

Biochemistry of Collagens, Laminins and Elastin

Structure, Function and Biomarkers

Second Edition

Edited by

Morten A. Karsdal

Nordic Bioscience, Herlev, Denmark

University of Southern Denmark, Odense, Denmark

Co-editors

Diana J. Leeming

Kim Henriksen

Anne-Christine Bay-Jensen

Signe Holm Nielsen

Cecilie L. Bager

ACADEMIC PRESS

Contents

List of contributors	xiii
Foreword	xv
Preface	xvii
Acknowledgments	xix
List of abbreviations	xxi
Introduction	xxiii
1. Type I collagen	1
<i>K. Henriksen and M.A. Karsdal</i>	
References	9
2. Type II collagen	13
<i>Y. He, N.S. Gudmann, A.C. Bay-Jensen, M.A. Karsdal, A. Engstroem and C.S. Thudium</i>	
Biomarkers of type II collagen	16
References	19
3. Type III collagen	23
<i>M.J. Nielsen, I.F. Villesen, D. Sinkeviciute, A.C. Bay-Jensen and M.A. Karsdal</i>	
Biomarkers of type III collagen	26
References	31
4. Type IV collagen	37
<i>J.M.B. Sand, F. Genovese, N.S. Gudmann and M.A. Karsdal</i>	
Biomarkers of type IV collagen	43
References	44
5. Type V collagen	51
<i>D.J. Leeming and M.A. Karsdal</i>	
Biomarkers of type V collagen	53
References	55

6. Type VI collagen	59
<i>S. Sun, F. Genovese and M.A. Karsdal</i>	
Biomarkers of type VI collagen	62
References	65
7. Type VII collagen	69
<i>J.H. Mortensen and M.A. Karsdal</i>	
Biomarkers of type VII collagen	71
References	73
8. Type VIII collagen	75
<i>N.U.B. Hansen, N.S. Gudmann and M.A. Karsdal</i>	
Biomarkers of type VIII collagen	79
References	79
9. Type IX collagen	83
<i>Y. He, S. Sardar and M.A. Karsdal</i>	
Biomarkers of type IX collagen	87
References	88
10. Type X collagen	91
<i>Y. He, N.S. Gudmann, N. Willumsen and M.A. Karsdal</i>	
Biomarkers of type X collagen	93
References	95
11. Type XI collagen	99
<i>Y.Y. Luo, P.M. Szlarski, S.N. Kehlet and M.A. Karsdal</i>	
References	104
12. Type XII collagen	107
<i>J.H. Mortensen, T. Manon-Jensen and M.A. Karsdal</i>	
References	111
13. Type XIII collagen	115
<i>A.S. Siebuhr, C.S. Thudium and M.A. Karsdal</i>	
Biomarkers of type XIII collagen	118
References	119

14. Type XIV collagen	121
<i>M. Lindholm, T. Manon-Jensen and M.A. Karsdal</i>	
References	124
15. Type XV collagen	127
<i>T. Manon-Jensen, A. Arvanitidis and M.A. Karsdal</i>	
References	130
16. Type XVI collagen	133
<i>J.M.B. Sand, C. Jensen and M.A. Karsdal</i>	
Biomarkers of type XVI collagen	136
References	138
17. Type XVII collagen	141
<i>S. Sun and M.A. Karsdal</i>	
References	145
18. Type XVIII collagen	149
<i>M. Pehrsson, C.L. Bager and M.A. Karsdal</i>	
Tissue expression	151
The functional role of type XVIII collagen in pathological conditions	151
Hemophilia and the involvement of the short isoform of type XVIII collagen	153
The short isoform of type XVIII collagen, a biomarker for hemophilia	153
Role of endostatin in biology and pathology	154
Biomarkers of endostatin	156
References	158
19. Type XIX collagen	163
<i>S. Holm Nielsen and M.A. Karsdal</i>	
Biomarkers of type XIX collagen	165
References	166
20. Type XX collagen	167
<i>N. Willumsen, N.I. Nissen and M.A. Karsdal</i>	
References	170

21. Type XXI collagen	171
<i>S.N. Kehlet, H. Jessen and M.A. Karsdal</i>	
Biomarkers of type XXI collagen	173
References	174
22. Type XXII collagen	175
<i>S.N. Kehlet, H. Jessen and M.A. Karsdal</i>	
Biomarkers of type XXII collagen	178
References	178
23. Type XXIII collagen	181
<i>S.N. Kehlet, H. Jessen and M.A. Karsdal</i>	
Biomarkers of type XXIII collagen	183
References	184
24. Type XXIV collagen	187
<i>S. Holm Nielsen and M.A. Karsdal</i>	
References	190
25. Type XXV collagen	191
<i>L.L. Langholm, N.G. Kjeld and M.A. Karsdal</i>	
References	195
26. Type XXVI collagen	197
<i>T. Manon-Jensen, N.G. Kjeld and M.A. Karsdal</i>	
References	200
27. Type XXVII collagen	201
<i>F. Genovese and M.A. Karsdal</i>	
References	204
28. Type XXVIII collagen	205
<i>N. Sparding, A. Arvanitidis and M.A. Karsdal</i>	
References	208

