CONTENTS

<i>Contributors</i>	xv
<i>Preface</i>	xxi
1. Hedgehog Signaling	1
Siu Wah Choy and Shuk Han Cheng	
I. Hedgehog Ligands	2
II. Hedgehog Signaling	4
III. Hedgehog Signaling in Zebrafish Eye Vesicle Patterning	5
IV. Hedgehog Signaling in Zebrafish Photoreceptor Differentiation	7
V. Hedgehog Signaling in Zebrafish Inner Nuclear Layer	10
VI. Hedgehog Signaling in Zebrafish Ganglion Cell Differentiation	11
References	18
2. Canonical and Noncanonical Hedgehog/GLI Signaling in Hematological Malignancies	25
Fritz Aberger, Daniela Kern, Richard Greil, and Tanja Nicole Hartmann	
I. Hedgehog Introduction	26
II. Regulation of Canonical HH Signaling and Its Implication in Cancer	26
III. SMO-Independent Modulation of GLI Activity	32
IV. Hedgehog in Hematopoiesis and Hematopoietic Stem Cells	35
V. From HSC to CML	38
VI. T- and B-Cell Malignancies	39
VII. Outlook	44
Acknowledgments	46
References	46
3. Noncanonical Hedgehog Signaling	55
Donna Brennan, Xiaole Chen, Lan Cheng, My Mahoney, and Natalia A. Riobo	
I. Definition	56
II. Type I Noncanonical Signaling: Pathways Engaged Exclusively by Ptc1	56
III. Type II Noncanonical Signaling: Pathways Engaged by Smoothened	61
IV. Noncanonical Hh Signaling in <i>Drosophila</i>	67
V. Concluding Remarks	68
References	68

4. Gli Protein Nuclear Localization Signal	73
Minoru Hatayama and Jun Aruga	
I. Introduction	74
II. Nuclear Localization Signal and Nuclear Export Signal	74
III. NLS and NES Mapping	75
IV. Sequence Comparison of Gli NLSs—NLSs in ZF Domains	79
V. Predicted 3D Structure of Gli NLS	81
VI. NLS Control of Gli/Ci Subcellular Localization in Hh Signaling	83
VII. Perspectives	86
References	86
5. Mammalian Homologues of <i>Drosophila</i> Fused Kinase	91
Alla Maloverjan and Marko Piirsoo	
I. Introduction	92
II. The Major Steps of Hh Signaling	93
III. Ci/Gli Proteins are Transcription Factors Mediating Hh Activities	94
IV. Hedgehog Signaling Complex is Responsible for Regulation of ci Protein	96
V. Regulation of Gli Proteins	98
VI. Fu is a Protein Kinase Playing Catalytic and Regulatory Roles in ci regulation	99
VII. Protein Kinases Participating in the Regulation of Gli Proteins	100
VIII. Controversial Roles of Stk36	101
IX. The Role of Ulk3 in Shh Signaling Pathway	103
X. An Emerging Shh Signaling Model Involving Ulk3	106
Acknowledgments	107
References	107
6. Identification, Functional Characterization, and Pathobiological Significance of GLI1 Isoforms in Human Cancers	115
Richard L. Carpenter and Hui-Wen Lo	
I. Introduction	116
II. Structures and Properties of GLI1 Isoforms	117
III. Regulation of GLI1 Isoforms by Canonical and Noncanonical Pathways	121
IV. GLI1 Isoforms and Malignant Phenotypes of Cancer	126
V. Conclusion and Future Directions	133
Acknowledgments	135
References	135

