

# INDUSTRIAL ECOLOGY

Second Edition

**T. E. Graedel**

*Professor of Industrial Ecology  
Yale University*

**B. R. Allenby**

*Research Vice President, Technology and Environment  
AT&T*

Pearson Education, Inc.  
Upper Saddle River, New Jersey

# Contents

Preface xvii

<b>PART I</b>	<b>INTRODUCING THE FIELD</b>	<b>1</b>
<b>Chapter 1</b>	<b>Humanity and Environment</b>	<b>1</b>
1.1	The Tragedy of the Commons	1
1.2	The Master Equation	5
1.3	The Grand Objectives	8
1.3.1	<i>Linking the Grand Objectives to Environmental Science</i>	9
1.3.2	<i>Targeted Activities of Technological Societies</i>	11
1.3.3	<i>Actions for an Industrialized Society</i>	12
1.4	Addressing the Challenge	14
	Further Reading	15
	Exercises	15
<b>Chapter 2</b>	<b>The Industrial Ecology Concept</b>	<b>17</b>
2.1	From Contemporaneous Thinking to Forward Thinking	17
2.2	Linking Industrial Activity and Environmental and Social Sciences	20
2.3	Key Questions of Industrial Ecology	21
2.4	An Overview	21
	Further Reading	23
	Exercises	23

<b>Chapter 3</b>	<b>Technological Change and Evolving Risk</b>	<b>25</b>
	3.1 Historical Patterns in Technological Evolution	25
	3.2 Approaches to Risk	30
	3.3 Risk Assessment	33
	3.4 Risk Communication	35
	3.5 Risk Management	35
	Further Reading	37
	Exercises	38

## **PART II THE PHYSICAL, BIOLOGICAL, AND SOCIETAL FRAMEWORK 39**

<b>Chapter 4</b>	<b>The Relevance of Biological Ecology to Technology</b>	<b>39</b>
	4.1 Considering the Analogy	39
	4.2 Biological and Industrial Organisms	40
	4.3 Food Chains: Networks of Nutrient and Energy Transfer	43
	4.4 Population Ecology	47
	4.5 Classification of Specific Linkages	49
	4.6 The Utility of the Ecological Approach	52
	Further Reading	54
	Exercises	54

<b>Chapter 5</b>	<b>The Status of Resources</b>	<b>55</b>
	5.1 Introduction	55
	5.2 Depletion Times and Underabundant Resources	55
	5.3 Hitchhiker Resources	57
	5.4 Energy Resources	58
	5.4.1 <i>Trading Energy for Mineral Resources</i>	58
	5.4.2 <i>Energy Sources</i>	58
	5.4.3 <i>Energy Resource Status</i>	58
	5.5 Energetically Limited Mineral Resources	60
	5.6 Geographically Influenced Resource Availability	61
	5.7 Environmentally Limited Resources	62
	5.8 Cumulative Supply Curves	63
	5.9 Water Resources	64
	5.10 Summary	65
	Further Reading	67
	Exercises	67

<b>Chapter 6</b>	<b>Society and Culture</b>	<b>68</b>
	6.1 Society, Culture, and Industrial Ecology	68
	6.2 Cultural Constructs and Temporal Scales	69
	6.3 The Private Firm in a Social Context	72
	6.4 Environmentalism, Technology, and Society	72
	Further Reading	75
	Exercises	76

