# Contents

<i>Preface</i> .....	<i>xv</i>
<i>About the Author</i> .....	<i>xxi</i>
 Chapter 1 <i>Foundations for an Applied Science of Data Visualization</i> .....	 1
Visualization Stages .....	4
Experimental Semiotics Based on Perception .....	5
Semiotics of Graphics .....	6
<i>Are Pictures Arbitrary?</i> .....	7
Sensory versus Arbitrary Symbols .....	9
<i>Properties of Sensory Representation</i> .....	12
<i>Testing Claims about Sensory Representations</i> .....	15
<i>Representations That Are Arbitrary</i> .....	15
<i>The Study of Arbitrary Conventional Symbols</i> .....	17
Gibson's Affordance Theory .....	17
A Model of Perceptual Processing .....	20
<i>Stage 1. Parallel Processing to Extract Low-Level Properties of the Visual Scene</i> .....	21
<i>Stage 2. Pattern Perception</i> .....	21
<i>Stage 3. Visual Working Memory</i> .....	22
<i>Attention</i> .....	22
Costs and Benefits of Visualization .....	23
Types of Data .....	25
<i>Entities</i> .....	26
<i>Relationships</i> .....	26
<i>Attributes of Entities or Relationships</i> .....	26
<i>Data Dimensions: 1D, 2D, 3D, ...</i> .....	26
<i>Types of Numbers</i> .....	27
<i>Uncertainty</i> .....	28
<i>Operations Considered as Data</i> .....	28
Metadata .....	29
Conclusion .....	29
 Chapter 2 <i>The Environment, Optics, Resolution, and the Display</i> .....	 31
The Environment .....	32
<i>Visible Light</i> .....	32
<i>Ecological Optics</i> .....	32
<i>Optical Flow</i> .....	34
<i>Textured Surfaces and Texture Gradients</i> .....	35
<i>The Paint Model of Surfaces</i> .....	36
The Eye .....	41
<i>The Visual Angle Defined</i> .....	42

<i>Lens</i> .....	43
<i>Optics and Augmented-Reality Systems</i> .....	44
<i>Optics in Virtual-Reality Displays</i> .....	47
<i>Chromatic Aberration</i> .....	48
<i>Receptors</i> .....	49
<i>Simple Acuities</i> .....	50
<i>Acuity Distribution and the Visual Field</i> .....	52
<i>Brain Pixels and the Optimal Screen</i> .....	55
<i>Spatial Contrast Sensitivity Function</i> .....	59
<i>Visual Stress</i> .....	62
The Optimal Display .....	63
<i>Aliasing</i> .....	64
<i>Number of Dots</i> .....	66
<i>Superacuities and Displays</i> .....	66
<i>Temporal Requirements of the Perfect Display</i> .....	67
Conclusion .....	68
Chapter 3 <i>Lightness, Brightness, Contrast, and Constancy</i> .....	69
Neurons, Receptive Fields, and Brightness Illusions .....	70
<i>Simultaneous Brightness Contrast</i> .....	73
<i>Mach Bands</i> .....	74
<i>The Chevreul Illusion</i> .....	74
<i>Simultaneous Contrast and Errors in Reading Maps</i> .....	75
<i>Contrast Effects and Artifacts in Computer Graphics</i> .....	75
<i>Edge Enhancement</i> .....	76
Luminance, Brightness, Lightness, and Gamma .....	79
<i>Constancies</i> .....	79
<i>Luminance</i> .....	80
<i>Displaying Details</i> .....	82
<i>Brightness</i> .....	82
<i>Monitor Gamma</i> .....	83
<i>Adaptation, Contrast, and Lightness Constancy</i> .....	84
<i>Contrast and Constancy</i> .....	85
<i>Contrast on Paper and on Screen</i> .....	85
Perception of Surface Lightness .....	87
<i>Lightness Differences and the Gray Scale</i> .....	88
<i>Contrast Crispening</i> .....	89
Monitor Illumination and Monitor Surrounds .....	90
Conclusion .....	93
Chapter 4 <i>Color</i> .....	95
Trichromacy Theory .....	96
<i>Color Blindness</i> .....	98
Color Measurement .....	98
<i>Change of Primaries</i> .....	100

