Preface to the Second Edition.....	xiii
Preface to the First Edition	xv
Acknowledgments (First Edition).....	xvii
Introduction.....	xix
The Author.....	xxi
Chapter 1 Polymeric Materials for Coating.....	1
1.1 Rubbers: Natural and Synthetic	1
1.1.1 Introduction.....	1
1.1.2 Production, Structure, and Properties.....	1
1.1.2.1 Natural Rubber	1
1.1.2.2 Styrene–Butadiene Rubber.....	2
1.1.2.3 Isoprene–Isobutylene Rubber, Butyl Rubber	3
1.1.2.4 Ethylene–Propylene Polymers and Terpolymers, EPM and EPDM	3
1.1.2.5 Polychloroprene Rubber (CR)	4
1.1.2.6 Nitrile–Butadiene Rubber (NBR)	5
1.1.2.7 Chlorosulfonated Polyethylene (CSM) Rubber.....	5
1.1.2.8 Silicone Rubber	6
1.1.3 Rubber Additives	7
1.1.4 Compounding and Processing of Rubber	9
1.1.4.1 Mastication and Compounding	9
1.1.4.2 Spreading Dough.....	12
1.1.4.3 Vulcanization of Rubberized Fabrics	12
1.2 Polyvinyl Chloride	13
1.2.1 Introduction.....	13
1.2.2 Resin Characteristics	13
1.2.3 Additives for PVC	14
1.2.3.1 Plasticizers.....	14
1.2.3.2 Stabilizers.....	16
1.2.3.3 Other Additives	17
1.2.4 Plastics and Organosols	17
1.2.4.1 Resins	18
1.2.4.2 Plasticizers.....	18
1.2.4.3 Stabilizers.....	19
1.2.4.4 Fillers.....	19
1.2.4.5 Viscosity Depressants	19
1.2.4.6 Thickeners	19
1.2.4.7 Blowing Agents	19
1.2.4.8 Manufacture	20

1.2.4.9	Fusion	20
1.2.4.10	Uses in Coating	20
1.2.5	Compounding of PVC for Solid Compositions.....	20
1.2.5.1	Melt Compounding.....	20
1.2.5.2	Dry Blending	21
1.3	Polyurethanes.....	22
1.3.1	Introduction.....	22
1.3.2	Building Blocks of Polyurethane.....	22
1.3.2.1	The Isocyanates.....	23
1.3.2.2	Polyols	25
1.3.2.3	Cross-Linkers and Chain Extenders	27
1.3.2.4	Catalysts	27
1.3.3	Method of Preparation of Polyurethanes	27
1.3.4	Structure of Polyurethanes	28
1.3.5	Thermoplastic Urethane Elastomers.....	29
1.3.6	Polyurethane Coatings.....	29
1.3.6.1	One-Component Systems.....	29
1.3.6.2	Two-Component Systems.....	30
1.3.6.3	Additives.....	30
1.3.7	Aqueous Dispersion of Polyurethanes	31
1.3.7.1	Emulsifiers.....	31
1.3.7.2	Preparation of Dispersions	32
1.3.7.3	Film Properties.....	33
1.3.8	Features of Polyurethane Coating.....	33
1.3.8.1	Structure–Property Relationship.....	34
1.4	Acrylic Polymers.....	35
1.5	Adhesive Treatment	35
1.5.1	Mechanism of Adhesion	35
1.5.2	Resorcinol–Formaldehyde–Latex System	36
1.5.3	Dry Bonding System.....	37
1.5.4	Mode of Action of RFL Dip	38
1.5.5	Isocyanate Bonding System.....	39
1.5.6	Adhesives for Lamination.....	39
1.5.6.1	Hot-Melt Adhesives.....	39
1.6	Foams for Laminates	40
1.6.1	Flexible Polyurethane (PU) Foam	41
1.6.2	Polyolefine Foams	41
1.6.3	Flexible PVC Foam.....	41
1.7	Radiation-Cured Coatings	41
1.7.1	General Features	41
1.7.2	Chemistry.....	42
1.7.2.1	Photoinitiators	42
1.7.2.2	Polymer Systems	43
1.7.3	Equipment.....	44
1.7.4	Applications in Textile Coating	44
References	45