<b>Chapter 7</b>	<b>Governments, Laws, and Economics</b>	<b>77</b>
7.1	National Governmental Structures and Actions	77
7.2	International Governance Considerations	80
7.3	Industrial Ecology and the Legal System	81
	7.3.1 <i>Fundamental Legal Issues</i>	82
	7.3.2 <i>Legal Case Studies Relevant to Industrial Ecology</i>	84
7.4	Economics and Industrial Ecology	86
	7.4.1 <i>Valuation</i>	86
	7.4.2 <i>Discount Rates</i>	87
	7.4.3 <i>Benefit-Cost Analysis</i>	87
	7.4.4 <i>Green Accounting</i>	88
	7.4.5 <i>Substitutability Versus Complementarity</i>	89
	7.4.6 <i>Externalities</i>	89
7.5	Finance, Capital, and Investment	90
	Further Reading	92
	Exercises	92
<b>PART III</b>	<b>DESIGN FOR ENVIRONMENT</b>	<b>94</b>
<b>Chapter 8</b>	<b>Industrial Product Design and Development</b>	<b>94</b>
8.1	The Product Design Challenge	94
8.2	Conceptual Tools for Product Designers	96
	8.2.1 <i>The Pugh Selection Matrix</i>	96
	8.2.2 <i>The House of Quality</i>	97
8.3	Design for X	97
8.4	Product Design Teams	99
8.5	The Product Realization Process	101
	Further Reading	103
	Exercises	104
<b>Chapter 9</b>	<b>Industrial Process Design and Operation</b>	<b>105</b>
9.1	The Process Design Challenge	105
9.2	Pollution Prevention	106
9.3	The Challenge of Water Availability	109
9.4	The Process Life Cycle	111
	9.4.1 <i>Resource Provisioning</i>	112
	9.4.2 <i>Process Implementation</i>	112
	9.4.3 <i>Primary Process Operation</i>	112
	9.4.4 <i>Complementary Process Operation</i>	112
	9.4.5 <i>Refurbishment, Recycling, Disposal</i>	113
9.5	The Approach to Process Analysis	113
	9.5.1 <i>The Process Itself</i>	114
	9.5.2 <i>The Process Equipment</i>	114
	9.5.3 <i>Complementary Processes</i>	115
9.6	Guidelines for Process Design and Operation	115

9.7 Implications for Corporations 116  
 Further Reading 116  
 Exercises 117

**Chapter 10 Choosing Materials 118**

10.1 Materials Selection Considerations 118  
 10.2 Materials and Environmental Hazards 119  
 10.3 Materials Sources and Principal Uses 121  
   10.3.1 *Absolute Abundances* 121  
   10.3.2 *Impacts of Materials Extraction and Processing* 122  
   10.3.3 *Availability and Suitability of Post-Consumer Recycled Materials* 124  
 10.4 Materials Substitution 126  
 10.5 Multiparameter Materials Selection 128  
 10.6 Dematerialization 134  
 10.7 Material Selection Guidelines 134  
 Further Reading 136  
 Exercises 136

**Chapter 11 Designing for Energy Efficiency 137**

11.1 Energy and Industry 137  
 11.2 Primary Processing Industries 139  
 11.3 Intermediate Processing Industries 140  
 11.4 Analyzing Energy Use 141  
 11.5 General Approaches to Minimizing Energy Use 144  
   11.5.1 *Heating, Ventilating, and Air Conditioning (HVAC)* 144  
   11.5.2 *Lighting* 144  
   11.5.3 *On-Site Energy Generation* 144  
   11.5.4 *Energy Housekeeping* 145  
 11.6 Summary 147  
 Further Reading 147  
 Exercises 148

**Chapter 12 Product Delivery 149**

12.1 Introduction 149  
 12.2 General Packaging Considerations 150  
 12.3 Solid Residue Considerations 151  
 12.4 Liquid and Gaseous Emission Considerations 155  
 12.5 Transportation and Installation 155  
 12.6 Discussion and Summary 156  
 Further Reading 157  
 Exercises 157