<i>Chromaticity Coordinates</i> .....	102
<i>Color Differences and Uniform Color Spaces</i> .....	105
Opponent Process Theory .....	108
<i>Naming</i> .....	108
<i>Cross-Cultural Naming</i> .....	109
<i>Unique Hues</i> .....	109
<i>Neurophysiology</i> .....	110
<i>Categorical Colors</i> .....	110
Properties of Color Channels .....	111
<i>Spatial Sensitivity</i> .....	111
<i>Stereoscopic Depth</i> .....	112
<i>Motion Sensitivity</i> .....	112
<i>Form</i> .....	113
Color Appearance .....	114
<i>Monitor Surrounds</i> .....	114
<i>Color Constancy</i> .....	114
<i>Color Contrast</i> .....	115
<i>Saturation</i> .....	116
<i>Brown</i> .....	117
Applications of Color in Visualization .....	117
Application 1: Color Specification Interfaces and Color Spaces .....	117
<i>Color Spaces</i> .....	118
<i>Color Naming Systems</i> .....	120
<i>Color Palettes</i> .....	122
Application 2: Color for Labeling (Nominal Codes) .....	122
Application 3: Color Sequences for Data Maps .....	128
<i>Form and Quantity</i> .....	129
<i>Interval Pseudocolor Sequences</i> .....	132
<i>Ratio Pseudocolors</i> .....	132
<i>Sequences for the Color Blind</i> .....	133
<i>Bivariate Color Sequences</i> .....	134
Application 4: Color Reproduction .....	135
Conclusion .....	138
 Chapter 5 <i>Visual Salience and Finding Information</i> .....	 139
Eye Movements .....	140
<i>Accommodation</i> .....	142
<i>The Eye Movement Control Loop</i> .....	142
V1, Channels, and Tuned Receptors .....	143
<i>The Elements of Form</i> .....	145
<i>The Gabor Model and Visual Distinctness</i> .....	147
<i>A Differencing Mechanism for Fine Discrimination</i> .....	149
<i>Feature Maps, Channels, and Lessons for Visual Search</i> .....	150
Preattentive Processing and Ease of Search .....	152
<i>Attention and Expectations</i> .....	156
<i>Highlighting and Asymmetries</i> .....	157

<i>Coding with Combinations of Features</i> .....	158
<i>Coding with Redundant Properties</i> .....	159
<i>What Is Not Easily Findable: Conjunctions of Features</i> .....	159
<i>Highlighting Two Data Dimensions: Conjunctions That Can Be Seen</i> .....	160
Integral and Separable Dimensions: Glyph Design .....	162
<i>Restricted Classification Tasks</i> .....	163
<i>Speeded Classification Tasks</i> .....	164
<i>Integral–Separable Dimension Pairs</i> .....	167
Representing Quantity .....	168
<i>Representing Absolute Quantities</i> .....	169
<i>Multidimensional Discrete Data: Uniform Representation</i> <i>versus Multiple Channels</i> .....	170
<i>Stars and Whiskers</i> .....	172
The Searchlight Metaphor and Cortical Magnification .....	173
<i>Useful Field of View</i> .....	173
<i>Tunnel Vision, Stress, and Cognitive Load</i> .....	173
<i>The Role of Motion in Attracting Attention</i> .....	174
<i>Motion as a User Interrupt</i> .....	174
Conclusion.....	176
 Chapter 6 <i>Static and Moving Patterns</i> .....	179
Gestalt Laws .....	181
<i>Proximity</i> .....	181
<i>Similarity</i> .....	182
<i>Connectedness</i> .....	183
<i>Continuity</i> .....	183
<i>Symmetry</i> .....	185
<i>Closure and Common Region</i> .....	186
<i>Figure and Ground</i> .....	189
<i>More on Contours</i> .....	191
<i>Representing Vector Fields: Perceiving Orientation and Direction</i> .....	193
<i>Comparing 2D Flow Visualization Techniques</i> .....	194
<i>Showing Direction</i> .....	196
Texture: Theory and Data Mapping .....	199
<i>Tradeoffs in Information Density: An Uncertainty Principle</i> .....	201
<i>Primary Perceptual Dimensions of Texture</i> .....	202
<i>Texture Contrast Effects</i> .....	202
<i>Other Dimensions of Visual Texture</i> .....	203
<i>Nominal Texture Codes</i> .....	204
<i>Using Textures for Univariate and Multivariate Map Displays</i> .....	205
<i>Quantitative Texture Sequences</i> .....	209
Perception of Transparency: Overlapping Data .....	211
Perceiving Patterns in Multidimensional Discrete Data .....	213
Pattern Learning.....	218
<i>Priming</i> .....	220
<i>Vigilance</i> .....	220
The Visual Grammar of Node–Link Diagrams.....	221

