Contents

List of contributors	xiii
About the editors	xvii
1 Introduction to biomass and its composites	1
<i>M. Jawaid, M.T. Paridah, N. Saba</i>	
1.1 Biomass, source and its compositions	1
1.2 Utilization of biomass in different sectors	2
1.3 Biomass based polymer composites	3
1.4 Applications of biomass based polymer composites	6
Acknowledgements	8
References	9
2 Agro-industrial waste composites as components for rural buildings	13
<i>J.C.M. Cravo, D.L. Sartori, J. Fiorelli</i>	
2.1 Introduction	13
2.2 Particleboard with agroindustrial waste as components for rural buildings	14
2.3 Conclusion	22
References	23
3 Predicting the potential of biomass-based composites for sustainable automotive industry using a decision-making model	27
<i>Faris M. AL-Oqla, Mohammad A. Omari, Amani Al-Ghraibah</i>	
3.1 Introduction	27
3.2 Selection considerations	28
3.3 Biomass composites characteristics and testing	29
3.4 Materials selection	31
3.5 Biomass selection using a multi criteria decision making model	33
3.6 Future developments	39
3.7 Summary	40
3.8 Conclusions	40
References	40
4 Biomass-based composites from different sources: Properties, characterization, and transforming biomass with ionic liquids	45
<i>M.A. Usmani, I. Khan, A. Haque, A.H. Bhat, D. Mondal, U. Gazal</i>	
Abbreviation	45
4.1 Introduction	46
4.2 Lignocellulosic biomass	47

4.3	Challenges in development of biomass based composites	51
4.4	Biomass based composites	58
4.5	Characterization of biomass based composites	63
4.6	Properties of biomass based composites	65
4.7	Application of biomass-based composites	67
4.8	Conclusions	68
	References	68
	Further reading	76
5	Rice husk and kenaf fiber reinforced polypropylene biocomposites	77
	<i>R. Arjmandi, A. Hassan, Z. Zakaria</i>	
5.1	Introduction	77
5.2	Rice husk	78
5.3	Kenaf fibers	80
5.4	RH and KF biocomposites	81
5.5	Development and applications	88
5.6	Conclusion and future prospects	89
	Acknowledgment	89
	References	89
6	Thermal properties of oil palm biomass based composites	95
	<i>N. Saba, M. Jawaaid, M.T.H. Sultan</i>	
6.1	Introduction	95
6.2	Oil palm	96
6.3	Oil palm wastes biomass in Malaysia	98
6.4	Oil palm biomass	99
6.5	Polymer matrix	107
6.6	Polymer composites	107
6.7	Thermal properties	111
6.8	Thermal properties of oil palm biomass reinforced thermoset polymer composites	112
6.9	Thermal properties oil palm biomass reinforced thermoplastic polymer composites	113
6.10	Thermal properties of oil palm biomass reinforced polymer nanocomposites	113
6.11	Applications of oil palm biomass and its polymer composites	114
6.12	Conclusion	115
	Acknowledgement	116
	References	116
7	Biomass-based nanocomposite for packaging applications	123
	<i>G. Sahoo, N. Sarkar, S.K. Swain</i>	
7.1	Introduction	123
7.2	Brief introduction to biomass based polysaccharides and proteins	123
7.3	Introduction to nano fillers	125
7.4	Method of synthesis	128

7.5	Morphological analysis	130
7.6	FTIR analysis	132
7.7	XRD analysis	135
7.8	Thermal analysis	137
7.9	Gas barrier properties	140
7.10	Mechanical properties	142
7.11	Future perspective	144
7.12	Conclusion	144
	References	145
	Further Reading	146
8	Alfa and doum fiber-based composite materials for different applications	147
	<i>H. Essabir, R. Bouhfid, A. Qaiss</i>	
8.1	Introduction	147
8.2	Natural fibers properties (alfa and doum)	150
8.3	Critical issues in the processing of natural fiber-reinforced composites	152
8.4	Compounding method	154
8.5	Physico mechanical properties of fibers polymers matrix composites	155
8.6	Application of natural fibers composites	160
8.7	Conclusion and challenges	161
	References	162
9	Comprehensive approach on the structure, production, processing, and application of lignin	165
	<i>A. Nasrullah, A.H. Bhat, A. Sada Khan, H. Ajab</i>	
9.1	Introduction	165
9.2	Historical background of lignin	166
9.3	Biomass	166
9.4	Major constituents of lignocellulose	166
9.5	Chemical composition and structure of lignin	168
9.6	Different lignin types based on extraction techniques	169
9.7	Modification of lignin	170
9.8	Applications of lignin	172
9.9	Conclusions	175
	Acknowledgment	175
	References	175
10	Fabrication of composites reinforced with lignocellulosic materials from agricultural biomass	179
	<i>A. Haque, D. Mondal, I. Khan, M.A. Usmani, A.H. Bhat, U. Gazal</i>	
10.1	Introduction	179
10.2	Biomass composition of agricultural residues	181
10.3	Extraction of cellulose from agricultural residue	182

