1. Introduction

1.1 Prokaryote Cell Membranes	2
1.2 Eukaryote Cell Membranes	4
1.3 Plasma Membranes	5
1.4 Intracellular Membranes	8
1.4.1 Nuclear Membranes	8
1.4.2 Endoplasmic Reticulum Membranes	9
1.4.3 Golgi Membranes	10
1.4.4 Mitochondrial Membranes	11
1.4.5 Lysosome	13
1.4.6 Peroxisome	14
1.5 Viral Membranes	14
1.6 Membrane Motifs	16
1.7 The Hydrophobic Effect	16
1.8 Structure of Water	17
1.9 Nonpolar Molecules and Water	18
1.10 Highlights	24
References	25

2. The Lipids of Biological Membranes

2.1 Phospholipids	27
2.1.1 Chemical Structure	27
2.1.2 Electrical Charge	32
2.1.3 Phospholipid Composition of Biological Membranes	33
2.1.4 Fatty Acid Composition of Phospholipids	33
2.1.5 Structurally Related Phosphorus-Containing Lipids	41
2.1.6 Phospholipases	43
2.2 Sphingolipids	45
2.3 Glycolipids	49
2.4 Sterols	50
2.5 Two-Headed Lipids	52
2.6 Lipopolysaccharide	52
2.7 Lipid Identification	52
2.8 Highlights	54
References	56

3. Biogenesis of Membrane Lipids	
3.1 Desaturation of Fatty Acids	57
3.2 Biosynthesis of Phospholipids	60
3.2.1 Biosynthesis of Phosphatidate	60
3.2.2 Biosynthesis of Diacylglycerol from Phosphatidate	60
3.2.3 Biosynthesis of Phosphatidylcholine	61
3.2.4 Phosphatidylethanolamine Biosynthesis	63
3.2.5 Phosphatidylserine Biosynthesis	64
3.2.6 Phosphatidylglycerol and Diphosphatidylglycerol Synthesis	64
3.2.7 Phosphatidylinositol Biosynthesis	65
3.3 Biosynthesis of Sphingolipids	66
3.4 Cholesterol Biosynthesis	66
3.5 Assembly of Newly Synthesized Lipids into Membranes	67
3.6 Highlights	70
References	71
4. Detergents	
4.1 Nonionic Detergents	73
4.2 Ionic Detergents	75
4.2.1 Lysophospholipids	77
4.3 Detergent Properties	77
4.4 Detergents and Membrane Rafts	82
4.5 Highlights	83
References	84
5. Membrane Models	
5.1 The Evidence for the Lipid Bilayer	86
5.2 The Singer Nicholson Model for Membranes	89
5.3 Current Model for Biological Membranes	90
5.4 Highlights	93
References	93
6. Laboratory Membrane Systems	
6.1 Structure of Laboratory Membrane Systems	95
6.1.1 Liposomes	95
6.1.2 Sonicated Vesicles	97
6.1.3 Large Unilamellar Vesicles	98
6.1.4 Black Lipid Membrane	100
6.1.5 Lipid Monolayers	102
6.1.6 Bicelles	104
6.1.7 Nanodisks	105
6.1.8 Lipodisks [®]	106
6.2 Properties Derived from Laboratory Membrane Systems	107
6.3 Hydration	109
6.4 Ion Binding	110
6.5 Highlights	112
References	113

7. Structures of Lipid Assemblies	
7.1 Lamellar (Bilayer) Structure	116
7.2 Interdigitated Bilayers	118
7.3 Micellar Phase	120
7.4 Hexagonal I Phase (H_I)	121
7.5 Hexagonal II Phase (H_{II})	121
7.6 Cubic Phase	127
7.7 Subphase for Phospholipid Bilayers	127
7.8 Solution Phase	127
7.9 Lipid Phase Transitions	128
7.10 Phase Transitions in Cell Membranes	135
7.11 Lamellar to H_{II} Phase Transition	138
7.12 Lipid Microdomains in Membranes	140
7.13 Lipid Conformation in Membranes	142
7.13.1 Phospholipid Hydrocarbon Chain Conformations	142
7.13.2 Conformation of the Glycerol Region of the Glycerolipids	145
7.13.3 Phospholipid Headgroup Conformation	147
7.14 Water in the Lipid Bilayer	150
7.15 Highlights	150
References	151
8. Lipid Dynamics in Membranes	
8.1 Introduction	155
8.2 ESR	156
8.3 2H NMR	156
8.4 Motional Order	158
8.4.1 Order Parameters in Membranes	160
8.4.2 Analytical Description of Order Parameter	161
8.4.3 Effects of Phase Transitions on Order Parameters in Membranes	164
8.4.4 Effects of Double Bonds in the Phospholipid Acyl Chains on Motional Order Parameters	164
8.4.5 Permeability and Membrane Order	165
8.4.6 Effects of Cholesterol	166
8.5 Motional Rates	167
8.5.1 Motional Rates for the Dominant Hydrocarbon Chain Motions in the Lipid Bilayer	170
8.5.2 Phospholipid Headgroup Motions	171
8.5.3 Sterol Dynamics	172
8.6 Integrated View of Motional Order and Dynamics	172
8.7 Membrane Fluidity	173
8.8 Free Volume Within a Membrane Bilayer	174
8.9 Lateral Diffusion of Membrane Components	176
8.10 Lateral Phase Separation	178
8.11 Transmembrane Movement of Lipids	180
8.12 Movement of Phospholipids Between Membranes	182
8.13 Transmembrane Lipid Asymmetry	182
8.14 Highlights	185
References	186

