Contents

Preface to the First Edition xxvii
Preface to the Second Edition xxix

CHAPTER 1 A New Beginning 1
Multivariate Normal Distribution 3
Matrix Operations 7
References 8
Further Reading 8

SECTION 1 ELEMENTARY MATRIX ALGEBRA

CHAPTER 2 Elementary Matrix Algebra: Part 1 11
Matrix Operations 12
Matrix Addition 12
Subtraction 13
Matrix Multiplication 13
Matrix Division 13
Inverse of a Matrix 13
Transpose of a Matrix 14
Elementary Operations for Linear Equations 14
The Solution 16
Summary 17
References 17

CHAPTER 3 Elementary Matrix Algebra: Part 2 19
Elementary Matrix Operations 19
Calculating the Inverse of a Matrix 21
Summary 22
References 23

SECTION 2 MATRIX ALGEBRA AND MULTIPLE LINEAR REGRESSION

CHAPTER 4 Matrix Algebra and Multiple Linear Regression: Part 1 27
Quasialgebraic Operations 29
Multiple Linear Regression 31
The Least Squares Method 33
References 35

CHAPTER 5 Matrix Algebra and Multiple Linear Regression: Part 2 37
The Power of Matrix Mathematics 42
References 45

CHAPTER 6 Matrix Algebra and Multiple Linear Regression: Part 3—The Concept of Determinants 47
References 49

CHAPTER 7 Matrix Algebra and Multiple Linear Regression: Part 4—Concluding Remarks 51
A Word of Caution 52
Reference 53

SECTION 3 EXPERIMENTAL DESIGNS

CHAPTER 8 Experimental Designs, Part 1: Introduction 57
References 61

CHAPTER 9 Experimental Designs, Part 2: One-Way ANOVA 63
References 68

CHAPTER 10 Experimental Designs, Part 3: Two-Factor Designs 69

CHAPTER 11 Experimental Designs, Part 4: Varying Parameters to Expand the Design 77
Introduction to Factorial Designs 78
References 79

CHAPTER 12 Experimental Designs, Part 5: One-at-a-Time Designs 81
References 82

CHAPTER 13 Experimental Designs, Part 6: Sequential Designs 83
References 86

CHAPTER 14 Experimental Designs, Part 7: β, the Power of a Test 87
Reference 89

CHAPTER 15 Experimental Designs, Part 8: β, the Power of a Test (Continued) 91
Reference 92

CHAPTER 16 Experimental Designs, Part 9: Sequential Designs (Concluded) 93

SECTION 4 ANALYTIC GEOMETRY

CHAPTER 17 Analytic Geometry: Part 1—The Basics in Two and Three Dimensions 99
The Distance Formula 99
Direction Notation 100
The Cosine Function 101
Direction in 3D Space 102
Defining Slope in Two Dimensions 103
Recommended Reading 104

CHAPTER 18 Analytic Geometry: Part 2—Geometric Representation of Vectors and Algebraic Operations 105
Vector Multiplication (Scalar × Vector) 105
Vector Division (Vector ÷ Scalar) 106
Vector Addition (Vector + Vector) 106
Vector Subtraction (Vector − Vector) 106

CHAPTER 19 Analytic Geometry: Part 3—Reducing Dimensionality 109
Reducing Dimensionality 109
3D to 2D by Projection 109
2D Into 1D by Rotation 112

CHAPTER 20 Analytic Geometry: Part 4—The Geometry of Vectors and Matrices 113
Row Vectors in Column Space 113
Column Vectors in Row Space 114
Principal Components for Regression Vectors 115
Recommended Reading 116

SECTION 5 REGRESSION TECHNIQUES

CHAPTER 21 Calculating the Solution for Regression Techniques: Part 1—Multivariate Regression Made Simple 119
References 120

CHAPTER 22 Calculating the Solution for Regression Techniques: Part 2—Principal Component(s) Regression Made Simple 121
References 123

CHAPTER 23 Calculating the Solution for Regression Techniques: Part 3—Partial Least Squares Regression Made Simple 125
References 128