29. Laminins	209
<i>D.G.K. Rasmussen and M.A. Karsdal</i>	
Introduction	210
Structure	212
Nomenclature	214
Interaction partners	214
Signaling	215
Laminin trimers	217
Laminin-111	217
Laminin-211	218
Laminin-121	219
Laminin-221	220
Laminin-332, -311, and -321	220
Laminin-411	221
Laminin-421	222
Laminin-511	222
Laminin-521	223
Laminin-213	225
Laminin-323, -423, and -523	225
Laminin mutations and their disease in man	226
LAMA1	230
LAMA2	232
LAMA3	234
LAMA4	236
LAMA5	238
LAMB1	241
LAMB2	243
LAMB3	244
LAMC1	247
LAMC2	248
LAMC3	250
References	252
30. Elastin	265
<i>J.H. Kristensen, J. Thorlacius-Ussing, S.R. Rønnow and M.A. Karsdal</i>	
References	270
31. The collagen chaperones	275
<i>S.N. Kehlet, A.S. Siebuhr, N.S. Gudmann and M.A. Karsdal</i>	
Chaperone introduction	276
SPARC	277

Protein structure and expression	277
SPARC and collagens—implications of an extracellular chaperone function	278
SPARC as a mediator of fibrosis	279
Periostin	280
Protein structure and expression	280
Periostin as a collagen chaperone	280
The role of periostin in fibrosis	280
COMP	281
COMP as a chaperone	282
COMP as a player in diseases	283
HSP47	284
HSP47 expression and structure	284
HSP47 function	285
HSP47 in disease and as a target for treatment	285
References	286
32. Collagen diseases	293
<i>S. Sardar, M.A. Karsdal and K. Henriksen</i>	
Osteogenesis imperfecta	295
Clinical characteristics	295
Genetics of OI	295
The ECM in OI	297
Therapies for OI	298
Summary	299
Ehlers–Danlos syndrome	299
Clinical characteristics	299
Genetic basis and pathophysiology	302
Diagnosis	304
Management	305
Summary	305
Alport’s syndrome	305
Clinical manifestations	305
Genetic basis and pathophysiology	306
Diagnosis	307
Management	307
Summary	307
Epidermolysis bullosa	308
Clinical manifestations	308
Genetic basis and pathophysiology	310
Diagnosis	311
Management	311
Summary	311
References	312

33. The signals of the extracellular matrix	321
<i>A.L. Reese-Petersen, F. Genovese and M.A. Karsdal</i>	
Introduction	321
Type IV collagen—arresten, canstatin, tumstatin, tetrastatin, pentastatin, and hexastatin	322
Receptor signaling	326
Type VI collagen—endotrophin	328
Type VIII collagen—vastatin	330
Type XV collagen—restins	330
Type XVIII collagen—endostatin	331
Other extracellular matrix fragments	332
References	334
34. The roles of collagens in cancer	341
<i>N. Willumsen, N.I. Nissen and M.A. Karsdal</i>	
Desmoplasia	341
Collagen binding to receptors regulate cancer cell fate and metastasis	343
Altered degradation of collagen in the tumor	344
Collagen fragments as noninvasive biomarkers of desmoplasia	346
References	348
35. Use of extracellular matrix biomarkers in clinical research	353
<i>A.R. Bihlet, M.A. Karsdal, J.R. Andersen and C.L. Bager</i>	
Biomarker terminology	354
Extracellular matrix biomarkers as a translational tool in drug development	355
Established use of ECM biomarkers in drug development and epidemiology	355
Osteoporosis	356
Osteoarthritis	356
Rheumatoid arthritis and other rheumatic conditions	356
Respiratory diseases	357
Liver fibrosis and collagen type III deposition	358
Potential for future use	358
Inhibition of aggrecan degradation in osteoarthritis: aggrecanase-derived aggrecan fragments as a translational tool and surrogate endpoint	358
Perspectives for collagen biomarkers in clinical research	359
References	360

36. Common confounders when evaluating noninvasive protein biomarkers	363
<i>N. Willumsen, M.A. Karsdal and A. Kern-Jespersen</i>	
Technical and analytical validation of novel noninvasive protein biomarkers	363
Clinical validation of novel noninvasive biomarkers	365
Analyte features and impact on pathological/clinical relevance of noninvasive biomarker measurements	366
Sample handling when evaluating novel noninvasive biomarkers	367
Importance of patient cohort characteristics, sample size, and reporting guidelines	367
References	368
37. Implementation of collagen biomarkers in the clinical setting	373
<i>E. Erhardtsen, D.G.K. Rasmussen and M.A. Karsdal</i>	
How to implement biomarkers in clinical development	373
Definitions of biomarkers in healthcare and drug development	374
Biomarkers used to increase knowledge on whom to treat and derisk phase III programs	376
Biomarkers used for enrichment of trial populations—the qualification route	378
Status on collagen biomarkers in clinical development	379
Discussion	381
References	382
Index	385