The Visual Grammar of Maps .....	227
Patterns in Motion .....	229
<i>Form and Contour in Motion</i> .....	231
<i>Moving Frames</i> .....	232
<i>Expressive Motion</i> .....	233
<i>Perception of Causality</i> .....	233
Perception of Animated Motion .....	235
<i>Enriching Diagrams with Simple Animation</i> .....	236
The Processes of Pattern Finding .....	236
 Chapter 7 <i>Space Perception</i> .....	239
Depth Cue Theory .....	240
<i>Perspective Cues</i> .....	241
<i>The Duality of Depth Perception in Pictures</i> .....	242
<i>Pictures Seen from the Wrong Viewpoint</i> .....	244
<i>Occlusion</i> .....	246
<i>Shape-from-Shading</i> .....	247
<i>Shading Models</i> .....	248
<i>Cushion Maps</i> .....	249
<i>Surface Texture</i> .....	250
<i>Cast Shadows</i> .....	253
<i>Distance Based on Familiar Size</i> .....	255
<i>Depth of Focus</i> .....	255
<i>Eye Accommodation</i> .....	256
<i>Structure-from-Motion</i> .....	256
<i>Eye Convergence</i> .....	258
<i>Stereoscopic Depth</i> .....	258
<i>Problems with Stereoscopic Displays</i> .....	260
<i>Frame Cancellation</i> .....	261
<i>The Vergence–Focus Problem</i> .....	261
<i>Distant Objects</i> .....	262
<i>Making Effective Stereoscopic Displays</i> .....	262
<i>Cyclopean Scale</i> .....	264
<i>Virtual Eye Separation</i> .....	264
<i>Artificial Spatial Cues</i> .....	266
Depth Cues in Combination .....	269
Task-Based Space Perception .....	272
Tracing Data Paths in 3D Graphs .....	272
Judging the Morphology of Surfaces .....	276
<i>Conformal Textures</i> .....	277
<i>Guidelines for Displaying Surfaces</i> .....	280
<i>Bivariate Maps–Lighting and Surface Color</i> .....	281
Patterns of Points in 3D Space .....	282
Perceiving Patterns in 3D Trajectories .....	283
Judging Relative Positions of Objects in Space .....	284
Judging the Relative Movements of Self within the Environment .....	285

Selecting and Positioning Objects in 3D .....	286
Judging the “Up” Direction .....	288
The Aesthetic Impression of 3D Space (Presence).....	289
Conclusion.....	290
 Chapter 8 <i>Visual Objects and Data Objects</i> .....	293
Image-Based Object Recognition .....	294
<i>Priming</i> .....	296
<i>Searching an Image Database</i> .....	297
<i>Life Logging</i> .....	298
Structure-Based Object Recognition .....	299
<i>Geon Theory</i> .....	299
<i>Silhouettes</i> .....	299
The Object Display and Object-Based Diagrams .....	303
<i>The Geon Diagram</i> .....	305
Faces .....	308
Coding Words and Images .....	311
<i>Mental Images</i> .....	312
Labels and Concepts.....	313
<i>Object Categorization</i> .....	313
<i>Canonical Views and Object Recognition</i> .....	315
Concept Mapping .....	316
<i>Concept Maps and Mind Maps</i> .....	316
Iconic Images versus Words versus Abstract Symbols .....	320
<i>Static Links</i> .....	321
Scenes and Scene Gist .....	322
<i>Priming, Categorization, and Trace Theory</i> .....	322
Conclusion.....	323
 Chapter 9 <i>Images, Narrative, and Gestures for Explanation</i> .....	325
The Nature of Language.....	326
<i>Sign Language</i> .....	326
<i>Language Is Dynamic and Distributed over Time</i> .....	328
<i>Is Visual Programming a Good Idea?</i> .....	328
<i>Images versus Sentences and Paragraphs</i> .....	331
<i>Links between Images and Words</i> .....	332
Integrating Visual and Verbal and the Narrative Thread.....	333
<i>Linking Text with Graphical Elements of Diagrams</i> .....	333
<i>Gestures as Linking Devices in Verbal Presentations</i> .....	333
<i>Deixis</i> .....	334
<i>Symbolic Gestures</i> .....	336
<i>Expressive Gestures</i> .....	336
Animated versus Static Presentations.....	337
Visual Narrative .....	339
<i>Animated Images</i> .....	341
Conclusion.....	343