CHAPTER 24 Calculating the Solution for Regression Techniques: Part 4—Singular Value Decomposition 129
References 131

CHAPTER 25 Interlude: Looking Behind and Ahead 133
Reference 134

CHAPTER 26 A Simple Question 135
References 141

CHAPTER 27 Challenges: Unsolved Problems in Chemometrics 143
So What Are These Problems? 143

SECTION 6 LINEARITY IN CALIBRATION

CHAPTER 28 Linearity in Calibration—Act I 151

CHAPTER 29 Linearity in Calibration—Act II Scene I 157
References 160

CHAPTER 30 Linearity in Calibration—Act II Scene II: Reader Responses 161
Reference 164

CHAPTER 31 Linearity in Calibration—Act II Scene III 165
References 174

CHAPTER 32 Linearity in Calibration—Act II Scene IV 175
References 178

CHAPTER 33 Linearity in Calibration—Act II Scene V 179
References 182

SECTION 7 COLLABORATIVE LABORATORY STUDIES

CHAPTER 34 Collaborative Laboratory Studies: Part 1—A Blueprint 185
Experimental Design 186
Analytical Methods 191
Sample Collection and Handling 191
Method A and B Analysis 191
Results and Data Analysis 191
Comparing All Laboratories and All Methods for Precision and Accuracy 191
References 195

CHAPTER 35 Collaborative Laboratory Studies: Part 2—Using ANOVA 197
ANOVA Test Comparisons for Laboratories and Methods (ANOVA_s4 Worksheet) 197
ANOVA Test Comparisons (Using ANOVA_s2 Worksheet) 197
References 199

CHAPTER 36 Collaborative Laboratory Studies: Part 3—Testing for Systematic Error 201
Testing for Systematic Error in a Method: Comparison Test for a Set of Measurements Versus True Value—Spiked Recovery Method (Compare *T* Worksheet) 201
References 202

CHAPTER 37 Collaborative Laboratory Studies: Part 4—Ranking Test 203
Ranking Test for Laboratories and Methods (Manual Computations) 203
Reference 204

CHAPTER 38 Collaborative Laboratory Studies: Part 5—Efficient Comparison of Two Methods 205
Computations for Efficient Comparison of Two Methods (Comp_Meth Worksheet) 205
Measuring the Precision and Standard Deviation of the Methods (Youden/Steiner) 208
Summary 209
Acknowledgment 210
References 210

CHAPTER 39 Collaborative Laboratory Studies: Part 6—MathCad Worksheet Text 211
References 230

SECTION 8 ANALYSIS OF NOISE

CHAPTER 40 Is Noise Brought by the Stork? Analysis of Noise—Part 1 233
References 236

CHAPTER 41 Analysis of Noise—Part 2 237
Appendix: Proof That the Variance of a Sum Equals the Sum of the Variances 242
References 243

CHAPTER 42 Analysis of Noise—Part 3 245
References 251

CHAPTER 43 Analysis of Noise—Part 4 253
Reference 262

CHAPTER 44 Analysis of Noise—Part 5 263
Update 263
Continuation 264
References 269

CHAPTER 45 Analysis of Noise—Part 6 271

CHAPTER 46 Analysis of Noise—Part 7 277
Variation of the Reflectance Due to Noise 280
Noise of the KM Function 280
Expressing the Variations in Terms of Measured Energies 281
Passing Into the Statistical Domain 282
Optimizing the KM Function 284
Go to the Statistical Domain 285
Summary 287

CHAPTER 47 Analysis of Noise—Part 8 289
Effect of Noise on Computed Transmittance 291
Computed Transmittance Noise 293
Reference 295

CHAPTER 48 Analysis of Noise—Part 9 297
References 303

CHAPTER 49 Analysis of Noise—Part 10 305
Reference 309

CHAPTER 50 Analysis of Noise—Part 11 311
Discussion 320
Reference 322

CHAPTER 51 Analysis of Noise—Part 12 323

CHAPTER 52 Analysis of Noise—Part 13 327
References 331

CHAPTER 53 Analysis of Noise—Part 14 333
Reference 337

CHAPTER 54 Analysis of Noise—Part 15 339
Preliminary Steps 342
Evaluation of the Function 345
Noise 346
Reference 347

