PART 1 LIQUID TRANSPORT THROUGH POLYMERS

CHAPTER 1 Liquid Transport Characteristics in Polymeric Systems: An Introduction..... 3

Runcy Wilson, Soney C. George, Anil Kumar S.,

Sabu Thomas

1. Introduction	3
2. Factors Affecting the Transport Phenomena.....	6
2.1 Cohesive Energy Density	6
2.2 Free Volume of the Polymer	6
2.3 Segmental Mobility of the Polymer.....	7
2.4 Glass Transition Temperature.....	7
2.5 Distribution of Cross-Links	8
2.6 Nature of Penetrants.....	8
2.7 Temperature.....	9
3. Liquid Transport Through Various Polymers.....	9
3.1 Liquid Transport Through Polymer Composites and Nanocomposites	10
4. Conclusions.....	11
References.....	11

CHAPTER 2 Modern Trends and Applications of Solvent/Gas Transport Through Various Polymers and Their Nanocomposites 15

Hanna J. Maria, Sabu Thomas

1. Introduction	15
2. Food Packaging	19
2.1 Oxygen Transmission Rate.....	20
2.2 Water Vapor Transmission Rate.....	20
2.3 Carbon Dioxide Transmission Rate.....	22
3. Gas Separation Technology.....	22
3.1 Separation of O ₂ and N ₂	23
3.2 Separation of H ₂	23
3.3 Removal of Acid Gas From Natural Gas.....	24
3.4 Olefin/Paraffin Separation.....	24
3.5 CO ₂ Sequestration.....	24

4. Seed Storage	24
5. Barrier Tube for Ink	27
6. Underground Cable Systems	27
7. Tire Inner Lining.....	29
8. Packaging of Pharmaceuticals and Medical Devices.....	29
9. Future Applications	30
9.1 Membranes for Printed and Flexible Electronics Devices.....	30
9.2 External Packaging for Pharmaceutical Products	30
References.....	30
CHAPTER 3 Fabrication Methods: Polymer Membranes for Liquid Transport.....	35
<i>Vayyaprontavida Kaliyathan Abitha, Sabu Thomas</i>	
1. Introduction	35
2. Fabrication of Polymer Membranes.....	37
3. Studies in Polymer Membrane.....	42
4. Conclusion.....	48
References.....	48
CHAPTER 4 Fundamentals and Measurement Techniques for Solvent Transport in Polymers	51
<i>Alena Randová, Lidmila Bartovská</i>	
1. Introduction	51
2. Solution-Diffusion Model	52
3. Total Mass Uptake—Sorption, Desorption.....	53
3.1 Gravimetric Sorption Measurement.....	54
3.2 Gravimetric Desorption Measurement	57
4. Preferential Sorption and Composite Isotherm.....	58
5. Composition of the Sorbed Liquid and Composition of the Swollen Polymer.....	62
5.1 Composition of the Sorbed Liquid, Individual Sorptions.....	62
5.2 Composition of the Swollen Polymer	64
6. Dimensional Changes of Membrane Caused by Swelling	64
7. Discussion and Conclusions	66
Acknowledgments.....	67
References.....	67
CHAPTER 5 Liquid Transport Through Elastomers	71
<i>Thomasukutty Jose, Soney C. George</i>	
1. Introduction	71
2. Fundamentals of Liquid Transport.....	72

3. Factors Affecting Liquid Transport Through Elastomers	73
3.1 Nature of Elastomers.....	73
3.2 Nature of Cross-Links	74
3.3 Nature of Penetrant.....	74
3.4 Nature of Fillers	74
3.5 Effect of Temperature.....	76
4. Transport Characteristics of Elastomers.....	76
4.1 Transport Through Natural Rubber	76
4.2 Transport through Synthetic Elastomers.....	77
4.3 Swelling of Elastomers in Oil and Water	83
5. Conclusion.....	86
References.....	86
Further Reading.....	89

CHAPTER 6 Liquid Transport Through Thermoplastics..... 91

Gejo George, Kuruvilla Joseph,

Nellipparambil V. Unnikrishnan

1. Introduction	91
2. Diffusion of Moisture/Water Through Thermoplastics	93
3. Diffusion of Organic Solvents Through Thermoplastics	103
4. Conclusions.....	105
References.....	105