Chapter 2	Textile Substrate for Coated Fabrics	47
2.1	Materials and Trends.....	47
2.2	Textile Fibers.....	48
2.2.1	Cotton.....	48
2.2.2	Rayon	51
2.2.3	Nylons	51
2.2.4	Polyester.....	52
2.2.5	Polypropylene Fiber	52
2.2.6	Aramids	52
2.3	Spinning.....	53
2.3.1	Cotton Spinning System	53
2.3.1.1	Ginning.....	53
2.3.1.2	Blow Room.....	53
2.3.1.3	Carding.....	54
2.3.1.4	Lap Formation	55
2.3.1.5	Combing	55
2.3.1.6	Drawing.....	56
2.3.1.7	Speed Frame and Fly Frame	56
2.3.1.8	Ring Spinning	56
2.3.1.9	Newer Methods of Spinning.....	57
2.3.2	Synthetic Fiber Spinning	57
2.3.2.1	Melt Spinning.....	57
2.3.2.2	Solution Spinning.....	58
2.4	Woven Fabrics.....	58
2.4.1	Weaving	58
2.4.2	Fundamental Weaves	59
2.4.2.1	Plain Weave.....	59
2.4.2.2	Twill Weaves	60
2.4.2.3	Satin and Sateen Weaves.....	60
2.4.3	Looms	61
2.5	Knitted Fabrics.....	62
2.5.1	Weft Knitted Structures.....	63
2.5.2	Warp Knitted Structures.....	63
2.6	Nonwoven Fabrics	64
2.6.1	Web Formation.....	64
2.6.2	Web Bonding	65
2.6.2.1	Entanglement of Fibers	65
2.6.2.2	Bonding by Adhesives.....	65
2.7	Fabric Preparation for Coating.....	66
	References.....	67
	Bibliography.....	67
Chapter 3	Coating Methods	69
3.1	General Features	69
3.1.1	Common Features of Fluid Coating Units.....	69

3.1.2	Post- and Pre-metering Methods.....	72
3.2	Knife Coating.....	72
3.2.1	Arrangements of Knife Coating	73
3.2.2	Coating Knives	75
3.2.3	The Role of Rolling Bank and Web Tension	76
3.3	Roll Coating	77
3.3.1	Mayer Rod Coating.....	77
3.3.2	Direct-Roll Coating.....	78
3.3.3	Kiss Coating.....	78
3.3.4	Gravure Coating.....	79
3.3.5	Reverse-Roll Coaters	79
3.4	Dip Coating.....	81
3.5	Transfer Coating.....	82
3.6	Rotary Screen Printing	84
3.7	Calendering.....	84
3.7.1	Precalendering Section	85
3.7.2	Calender	85
3.7.3	Coating and Lamination	87
3.7.4	Postcalendering Section.....	89
3.7.5	Coating Defects.....	90
3.7.6	Comparison with Other Coating Methods.....	90
3.7.7	Zimmer Coating.....	91
3.8	Hot-Melt Coating	91
3.8.1	Extrusion Coating	91
3.8.2	Dry Powder Coating	93
3.9	Foam Coating.....	94
3.10	Lamination by Adhesives.....	95
3.11	Welding	96
	References.....	96
Chapter 4 Physical Properties of Coated Fabrics.....		99
4.1	General Characteristics.....	99
4.2	Tensile Strength.....	99
4.3	Elongation	101
4.4	Adhesion	101
4.5	Tear Resistance	105
4.6	Weathering Behavior.....	108
4.7	Microbiological Degradeation	110
4.8	Yellowing	111
	References.....	111
Chapter 5 Rheology of Coating		113
5.1	Introduction.....	113
5.2	Rheological Behavior of Fluids	113