SECTION 9 DERIVATIVES

CHAPTER 55 Derivatives in Spectroscopy: Part 1—The Behavior of the Theoretical Derivative 351
The Behavior of Theoretical Derivatives 351
The Behavior of Computed Derivatives 356
References 361

CHAPTER 56 Derivatives in Spectroscopy: Part 2—The "True" Derivative 363
Better Derivative Approximations 365
References 369

CHAPTER 57 Derivatives in Spectroscopy: Part 3—Computing the Derivative (the Savitzky-Golay Method) 371
Methods of Computing the Derivative 373
Limitations of the Savitzky-Golay Method 375
Extensions to the Savitzky-Golay Method 377
References 381

CHAPTER 58 Derivatives in Spectroscopy: Part 4—Calibrating With Derivatives 383
Acknowledgment 390
References 390

CHAPTER 59 Corrections and Discussion Regarding Derivatives 391

SECTION 10 GOODNESS OF FIT STATISTICS

CHAPTER 60 Comparison of Goodness of Fit Statistics for Linear Regression: Part 1—Introduction 401
Reference 405

CHAPTER 61 Comparison of Goodness of Fit Statistics for Linear Regression: Part 2—The Correlation Coefficient 407
References 413

CHAPTER 62 Comparison of Goodness of Fit Statistics for Linear Regression: Part 3—Computing Confidence Limits for the Correlation Coefficient 415
Testing Correlation for Different Size Populations 418
References 419

CHAPTER 63 Comparison of Goodness of Fit Statistics for Linear Regression: Part 4—Confidence Limits for Slope and Intercept 421
References 423

SECTION 11 MORE ABOUT LINEARITY IN CALIBRATION

CHAPTER 64 Linearity in Calibration, Act III Scene I: Importance of (Non)linearity 427
Why Is Nonlinearity Important? 427
References 432

CHAPTER 65 Linearity in Calibration, Act III Scene II: A Discussion of the Durbin-Watson Statistic, a Step in the Right Direction 433
References 440

CHAPTER 66 Linearity in Calibration, Act III Scene III: Other Tests for Nonlinearity 441
F-test 441
Normality of Residuals 443

CHAPTER 67 Linearity in Calibration, Act III Scene IV: How Test for Nonlinearity 445
Conclusion 452
Appendix A: Derivation and Discussion of the Formula in Eq. (67-11) 453
References 455

CHAPTER 68 Linearity in Calibration, Act III Scene V: Quantifying Nonlinearity 457
References 463

CHAPTER 69 Linearity in Calibration, Act III Scene VI: Quantifying Nonlinearity, Part II, and a News Flash 465
News Flash!! 470
References 475

SECTION 12 CONNECTING CHEMOMETRICS TO STATISTICS

CHAPTER 70 Connecting Chemometrics to Statistics: Part 1—The Chemometrics Side 479
References 483

CHAPTER 71 Connecting Chemometrics to Statistics: Part 2—The Statistics Side 485
Multivariate ANOVA 485
References 488

SECTION 13 LIMITATIONS IN ANALYTICAL ACCURACY

CHAPTER 72 Limitations in Analytical Accuracy: Part 1—Horwitz's Trumpet 491
References 495

CHAPTER 73 Limitations in Analytical Accuracy: Part 2—Theories to Describe the Limits in Analytical Accuracy 497
Detection Limit for Concentrations Near Zero 498
References 499

CHAPTER 74 Limitations in Analytical Accuracy: Part 3—Comparing Test Results for Analytical Uncertainty 501
Uncertainty in an Analytical Measurement 501
Comparison Test for a Single Set of Measurements Versus a True Analytical Result 502
Comparison Test for Two Sets of Measurements 502
Calculating the Number of Measurements Required to Establish a Mean Value (or Analytical Result) With a Prescribed Uncertainty (Accuracy) 503
The Q-Test for Outliers 504
Summation of Variance From Several Data Sets 505
References 505

