

Metal Amide Chemistry

MICHAEL LAPPERT AND ANDREY PROTCHENKO

Department of Chemistry and Biochemistry, University of Sussex, UK

PHILIP POWER AND ALEXANDRA SEEBER

Department of Chemistry, University of California at Davis, USA

A John Wiley and Sons, Ltd, Publication

Contents

Biographies	xi
Preface	xiii
1 Introduction	1
1.1 Scope and Organisation of Subject Matter	1
1.2 Developments and Perspectives	2
2 Alkali Metal Amides	7
2.1 Introduction	7
2.2 Lithium Amides	8
2.2.1 Introduction	8
2.2.2 Monomeric Lithium Amides	9
2.2.3 Dimeric Lithium Amides	11
2.2.4 Trimeric Lithium Amides	13
2.2.5 Tetrameric Lithium Amides	14
2.2.6 Higher Aggregate Lithium Amides	15
2.2.7 Laddering	17
2.2.8 Heterometallic Derivatives	18
2.3 Sodium Amides	20
2.3.1 Introduction	20
2.3.2 Monomeric and Dimeric Sodium Amides	21
2.3.3 Higher Aggregate Sodium Amides	22
2.3.4 Heterometallic Sodium Amides	23
2.4 Potassium Amides	25
2.4.1 Introduction	25
2.4.2 Potassium Parent Amides ($\bar{\text{N}}\text{H}_2$ as Ligand)	25
2.4.3 Potassium Primary and Secondary Amides	26
2.4.4 Heterometallic Potassium Amides	26
2.5 Rubidium Amides	28
2.6 Caesium Amides	30
References	31
3 Beryllium and the Alkaline Earth Metal Amides	39
3.1 Introduction	39
3.2 Beryllium Amides	40

3.3	Magnesium Amides	43
3.3.1	Introduction	43
3.3.2	Monomeric Magnesium Amides	45
3.3.3	Dimeric Magnesium Amides	48
3.3.4	Higher Aggregates and Related Magnesium Amides	51
3.3.5	Heterometallic Magnesium Amides	52
3.3.6	Magnesium Inverse Crown Complexes	56
3.3.7	Magnesium Imides	59
3.4	Calcium Amides	60
3.4.1	Introduction	60
3.4.2	Monomeric Calcium Amides	60
3.4.3	Dimeric Calcium Amides and Higher Aggregates	63
3.4.4	Heterometallic Calcium Amide Derivatives	64
3.5	Strontium Amides	65
3.5.1	Introduction	65
3.5.2	Monomeric Strontium Amides	67
3.5.3	Higher Aggregate Strontium Amides	68
3.6	Barium Amides	69
3.6.1	Introduction	69
3.6.2	Monomeric Barium Amides	69
3.6.3	Dimeric Barium Amides	70
3.6.4	Heterometallic Barium Amides	70
	References	72
4	Amides of the Group 3 and Lanthanide Metals	79
4.1	Introduction	79
4.2	The Pre-1996 Literature: Anwander's Review	81
4.2.1	Introduction	81
4.2.2	Ln ^{III} Complexes with <i>N</i> -Hydrocarbyl-Amido Ligands	81
4.2.3	Ln ^{III} Complexes having Silylamido Ligands	81
4.2.4	Bis(Trimethylsilyl)Amido-Ln ^{II} Complexes and a Ce ^{IV} Analogue	82
4.2.5	Ln ^{III} Complexes having Donor-Functionalised Amido Ligands	83
4.2.6	Ln Amides as Precursors for Ln Coordination or Organometallic Compounds	85
4.2.7	Applications as Materials or Catalysts	85
4.3	The Recent (Post-1995) Literature	86
4.3.1	Introduction	86
4.3.2	Ln ^{III} Complexes with <i>N</i> -Hydrocarbyl Substituted Ligands	86
4.3.3	Ln ^{III} Complexes having Silylamido Ligands	87
4.3.4	Ln ^{II} and Ce ^{IV} Amides	90
4.3.5	Ln Complexes having Donor-Functionalised Amido Ligands	93

4.3.6	Ln Amides as Precursors for Ln Coordination or Organometallic Compounds	104
4.3.7	Applications as Materials or Catalysts	110
4.3.8	Ln Complexes having 1,4-Disubstituted-1,4-Diazabutadiene Ligands, R ₂ -DAD	111
	References	113
5	Amides of the Actinide Metals	121
5.1	Introduction	121
5.2	Neutral Amidouranium(IV) and Thorium(IV) Complexes	122
5.2.1	Introduction	122
5.2.2	Hydrocarbylamido-An ^{IV} Compounds Free of π -Centred Ligands	123
5.2.3	Silylamido-An ^{IV} Compounds Free of π -Centred Ligands	127
5.2.4	An ^{IV} Amides Containing π -Centred Co-ligands	131
5.3	Neutral U ^{III} Amides	135
5.4	Neutral Mixed Valence (U ^{III} /U ^{IV}), U ^{II} , U ^V and U ^{VI} Amides	136
5.5	Amidouranates	139
5.6	Amidouranium Tetraphenylborates	141
	References	144
6	Amides of the Transition Metals	149
6.1	Introduction	149
6.2	Transition Metal Derivatives of Monodentate Amides	150
6.2.1	Overview	150
6.2.2	Synthesis	162
6.2.3	Structure and Bonding	164
6.2.4	Parent Amido (-NH ₂) Derivatives	167
6.2.5	Low-coordinate Transition Metal Amides	170
6.2.6	'Two-sided' Amido Ligands	173
6.3	Transition Metal Complexes of Polydentate Amido Ligands	178
6.3.1	Introduction	178
6.3.2	Amido Phosphine Ligands	179
6.3.3	Multidentate Podand Ligands	180
6.4	Other Chelating Amido Ligands	184
	References	186
7	Amides of Zinc, Cadmium and Mercury	205
7.1	Introduction	205
7.2	Neutral Homoleptic Zinc, Cadmium and Mercury Amides	206
7.3	Ionic Metal Amides	208
7.3.1	Amidometallates	208
7.3.2	Zincation Mediated by Amidozinc Complexes	208
7.3.3	Other Ionic Group 12 Metal Amido Salts	211