Chapter 10 <i>Interacting with Visualizations</i> .....	345
Data Selection and Manipulation Loop.....	346
Choice Reaction Time .....	346
Two-Dimensional Positioning and Selection .....	347
Hover Queries.....	348
Path Tracing .....	349
Two-Handed Interaction.....	349
Learning .....	350
Control Compatibility.....	351
Exploration and Navigation Loop .....	353
Locomotion and Viewpoint Control .....	354
Spatial Navigation Metaphors.....	355
Wayfinding, Cognitive Maps and Real Maps .....	359
Landmarks, Borders, and Place.....	361
Frames of Reference .....	362
Egocentric Frame of Reference .....	362
Exocentric Frames of Reference.....	363
Map Orientation .....	364
Focus, Context and Scale in Nonmetaphoric Interfaces .....	366
Distortion Techniques.....	368
Rapid Zooming Techniques.....	370
Elision Techniques .....	371
Multiple Simultaneous Views .....	372
Conclusion.....	373
Chapter 11 <i>Visual Thinking Processes</i> .....	375
The Cognitive System .....	376
Memory and Attention .....	377
Working Memories .....	378
Visual Working Memory Capacity .....	379
Change Blindness .....	380
Spatial Information .....	381
Attention .....	383
Object Files, Coherence Fields, and Gist .....	384
Long-Term Memory .....	386
Chunks and Concepts .....	388
Knowledge Formation and Creative Thinking .....	388
Knowledge Transfer.....	389
Visualizations and Mental Images .....	392
Review of Visual Cognitive System Components .....	393
Early Visual Processing .....	393
Pattern Perception .....	393
Eye Movements.....	393
The Intrasaccadic Scanning Loop .....	393
Working Memory .....	394

<i>Mental Imagery</i> .....	394
<i>Epistemic Actions</i> .....	394
<i>Visual Queries</i> .....	396
<i>Computational Data Mappings</i> .....	396
Visual Thinking Algorithms .....	397
Algorithm 1: Visual Queries .....	398
Algorithm 2: Pathfinding on a Map or Diagram .....	400
<i>Visual Query Construction</i> .....	401
<i>The Pattern-Finding Loop</i> .....	402
Algorithm 3: Reasoning with a Hybrid of a Visual Display and Mental Imagery .....	403
Algorithm 4: Design Sketching .....	405
Algorithm 5: Brushing .....	407
Algorithm 6: Small Pattern Comparisons in a Large Information Space .....	408
Algorithm 7: Degree-of-Relevance Highlighting .....	412
Algorithm 8: Generalized Fisheye Views .....	415
Algorithm 9: Multidimensional Dynamic Queries with Scatter Plot .....	417
Algorithm 10: Visual Monitoring Strategies .....	420
Conclusion .....	422
Appendix A <i>Changing Primaries</i> .....	425
Appendix B <i>CIE Color Measurement System</i> .....	427
Appendix C <i>The Perceptual Evaluation of Visualization Techniques and Systems</i> .....	431
Research Goals .....	431
Psychophysics .....	433
<i>Detection Methods</i> .....	434
<i>Method of Adjustment</i> .....	435
Cognitive Psychology .....	435
Structural Analysis .....	436
<i>Testbench Applications for Discovery</i> .....	436
<i>Structured Interviews</i> .....	437
<i>Rating Scales</i> .....	438
Statistical Exploration .....	438
<i>Principal Components Analysis</i> .....	438
<i>Multidimensional Scaling</i> .....	439
<i>Clustering</i> .....	439
<i>Multiple Regression</i> .....	439
Cross-Cultural Studies .....	439
Child Studies .....	440
Practical Problems in Conducting User Studies .....	440
<i>Experimenter Bias</i> .....	440
<i>How Many Subjects to Use?</i> .....	441
<i>Combinatorial Explosion</i> .....	442

*Task Identification* ..... 442

*Controls*..... 443

*Getting Help* ..... 443

Appendix D *Guidelines* ..... 445

*Bibliography*..... 459

*Index* ..... 497