CHAPTER 75 The Statistics of Spectral Searches 507
Common Spectral Matching Approaches 508
Mahalanobis Distance Measurements 508
Euclidean Distance 509
Common Spectral Matching (Correlation or Dot Product) 509
References 510

CHAPTER 76 The Chemometrics of Imaging Spectroscopy 513
Image Projection of Spectroscopic Data 513
References 519

CHAPTER 77 Corrections to Analysis of Noise—Part 1 521
Alternate Analysis 521

CHAPTER 78 Corrections to Analysis of Noise—Part 2 529
Absorbance Noise in the "High-Noise" Regime 531

CHAPTER 79 What Can NIR Predict? 535
Part A—Results From a Model Created Using Real Reference Values 536
Part B—Results from a Model Created Using Random Reference Values 539
Part C—So What Does It All Mean? 540
References 544

SECTION 14 DERIVATIONS OF PRINCIPAL COMPONENTS

CHAPTER 80 The Long, Complicated, Tedious, and Difficult Route to Principal Components (or, When You're Through Reading This Set You'll Know Why It's Always Done With Matrices)—Part 1: Introduction and Review 547
Some Preliminary Discussion 549
Some Preliminary Results 550
Application of the ANOVA Principle 551
Appendix A: Matrices and Matrix Notation 556
Special Matrices 557
Key Matrix Operations 557
References 559

CHAPTER 81 The Long, Complicated, Tedious, and Difficult Route to Principal Components (or, When You're Through Reading This Set You'll Know Why It's Always Done With Matrices)—Part 2: Our First Attempt 561

CHAPTER 82 The Long, Complicated, Tedious, and Difficult Route to Principal Components (or, When You're Through Reading This Set You'll Know Why It's Always Done With Matrices)—Part 3: Multivariate Curve Fitting 569
Appendix B 573
Reference 574

CHAPTER 83 The Long, Complicated, Tedious, and Difficult Route to Principal Components (or, When you're Through Reading This Set You'll Know Why It's Always Done With Matrices)—Part 4: The Lagrange Multiplier **575**
Appendix C 579
References 579

CHAPTER 84 The Long, Complicated, Tedious, and Difficult Route to Principal Components (or, When you're Through Reading This Set You'll Know Why It's Always Done With Matrices)—Part 5: Solving the Equations With Determinants **581**
References 586

CHAPTER 85 The Long, Complicated, Tedious, and Difficult Route to Principal Components (or When You're Through Reading This Set You'll Know Why It's Always Done With Matrices)—Part 6: Solving the Equations Without Determinants **587**
Summary 592

CHAPTER 86 The Long, Complicated, Tedious, and Difficult Route to Principal Components (or, When You're Through Reading This Set You'll Know Why It's Always Done With Matrices)—Coda: Applying Constrained Univariate Calculations **595**

SECTION 15 CLINICAL DATA REPORTING

CHAPTER 87 Statistics and Chemometrics for Clinical Data Reporting, Part 1 ..... **601**
Introduction 601
Definitions 602
Measurement Error 602
Accuracy 602
Trueness and Bias 603
Precision 603
Sample Data Calculations 604
Computation of the Regression Line 604
Pearson Product-Moment Correlation Coefficient (R) 604
Acknowledgments 606
References 606

CHAPTER 88 Statistics and Chemometrics for Clinical Data Reporting, Part 2 (Using Excel for Computations) **607**
Introduction 607

Basic Definitions 610
Measurement Error 611
Accuracy 611
Trueness and Bias 611
Standard Deviation (as a Measure of Repeatability) 611
Precision 612
Computation of the Regression Line 612
Coefficient of Determination (R^2) 612
Slope (m_0) 612
y-Intercept (i) 613
Linear Regression Corrected Results 613
Acknowledgments 613
References 614

