Boston, Massachusetts
2009*

Hematopoietic Stem Cells VII

Editors

LOTHAR KANZ, KATJA C. WEISEL, JOHN E. DICK, AND WILLEM E. FIBBE

This volume presents manuscripts stemming from the conference entitled "Hematopoietic Stem Cells VII," held in Meersburg, Lake Constance, Germany on September 18–20, 2008.

CONTENTS

International Symposium and Workshop on Hematopoietic Stem Cells VII, University of Tübingen, Germany, September 18–20, 2008. <i>By</i> Katja C. Weisel, John Dick, Willem E. Fibbe, and Lothar Kanz	1
--	---

Part I. Stem Cell Hierachy and Niche

Lymphoid Lineage Fate Decision of Hematopoietic Stem Cells. <i>By</i> Koichi Akashi	18
Genetic Models to Study Quiescent Stem Cells and Their Niches. <i>By</i> Christoph Schaniel and Kateri A. Moore	26
Niche Regulation of Hematopoietic Stem Cells in the Endosteum: The Role of Thrombopoietin/Mpl Signaling in the Maintenance of Quiescent Hematopoietic Stem Cells. <i>By</i> Fumio Arai, Hiroki Yoshihara, Kentaro Hosokawa, Yuka Nakamura, Yumiko Gomei, Hiroko Iwasaki, and Toshio Suda	36
Functional Heterogeneity of the Bone Marrow Vascular Niche. <i>By</i> Hans-Georg Kopp, Andrea T. Hooper, Scott T. Avecilla, and Shahin Rafii	47

Part II. Stem Cell Regulation

Complex and Context Dependent Regulation of Hematopoiesis by TGF- β Superfamily Signaling. <i>By</i> Sofie Singbrant Söderberg, Göran Karlsson, and Stefan Karlsson	55
WNT Proteins: Environmental Factors Regulating HSC Fate in the Niche. <i>By</i> Tiago C. Luis and Frank J.T. Staal	70
Removal of the Spleen in Mice Alters the Cytokine Expression Profile of the Marrow Micro-environment and Increases Bone Formation. <i>By</i> Fabrizio Martelli, Maria Verrucci, Giovanni Migliaccio, Maria Zingariello, Rosa Alba Rana, Alessandro Maria Vannucchi, and Anna Rita Migliaccio	77

Novel Trafficking Routes for Hematopoietic Stem and Progenitor Cells. <i>By</i> Steffen Massberg and Ulrich H. von Andrian	87
Dysregulation of Myeloid-specific Transcription Factors in Congenital Neutropenia: Rescue by NAMPT/NAD ⁺ /SIRT1. <i>By</i> Julia Skokowa and Karl Welte	94

Part III. Mesenchymal Stem Cells

Mesenchymal Stromal Cells: A Novel Treatment Modality for Tissue Repair. <i>By</i> Maria Ester Bernardo, Franco Locatelli, and Willem E. Fibbe	101
Perivascular Multipotent Progenitor Cells in Human Organs. <i>By</i> Mihaela Crisan, Chien-Wen Chen, Mirko Corselli, Gabriella Andriolo, Lorenza Lazzari, and Bruno P��ault	118
Phenotypic Characterization of Distinct Human Bone Marrow-Derived MSC Subsets. <i>By</i> Hans-J��rg B��hring, Sabrina Treml, Flavianna Cerabona, Peter de Zwart, Lothar Kanz, and Malgorzata Sobiesiak	124
<i>In vitro</i> Myogenic Differentiation of Human Bone Marrow-Derived Mesenchymal Stem Cells as a Potential Treatment for Urethral Sphincter Muscle Repair. <i>By</i> Adriana C. Drost, Sibylle Weng, Gerhard Feil, Jochen Sch��fer, Simon Baumann, Lothar Kanz, Karl-Dietrich Sievert, Arnulf Stenzl, and Robert M��hle	135

Part IV. Malignant Hematopoiesis and Cancer Stem Cells

Transformation from Committed Progenitor to Leukemia Stem Cells. <i>By</i> Andrei V. Krivtsov, Zhaohui Feng, and Scott A. Armstrong	144
The Role of PLZF in Human Myeloid Development. <i>By</i> John E. Dick and Sergei Doulatov	150
Antitumor Immunity and Cancer Stem Cells. <i>By</i> Tobias Schatton and Markus H. Frank	154
Natural Genetic Diversity as a Means to Uncover Stem Cell Regulatory Pathways. <i>By</i> Gary Van Zant and Ying Liang	170

Part V. Aging

Short Telomeres Resulting from Heritable Mutations in the Telomerase Reverse Transcriptase Gene Predispose for a Variety of Malignancies. <i>By</i> Mark Hills and Peter M. Lansdorp	178
--	-----

Part VI. Pluripotency

Disease Models from Pluripotent Stem Cells: Turning Back Time in Disease Pathogenesis? <i>By</i> Claudia Lengerke and George Q. Daley	191
Tumors Originating from Induced Pluripotent Stem Cells and Methods for Their Prevention. <i>By</i> Dirk Duinsbergen, Daniela Salvatori, Malin Eriksson, and Harald Mikkers	197
Fetal Liver Very Small Embryonic/Epiblast Like Stem Cells Follow Developmental Migratory Pathway of Hematopoietic Stem Cells. <i>By</i> Ewa K. Zuba-Surma, Magda Kucia, Liu Rui, Dong-Myung Shin, Wojtek Wojakowski, Janina Ratajczak, and Mariusz Z. Ratajczak	205

Hematopoietic Development from Human Induced Pluripotent Stem Cells.
By Claudia Lengerke, Matthias Grauer, Nina I. Niebuhr, Tamara Riedt,
Lothar Kanz, In-Hyun Park, and George Q. Daley 219