7.4	Lewis Base Complexes, Chelated Metal Amides and Heteroleptic Amido Complexes	212
	References	214
8	Amides of the Group 13 Metals	219
8.1	Introduction	219
8.1.1	Synthesis	220
8.1.2	M–N Bonding (M = Al, Ga, In or Tl)	220
8.1.3	Multiple Character in M–N (M = Al – Tl) Bonds	221
8.2	Aluminium Amides	221
8.2.1	Aluminium Parent Amides (NH_2^- as Ligand)	221
8.2.2	Monomeric Aluminium Amides	223
8.2.3	Dimeric Aluminium Amides	226
8.2.4	Higher Aggregate Aluminium Amides	228
8.2.5	Heterometallic Aluminium Amides	230
8.2.6	Aluminium Imides (Iminoalanes)	232
8.2.7	Aluminium(I) Amides	235
8.3	Gallium Amides	236
8.3.1	Introduction	236
8.3.2	Monomeric Gallium Amides	237
8.3.3	Associated Gallium Amides	238
8.3.4	Heterometallic Gallium Amides	239
8.3.5	Iminogallanes (Gallium Imides)	240
8.3.6	Gallium Amides in Low (<+3) Oxidation States	242
8.4	Indium Amides	242
8.4.1	Introduction	242
8.4.2	Monomeric Indium(III) Amides	242
8.4.3	Associated Indium Amides	243
8.4.4	Heterometallic Indium Amides	245
8.4.5	Iminoindanes (Indium Imides)	245
8.4.6	Indium Amides in Oxidation States <+3	247
8.5	Thallium Amides	248
8.5.1	Introduction	248
8.5.2	Thallium(I) Amides	248
8.5.3	Thallium(III) Derivatives	251
8.5.4	Thallium Amides in Mixed Oxidation States	251
8.5.5	Heterometallic Derivatives	252
	References	253
9	Subvalent Amides of Silicon and the Group 14 Metals	263
9.1	Introduction	263
9.2	Subvalent Amidosilicon Compounds	264
9.2.1	Introduction	264
9.2.2	Bis(amino)silylenes: Pre-2001	265

9.2.3	Bis(amino)silylenes: 2001–2004	266
9.2.4	Bis(amino)silylenes: Post-2004	271
9.3	Amidometal(II) Chemistry [Ge(II), Sn(II), Pb(II)]	279
9.3.1	Introduction	279
9.3.2	Homoleptic Metal(II) Amides: Synthesis, Structures and Physical Properties	279
9.3.3	Protonolyses of Homoleptic Metal(II) Amides	287
9.3.4	Heteroleptic Metal(II) Amides	290
9.3.5	Metathetical Exchange Reactions	295
9.3.6	Reactions with Heterocumulenes	297
9.3.7	Oligomeric Metal(II) Imides	298
9.3.8	Metal(II) Amides based on 1,4-Diazabutadienes or a Related Compound	298
9.3.9	Oxidative Addition and Redox Reactions	299
9.3.10	Reactions with Transition Metal Complexes	306
9.4	Dimeric Metal(III) Imides: Biradicaloid Compounds	312
9.5	Higher-Nuclearity Group 14 Metalloid Clusters having Amido Ligands	316
	References	318
10	Amides of the Group 15 Metals (As, Sb, Bi)	327
10.1	Introduction	327
10.2	Mononuclear Group 15 Metal(III) Amides	329
10.2.1	Introduction	329
10.2.2	Synthesis, Structures and Protolyses of Metal(III) Amides	329
10.2.3	Synthesis, Structures and Reactions of Heteroleptic Mononuclear Bis(amido) Metal(III) Compounds	330
10.2.4	Synthesis, Structures and Reactions of Heteroleptic Mononuclear Amidometal(III) Compounds	333
10.2.5	Bis(amido)Metal(III) Salts	334
10.3	Oligomeric Group 15 Metal Imides	338
10.3.1	Binuclear and Oligomeric Group 15 Metal(III) Imides	339
10.3.2	Binuclear Group 15 Metal(V) Imides	342
10.4	Mononuclear Group 15 Metal(V) Amides	343
10.5	Group 15 Metal(III) Macrocyclic Imides	344
10.6	Miscellaneous Group 15 Metal-Nitrogen Compounds	345
	References	347
	Index	351
