

ISSUE

Aging, Cancer, and Age-Related Diseases
Common Mechanisms?

ISSUE EDITOR

Robert M. Tanguay

This volume presents manuscripts stemming from the 13th Congress of the International Association of Biomedical Gerontology entitled "Aging, Cancer, and Age-Related Diseases: Common Mechanisms?" held on May 18–20, 2009 in Quebec City, Quebec, Canada.

TABLE OF CONTENTS

vii Introduction to *Aging, Cancer, and Age-related Diseases*
Daniel P. Perry

1 Why aging research? The moral imperative to retard human aging
Colin Farrelly

Aging model systems

9 Age-related behavioral changes in *Drosophila*
Konstantin G. Iliadi and Gabrielle L. Boulianne

19 A screen for genes involved in respiration control and longevity in
Schizosaccharomyces pombe
Antoine E. Roux, Geneviève Arseneault, Pascal Chartrand, Gerardo Ferbeyre, and Luis A. Rokeach

Metabolic interventions

28 Targeting the age-related occurrence, removal, and accumulation of molecular
damage by hormesis
Suresh I. S. Rattan

33 Biological significance of protein modifications in aging and calorie restriction
Akihiro Nakamura, Kyojiro Kawakami, Fuyuki Kametani, Hideko Nakamoto, and Sataro Goto

40 Ascorbate improves metabolic abnormalities in *Wrn* mutant mice but not the
free radical scavenger catechin
Michel Lebel, Laurent Massip, Chantal Garand, and Eric Thorin

TABLE OF CONTENTS, CONTINUED

- 45** Evaluating the role of p38 MAP kinase in growth of Werner syndrome fibroblasts
Terence Davis, Marcus A. Bachler, Fiona S. Wyllie, Mark C. Bagley, and David Kipling
- 49** Decreasing the aging velocity in industry workers
Ülo Kristjuhan

Protein quality control and folding

- 54** Mitochondrial pathways governing stress resistance, life, and death in the fungal aging model *Podospora anserina*
Heinz D. Osiewacz, Diana Brust, Andrea Hamann, Birgit Kunstmann, Karin Luce, Mathis Müller-Ohldach, Christian Q. Scheckhuber, Jörg Servos, and Ingmar Strobel
- 67** Protection from aging by small chaperones: A trade-off with cancer?
Geneviève Morrow, Hyun-Ju Kim, Marie Le Pécheur, Sunil C. Kaul, Renu Wadhwa, and Robert M. Tanguay
- 76** HSPB1, actin filament dynamics, and aging cells
Bindi M. Doshi, Lawrence E. Hightower, and Juliet Lee
- 85** Chaperonopathies of senescence and the scrambling of interactions between the chaperoning and the immune systems
Alberto J. L. Macario, Francesco Cappello, Giovanni Zummo, and Everly Conway de Macario
- 94** Exogenous mammalian extracellular HSP70 reduces endotoxin manifestations at the cellular and organism levels
Elena Rozhkova, Marina Yurinskaya, Olga Zatsepina, David Garbuz, Vadim Karpov, Sergei Surkov, Arkady Murashev, Vladimir Ostrov, Boris Margulis, Mikhail Evgenèv, and Maxim Vinokurov

Cellular damage

- 108** Cellular aging and centrosome aberrations
Susumu Ohshima and Atsushi Seyama
- 118** Synchronization of posttranslational modifications during aging: time is a crucial biological dimension
André Schrattenholz, Vukić Šoškić, and Karlfried Groebe

Aging, senescence, and cancer

- 129** Molecular bridging of aging and cancer: a CARF link
Caroline T. Cheung, Sunil C. Kaul, and Renu Wadhwa
- 134** Emerging role of the MORF/MRG gene family in various biological processes, including aging
Meizhen Chen, Kaoru Tominaga, and Olivia M. Pereira-Smith

TABLE OF CONTENTS, CONTINUED

- 142** Transcriptome analysis and tumor suppressor requirements of STAT5-induced senescence
Frédéric A. Mallette, Olga Moiseeva, Viviane Calabrese, Botum Mao, Marie-France Gaumont-Leclerc, and Gerardo Ferbeyre
- 152** Major heat shock protein Hsp72 controls oncogene-induced senescence
Michael Sherman
- 158** Potential role of immunosenescence in cancer development
Tamas Fulop, Rami Kotb, Carl F. Fortin, Graham Pawelec, Flavia de Angelis, and Anis Larbi

Aging therapies

- 166** Tissue engineering of skin and cornea: development of new models for *in vitro* studies
Claudie Paquet, Danielle Larouche, Francis Bisson, Stéphanie Proulx, Carolyne Simard-Bisson, Manon Gaudreault, Hubert Robitaille, Patrick Carrier, Israël Martel, Louise Duranceau, François A. Auger, Julie Fradette, Sylvain L. Guérin, and Lucie Germain
- 178** Hyperbaric oxygen treatment induces antioxidant gene expression
Cassandra A. Godman, Rashmi Joshi, Charles Giardina, George Perdrizet, and Lawrence E. Hightower
- 184** Longevity health sciences and mental health as future medicine
Sorin Riga, Dan Riga, Alexandra Mihailescu, Daniela Motoc, Liana Mos, and Francisc Schneider
- 188** The marvel of percutaneous cardiovascular devices in the elderly
Robert Guidoin, Yvan Douville, Marie-Annick Clavel, Ze Zhang, Mark Nutley, Philippe Pibarot, and Guy Dionne
