular Addition of Ethers to Alkynes	984