**Chapter 13 Environmental Interactions During Product Use 158**

13.1 Introduction 158  
 13.2 Solid Residue Generation During Product Use 158

13.3	Liquid Residue Generation During Product Use	159
13.4	Gaseous Residue Generation During Product Use	159
13.5	Energy Consumption During Product Use	160
13.6	Intentionally Dissipative Products	161
13.7	Unintentionally Dissipative Products	162
13.8	Design for Maintainability	162
	Further Reading	165
	Exercises	165
<b>Chapter 14</b>	<b>Design for End of Life</b>	<b>166</b>
14.1	Introduction	166
14.2	General End-of-Life Considerations	171
14.3	Remanufacturing	173
14.4	Recycling	173
	14.4.1 <i>Metals</i>	173
	14.4.2 <i>Plastics</i>	175
	14.4.3 <i>Forest Products</i>	176
14.5	Fastening Parts Together	177
14.6	Planning for Recyclability	177
	14.6.1 <i>Design for Disassembly</i>	177
	14.6.2 <i>Just-in-Case Designs</i>	180
	14.6.3 <i>Priorities for Recyclability</i>	180
	Further Reading	182
	Exercises	182
<b>Chapter 15</b>	<b>An Introduction to Life-Cycle Assessment</b>	<b>183</b>
15.1	The Life Cycle of Industrial Products	183
15.2	The LCA Framework	186
15.3	Goal Setting and Scope Determination	188
15.4	Defining Boundaries	188
	15.4.1 <i>Life Stage Boundaries</i>	189
	15.4.2 <i>Level of Detail Boundaries</i>	189
	15.4.3 <i>The Natural Ecosystem Boundary</i>	190
	15.4.4 <i>Boundaries in Space and Time</i>	191
	15.4.5 <i>Choosing Boundaries</i>	191
15.5	Approaches to Data Acquisition	191
	Further Reading	196
	Exercises	196
<b>Chapter 16</b>	<b>The LCA Impact and Interpretation Stages</b>	<b>197</b>
16.1	LCA Impact Analysis	197
16.2	Industrial Prioritization: The IVL/Volvo EPS System	198
16.3	Interpretation Analysis	204
	16.3.1 <i>Explicit and Implied Recommendations</i>	204
	16.3.2 <i>Prioritization Tables</i>	206

16.4 Prioritization Diagrams 207  
     16.4.1 *The Action-Agent Prioritization Diagram* 207  
     16.4.2 *The Life-Stage Prioritization Diagram* 209  
 16.5 Discussion 210  
 Further Reading 211  
 Exercises 212

**Chapter 17 Streamlining the LCA Process 214**

17.1 The Assessment Continuum 214  
 17.2 Preserving Perspective 215  
 17.3 The SLCA Matrix 216  
 17.4 Target Plots 218  
 17.5 Assessing Generic Automobiles of Yesterday and Today 218  
 17.6 SLCA Assets and Liabilities 224  
 17.7 Discussion 226  
 Further Reading 226  
 Exercises 227

**Chapter 18 Using the Corporate Industrial Ecology Toolbox 228**

18.1 Stages and Scales in Industrial Environmental Management 228  
 18.2 The First Stage: Regulatory Compliance 228  
 18.3 The Second Stage: Pollution Prevention 229  
 18.4 The Third Stage: Design for Environment 230  
 18.5 Environmental Opportunities at the PRP Gates 231  
 18.6 The Industrial Ecology Mechanic and the Toolbox 234  
 18.7 Industrial Ecology Tools for the Service Sector 235  
 Further Reading 236  
 Exercises 236

**PART IV CORPORATE INDUSTRIAL ECOLOGY 237**

**Chapter 19 Managing Industrial Ecology in the Corporation 237**

19.1 Overview 237  
 19.2 Environment as Strategic for the Firm 238  
 19.3 Implementing Industrial Ecology in the Corporation 239  
     19.3.1 *Environmental Management Systems* 240  
     19.3.2 *Tactical Organizational Structures* 242  
     19.3.3 *Training Programs* 242  
     19.3.4 *Technical Support* 242  
     19.3.5 *The Triple Bottom Line* 243  
 Further Reading 244  
 Exercises 244

**Chapter 20 Indicators and Metrics 245**

20.1 The Importance of Indicators and Metrics 245  
 20.2 Metric Systems Development 246

20.3	Industry-Level Metrics	248
20.4	Metrics Displays and Metrics Aggregation	251
20.5	Hierarchical Metrics Systems	252
	Further Reading	254
	Exercises	254

<b>Chapter 21</b>	<b>Services Technology and Environment</b>	<b>256</b>
21.1	Defining Services	256
21.1.1	<i>Type Alpha Services: The Customer Comes to the Service</i>	258
21.1.2	<i>Type Beta Services: The Service Goes to the Customer</i>	259
21.1.3	<i>Type Gamma Services: Remote Provisioning</i>	259
21.2	The Environmental Dimensions of Services	261
21.3	The Industrial Ecology of Service Firms	263
21.3.1	<i>Leverage Suppliers</i>	263
21.3.2	<i>Educate Customers</i>	264
21.3.3	<i>Facilitate Environmentally Preferable Resource and Product Use Patterns</i>	264
21.3.4	<i>Substitution of Services for Energy and Material Use</i>	265
21.3.5	<i>Services as a Source of Quality of Life</i>	265
	Further Reading	266
	Exercises	266

