# Contents

<b>One</b>	Shells, the man, his philosophy and influences	11	<b>Five</b>	Inverted membrane shells	91
	Historical shells	12		Motorway Service Station, Deitingen Süd, 1968	92
	The great concrete shell builders	12		Factory for Sici SA, Geneva, 1969	97
	Thin concrete shells	12		Open-air theatres at Stetten auf den Fildern, 1976, and Grötzingen, 1977	102
	Heinz Isler	13		Stetten	102
	Isler's first polyester shells	16		Grötzingen	105
	First Congress of the International Association for Shell Structure	16		Tennis halls and swimming pools	106
	Influences of Torroja, Lardy, Hauri and Candela	20		Tennis halls	106
	Munich Olympic Stadium	22		Swimming pools	108
	Design philosophy	22		Aircraft Museum, Dübendorf, 1987	109
	Creative play	28		Norwich Sports Village, 1987–91	110
	The future of the practice	29		Formwork	113
<b>Two</b>	Finding the form and proving its strength	31		Shell thickness	114
	Why shells?	32		Concrete	115
	The process of form-finding	32		Pouring the shell	115
	'Bubble' shells	33		Prestressing	117
	Expansion forms	35		Surface protection of the shell	117
	Free- form shells from hanging membranes	35		Environmental considerations	118
	Forces in the shell	38	<b>Six</b>	Hypars, domes and sculptures	121
	Model tests	40		Holy Spirit Church at Lommiswil, 1967	122
	Instability	41		Inflated 'ball' houses	128
	Measuring the form	42		Balz House, Stetten auf den Fildern, near Stuttgart, 1980	130
	Construction	44		Villa, near Geneva, 1986	134
	Monitoring of lifetime performance	44		New Church, Cazis, 1996	135
	Is the physical model dead?	46		Sculptures	138
<b>Three</b>	'Bubble' shells	49	<b>Seven</b>	Translucent shells of ice and plastic	141
	Architectural considerations	50		Sky domes and vaults	143
	Planning	50		Translucent plates	145
	Shell thickness	52		Translucent cantilever shells	147
	Façades	52		Structures in ice	148
	Daylight and ventilation	52	<b>Eight</b>	Influence of Heinz Isler's work and the future of thin concrete shells	155
	Artificial lighting	54		Heinz Isler's contribution to contemporary architecture	156
	Moser, Lyssach, 1964	54		Working with architects	156
	COOP, Wangen bei Olten, 1960	54		IASS and structural morphology	156
	Recent applications of the bubble shells	58		Future of shells	157
	Warehouse Formex, Bubendorf, 1994	60	<b>Endnotes</b>		160
	Bus depot, Müllheim, 1996/7	61	<b>Selected List of works</b>		165
	New office building, W. Bösiger AG, Langenthal, 1998	62	<b>Bibliography</b>		167
	Co-operation with contractors	62	<b>Index</b>		168
	Demolition of bubble shells	66			
<b>Four</b>	Free-form shells	69			
	Wyss Garden Centre, Solothurn, 1962	70			
	Soc. Migros, Bellinzona, 1964	77			
	Garden Centre Florélites Clause SA, St. Appoline, Paris, 1965	80			
	Kilcher Factory, Rechterswil, Solothurn, 1965	83			
	Bürgli Garden Centre, Camorino, 1973	86			
	Sports and Ski Centre, Chamonix, 1970–75	86