CHAPTER 7 Liquid Transport Through Thermosets..... 107

Grace Moni, Soney C. George

1. Introduction	107
2. Liquid Transport Through Thermosets	107
3. Fundamentals of Liquid Transport Studies.....	108
3.1 Diffusion Coefficient, Sorption Coefficient, and Permeability Coefficient.....	108
3.2 Mechanism of Transport	109
4. Water Diffusion in Epoxy Resins	109
5. Water Transport Through Polyurethanes and Polyester Resins.....	111
6. Transport of Organic Liquids Through Polyurethanes and Polyamide-Based Thermosets.....	112
7. Transport of Organic Liquids Through Polyesters	115
8. Summary	116
References.....	116

CHAPTER 8 Transport Properties Through Polymer Membranes..... 119

Nimisha Kaippamangalath,

Unnikrishnan Gopalakrishnapanicker

1. Introduction	119
2. Fundamentals of Transport Phenomena.....	120
2.1 Swelling of Polymer Membranes.....	120
2.2 Sorption of Binary Liquid Mixtures	124
3. Interesting Transport Studies.....	129
3.1 Transport Properties of Gases and Vapors Through Polymer Membranes.....	143
4. Conclusion.....	151
References.....	151

CHAPTER 9 Liquid Transport Through IPNs..... 159

Jose James, George V. Thomas, Sabu Thomas

1. Introduction.....	159
2. General Concepts of IPNs.....	160
3. Theory of Transport Behavior.....	160
4. General Procedure of Diffusion Studies.....	161
5. Factors of Diffusion in IPN.....	161
6. Phase Morphology of the IPN System.....	162
7. Cross-Link Density and Molecular Weight.....	163
8. Sorption Behavior	164
9. Sorption, Desorption, Resorption, and Redesorption	165
9.1 Cycles in Transport Behavior of IPN.....	165
10. Effect of Temperature on the Transport Behavior of IPN.....	166
11. Transport Parameters of IPN	167
12. Kinetic and Thermodynamic Parameters of Diffusion in IPN	168
13. Role of Solubility Parameter in IPN Diffusion.....	169
14. Transport Behavior in IPN Hydrogel.....	169
15. Applications of Transport Behavior in IPN	170
16. Conclusions.....	170
References.....	170

CHAPTER 10 Liquid Transport Through Polymer Composites 175

Ajith J. Jose, Jincymol Kappen, Meghana M. Thomas,

Vipin G. Krishnan, Anila Sebastian

1. Introduction	175
2. Diffusion in Elastomers/Composites	176
2.1 Natural Rubber/Carbon Black Composites	177
2.2 Elastomer/Fibers/Particulate-Filled Composites.....	178
3. Diffusion in Thermoplastic Composites.....	179
3.1 Diffusion in Fiber-Filled Thermoplastic Composites	179
3.2 Diffusion in Carbon Black–Filled Thermoplastic.....	180
4. Diffusion in Thermoset Composites.....	181
5. Diffusion in Blend Composites.....	182
6. Diffusion of Organic Solvents in Blends	182
7. Influence of Filler Morphology in Liquid Diffusion.....	183
8. Applications.....	185
9. Conclusions.....	186
References.....	186

CHAPTER 11 Liquid Transport Through Polymer Nanocomposites 191

Jiji Abraham, Jince Thomas, Akhina Hafusa,

Soney C. George, Sabu Thomas

1. Polymer Nanocomposites	191
2. Importance of Liquid Transport Through Polymer Nanocomposites.....	192
3. Liquid Transport Through Rubber Nanocomposites.....	193
3.1 Effect of Filler Loading.....	193
3.2 Effect of Different Fillers	194
3.3 Effect of Processing Conditions.....	196
3.4 Effect of Functionalization of Filler.....	197
3.5 Hybrid Filler Effect.....	198
3.6 Effect of Solvent.....	199
3.7 Effect of Temperature	199
3.8 Effect of Free Volume.....	200
3.9 Effect of Morphology	200
3.10 Network Structure Analysis	202
3.11 Theoretical Modeling.....	202
4. Liquid Transport Through Thermoplastic Nanocomposites	205
5. Liquid Transport Through Thermoset Nanocomposites	207