## **PART V SYSTEMS-LEVEL INDUSTRIAL ECOLOGY** **268**

<b>Chapter 22</b>	<b>Industrial Ecosystems</b>	<b>268</b>
22.1	The Ecosystems Concept	268
22.2	Industrial Symbiosis	273
22.3	Designing and Developing Symbiotic Industrial Ecosystems	275
22.4	Resource Flow in Industrial Ecosystems	277
22.5	Pattern and Scale in Industrial Ecosystems	279
22.6	The Utility of Mixed Ecological Approaches	281
	Further Reading	283
	Exercises	283
<b>Chapter 23</b>	<b>Metabolic and Resource Analyses</b>	<b>284</b>
23.1	Budgets and Cycles	284
23.2	Metabolic Analyses in Industrial Ecology	289
23.3	Resource Analyses in Industrial Ecology	291
23.3.1	<i>Elemental Analyses</i>	292
23.3.2	<i>Molecular Analyses</i>	292
23.3.3	<i>Substance Analyses</i>	294
23.3.4	<i>Material Analyses</i>	294

23.4	The Balance Between Natural and Anthropogenic Mobilization of Resources	296
23.5	The Utility of Metabolic and Resource Analyses	297
	Further Reading	298
	Exercises	298
<b>Chapter 24</b>	<b>Systems Analysis, Models, and Scenario Development</b>	<b>299</b>
24.1	Thinking at the Systems Level	299
	24.1.1 <i>The Systems Concept</i>	299
	24.1.2 <i>The Automotive Technology System</i>	301
24.2	Models of Technological Systems	305
	24.2.1 <i>The Concept of a Model</i>	305
	24.2.2 <i>Iron and Steel in the U.K.: A Model Example</i>	306
	24.2.3 <i>Model Validation</i>	306
24.3	Describing Possible Futures	308
	24.3.1 <i>The Utility of Scenarios</i>	308
	24.3.2 <i>The IMAGE Model for Climate Change</i>	309
	24.3.3 <i>IPCC 2000 Scenarios</i>	311
24.4	Developing a Predictive Industrial Ecology	313
	Further Reading	314
	Exercises	315
<b>Chapter 25</b>	<b>Earth Systems Engineering and Management</b>	<b>316</b>
25.1	Introducing the Concept	316
25.2	Examples of ESEM, Implemented and Proposed	317
	25.2.1 <i>Brownfields Restoration</i>	317
	25.2.2 <i>Dredging the Waters</i>	318
	25.2.3 <i>Restoring Regional-Scale Wetlands</i>	318
	25.2.4 <i>Combating Global Warming</i>	318
25.3	The Principles of ESEM	323
	25.3.1 <i>Theoretical Principles of ESEM</i>	323
	25.3.2 <i>Governance Principles of ESEM</i>	323
	25.3.3 <i>Design and Engineering Principles of ESEM</i>	324
25.4	Facing the ESEM Question	324
	Further Reading	326
	Exercises	327
<b>Chapter 26</b>	<b>The Future of Industrial Ecology</b>	<b>328</b>
26.1	Industrial Ecology in the Midst of Change	328
26.2	The Industrial Ecology Hardware Store	329
	26.2.1 <i>Tools for the Product and Process Designer</i>	330
	26.2.2 <i>Tools for the Corporate Manager</i>	330
	26.2.3 <i>Tools for the Service Provider</i>	330
	26.2.4 <i>Tools for the Systematist</i>	331
	26.2.5 <i>Tools for the Policy Maker</i>	331

26.3	Industrial Ecology as an Evolving Science	331
26.4	An Industrial Ecology Research Roadmap	335
26.4.1	<i>Theoretical Industrial Ecology Goals</i>	336
26.4.2	<i>Experimental Industrial Ecology Goals</i>	336
26.4.3	<i>Applied Industrial Ecology Goals</i>	337
26.5	Redefining the Challenge	338
	Further Reading	338
<b>Appendix A</b>	<b>Electronic Solder Alternatives: A Detailed Case Study</b>	<b>339</b>
<b>Appendix B</b>	<b>Units of Measurement in Industrial Ecology</b>	<b>349</b>
	<b>Glossary</b>	<b>351</b>
	<b>Index</b>	<b>357</b>