7. Gli-Similar Proteins: Their Mechanisms of Action, Physiological Functions, and Roles in Disease	141
Kristin Lichti-Kaiser, Gary ZeRuth, Hong Soon Kang, Shivakumar Vasanth, and Anton M. Jetten	
I. Introduction	142
II. Mechanism of Action of Glis Proteins	144
III. Role of Glis Proteins in Renal Physiology and Pathology	151
IV. Role of Glis3 in Pancreas Physiology and Pathology	155
V. Glis Functions in Other Tissues	160
VI. Conclusion	163
Acknowledgments	163
References	163
8. Sonic Hedgehog Regulates Wnt Activity During Neural Circuit Formation	173
Nicole H. Wilson and Esther T. Stoeckli	
I. Introduction	174
II. Shh and Wnt Signaling: Canonical Signaling Pathways	174
III. Patterning and Morphogenesis of the Neural Tube	177
IV. Establishment of Neuronal Polarization	184
V. Axon Guidance	186
VI. Synapse Formation	195
VII. Other Factors Influencing Shh and Wnt Pathways	197
VIII. Conclusions and Future Directions	200
References	201
9. Hedgehog/Gli Control by Ubiquitination/Acetylation Interplay	211
Alberto Gulino, Lucia Di Marcotullio, Gianluca Canettieri, Enrico De Smaele, and Isabella Screpanti	
I. Introduction	212
II. Ubiquitin-Dependent Regulation of Hh Signaling	213
III. Increasing the Complexity of Hh Signaling in Vertebrates: The Cul1- and Cul3-Dependent Ubiquitination Processes	214
IV. An Alternative Gli1 Control by the HECT-Type Itch E3 Ubiquitin Ligase-Based Processing	215
V. Activation of Itch Function by Numb	216
VI. Acetylation to Ubiquitination Connection in Hh Signaling	217

VII. Implications of Ubiquitin-Dependent Events for Cell Development and Tumorigenesis	218
VIII. Implications for Ubiquitination/Acetylation Interplay in Cell Development and Cancer Control	220
IX. Conclusions	221
Acknowledgments	222
References	222
10. Palmitoylation of Hedgehog Proteins	229
John A. Buglino and Marilyn D. Resh	
I. Introduction to Protein Palmitoylation	230
II. Palmitoylation of Hedgehog Proteins	231
III. Palmitoylation of Other Secreted Proteins	240
IV. The MBOAT Family of Acyltransferases	242
V. Conclusions and Future Directions	246
Acknowledgments	246
References	246
11. Phosphorylation Regulation of Hedgehog Signaling	253
Jianhang Jia	
I. Introduction	253
II. Phosphorylation of the Transcription Factor in Hh Signaling	255
III. Phosphorylation of Smo Receptor in Hh Signaling	257
IV. Other Phosphorylation Events in Hh Signaling	260
V. Nonconserved Phosphorylation	262
VI. Phosphatases in Hh Signaling	263
VII. Differential Phosphorylation of Hh Signaling Components	264
Acknowledgments	266
References	266
12. Protein Kinase A Activity and Hedgehog Signaling Pathway	273
Tomoya Kotani	
I. Introduction	274
II. Function of PKA in Hedgehog-Responsive Cells	275
III. Activation of PKA	279
IV. PKA Activity in Hedgehog-Responding Cells	284
V. Perspectives	286
Acknowledgments	287
References	287

13. Phosphorylation of Gli by cAMP-Dependent Protein Kinase	293
Yoshinari Asaoka	
I. Introduction	294
II. cAMP-Dependent Protein Kinase	295
III. Hedgehog Signaling and cAMP-Dependent Protein Kinase	297
IV. Gli Transcription Factors and cAMP-Dependent Protein Kinase	298
V. Conclusions	301
References	304
14. ZFP932 Suppresses Cellular Hedgehog Response and Patched1 Transcription	309
G. Jason Huang, Zhenhua He, and Liang Ma	
I. Introduction	310
II. <i>Zfp932</i> Characterization	312
III. ZFP932 Represses <i>Ptch1</i> Expression	315
IV. ZFP932 Represses Cellular Hedgehog-Signaling Response	327
V. ZFP932 Regulates Osteoblast Differentiation	328
VI. Conclusion	330
Acknowledgments	330
References	331
15. A New Era for an Ancient Drug: Arsenic Trioxide and Hedgehog Signaling	333
Elsbeth M. Beauchamp and Aykut Üren	
I. Historic Use of Arsenic in Medicine	334
II. Molecular Mechanisms of Arsenic in Cancer Therapy	335
III. Role of Hedgehog Signaling in Cancer	339
IV. Effect of Arsenic on Hh Signaling	342
V. Conclusions	345
References	347
16. Aberrations and Therapeutics Involving the Developmental Pathway Hedgehog in Pancreatic cancer	355
Fergal C. Kelleher and Raymond McDermott	
I. Introduction	356
II. The Hedgehog Pathway	357
III. Hedgehog Therapeutics	362
IV. Conclusion	375
References	375

