**Classification of Services in the
Digital Economy**

Contents

Preface	III
Bibliography	IX
Abbreviations	XV
Figures and Tables	XVII
Chapter I:	
IT services, telecommunications and new media in a converging era	1
1. Overview of services in the information economy	2
2. Overview of the WTO legal framework	3
2.1 Notion of “services”	3
2.2 Modes of services supply	5
2.3 Disciplines	6
2.4 General limitations of liberalization	8
a) Domestic regulation	8
b) Exceptions	9
2.5 Preferential trade agreements	10
3. Challenges for policy makers/regulators and trade negotiators	13
3.1 Outdated classifications	13
3.2 Teleological interpretation of classification terms	14
3.3 Likeness aspects	15
3.4 Interim conclusion	16
Chapter II:	
Overview of services classifications and the role of services classifications	17
1. Available classification regimes	17
1.1 W/120	17
1.2 CPC	17
1.3 OECD	21
1.4 MSITS	22
1.5 EBOPS	23
1.6 BPM6	24
1.7 SNA	25
1.8 ISIC	26
1.9 Interim assessment	29

2. Definition of service, supply of service, service suppliers, service consumer, services classification	29
2.1 Service	29
2.2 Supply of service	33
2.3 Service suppliers	36
2.4 Service consumer	36
2.5 Services classification	36
2.6 Digital products	37
3. WTO classifications as foundation and later development of other classifications	38
3.1 Sectoral Classification List (W/120)	38
3.2 Central Product Classification (CPC)	38
3.3 Classifications in new PTAs	38
3.4 Other classifications	40
4. Methodology for services classification from different points of view	43
4.1 Basic principles of methodology	43
4.2 Classification for statistical and market/industry planning purposes	45
4.3 Policy- and rulemaking	46
4.4 Trade in services negotiations	49
Chapter III:	
ICT services classification	51
1. Computer and communications services in general	51
2. IT (computer-related) services classification	54
2.1 Factual background	54
2.2 Ongoing discussions	55
2.3 Possible alternatives in the era of technological convergence	57
2.4 Interim assessment	60
3. Telecommunications services classification	61
3.1 Legal framework	61
a) Annex on Telecommunications	61
b) Agreement on Basic Telecommunications	64
c) The Reference Paper	65
3.2 Particular characteristics of telecommunications services classification	67
3.3 Outdated telecommunications services classification	73
a) Basic versus value-added telecommunications services	73
b) Blurring of horizontal sectoral boundaries	74
c) Technological neutrality	75
3.4 New and emerging regulatory issues related to telecommunications services	77

4. Audiovisual services classification	81
4.1 Audiovisual services: The current state of affairs	82
4.2 Audiovisual services: Evolution of the classification negotiations	87
a) At the multilateral level	87
b) Developments in PTAs	90
5. Methodology for classification in overlapping areas	91
5.1 Basic methodologies in case of services with overlapping classifications	91
a) Introduction	91
b) General elements of a methodological approach	92
c) Assessment of existing documentations	94
5.2 Country case studies	96
a) The European Union	96
b) The United States	103
c) China	108
5.3 Case studies of specific issues	115
a) Social networks	115
b) Internet telephony	119
c) Video-on-demand	121
 Chapter IV:	
Conclusions	125
1. Methodological and conceptual issues	125
2. Problems with not flexible GATS classifications	126
3. Elements of choice in making classifications decisions	126
 Appendix:	
Justification of trade restricting rules (Article XIV GATS)	129
A. Contents of Article XIV GATS	129
B. Public interest justifications	130
1. Public morals and public order	131
2. GATS consistent laws	132
C. General requirements	133
1. Necessity test	133
2. Chapeau of Article XIV GATS	134
