

# Time-Resolved X-ray Spectroscopy

Mapping electron flow in matter with the ATHOS beamline at SwissFEL

# Table of Contents

|    |   |
|----|---|
| 5  | Foreword  |
| 6  | Scientific Challenges   |
| 10 | Introduction and ATHOS Project Overview   |
| 16 | I. Ultrafast Magnetization Dynamics on the Nanoscale<br>Temporal spin behavior in magnetic solids at short length scales                    |
| 30 | II. Following Catalysis and Biochemistry with Soft X-Rays<br>Electronic transfer and redistribution in functional molecules                 |
| 46 | III. Time-Resolved Spectroscopy of Correlated Electron Materials<br>Mapping the flow of energy among strongly-correlated degrees of freedom |
| 66 | IV. Non-Linear X-Ray Optics<br>Can the field of non-linear optics be extended to the X-ray regime?  |
| 78 | The XFEL Operating Principle  |
| 82 | Appendix: ATHOS Workshops   |