17. Sonic Hedgehog Signaling and Potential Therapeutic Indications	379
Nicholas C. Bambakidis and Kaine Onwuzulike	
I. Sonic Hedgehog Discovered (Shh)	380
II. Shh Signaling in Vertebrates	380
III. Shh Second Messenger Systems	383
IV. Shh in Stem Cell Proliferation	385
V. Shh in Oncogenesis	387
VI. Shh in Injury of the CNS	389
VII. Conclusion	393
References	393
18. Sonic Hedgehog on Microparticles and Neovascularization	395
Raffaella Soleti and Maria Carmen Martinez	
I. Introduction	396
II. Neovascularization	397
III. Sonic Hedgehog	405
IV. Microparticles	415
V. Conclusion	424
References	425
19. "Patch"-ing up the Neurons: Revival or Enervation?	439
Sayantani Ghosh, Arunabha Chakrabarti, and Debashis Mukhopadhyay	
I. Introduction	440
II. The "Patched" Transmission	442
III. Ptch1 Expression in Neural Tissues	443
IV. Ptch1 in Disease, Development, and Injury	445
V. Conclusion	453
Acknowledgments	454
References	454
20. Activation of Hedgehog Pathway in Gastrointestinal Cancers	461
Ling Yang, Xiulan Su, and Jingwu Xie	
I. Introduction	461
II. Activation of the Hh Pathway in Esophageal Cancer	462
III. Activation of the Hh Pathway in Gastric Cancer	464
IV. Activation of the Hh Pathway in Colorectal Cancer	466
V. Summary	467
References	467

21. The Role of Sonic Hedgehog as a Regulator of Gastric Function and Differentiation	473
Rui Feng, Chang Xiao, and Yana Zavros	
I. Introduction	474
II. Hh in the Adult Stomach	474
III. The Potential Role of Sonic Hh as a Gastric Hormone	481
IV. Conclusions and Future Directions	484
Acknowledgment	485
References	485
22. Sonic Hedgehog-Mediated Synergistic Effects Guiding Angiogenesis and Osteogenesis	491
Sabine Fuchs, Eva Dohle, and Charles James Kirkpatrick	
I. General Introduction	492
II. General Aspects of Shh Signaling	492
III. The Role of Hh Morphogens in Bone Development and Repair	493
IV. Shh: Potential Candidate Linking Angiogenesis and Osteogenesis	494
V. Effects of Shh on Angiogenesis, Vessel Maturation, and Osteogenesis	494
VI. Coculture Models as <i>In Vitro</i> Models to Investigate Effects of Shh on Osteogenesis and Angiogenesis	496
VII. Effects of Shh on Angiogenesis in a Coculture Model	497
VIII. Effects of Shh on Osteogenesis in a Coculture Model	499
IX. Future Therapeutical Options and Delivery Strategies	501
References	502
23. Hedgehog Inhibition as an Anti-Cancer Strategy	507
G. Praveen Raju and Diane Pham	
I. Introduction	508
II. Hh Signaling in Normal Development	508
III. Hh Pathway Alterations in Cancer	509
IV. Targeted Therapies for Hedgehog Dependent Cancers	512
V. Conclusions and Future Directions	516
Acknowledgments	518
References	519
Index	523
