

High Temperature Coatings

Second Edition

Sudhangshu Bose

*Retired Fellow, Pratt & Whitney, East Hartford
Connecticut, Retired Professor of Practice
Rensselaer Polytechnic Institute, Department
of Mechanical Engineering, Troy, New York*

Contents

|--|-----------|
| About the Author..... | xiii |
| Preface to the Second Edition..... | xv |
| Preface to the First Edition..... | xvii |
| CHAPTER 1 Introduction..... | 1 |
| 1.1 High-Temperature Environment..... | 1 |
| References..... | 6 |
| CHAPTER 2 Fundamental Concepts..... | 7 |
| 2.1 Thermodynamic Concepts..... | 7 |
| Thermodynamic Systems..... | 7 |
| Laws of Thermodynamics..... | 10 |
| Carnot Engine..... | 10 |
| Steady Flow Energy Equation and Bernoulli's Theorem..... | 11 |
| Equilibrium Constant..... | 11 |
| Activity Coefficient..... | 12 |
| Partial Pressure..... | 13 |
| Ionization..... | 13 |
| Combustion..... | 13 |
| 2.2 Concept of Kinetics..... | 13 |
| Activation Energy..... | 14 |
| Diffusion..... | 15 |
| 2.3 Crystal Structure..... | 18 |
| Defects in Crystals..... | 18 |
| Crystal Structure of Nonmetallic Materials..... | 21 |
| 2.4 Equilibrium Phases..... | 21 |
| Binary Phase Diagram..... | 22 |
| Ternary Phase Diagram..... | 23 |
| 2.5 Mechanical Behavior..... | 25 |
| Creep..... | 25 |
| Fatigue..... | 26 |
| References..... | 27 |
| CHAPTER 3 Substrate Alloys..... | 29 |
| 3.1 Temperature Capability of Metals, Alloys, Intermetallics, Ceramics, and Composites..... | 29 |
| 3.2 Strengthening Mechanisms..... | 29 |
| 3.3 Titanium Alloys..... | 31 |
| 3.4 Steels..... | 34 |

| | | |
|------------------|--|-----------|
| 3.5 | Nickel–Iron Alloys | 37 |
| 3.6 | Nickel and Cobalt Base Superalloys | 37 |
| 3.7 | Ceramics, Refractory Intermetallics, and Composites..... | 41 |
| 3.8 | Need for Coatings | 42 |
| | References..... | 42 |
| CHAPTER 4 | Oxidation..... | 45 |
| 4.1 | Oxidation Process..... | 45 |
| | Temperature Effects | 45 |
| | Composition Effects..... | 49 |
| | Kinetics of Oxidation | 49 |
| | Oxide Scale Protectiveness..... | 50 |
| 4.2 | Oxidation Testing and Evaluation..... | 50 |
| | Oxidation Rates..... | 50 |
| | Parabolic Growth..... | 53 |
| | Linear Growth..... | 54 |
| | Logarithmic Growth..... | 55 |
| | Breakaway Oxidation | 55 |
| 4.3 | Oxidation of Alloys | 59 |
| | Binary Alloy Systems..... | 60 |
| | Ternary and Multicomponent Alloy Systems | 61 |
| 4.4 | Roles of Specific Alloying Constituents | 65 |
| | Aluminum..... | 65 |
| | Chromium..... | 65 |
| | Cobalt..... | 65 |
| | Silicon..... | 65 |
| | Boron | 65 |
| | Titanium | 66 |
| | Manganese | 66 |
| | Tantalum, Molybdenum, and Tungsten..... | 66 |
| | Oxygen Reactive Elements..... | 66 |
| | Rhenium/Ruthenium | 68 |
| | Reduction of Sulfur Level..... | 68 |
| 4.5 | Oxidation in the Presence of Water Vapor..... | 69 |
| 4.6 | Oxidation of Polycrystalline Versus Single-Crystal Alloys..... | 69 |
| 4.7 | Oxidation of Intermetallic γ TiAl..... | 70 |
| | References..... | 71 |
| CHAPTER 5 | High-Temperature Corrosion..... | 73 |
| 5.1 | Hot Corrosion Processes..... | 73 |
| | The Corroding Salts | 76 |
| | Acid and Base Characteristics of the Salts | 78 |

