

DIET-MICROBE INTERACTIONS IN THE GUT

Effects on Human Health
and Disease

Edited by

KIERAN TUOHY

*Department of Food Quality and Nutrition, Research and Innovation Centre,
Foundation Edmund Mach (FEM), San Michele all' Adige, Trento, Italy*

DANIELE DEL RIO

Department of Food Science, University of Parma, Parma, Italy

Contents

Foreword	ix
Acknowledgements	xi
List of Contributors	xiii
1. The Microbiota of the Human Gastrointestinal Tract: A Molecular View.....	1
KIERAN M. TUOHY AND KAREN P. SCOTT	
Introduction	1
Gut Microbiota Metabolism in Health and Disease	1
Methodologies for Studying the Human Gut Microbiota.....	3
Spatial Distribution of the Gut Microbiota and Interactions with Diet.....	6
Models to Study Microbial Ecology	10
Conclusions.....	11
References	11
2. A Nutritional Anthropology of the Human Gut Microbiota	17
CARLOTTA DE FILIPPO AND KIERAN M. TUOHY	
Human Diet or Microbiota, Which Came First?.....	17
Metagenomics and Cultivation-Independent Assessment of Human Gut Microbiota	18
Microbiome and Human Nutritional Phenotype	18
The Gut Microbiota in Human Evolution	19
Population Metagenomic Variation within the Human Microbiota	21
The Western Diet Metagenome Is Obesity Prone	24
Conclusions.....	25
References	25
3. Probiotic Microorganisms for Shaping the Human Gut Microbiota – Mechanisms and Efficacy into the Future	27
LORENZO MORELLI AND VANIA PATRONE	
Introduction	27
Let's Start With the Definition of Probiotics	27
Shaping the Microbiota.....	28
The Neonatal Period	29
Adult Life and the Proposed Enterotype Classification.....	31
The Aged Period.....	32
Mechanisms and Efficacy	33
Efficacy in Healthy People.....	33
Conclusions.....	37
References	37
4. Bifidobacteria of the Human Gut: Our Special Friends	41
MARCO VENTURA, FRANCESCA TURRONI AND DOUWE VAN SINDEREN	
Taxonomy of Bifidobacteria	41
Bifidobacterial Ecology	43

Bifidobacterial Populations in the Human Gut	43
Bifidobacteria as Probiotics	44
Bifidobacterial Genomics	45
Comparative Genomics and Bifidobacteria.....	46
Interaction Between Bifidobacteria and Their Hosts	47
Conclusions.....	48
References	49
5. Shaping the Human Microbiome with Prebiotic Foods – Current Perspectives for Continued Development	53
KIERAN M. TUOHY, DUNCAN T. BROWN, ANNETT KLINDER, ADELE COSTABILE AND FRANCESCA FAVA	
Introduction	53
Linking Microbiome Structure and Function.....	54
Probiotics.....	55
Prebiotics.....	56
Testing Prebiotics.....	59
Conclusion	65
References	66
6. Bioactivation of High-Molecular-Weight Polyphenols by the Gut Microbiome	73
PEDRO MENA, LUCA CALANI, RENATO BRUNI AND DANIELE DEL RIO	
Introduction	73
Proanthocyanidins	73
Hydrolyzable Tannins (Gallotannins and Ellagitannins).....	85
Conclusions.....	98
References	98
7. Gut Microbial Metabolism of Plant Lignans: Influence on Human Health.....	103
SETH C. YODER, SAMUEL M. LANCASTER, MEREDITH A.J. HULLAR AND JOHANNA W. LAMPE	
Introduction	103
Conversion of Plant Lignans to Enterolignans by Gut Bacteria	104
Associations Between Lignan Exposure and Human Health	107
Interindividual Differences in Lignan Metabolism	110
Conclusions.....	114
Acknowledgements.....	114
References	114
8. Gut Microbiome Modulates Dietary Xenobiotic Toxicity: The Case of DON and Its Derivatives.....	119
MARTINA CIRLINI, RENATO BRUNI AND CHIARA DALL'ASTA	
Introduction	119
Gastric Stability of DON Derivatives.....	121
Bacterial Transformation and Intestinal Absorption of DON and Its Derivatives.....	121
DON and DON-Conjugates Impact on the Human Gut.....	123
References	124
9. Gut Microbiota–Immune System Crosstalk: Implications for Metabolic Disease.....	127
FRANCESCA FAVA	
Gut Microbial Recognition by the Immune System.....	127
Intestinal Barrier, Gut Permeability and Metabolic Inflammation	129