9. Cholesterol and Related Sterols: Roles in Membrane Structure and Function

9.1	Structure and Properties of the Cholesterol Molecule	191
9.2	Cholesterol Location in Cells	192
9.2.1	Distribution of Cholesterol in Cells	192
9.2.2	Cholesterol Movement Between Membranes	193
9.2.3	Partitioning of Cholesterol Among Membranes	194
9.2.4	Intracellular Movement	198
9.2.5	Sterol Carrier Proteins	198
9.2.6	Transmembrane Movement of Cholesterol	199
9.2.7	Location of Cholesterol in the Lipid Bilayer	199
9.3	Cholesterol Modulates Membrane Physical Properties	200
9.3.1	Ordering of Lipid Bilayers by Cholesterol	201
9.3.2	Cholesterol Reduces Passive Permeability	203
9.3.3	The Condensing Effect of Cholesterol	205
9.3.4	Effects of Cholesterol on Phospholipid Headgroups	205
9.3.5	Effects of Cholesterol on Lateral Diffusion	206
9.3.6	Effects of Cholesterol on Lipid Phase Transitions	206
9.3.7	Cholesterol Cannot Form Lipid Bilayers	207
9.4	Role of Sterols in Sterol-Requiring Cells	207
9.4.1	Sterol Requirements in Cell Biology	207
9.5	Essential Role of Cholesterol in Mammalian and Other Sterol-Requiring Cells	209
9.6	Hypothesis for a Specific Sterol Requirement	211
9.7	Highlights	214
	References	215

10. Membrane Proteins

10.1	Classification of Membrane Proteins	220
10.2	Peripheral Membrane Proteins	223
10.2.1	Cytochrome c, an Associated Membrane Protein	223
10.2.2	Spectrin, a Membrane Skeleton Protein	225
10.3	Integral Membrane Proteins	226
10.3.1	Acetylcholinesterase, an Anchored Protein	226
10.3.2	Human Erythrocyte Glycophorins Are Transmembrane Proteins	227
10.4	Primary Structure of Membrane Proteins	231
10.5	Secondary Structure of Integral Membrane Proteins	237
10.6	Tertiary Structure of Membrane Proteins	240
10.7	Quaternary Structure of Membrane Proteins	242
10.8	Three-Dimensional Structure of Integral Membrane Proteins—Experimental Approaches	243
10.9	Principles of Membrane Protein Structure	245
10.10	Domain Structure of Membrane Proteins	258
10.11	Membrane Protein Stability	260
10.12	Dynamics of Membrane Proteins in Membranes	261
10.13	Membrane Protein Asymmetry in Membranes	262
10.14	Posttranslational Modification of Membrane Proteins	263
10.15	Highlights	264
	References	265

11. Membrane Biogenesis	
11.1 Assembly of Newly Synthesized Lipids into Membranes	269
11.2 Transport of Lipids to Target Membranes	274
11.3 Membrane Protein Biosynthesis	277
11.4 Biosynthesis and Insertion of Integral Membrane Proteins into Endoplasmic Reticulum	278
11.5 Posttranslational Modifications of Membrane Proteins	286
11.6 Degradation of Membrane Proteins	287
11.7 Highlights	287
References	288
12. Lipid-Protein Interactions in Membranes	
12.1 Influence of Membrane Proteins on Bulk Membrane Lipid Properties in a Bilayer	294
12.2 Specific Lipid Influence on Membrane Protein Function	299
12.3 Tight Noncovalent Binding of Lipids to Membrane Proteins	302
12.3.1 Diphosphatidylglycerol (cardiolipin)	306
12.3.2 Phosphatidylglycerol	309
12.3.3 Phosphatidylethanolamine	310
12.3.4 Phosphatidylinositol	312
12.3.5 Phosphatidylcholine	313
12.3.6 Cholesterol	314
12.4 Pleckstrin Homology Domains	318
12.5 Phospholipase Binding to Phospholipid Substrate	319
12.6 Boundary Lipids in Membranes Containing Transmembrane Proteins	319
12.7 Dynamics of Lipids Interacting with Membrane Proteins	321
12.8 Membrane Proteins and Rafts	324
12.9 Proteins That Bend Bilayers	325
12.10 Lipids Covalently Bonded to Proteins	325
12.11 Reconstitution	326
12.12 Highlights	328
References	329
13. Membrane Transport	
13.1 Passive Diffusion	336
13.2 Facilitated Diffusion	340
13.2.1 Carriers	340
13.2.2 Channels Formed by Antibiotics	345
13.2.3 Protein Channels	347
13.3 Active Transport	362
13.3.1 Lactose Permease	364
13.3.2 Na ⁺ K ⁺ ATPase	366
13.3.3 Sarco(end)plasmic Reticulum Calcium Pump	369
13.3.4 ATP Synthase	371
13.3.5 Phosphotransferase System of Bacteria	373
13.4 Highlights	375
References	375

14. Membrane Fusion

14.1	Fundamentals of the Membrane Fusion Process	382
14.2	Measurement of Membrane Fusion	383
14.3	Fusion of Phospholipid Vesicles	384
14.4	Virus Fusion	386
14.5	Sendai Virus	387
14.6	Influenza Virus	390
14.7	Intracellular Membrane Fusion	393
14.8	Highlights	396
	References	397

15. Membrane Receptors

15.1	LDL Receptor	401
15.2	Receptor-Mediated Endocytosis	403
15.3	Transferrin Receptor	405
15.4	Receptor Tyrosine Kinases—Insulin Receptor	406
15.5	Receptor Tyrosine Kinases—Epidermal Growth Factor Receptor	408
15.6	Nicotinic Acetylcholine Receptor	409
15.7	Integrins, Adhesion Receptors	411
15.8	Guanylyl Cyclase Receptors	412
15.9	G-Protein Coupled Receptors	413
15.10	Highlights	421
	References	422