| | | |
|------------------|--|-----------|
| 5.2 | Hot Corrosion of Metals and Alloys | 81 |
| | Solubility of Oxides in Molten Salts | 81 |
| | Mechanism of Sustained Hot Corrosion..... | 81 |
| | Role of Vanadium..... | 82 |
| 5.3 | Role of Specific Alloying Elements in Hot Corrosion | |
| | of Ni- and Co-Based Alloys and Coatings | 84 |
| | Chromium..... | 84 |
| | Nickel and Cobalt..... | 86 |
| | Silicon..... | 86 |
| | Tungsten and Molybdenum | 86 |
| | Vanadium..... | 87 |
| | Titanium | 87 |
| | Rare Earth Elements | 87 |
| | Platinum | 87 |
| 5.4 | Influence of Other Contaminants..... | 88 |
| | Presence of Carbon..... | 88 |
| | Presence of Chlorides..... | 89 |
| | Hot Corrosion Effects of Biofuels..... | 90 |
| 5.5 | Hot Corrosion of Thermal Barrier Coatings | 90 |
| 5.6 | Hot Corrosion-Like Degradation | 91 |
| | Stress Corrosion Cracking..... | 92 |
| | Influence of Hot Corrosion on Low Cycle Fatigue Life | 93 |
| | References..... | 94 |
| CHAPTER 6 | Oxidation- and Corrosion-Resistant Coatings..... | 97 |
| 6.1 | Requirements for Metallic Coatings..... | 97 |
| | Coating Constituents and Their Role..... | 98 |
| 6.2 | Coating Processes..... | 99 |
| 6.3 | Diffusion Coatings..... | 99 |
| | Pack Coatings | 100 |
| | Chemical Vapor Deposition..... | 111 |
| | Role of Reactive Elements in Diffusion Coatings..... | 113 |
| | Microstructure of Platinum Aluminides | 113 |
| | Manufacturing Aspects of the Coating Process | 115 |
| | Commercial Diffusion Coatings | 116 |
| | Coating—Substrate Interdiffusion Effects | 116 |
| | Coating Phase Stability..... | 120 |
| | Oxidation Resistance of Diffusion Coatings | 122 |
| | Corrosion Resistance of Diffusion Coatings | 124 |
| | Mechanical Properties of Platinum Aluminides..... | 125 |
| 6.4 | Overlay Coatings..... | 125 |

| | | |
|------------|---|-----|
| 6.5 | Overlay Coatings by Spray and Arc Processes..... | 127 |
| | Beta–Gamma System Phase Stability | 127 |
| | Spray Coatings..... | 129 |
| | Low-Pressure Plasma Spray Coating Deposition Profile and Microstructure..... | 145 |
| | Arc Process | 147 |
| | Coating–Substrate Diffusion Effects..... | 150 |
| | Commercial Overlay Coatings | 153 |
| 6.6 | Overlay Coatings by Physical Vapor Deposition | 153 |
| | Sputtering..... | 154 |
| | Ion Plating..... | 158 |
| | Ion Implantation..... | 158 |
| | Electron Beam Physical Vapor Deposition | 158 |
| | Microstructure of Coatings..... | 159 |
| | Mechanical Properties of Coatings and Coated Materials..... | 160 |
| 6.7 | Relative Oxidation and Corrosion Resistance of Coatings..... | 174 |
| | Oxidation Resistance..... | 174 |
| | Corrosion Resistance..... | 176 |
| 6.8 | Modeling of Oxidation and Corrosion Life | 177 |
| | Oxidation Life of Superalloys and Metallic Coatings | 177 |
| | Hot Corrosion Life of Superalloys and Coatings | 182 |
| 6.9 | Interaction of Erosion–Oxidation and Erosion–Corrosion.... | 190 |
| | References..... | 190 |