6. Liquid Transport Through Blend Nanocomposites	209
7. Conclusion and Future Outlook	211
References.....	211

CHAPTER 12 Liquid–Liquid Separation Through Polymeric Membranes..... 217

Vinod Kumar Gupta, Bhavana Sethi

1. Introduction	217
2. Fundamentals Behind PV Separation Process.....	219
3. PV Membrane Materials and Their Separation Properties.....	219
3.1 PV Membranes.....	219
3.2 Polymer Material Selection for PV: Criteria	222
3.3 Performance Characterization of PV Membranes.....	223
3.4 Membrane Morphology	225
3.5 Membrane Modification.....	226
3.6 Factors Affecting Membrane Performance.....	229
4. Applications of PV Polymeric Membranes in Separation of Different Liquid–Liquid Mixtures: An Overview on Recent Research Advancements	231
4.1 Separation of Water–Organic Mixtures	232
5. Conclusions and Future Outlook.....	236
References.....	237

CHAPTER 13 Separation via Pervaporation Techniques Through Polymeric Membranes..... 243

Mashallah Rezakazemi, Mohtada Sadrzadeh,

Toraj Mohammadi

1. Introduction	243
2. Separation Characterization Parameters.....	244
3. Pervaporation Membrane Materials and Their Separation Properties	245
3.1 Water-Selective Polymeric Membrane	246
3.2 Apolar or Organophilic Polymer Membranes.....	251
4. Pervaporation Transport Models	251
4.1 Thermodynamics of Irreversible Processes.....	252
4.2 Solution-Diffusion Model.....	252
4.3 Modified Solution-Diffusion Model.....	253
4.4 Pore-Flow Model	255
4.5 Modified Pore-flow Model.....	256
4.6 Thermodynamic Vapor–Liquid Equilibrium Model.....	256
4.7 Pseudophase-Change Solution-Diffusion (PPCSD) Model	258

4.8 Resistance-in-Series Model.....	259
4.9 Computational Fluid Dynamics	260
4.10 Maxwell–Stefan Model	260
5. Conclusion.....	261
References.....	262

CHAPTER 14 Membrane Filtration Techniques Through Polymer Nanocomposites 265

Nivedita Sankar, Shiny Joseph

1. Introduction	265
1.1 Membrane Separation Processes.....	265
2. Membrane Materials.....	266
3. Characteristics of Membranes.....	267
3.1 Surface Morphology.....	267
3.2 Membrane Porosity.....	268
3.3 Mechanical Strength.....	268
3.4 Surface Roughness.....	268
3.5 Hydrophilicity.....	269
3.6 Pure Water Flux	269
4. Nanomaterials.....	270
5. Polymer Nanocomposites	271
5.1 Synthesis Techniques.....	271
6. Influence of Various Nanoparticles in Polymer Nanocomposite Membranes	276
6.1 Metal Oxides	276
6.2 Silver.....	283
6.3 Nanoclay.....	285
6.4 Silica Nanoparticles	287
6.5 Carbon Nanotubes.....	289
6.6 Graphene and Graphene Oxide.....	290
6.7 Zeolites.....	294
7. Transport Through the Membrane	294
8. Conclusion and Future Improvements.....	296
References.....	297
Further Reading.....	300

CHAPTER 15 Liquid Transport Through Biodegradable Polymers 301

Sharika T. Nair, Soney C. George, Sabu Thomas

1. Introduction	301
2. Effect of Nanofillers on the Transport Properties of Biopolymers.....	303

2.1 Effect of Nanoparticle Hydration on Transport	
Properties	305
2.2 Effect of Filler Dispersion Technique	306
2.3 Effect of Natural Fibers on the Transport Properties.....	308
2.4 Effect of Compatibilizers in Biopolymer	
Nanocomposites	309
3. Influence of the Nature of Liquid.....	310
4. Effect of Chemical Cross-Linking and Thermal Treatment	
of Polymer Matrix.....	311
5. Effect of Molecular Weight of Polymer Matrix.....	314
6. Effect of Crystallinity of Polymer Matrix	316
7. Effect of Temperature	318
8. Conclusion.....	319
References.....	320

CHAPTER 16 Membrane Distillation, Forward Osmosis, and Pressure-Retarded Osmosis Through Polymer Membranes..... 323