5.2.1	Bingham Body Behavior.....	114
5.2.2	Dilatancy and Pseudoplasticity.....	114
5.2.3	Thixotropy and Rheopexy.....	115
5.3	Rheology of Plasticsols.....	116
5.3.1	Apparent Viscosity of Plasticsols.....	117
5.3.2	Polymer Size and Size Distribution.....	117
5.3.3	Plasticizer and Additives.....	118
5.3.4	Viscosity Change during Fusion.....	118
5.4	Hydrodynamic Analysis of Coating.....	119
	References.....	121
Chapter 6 Waterproof Breathable Fabrics.....		123
6.1	Introduction.....	123
6.2	Clothing Comfort.....	123
6.3	Impermeable Coating.....	125
6.4	Technology of Waterproof Breathable Fabrics.....	125
6.4.1	Parameters Required.....	125
6.4.2	Designing Waterproof Breathable Fabric.....	126
6.4.2.1	Diffusion of Water Vapor through a Fabric.....	127
6.4.2.2	Diffusion through Membranes.....	128
6.4.2.3	Water Vapor Transport through Textiles.....	128
6.4.2.4	Repellency.....	130
6.4.2.5	Techniques Adopted.....	131
6.4.3	Applications.....	131
6.4.3.1	Clothing Ensembles.....	131
6.4.3.2	Health-Care Garments.....	132
6.4.4	Types of Waterproof Breathable Fabrics.....	133
6.4.4.1	Closely Woven Fabrics.....	133
6.4.4.2	Microporous Coating and Laminates.....	134
6.4.4.3	Hydrophilic Coatings and Films.....	139
6.4.5	Using Waterproof Breathable Fabric for Apparel.....	142
6.4.6	Evaluation.....	142
	References.....	144
Chapter 7 Nonapparel Coating.....		147
7.1	Synthetic Leather.....	147
7.1.1	Compact Coated Fabrics.....	147
7.1.2	Poromerics.....	149
7.1.2.1	Coagulation Process.....	150
7.1.2.2	From Prepolymers.....	151
7.1.2.3	Structure of Porous Films.....	152
7.1.3	Porous Vinyls.....	152
7.1.4	PTFE Laminate.....	153
7.2	Architectural Textiles.....	153

7.2.1	Materials	154
7.2.2	Structures	155
7.2.2.1	Air-Supported Structures and Shelters	156
7.2.2.2	Flexible Barrier Storage System.....	157
7.2.2.3	Tension Structures	158
7.2.3	Awnings and Canopies	159
7.3	Fluid Containers.....	159
7.3.1	Inflatables.....	159
7.3.2	Liquid Containers	162
7.4	Tarpaulins	162
7.5	Automotive Applications	164
7.5.1	Air Bag Fabrics.....	164
7.5.2	Textile Foam Laminates for Automotive Interiors	166
7.5.2.1	Flame Lamination	167
7.5.2.2	Dry Adhesives	167
7.5.3	Headliner Structure.....	168
7.6	Carpet Backing	169
7.7	Flocking	170
7.8	Fusible Interlining.....	171
	References.....	172
Chapter 8	Coating with Functional Materials.....	175
8.1	Introduction.....	175
8.2	Microencapsulation.....	175
8.3	Thermochromic Fabrics.....	176
8.4	Temperature-Adaptable Fabrics	178
8.5	Fragrance Release Fabric.....	180
8.6	Fabrics for Chemical Protection	181
8.6.1	Types of Chemical Exposure Risks	182
8.6.2	Materials for Impermeable CPC.....	183
8.6.2.1	Civil Applications.....	184
8.6.2.2	Military Applications	184
8.6.3	Materials for Permeable CPCs.....	185
8.6.3.1	Carbon-Impregnated Polyurethane Foam	186
8.6.3.2	Carbon-Impregnated Cotton Flannel and Nonwoven Fabric.....	186
8.6.3.3	Bonded Spherical Carbon Adsorbents	186
8.6.3.4	Active Carbon Fabrics (Charcoal Cloth).....	187
8.6.4	Recent Trends	187
8.7	Camouflage Nets.....	188
8.7.1	Visual and Near-IR Nets.....	188
8.7.2	Radar Camouflage Net.....	190
8.7.3	Snow Camouflage	190
8.7.4	Thermal Camouflage (Infrared Reflecting Coverings).....	191
8.8	High-Visibility Garments.....	191

