Contents

Part I Models

1	Introduction	3
	<i>Relationships Matter</i>	3
	<i>Random Sampling Is Not Enough</i>	6
	<i>Literature Overview</i>	7
	<i>Major Research Advances</i>	9
	<i>Individual- and Network-Level Measures</i>	21
	<i>Summary</i>	25
2	History	26
	<i>History Reconsidered</i>	28
	<i>Behavioral Science</i>	30
	<i>Life Span Approaches</i>	35
	<i>Public Health and Medical Applications</i>	36
	<i>Summary</i>	39
3	Methods	41
	<i>Data Collection Techniques</i>	43
	<i>Data Management</i>	50
	<i>Data Characteristics</i>	55
	<i>Network Variables</i>	55
	<i>Summary</i>	60

4	Ego- and Personal-Network Effects	61
	<i>Measures</i>	65
	<i>Statistical Analysis</i>	70
	<i>Personal Network versus Sociometric Variables</i>	72
	<i>Snowball/Sequenced Data</i>	74
	<i>Summary</i>	77
Part II Measures		
5	Centrality	81
	<i>Degree</i>	82
	<i>Closeness</i>	83
	<i>Distances for Unconnected Nodes</i>	85
	<i>Betweenness</i>	87
	<i>Correlation among Centrality Measures</i>	91
	<i>Other Centrality Measures</i>	93
	<i>Link or Edge Centrality</i>	93
	<i>Centrality versus Centralization</i>	94
	<i>Centrality and Behavior</i>	95
	<i>Characteristics of Opinion Leaders</i>	98
	<i>Summary</i>	99
6	Groups	100
	<i>Components and K-Cores</i>	101
	<i>Girvan-Newman Technique</i>	105
	<i>Groups and Behavior</i>	108
	<i>Group Membership and Disease</i>	109
	<i>Groups, Density, and Bridges</i>	110
	<i>Summary</i>	113
7	Positions	114
	<i>Network-Level Positions</i>	115
	<i>CONCOR</i>	121
	<i>Individual Positional Measures</i>	122
	<i>Individual Measures as Positions</i>	123
	<i>Positions and Behavior</i>	124
	<i>Network Weights</i>	125
	<i>Summary</i>	126
8	Network-Level Measures	128
	<i>Size</i>	129
	<i>Density</i>	129
	<i>Mutuality/Reciprocity</i>	130
	<i>Triads/Transitivity</i>	132
	<i>Diameter/Average Path Length</i>	134
	<i>Density and Cohesion</i>	135
	<i>Clustering</i>	137

<i>Centralization</i>	138
<i>Core-Periphery</i>	140
<i>Two-Mode Data</i>	144
<i>Individual Network-Level Interactions</i>	146
<i>Summary</i>	147

Part III Applications

9	Exponential Random Graph Models, P* and Actor Oriented Models	151
	<i>Estimating the Link</i>	153
	<i>Vectorizing the Matrix</i>	153
	<i>Exponential Random Graph Models (ERGM)</i>	156
	<i>Simulation</i>	157
	<i>New Specifications</i>	160
	<i>Obesity Example</i>	161
	<i>Actor-Oriented Model</i>	163
	<i>WINCART</i>	166
	<i>Summary</i>	170
10	Diffusion of Innovations	172
	<i>Homogeneous Mixing</i>	175
	<i>Integration and Opinion Leadership</i>	179
	<i>Structural Models</i>	181
	<i>Dynamic Models</i>	184
	<i>Empirical Estimates Using Diffusion Network Data</i>	187
	<i>Infection and Susceptibility</i>	190
	<i>Thresholds</i>	191
	<i>Limitations to Diffusion Theory</i>	194
	<i>Summary</i>	194
11	Network Interventions	196
	<i>Opinion Leaders</i>	197
	<i>Key Players</i>	201
	<i>Groups</i>	202
	<i>Identifying Leaders and Groups</i>	203
	<i>Snowball Sampling or Network Recruitment</i>	205
	<i>Rewiring Networks</i>	207
	<i>Bridges and Potential Bridges</i>	208
	<i>Links versus Nodes</i>	209
	<i>Networks and Attributes</i>	212
	<i>Iatrogenic Effects</i>	214
	<i>A Pharmaceutical Marketing Example</i>	216
	<i>Summary</i>	218

12	Summary	219
	<i>Agent-Based Modeling</i>	224
	<i>Increasing the Threshold</i>	231
	<i>Statistical Analysis</i>	232
	<i>Network Scale</i>	232
	<i>Future Research Questions</i>	233
	<i>How to Get Started</i>	237
	<i>Limitations</i>	237
	<i>Conclusion</i>	238
	Appendix A: Glossary	239
	Appendix B: Sample Sociometric Survey	241
	Appendix C: Sample Egocentric Survey	243
	Appendix D: Centrality Scores for Network in Figure 1–1	245
	Appendix E: Input Files (Network and Attribute) for the Network in Figure 1–1	247
	References	251
	Author Index	269
	Subject Index	273