10.4	Composites reinforced with lignocellulosic materials from agricultural residue	183
10.5	Conclusion and future prospect	188
	References	189
11	Mechanical properties of lignocellulosic fiber composites	193
	<i>A. Shahzad</i>	
11.1	Introduction	193
11.2	Factors affecting the mechanical properties of LFCs	196
11.3	Mechanical properties	202
11.4	Conclusions	218
	References	219
12	Tribological properties of biomass-based composites	225
	<i>B.F. Yousif</i>	
12.1	Introduction	225
12.2	Composite materials based on natural fibers	226
12.3	Tribo-polymeric composites	227
12.4	Natural fibre reinforced polymer composite	227
12.5	Material selection and experimental procedure	228
12.6	Experimental procedure	229
12.7	Tribological experiments	231
12.8	Results and discussion	233
12.9	Conclusion	255
	References	256
	Further Reading	257
13	Bamboo: Potential material for biocomposites	259
	<i>P. Chaowana, M.C. Barbu</i>	
13.1	Introduction to bamboo	259
13.2	The bamboo morphological characteristic	259
13.3	The properties of bamboo culm	265
13.4	Bamboo resources	266
13.5	The bamboo processing into elements	268
13.6	The classification of bamboo bio-composites	270
13.7	Conclusion	285
	References	286
14	Design of green laminated composites from agricultural biomass	291
	<i>S. Siti Suhaily, H.P.S. Abdul Khalil, M. Asniza, M.R. Nurul Fazita, A.R. Mohamed, R. Dungani, W. Zulqarnain, M.I. Syakir</i>	
14.1	Introduction	291
14.2	Classification and properties of agricultural biomass raw materials	292
14.3	Design of agricultural biomass raw materials	295
14.4	Current applications of laminated composites from agricultural biomass	301

14.5	Laminated composites materials for sustainable applications	305
14.6	Conclusion	306
	References	306
15	Synthesis and utilization of natural fiber-reinforced poly (lactic acid) bionanocomposites	313
	<i>M. Abu Ghalia, Y. Dahman</i>	
15.1	Introduction and background	313
15.2	Wood structures	315
15.3	Cellulose structures	318
15.4	Enhancing compatibles between PLA and natural fibers	325
15.5	Processing technology for natural fibers reinforced PLA	331
15.6	Biocomposites	334
15.7	Conclusion and future trends	340
	Acknowledgements	340
	References	340
16	PLA nanocomposites from <i>Posidonia oceanica</i> waste	347
	<i>E. Fortunati, F. Luzi, L. Torre</i>	
16.1	Introduction	347
16.2	Lignocellulosic materials from natural sources and wastes: revalorization approach	348
16.3	Special focus on PLA-based nanocomposites reinforced with additives from <i>Posidonia oceanica</i> wastes	355
16.4	Conclusions	358
	References	359
	Further reading	363
17	Cork biomass biocomposites: Lightweight and sustainable materials	365
	<i>E.M. Fernandes, R.A. Pires, R.L. Reis</i>	
17.1	Introduction	365
17.2	Cork material	366
17.3	Cork composites	369
17.4	Conclusions and future trends	380
	Acknowledgements	381
	References	381
18	Biocomposites from olive-stone flour: A step forward in the valorization of the solid waste from the olive-oil industry	387
	<i>Sami Boufi</i>	
18.1	Introduction	387
18.2	OSF characterization	389
18.3	Composite based on olive stones flour and thermoplastics polymers	392
18.4	Composite based on OSF and PP	392
18.5	Composites based on OSF and PVC	399
18.6	Conclusion	404
	References	406

19	Mechanism of exterior coating performance of acetylated wood	409
	<i>R.M. Rowell</i>	
19.1	Introduction	409
19.2	Clear coatings and weathering of wood	409
19.3	Acetylation of wood	413
19.4	Accelerated weathering and analysis	414
19.5	Weathering of acetylated wood	415
19.6	Opaque coatings—nonacetylated	417
19.7	Opaque coatings—acetylated	419
19.8	Conclusions	421
	References	421
20	Torrefied-biomass-filled polyamide biocomposites	423
	<i>J. Vold, C. Ulven</i>	
20.1	Introduction	423
20.2	Torrefaction	425
20.3	Processing	435
20.4	Biocomposites	437
20.5	Continued research	443
	References	444
21	Potential for using multiscale <i>Posidonia oceanica</i> waste: current status and prospects in material science	447
	<i>R. Khiari, M.N. Belgacem</i>	
21.1	Introduction	447
21.2	Characterisation of raw material: <i>P. oceanica</i>	448
21.3	Potential applications for <i>P. oceanica</i>	453
21.4	Conclusions	464
	Acknowledgments	464
	References	465
22	Structural properties of rice husk and its polymer matrix composites: An overview	473
	<i>K. Majeed, R. Arjmandi, M.A. Al-Maadeed, A. Hassan, Z. Ali, A.U. Khan, M.S. Khurram, I.M. Inuwa, P.N. Khanam</i>	
22.1	Introduction	473
22.2	Physical structure and properties of RH	476
22.3	Pretreatment of RH	478
22.4	RH composites	482
22.5	Hybridization of RH with other fillers for composites	484
22.6	Conclusions	486
	References	486
