

Linear Algebra

Step by Step

Kuldeep Singh

Senior Lecturer in Mathematics
University of Hertfordshire

OXFORD
UNIVERSITY PRESS

Contents

1	Linear Equations and Matrices	1
1.1	Systems of Linear Equations	1
1.2	Gaussian Elimination	12
1.3	Vector Arithmetic	27
1.4	Arithmetic of Matrices	41
1.5	Matrix Algebra	57
1.6	The Transpose and Inverse of a Matrix	75
1.7	Types of Solutions	91
1.8	The Inverse Matrix Method	105
	Des Higham Interview	127
2	Euclidean Space	129
2.1	Properties of Vectors	129
2.2	Further Properties of Vectors	143
2.3	Linear Independence	159
2.4	Basis and Spanning Set	171
	Chao Yang Interview	190
3	General Vector Spaces	191
3.1	Introduction to General Vector Spaces	191
3.2	Subspace of a Vector Space	202
3.3	Linear Independence and Basis	216
3.4	Dimension	229
3.5	Properties of a Matrix	239
3.6	Linear Systems Revisited	254
	Janet Drew Interview	275
4	Inner Product Spaces	277
4.1	Introduction to Inner Product Spaces	277
4.2	Inequalities and Orthogonality	290
4.3	Orthonormal Bases	306
4.4	Orthogonal Matrices	321
	Anshul Gupta Interview	338
5	Linear Transformations	339
5.1	Introduction to Linear Transformations	339
5.2	Kernel and Range of a Linear Transformation	352
5.3	Rank and Nullity	364
5.4	Inverse Linear Transformations	372
5.5	The Matrix of a Linear Transformation	389
5.6	Composition and Inverse Linear Transformations	407
	Petros Drineas Interview	429

6	Determinants and the Inverse Matrix	431
6.1	Determinant of a Matrix	431
6.2	Determinant of Other Matrices	439
6.3	Properties of Determinants	455
6.4	LU Factorization	472
	Françoise Tisseur Interview	490
7	Eigenvalues and Eigenvectors	491
7.1	Introduction to Eigenvalues and Eigenvectors	491
7.2	Properties of Eigenvalues and Eigenvectors	503
7.3	Diagonalization	518
7.4	Diagonalization of Symmetric Matrices	533
7.5	Singular Value Decomposition	547
	Brief Solutions	567
	Index	605
