

Earth Science: Earth's Weather, Water, and Atmosphere

Volume 1

Editors

MARGARET BOORSTEIN, PH.D.

Long Island University

RICHARD RENNEBOOG, M.Sc.

Salem Press

A Division of EBSCO Publishing

Ipswich, Massachusetts

CONTENTS

Publisher's Note	vii	Drainage Basins	166
Introduction	ix	Drought	171
Contributors	xi	Earth-Sun Relations	177
Common Units of Measure	xiii	El Niño/Southern Oscillations (ENSO)	181
Complete List of Contents	xix	Floodplains	187
Category List of Contents	xxii	Floods	193
Acid Rain and Acid Deposition	1	Freshwater and Groundwater	
Air Pollution	7	Contamination Around the World	199
Alluvial Systems	13	Ganges River	204
Amazon River Basin	18	Geochemical Cycles	209
Aquifers	22	Global Energy Transfer	213
<i>ARA Synthesis Report</i>	28	Global Warming	216
Aral Sea	31	Great Lakes	221
Arctic Ocean	35	Greenhouse Effect	226
Artificial Recharge	40	Groundwater Movement	230
Atlantic Ocean	45	Groundwater Pollution and Remediation	237
Atmosphere's Evolution	51	Gulf of California	245
Atmosphere's Global Circulation	57	Gulf of Mexico	249
Atmosphere's Structure		Gulf of Mexico Oil Spill	253
and Thermodynamics	62	Gulf Stream	257
Atmospheric and Oceanic Oscillations	70	Hudson Bay	262
Atmospheric Properties	75	Hurricane Katrina	267
Auroras	79	Hurricanes	271
Barometric Pressure	83	Hydrologic Cycle	277
Beaches and Coastal Processes	86	Hydrothermal Vents	282
Black Sea	91	Ice Ages and Glaciations	288
Bleaching of Coral Reefs	95	Icebergs and Antarctica	292
Carbonate Compensation Depths	98	Impacts, Adaptation, and Vulnerability	295
Carbon-Oxygen Cycle	104	Indian Ocean	299
Caspian Sea	108	IPCC	304
Climate	112	Lake Baikal	308
Climate Change Theories	118	Lakes	313
Climate Modeling	122	Lightning and Thunder	319
Clouds	126	Long-Term Weather Patterns	324
Cosmic Rays and Background Radiation	131	Mediterranean Sea	327
Cyclones and Anticyclones	136	Mississippi River	332
Dams and Flood Control	140	Monsoons	337
Deep Ocean Currents	146	Nile River	342
Deep-Sea Sedimentation	151	Nitrogen Cycle	347
Deltas	156	North Sea	351
Desert Pavement	161	Nuclear Winter	355

Earth Science: Earth's Weather, Water, and Atmosphere

Volume 2

CONTENTS

Common Units of Measure	vii	Severe and Anomalous Weather in Recent Decades	508
Complete List of Contents	xiii	Severe Storms	512
Category List of Contents	xv	Surface Ocean Currents	518
Observational Data of the Atmosphere and Oceans	361	Surface Water	523
Ocean-Atmosphere Interactions	365	Tornadoes	529
Ocean Pollution and Oil Spills	370	Tropical Weather	535
Oceans' Origin	376	Tsunamis	539
Oceans' Structure	381	Turbidity Currents and Submarine Fans	545
Ocean Tides	386	Van Allen Radiation Belts	549
Ocean Waves	391	Volcanoes: Climatic Effects	555
Ozone Depletion and Ozone Holes	397	Waterfalls	561
Pacific Ocean	404	Water Quality	566
Persian Gulf	410	Watersheds	571
Precipitation	415	Water Table	575
Radon Gas	421	Water Wells	579
Rainforests and the Atmosphere	426	Weather Forecasting	584
Recent Climate Change Research	430	Weather Forecasting: Numerical	
Red Sea	433	Weather Prediction	588
Reefs	437	Weathering and Erosion	593
Remote Sensing of the Atmosphere	443	Weather Modification	599
Remote Sensing of the Oceans	447	Wind	604
River Bed Forms	451	World Ocean Circulation Experiment	610
River Flow	456	Yellow River	615
Salinity and Desalination	461	Appendixes	621
Saltwater Intrusion	467	Glossary	623
Sand	472	Bibliography	646
Satellite Meteorology	478	Atmospheric Pressure: Above and	
Sea Level	484	Below Sea Level	676
Seamounts	489	Major Oil Spills in Modern History	680
Seasons	493	Bodies of Water	681
Seawater Composition	498	Severe Weather	684
Sediment Transport and Deposition	503	Subject Index	689