CHAPTER 89 Statistics and Chemometrics for Clinical Data Reporting, Part 3 (Using Excel for Data Plotting) 615
Introduction 615
Comparing a Reference Method to a Second Test Method 621
Correcting One Analytical Method to Report Values of a Second Method 622
Comparisons of Two Analytical Methods 623
Bland-Altman Plot 623
Tukey Mean-Difference Plot 624
References 625

SECTION 16 CLASSICAL LEAST SQUARES (CLS)

CHAPTER 90 Classical Least Squares, Part 1: Mathematical Theory 629
The Mathematics Behind the CLS Method 631
References 635

CHAPTER 91 Classical Least Squares, Part 2: Mathematical Theory Continued 637
References 644

CHAPTER 92 Classical Least Squares, Part 3: Spectroscopic Theory 645
Equivalence of Spectra and Numbers 653
References 654

CHAPTER 93 Classical Least Squares, Part 4: Spectroscopic Theory Continued 655

CHAPTER 94 Classical Least Squares, Part 5: Experimental Results 661
Experimental 662
The Data 663
Postscript 668
Reference 668

CHAPTER 95 Classical Least Squares, Part 6: Spectral Results 669

CHAPTER 96 Classical Least Squares, Part 7: Spectral Reconstruction of Mixtures 689
Adding Some Calculations 690

CHAPTER 97 Classical Least Squares, Part 8: Comparison of CLS Values With Known Values 697
Troubleshooting 699
The Search for Composition 702
First Alternate Unit Considered 702
Second Alternate Unit Considered 703
Third Alternate Unit Considered 704

CHAPTER 98 Classical Least Squares, Part 9: Spectral Results From a Second Laboratory 707
Spectral Results 708
References 713

CHAPTER 99 Classical Least Squares, Part 10: Numerical Results From the Second Laboratory 715
Reference 723

CHAPTER 100 Classical Least Squares, Part 11: Comparison of Results From the Two Laboratories Continued 725
The Light Dawns 726

SECTION 17 TRANSFER OF CALIBRATIONS

CHAPTER 101 Transfer of Calibrations, Part 1 735
Introduction 735
Experimental 738
Results 738
Discussion 745
Conclusions 747
Definition 747

Summary 749
References 749

CHAPTER 102 Calibration Transfer, Part 2: The Instrumentation Aspects 751
Introduction 751
Modeling Approaches 752
Instrument Types 753
Standardization Methods 753
Instrument Comparison and Evaluation Methods 753
Instrument Optical Quality Performance Tests 754
Wavenumber Accuracy Test 754
Wavenumber Repeatability Test 755
Absorbance/Response Accuracy Test 756
Absorbance/Response Repeatability Test 757
Photometric Linearity Test 757
Photometric Noise Test 758
Signal Averaging Test 759
Instrument Line Shape Test 760
Summary Specifications for Instrument "Alikeness" Testing 762
References 763

CHAPTER 103 Calibration Transfer, Part 3: The Mathematical Aspects 765
Introduction 765
The Mathematical Approaches to Calibration Transfer 766
What to Compare When Transferring Calibrations? 767
Virtual Instrument Standardization 767
Bias or Slope Adjustments of Predicted Results Cross Parent and Child Instruments 767
Developing Global or Robust Models Including Variation Between Instruments 772
Augmenting Models Over time 773
Sample Selection to Improve Spectral Data 773
Spectral Data Transformation 773
Special Standardization Mathematical Approaches 773
Local Methods 774
Use of Indicator Variables 774
Summary 774
References 774

CHAPTER 104 Calibration Transfer, Part 4: Measuring the Agreement Between Instruments Following Calibration Transfer 777
Introduction 777

How to Tell If Two Instrument Predictions, or Method Results, Are Statistically Alike 778
Standard Uncertainty and Relative Standard Uncertainty 780
Uncertainty Defined 780
Relative Standard Uncertainty 781
Bland-Altman "Limits of Agreement" 782
Conclusion 785
References 785
Additional Reading 785