8.9	Intumescent Coating	191
8.10	Metal and Conducting Polymer-Coated Fabrics	193
8.10.1	Methods of Metal Coating	194
8.10.2	Uses of Metal-Coated Fabrics.....	197
8.10.2.1	Protective Clothing.....	197
8.10.2.2	Radar-Responsive Fabrics	198
8.10.2.3	Static Electricity Control.....	198
8.10.2.4	Electromagnetic Interference Shielding.....	198
8.10.3	Conducting Polymer Coatings	200
	References	200
Chapter 9 Coating Smart Polymers and Nanomaterials		203
9.1	Introduction	203
9.2	Smart Polymer Coating and Laminates	203
9.2.1	Based on Hydrogel.....	203
9.2.2	Shape Memory Polyurethane (SMPU)	205
9.3	Nanotechnology in Textiles.....	207
	References	209
Chapter 10 Test Methods		211
10.1	Introduction	211
10.2	Coating Mass per Unit Area (BS 3424, IS 7016 pt. 1).....	211
10.3	Degree of Fusion of Curing of Coating (BS 3424, ASTM D 4005-81).....	212
10.4	Blocking (BS 3424, IS 7016 pt. 9).....	212
10.5	Coating Adhesion (BS 3424, ASTM D-751, IS 7016 pt. 5)	212
10.6	Accelerated Aging (BS 3424, IS 7016 pt. 8 Based on ISO /R 1419-1970).....	213
10.7	Flexibility—Flat Loop Method (IS 7016 pt. 11 Based on ISO 5979-1982).....	214
10.8	Stiffness of Fabric—Cantilever Test (IS 649).....	214
10.9	Damage Due to Flexing (BS3424, IS 7016 pt. 4, ASTM D 2097).....	216
10.10	Abrasion Resistance (ASTM D-3389, BS 3424).....	216
10.11	Test for Colorfastness to Dry and Wet Rubbing (BS 3424, IS 1259).....	217
10.12	Low-Temperature Bend Test (ASTM D 2136, IS 7016 pt. 10, Based on ISO 4675-90)	218
10.13	Low-Temperature Impact Test (BS 3424, ASTM D-2137, IS 7016 pt.14)...	219
10.14	Cone Test (IS 7941)	220
10.15	Water Repellency—Spray Rating (IS 390, AATCC 22-1996).....	220
10.16	Resistance to Water Penetration (ASTM D-751, BS 3424, IS 7016, pt. 7)	221
10.17	Flame Resistance of Fabric (IS 11871, BS 3119).....	221
10.18	Air Permeability (BS 3424)	222
10.19	Water Vapor Permeability (ASTM E-96-80).....	223
10.19.1	Desiccant Method.....	223

10.19.2	Water Method	223
10.20	Resistance to Permeation by Hazardous Liquid Chemicals (ASTM F 739-96)	224
10.21	Resistance to Penetration or Permeation of Chemical Warfare Agents	224
10.21.1	Testing for Protection of Permeable Clothing against Mustard Gas Vapor	225
10.21.2	Testing for Protection of Clothing against Laid Down Mustard Gas Drops	225
10.22	Resistance to Penetration by Bloodborne Pathogens (ASTM F 1671-97 b)	225
10.23	Electrical Resistivity of Fabrics (AATCC 76-1995)	226
References	226
Appendix 1	227
Appendix 2	229