Jincai Su, Tai-Shung Chung

1. Principles of Membrane Distillation, Forward Osmosis, and Pressure-Retarded Osmosis Processes	323
2. Water Transport Through Membrane Distillation, Forward Osmosis, and Pressure-Retarded Osmosis Membranes	329
2.1 Mass Transfer in Membrane Distillation	329
2.2 Mass Transfer in Forward Osmosis.....	332
2.3 Mass Transfer in Pressure-Retarded Osmosis.....	337
3. Hot Topics, Challenges, and Future Research Prospects.....	339
References.....	341

PART 2 GAS TRANSPORT THROUGH POLYMERS

CHAPTER 17 Introduction to Gas Transport Through Polymer Membranes..... 349

Maruvathukavunkal Balakrishnan Sethu Lakshmi,

Bincy Francis, Anil Kumar S.

1. Introduction	349
2. Membranes	350
2.1 Inorganic Membranes.....	351
2.2 Polymeric Membranes.....	351
2.3 Inorganic-Polymer Hybrid Membranes	354

3. Gas Transport Mechanisms in Polymer Membranes	355
3.1 Transport Through Porous Membranes	355
3.2 Transport Through Dense Membranes	356
4. Application	359
5. Conclusion.....	359
References.....	360

CHAPTER 18 Modern Trends and Applications of Gas Transport Through Various Polymers..... 363

Vakkoottil S. Abhisha, Valiya P. Swapna, Ranimol Stephen

1. Introduction	363
2. Gas Transport Through Rubbery and Glassy Polymers	364
3. Modern Strategies to “Trade-off” Effect: Permeability Versus Selectivity.....	366
4. Modern Trends and Applications	367
4.1 Natural Gas Processing.....	367
4.2 Gas Separation Membranes	368
4.3 Food Packaging.....	373
4.4 Electronic Devices	376
4.5 Petrochemical Industry	377
4.6 Biomedical Field	380
5. Concluding Remarks.....	381
References.....	381

CHAPTER 19 Fundamentals and Measurement Techniques for Gas Transport in Polymers..... 391

Mohtada Sadrzadeh, Mashallah Rezakazemi,

Toraj Mohammadi

1. Introduction	391
2. Fundamentals of Gas Transport Through Membranes	392
2.1 Poiseuille Flow.....	393
2.2 Knudsen Diffusion.....	393
2.3 Molecular Sieving.....	394
2.4 Solution Diffusion.....	394
3. Measurement Techniques in Gas Separation.....	399
3.1 Gas Permeation Measurement.....	399
3.2 Gas Sorption Measurement.....	402
3.3 Gas Diffusion Measurement.....	412
3.4 Time-Lag Method.....	412
4. Summary and Concluding Remarks.....	416
References.....	418
Further Reading.....	423

**CHAPTER 20 Theoretical Aspects of Gas Transport
in Polymers 425**

Payam Parvasi, Fatemeh Sabzi

1. Introduction	425
2. Models Explaining Gas in Polymers.....	426
2.1 Macroscopic (Continuum) Model	426
2.2 Microscopic (Molecular) Model	427
3. Transport Phenomena in Different Polymeric Systems.....	427
3.1 Gas Transport in Rubbery Polymers.....	428
3.2 Gas Permeation in Glassy Polymers.....	428
3.3 Gas Transport in Crystalline Polymers.....	432
4. Effects of Environmental Conditions on Gas Transport in Polymers	433
4.1 Temperature Effects	433
4.2 Pressure Effects.....	434
5. Conclusions.....	435
Acknowledgments.....	436
References.....	436

**CHAPTER 21 Gas Permeability and Theoretical Modeling
of Elastomers and Its Nanocomposites..... 441**

Ajesh K. Zachariah

1. Introduction	441
2. Variation in Permeability Behavior Due to Different Kinds of Nanofillers	442
3. Variation in Matrix	448
4. Theories in Gas Permeability	451
5. Different Kinds of Models	452
6. Concluding Remarks.....	456
References.....	456

CHAPTER 22 Gas Transport Through Thermoplastics..... 459

Ajith J. Jose, Anila Sebastian, Meghana M. Thomas,

Vipin G. Krishnan, Jincymol Kappen

1. Introduction.....	459
2. Mechanism of Gas Transport Through Different Thermoplastics.....	460
3. Effect of Pressure on Permeation	461
4. Effect of Temperature	461
5. Effect of Free Volume and Glass Transition Temperature (T_g).....	461