CHAPTER 105 Calibration Transfer, Part 5: The Mathematics of Wavelength Standards Used for Spectroscopy 787
Introduction 787
Different Approaches to Alignment of the Wavelength Axis 788
The NIST Uncertainty Number for SRMs 789
Commercial Instrument Wavelength Data 790
The Relative Standard Uncertainty Across Commercial Instruments 794
The Confidence Levels and Uncertainty Across Commercial Instrument Manufacturers A Through D 795
Using a NIST-Like Uncertainty Measurement 796
References 796

CHAPTER 106 Calibration Transfer, Part 6: The Mathematics of Photometric Standards Used for Spectroscopy 799
Introduction 799
Different Approaches to Alignment of the Photometric Axis 800
The NIST Uncertainty Number for SRMs 800
Commercial Instrument Photometric Data 801
Measurement of Photometric Accuracy 801
Measurement of Photometric Precision 802
Estimating the Relative Uncertainty Across the Tested Commercial Instruments 805
References 807

SECTION 18 THE IMPORTANCE OF UNITS OF MEASURE

CHAPTER 107 Units of Measure in Spectroscopy, Part 1: ... and Then the Light Dawned 811
Reference 814

CHAPTER 108 Units of Measure in Spectroscopy, Part 2: It's the VOLUME, Folks! 815
Progress 815
References 821

CHAPTER 109 Units of Measure in Spectroscopy, Part 3: What Does It All Mean 823
A Short Review 823
The Mathematics 825
References 828

CHAPTER 110 Units of Measure in Spectroscopy, Part 4: Summary of Our Findings 829
Summary of Our Findings 829
CLS Versus Beer's Law 829
Meaning of "Concentration" 831
Calibration Transfer 832
Partial Molal Volumes 837
References 838

CHAPTER 111 Units of Measure in Spectroscopy, Part 5: The "Mythbusters" and Spectral Reconstruction 839
Calculation of Pure-Component Spectra 839
References 847

SECTION 19 THE BEST CALIBRATION MODEL

CHAPTER 112 Choosing the Best Regression Model 851
Introduction 851
Optimizing the Experimental Design for Calibration 857
Validating the Regression Model 859
Summary 859
References 860

CHAPTER 113 Optimizing the Regression Model: The Challenge of Intercept/Bias and Slope "Correction" 863
Introduction 863
The Initial Spectra and Calibration Equation 866
Changing the Wavelength Registration 866
Changing the Photometric Registration 868
Changing the Linewidth/Lineshape 869
Discussion and Review of Results 870
Confidence Limits for Predicted Values From a Regression 870
Confidence Limits for Slope From a Regression 870
Confidence Limits for Intercept/Bias From a Regression 872
Summary of Results 872
References 873

SECTION 20 STATISTICS

CHAPTER 114 Statistics, Part 1: First Foundation 877
Introduction 877
The Foundations 879
First Foundation: Probability Theory 879
Reference 882

CHAPTER 115 Statistics, Part 2: Second Foundation 883
Second Foundation: The Principle of Analysis of Variance 883
Analysis of Variance of Synthetic Data 885
The Effect of Adding a Perturbation 888
Reference 890

CHAPTER 116 Statistics, Part 3: Third Foundation 891
Third Foundation: The Principle of Least Squares 891
References 895

CHAPTER 117 How to Select the Appropriate Degrees of Freedom for Multivariate Calibration 897
Introduction 897
The Subject of Degrees of Freedom 898
General Discussion 900
Summary 901
References 901

CHAPTER 118 Bias and Slope Correction 903
Introduction 903
Analysis of the Issues 904
Instrument Differences Versus SEP 906
Instrument Differences Versus Bias 906
Instrument Differences Versus Slope 907
Summary 907
References 908

SECTION 21 OUTLIERS

CHAPTER 119 Outliers—Part 1: What Are Outliers? 913
Introduction 913
What Are Outliers? 915
References 917

CHAPTER 120 Outliers—Part 2: Pitfalls in Detecting Outliers 919
Detecting Outliers 919
Potential Pitfalls 920
References 928