Effects of Intestinal Bacterial Short-Chain Fatty Acids (SCFAs) on Inflammation and Metabolism	130
Dietary Fat Metabolism, Bile Acids and Gut Microbiota.....	131
Diet, TMAO, Gut Microbiota and Atherosclerosis.....	132
Immune Versus Metabolic Functions in Intestinal Epithelial Cells Gene Networks	133
Conclusion	134
References	135
10. The Interplay of Epigenetics and Epidemiology in Autoimmune Diseases: Time for Geopigenetics	139
CARLO SELMI AND ANGELA CERIBELLI	
The Etiology and Pathogenesis of Autoimmune Disease.....	139
The Rationale for Geopigenetics	140
Geopigenetics of Systemic Lupus Erythematosus (SLE)	141
Geopigenetics of Rheumatoid Arthritis (RA).....	143
Geopigenetics of Systemic Sclerosis.....	144
Conclusions.....	145
References	145
11. Obesity-Associated Gut Microbiota: Characterization and Dietary Modulation	149
QING SHEN AND VATSALA MAITIN	
The Obesity Pandemic	149
Genetic Determinants of Obesity	149
Obesity Associated Gut Microbiota.....	150
Interactions between Gut Microbes and Obesity: “The Energy Extraction Theory”	154
Interactions between Gut Microbes and Obesity: “The Appetite Control Theory”	157
Interactions between Gut Microbes and Obesity: “The Inflammation Theory”	158
Gut Microbiota as a Therapeutic Target of Probiotics, Prebiotics and Synbiotics.....	161
Conclusions.....	166
References	166
12. An Apple a Day Keeps the Doctor Away – Inter-Relationship Between Apple Consumption, the Gut Microbiota and Cardiometabolic Disease Risk Reduction	173
ATHANASIOS KOUTSOS AND JULIE A. LOVEGROVE	
Introduction	173
Apple Components.....	173
The Human Gut Microbiota.....	178
Cardiometabolic Disease Risk – Epidemiological Studies	180
Cardiometabolic Risk Factors	181
Diabetes Risk	187
Conclusion	187
References	188
13. Whole Plant Foods and Colon Cancer Risk	195
EMMA M. BROWN, IAN ROWLAND, NIGEL G. TERNAN, PHILIP ALLSOPP, GEOFF MCMULLAN AND CHRIS I.R. GILL	
Introduction	195
Diet and Colorectal Cancer	195
Biological Activity and Anticancer Properties of Whole-Grain Cereals.....	197
Biological Activity and Anticancer Properties of <i>Brassica</i> Vegetables.....	199
Human Studies.....	199

Biological Activity and Anticancer Properties of Berry Fruits.....	201
Conclusion	203
References	204
14. Population Level Divergence from the Mediterranean Diet and the Risk of Cancer and Metabolic Disease.....	209
GEORGE POUNIS, MARIALAURA BONACCIO, KIERAN M. TUOHY, MARIA BENEDETTA DONATI, GIOVANNI DE GAETANO AND LICIA IACOVIELLO	
Mediterranean Diet as the Traditional Diet of Southern Europe.....	209
The Evidence-Based Health Protection by Mediterranean Diet.....	211
Mediterranean Diet as a Health Protection Model.....	214
Mediterranean Food Consumption and Human Gut Microbiota.....	216
References	219
15. Diet and the Gut Microbiota – How the Gut: Brain Axis Impacts on Autism.....	225
KIERAN M. TUOHY, PAOLA VENUTI, SIMONE CUVA, CESARE FURLANELLO, MATTIA GASPEROTTI, ANDREA MANCINI, FLORENCIA CEPPA, DUCCIO CAVALIERI, CARLOTTA DE FILIPPO, URSKA VRHOVSEK, PEDRO MENA, DANIELE DEL RIO AND FRANCESCA FAVA	
Background	225
Gut Microbiota and ASD.....	226
Amino Acid Metabolism.....	228
Lipid Metabolism and the Brain	230
Short-Chain Fatty Acids (SCFA) and the Brain.....	231
Gut Microbiota and Digestive Function.....	233
Probiotics, Gut Microbiota Successional Development and Brain Function.....	237
Conclusions.....	238
References	238
Index	247