6. Gas Transports Through Polyethylene, Polyamide 11, and Polyvinylidene Fluoride.....	462
7. Gas Transports Through Polycarbonate	463
8. Gas Transports Through Polyvinyl Chloride.....	464
9. Influence of Cross-linker	464
10. Influence of Fillers	465
11. Modeling of Gas Transport Properties.....	465
12. Applications of Thermoplastics With Good Barrier Efficiency	466
12.1 Oxygen Transmission Rate	468
12.2 Water Vapor Transmission Rate	468
12.3 Carbon Dioxide Transmission Rate	468
13. Future Outlook.....	470
14. Conclusion.....	470
References.....	470

CHAPTER 23 Gas Permeability Through Thermosets 475

Pattoorpady K. Sandhya, Ravindran Lakshmipriya,

Meyyarappallil S. Sreekala

1. Introduction.....	475
2. Diffusion of Gases in Polymers.....	476
3. Laws of Gas Permeability.....	477
4. Modes of Sorption.....	479
5. Factors Affecting Gas Permeation Phenomena.....	481
5.1 Nature of Polymers	481
5.2 Crystallinity.....	482
5.3 Effect of Filler Particles.....	482
5.4 Effect of Temperature.....	484
5.5 Free Volume	485
6. Gases Commonly Used for Gas Permeation Study	486
7. Experimental Methods for Determining Gas Permeability	486
7.1 Volume Loss Method.....	487
7.2 Continuous Flow Method	487
7.3 Constant Volume Method.....	488
7.4 Gravimetric Method	488
8. Gas Barrier Properties Observed in Various Thermosetting Polymer Composites	489
9. Models Associated With Nature of Fillers.....	490
10. Thermosetting Polymers.....	492
10.1 Phenolic Resins	493
10.2 Aminoplasts	496

10.3 Epoxy Resins	498
10.4 Polyurethanes	506
10.5 Polyester Resins	509
10.6 Silicates	510
10.7 Fats	512
11. Methods to Improve the Gas Permeability	512
12. Conclusions	513
References	513
CHAPTER 24 Gas Transport Through Polymer Blends	517
<i>Fatemeh Saizi</i>	
1. Introduction	517
2. Classification of Polymer Blends	518
3. Conclusions	518
3.1 Effect of Polymer Blend Morphology on Gas Transport	518
3.2 Effect of Gas Sorption on Polymer Blend Morphology	528
List of Abbreviations	528
Acknowledgments	528
References	528
CHAPTER 25 Gas Transport Through Interpenetrating Polymer Networks	533
<i>Zohreh Bazargani, Fatemeh Saizi</i>	
1. Introduction	533
2. Structure of Interpenetrating Polymer Networks	533
2.1 Sequential Interpenetrating Polymer Network	534
2.2 Simultaneous Interpenetrating Polymer Network	534
2.3 Latex Interpenetrating Polymer Network	534
2.4 Gradient Interpenetrating Polymer Network	534
2.5 Thermoplastic Interpenetrating Polymer Network	534
2.6 Semi-Interpenetrating Polymer Network	534
2.7 Homo-Interpenetrating Polymer Network	534
3. Nomenclature of Interpenetrating Polymer Networks	535
4. Gas Transport Phenomena	535
4.1 Characteristics of Interpenetrating Polymer Network	536
4.2 Key Factors Influencing Transport Process	537
5. Gas Transport Phenomena in Samples of Interpenetrating Polymer Networks	537
5.1 (<i>net</i> -Polyethylene Glycol-Diacrylate)- <i>syn</i> -Poly(Ether Imides)	537
5.2 (<i>net</i> -Bismaleimide)- <i>syn</i> -Poly(Ether Imides)	538

5.3	(<i>net</i> -Polyurethane)- <i>ipn</i> -(<i>net</i> -Polystyrene).....	539
5.4	(<i>net</i> -Cardo-bismaleimide)- <i>sipn</i> -Poly(Ether Imide).....	539
5.5	(<i>net</i> -Poly 1-vinyl-3-octylimidazolium hexafluorophosphate)- <i>sipn</i> -Poly(Vinyl Acetate).....	540
6.	Conclusion.....	540
	Acknowledgments.....	541
	References.....	541
	Further Reading.....	546