CHAPTER 121 Outliers—Part 3: Dealing With Outliers 931
Dealing With Outliers 931
Delete the Discordant Observation 932
Transform the Data 933
Accommodate the Discordant Observation(s) 935
Summary 936
References 936

SECTION 22 SPECTRAL TRANSFER: MAKING INSTRUMENTS AGREE

CHAPTER 122 Calibration Transfer Chemometrics, Part 1: Review of the Subject 939
Introduction 939
Comparison of Transfer Methods 940
Instrument Alignment and Correction 941
The Master Instrument Concept 942
Filter Instrument Calibration Transfer 942
Direct Standardization and Piecewise Direct Standardization 943
Orthogonal Signal Correction 944
Procrustes Analysis 945
Finite Impulse Response 945
Maximum Likelihood Principal Component Analysis 946
Using Wavelength Standards for FT-NIR Alignment 946
Summary 946
References 946
Further Reading 948

CHAPTER 123 Calibration Transfer Chemometrics, Part 2: Review of the Subject 949
Introduction 949
Successive Projections Algorithm 949
Compressed Wavelet Domain is Called WTDS 950
Canonical Correlation Analysis 950
Positive Matrix Factorization 950
Spectral Regression 950

Wavelet Packet Transform Standardization....951
Stacked Partial Least-Squares Regression....951
Multiplicative Scatter (or Signal) Correction....951
Standard Normal Variate....952
Detrend....952
Classification Methods....953
Synthetic Calibration Spectra....953
Dispersive to FT Transfer....953
Dispersive to Handheld Transfer....953
Temperature Compensation....954
Two-Dimensional Method Transfer....954
Compensating for Extraneous Phenomena (or Unmodeled Variation)....954
Creating Transferable Calibrations in Mid-Infrared....954
Summary....955
References....955

SECTION 23 APPLYING STANDARD REFERENCE MATERIALS

CHAPTER 124 Using Reference Materials, Part 1: Standards for Aligning the *X*-Axis....959
Introduction....959
Ultraviolet Wavelength Measurement Standards....960
Holmium Oxide Liquid Wavelength Standard Traceable to SRM 2034....960
Holmium Oxide Glass Wavelength Standard Traceable to SRM 2034....962
Visible (Vis) Wavelength Measurement Standards....962
NIST SRM 2036 Reflectance Wavelength SRM....962
Near Infrared (NIR) Wavelength Measurement Standards....966
Polystyrene Reference Standard....966
SRM 1920a Former Reference Standard....968
Infrared Wavenumber Measurement Standards....969
NIST Wavenumber Standard Reference Material® for Infrared....970
Raman Wavenumber Measurement Standards....977
Wavenumber Standard Reference Material® for Raman....977
Summary....978
References....979
Further Reading....980

CHAPTER 125 Using Reference Materials, Part 2: Aligning the *Y*-Axis 981
Introduction to Photometric Accuracy 981
Example of Reporting Photometric Accuracy 982
Photometric Correction for Absorbance-Based Spectrophotometers 983
Ultraviolet Photometric Standards 984
Visible (Vis) Photometric Standards 987
Near Infrared Reflectance Photometric Standards 987
Infrared Reflectance Photometric Standards 993
Raman Intensity Correction Standards 993
References 999

SECTION 24 MORE ABOUT CLS

CHAPTER 126 More About CLS, Part 1: Expanding the Concept 1003
Expanding Beyond the Small Dataset 1009
Faux Linearity 1011
References 1018

CHAPTER 127 More About CLS, Part 2: Spectral Results and CLS (Not Requiring Constituent Values) 1019
Spectral Results Not Needing Constituent Values 1019
CLS Results 1020
Expanding Beyond CLS: Introducing PCA 1025
Reference 1027

CHAPTER 128 More About CLS, Part 3: Expanding the Analysis to Include Concentration Information (PCR and PLS) 1029
Expanding the Analysis to Include Concentration Information (PCR and PLS) 1029
Effect of PCR Analysis 1032
Effect on PLS Analysis 1034
Results for Individual Analytes 1034
Conclusions Reached 1039
Reference 1040

Index 1041