CHAPTER 7 Thermal Barrier Coatings (TBCs)..... 199

| | | |
|------------|--|-----|
| 7.1 | Temperature Reduction by Thermal Barrier Coatings | 200 |
| | Magnitude of Temperature Reduction..... | 201 |
| | The Benefits of Thermal Barrier Coating | 202 |
| 7.2 | Materials Requirement for Thermal Barrier Coatings..... | 203 |
| 7.3 | Partially Stabilized Zirconia..... | 204 |
| 7.4 | Plasma-Sprayed Thermal Barrier Coatings..... | 207 |
| | The Plasma Spray Process..... | 207 |
| | Online Process Monitoring | 209 |
| | Microstructure of Plasma-Sprayed Thermal Barrier Coating... | 211 |
| | Microstructure Development and Structure–Property Relationship..... | 212 |
| | Residual Stresses..... | 225 |
| | Role of Thermally Grown Oxide | 226 |
| | Structural Properties..... | 226 |
| | Plasma Thermal Barrier Coating Durability..... | 228 |
| | Non-line-of-sight Coating Deposition: Sol–Gel Process..... | 236 |

7.5 Electron Beam Physical Vapor Deposited Thermal Barrier
 Coatings 237
 Why Electron Beam.....237
 Processing.....237
 Microstructure Formation.....242
 Thermally Grown Oxide247
 EB-PVD Thermal Barrier Coating Degradation Modes
 and Locations250
 Role of Residual Stress.....260
 Roles of Oxygen Reactive Elements266
 Bond Strength.....266
 Structural Properties.....268
 Oxidation and Thermocyclic Behavior271
 Failure Mechanisms and Life Modeling.....271
 Thermal Properties of Thermal Barrier Coating279
7.6 Environmental Barrier Coatings 289
 References..... 290

CHAPTER 8 Nondestructive Inspection (NDI) of Coatings 301

8.1 Nondestructive Inspection Techniques..... 301
 Fluorescent Penetrant Inspection302
 Ultrasonic Inspection.....303
 Eddy Current304
 Infrared Imaging.....305
 Acoustic Emission306
 Photoacoustic Technique.....307
 Midinfrared Reflectance.....308
 Electrochemical Impedance Spectroscopy308
 Photoluminescence Piezospectroscopy.....309
 Interferometric Techniques313
 References..... 316

CHAPTER 9 Coatings Repair 319

9.1 Limits to Coatings Repair..... 319
9.2 The Repair Process..... 320
 Removal of Ceramic Coatings.....322
 Removal of Metallic Coatings.....323
9.3 Recoating and Material Restoration..... 323
 Microplasma Sprayed Ceramic Coating Restoration.....323
 Sol–Gel Process for Ceramic Coating Restoration323
 Coupon Repair.....323
 References..... 324

| | | |
|-------------------|--|------------|
| CHAPTER 10 | Field and Simulated Field Experience | 327 |
| 10.1 | Gas Turbine Engine Application | 327 |
| | Metallic Coatings | 327 |
| | Thermal Barrier Coating | 340 |
| 10.2 | Other Applications..... | 347 |
| | Coal Gasification Combined Cycle Power Plant..... | 347 |
| | Fast Breeder Reactors..... | 348 |
| | Waste to Energy Plants..... | 349 |
| | Diesel Engines | 349 |
| 10.3 | New Field Observations on Gas Turbine Engine | |
| | Hot Section Parts..... | 350 |
| | Internal Hot Corrosion..... | 351 |
| | Underplatform Pitting Hot Corrosion | 352 |
| | CMAS Attack of TBC-Coated Turbine Blade and Blade Outer Air Seal..... | 352 |
| | References..... | 354 |
| | Appendix | 359 |
| | Author Index | 369 |
| | Subject Index..... | 379 |