**CHAPTER 26 Activation Entropy for Diffusion of Gases
Through Mixed Matrix Membranes..... 547**

V. Compañ, L.F. del Castillo

1.	Introduction.....	547
2.	The Upper Bounds for Polymer Performances and MMMs....	548
3.	Description of MMMs. The Ideal Case	550
4.	“Lumped” Global Mass Transport Through MMMs	551
5.	Sorption–Diffusion Model and Permeability.....	552
6.	Energy Barrier Model to Describe Diffusion and Enthalpic and Entropic Contributions	555
	6.1 Amorphous Case	555
	6.2 Mixed Matrix Membranes Case.....	556
7.	Tortuosity and Chain Immobilization Factors	557
8.	Thermodynamic Interpretation of the Tortuosity and Chain Immobilization Factors.....	557
9.	Determination of the Tortuosity Factor From Experimental Data.....	559
	9.1 Thermal Rearrangement and Carbon Molecular Sieve Membranes.....	561
10.	Obtaining Solubility, Permeability, and Selectivity	562
11.	Conclusions.....	565
	Acknowledgments.....	566
	References.....	566
	Further Reading.....	572

**CHAPTER 27 Gas Transport Through Polymer/Clay
Nanocomposites 573**

Nadège Follain, Stéphane Marais

1.	Background on Transport Phenomenon.....	573
2.	Measurements Techniques: Permeation and Sorption Processes	578

2.1 Permeation Kinetics	578
2.2 Sorption Kinetics.....	582
2.3 Sorption Isotherms.....	585
3. Barrier Properties of Polymer/Clay Nanocomposites	587
3.1 Influence of Exfoliation and Dispersion Level of Nanoclays.....	588
3.2 Influence of Orientation of Clay Platelets.....	593
3.3 Influence of Volume Fraction and Aspect Ratio.....	595
3.4 Influence of the Structure and of the Molecular Mobility of Polymer Chains.....	596
3.5 Influence of Polymer/Clay Interfacial Area.....	600
3.6 Influence of the Type of Permeant	607
4. Summary	610
References.....	612

**CHAPTER 28 Gas Transport Through Polymer
Bio-nanocomposites..... 615**

*Jithin Joy, Midhun C. Raj, Neenu George, P. Lovely Mathew,
Sabu Thomas*

1. Introduction	615
2. Bio-nanocomposites.....	616
2.1 Biopolymers	616
2.2 Biopolymer-Based Nanocomposites	617
3. Nanoreinforcements.....	618
3.1 Clays and Silicates.....	618
3.2 Carbohydrates-Based Nanoreinforcements.....	619
4. Gas Transport Properties of Bio-nanocomposites	620
4.1 PLA-Based Nanocomposites.....	621
4.2 PHB-Based Nanocomposites.....	623
4.3 PBS-Based Composites.....	624
4.4 Cellulose-Based Nanocomposites	624
4.5 PCL-Based Nanocomposites	625
5. Conclusion.....	625
References.....	626

CHAPTER 29 Gas Transport Through Polymer Composites..... 633

Kuruville Joseph, Anoop Chandran, Gejo George

1. Introduction	633
2. Theory of Gas Transport Through Polymer Composite Membrane.....	634

3. Types of Polymer Composite Membranes Used for Gas Separation: The Relationship Between Structure and Properties	635
3.1 Composite Membranes Based on Rubbery Polymers.....	637
3.2 Composite Membranes Based on Glassy Polymers	639
4. Conclusions.....	648
References.....	648

CHAPTER 30 Gas Transport Properties in Packaging Applications 651

*Rafael Gavara, Ramón Catalá, Josep Pasqual Cerisuelo,
Pilar Hernandez-Muñoz*

1. Introduction	651
2. General Characteristics of Polymers for Packaging	652
3. Mass Transport and Packaging Technologies.....	653
4. Gas Permeation: Implications and Methods to Control.....	656
4.1 Permeation in Monolayer Structures.....	657
4.2 Permeation in Multilayer Materials	661
4.3 Permeation a Required Process in Some Packaging Technologies.....	664
5. Gas Sorption: Implications and Methods to Control	666
6. Gas Migration: Implications and Methods to Control	668
7. Future Trends	671
References.....	671

Index.....	673
