

Mineral Processing Design and Operations

An Introduction

Second Edition

Ashok Gupta

Retired Head of Metallurgy Department
WA School of Mines, Kalgoorlie
Curtin University of Technology, Western Australia

Denis Yan

Consulting Metallurgist
Minerals Engineering Technical Services
Perth, Western Australia

AMSTERDAM • BOSTON • HEIDELBERG • LONDON • NEW YORK • OXFORD • PARIS
SAN DIEGO • SAN FRANCISCO • SINGAPORE • SYDNEY • TOKYO

Contents

<i>Preface to the Second Edition</i>	<i>xix</i>
<i>Symbols and Units</i>	<i>xxi</i>
Chapter 1: Mineral Sampling	1
1.1 Introduction.....	1
1.2 Statistical Terminology	1
1.2.1 Mean	2
1.2.2 Variance	4
1.2.3 Confidence Intervals	6
1.3 Mineral Particles Differing in Size – Gy’s Method	7
1.4 Mineral Particles of Different Density	12
1.5 Incremental Sampling.....	14
1.6 Continuous Sampling of Streams	21
1.6.1 Linear Cutters	21
1.6.2 Rotary Arc Cutter	22
1.7 Sampling Ores of Precious Metals	24
1.8 Sampling Nomographs	26
1.9 Problems	28
References.....	31
Chapter 2: Particle Size Estimation and Distributions	33
2.1 Introduction.....	33
2.2 Methods of Size Estimation.....	33
2.2.1 Microscopic Method.....	34
2.2.2 Particle Size in Terms of Volume and Surface Area	35
2.2.3 Sedimentation Method – Gravity Sedimentation	37
2.2.4 Sedimentation Method – Centrifugal Sedimentation	45
2.2.5 Laser Diffraction Method	47
2.3 Particle Size Distribution	51
2.3.1 Sieve Analysis.....	51
2.3.2 Log-Normal Distribution.....	52
2.3.3 Gaudin–Schuhmann Distribution	54
2.3.4 Rosin–Rammler Distribution.....	57
2.4 Combining Size Distributions.....	59
2.5 Problems	67
References.....	69

Chapter 3: Size Reduction and Energy Requirement.....	71
3.1 Introduction.....	71
3.2 Design of Size Reduction Processes.....	71
3.3 Energy for Size Reduction – Work Index	73
3.4 Estimation of Work Index for Crushers and Grinding Mills	76
3.4.1 Bond Pendulum Test.....	77
3.4.2 Narayanan and Whiten’s Rebound Pendulum Test	78
3.4.3 JKMRC-drop Weight Crushing Test.....	81
3.4.4 SAG Mill Comminution (SMC) Test	85
3.4.5 SAG Power Index (SPI) and SAGDesign Tests.....	87
3.4.6 Bond Ball Mill Test	89
3.4.7 Bond Rod Mill Standard Test	92
3.5 Factors Affecting the Work Index	93
3.5.1 Effect of the Test Screen Size on Work Index	98
3.6 Approximation Methods for Work Index	102
3.6.1 Magdalinovic Method	102
3.6.2 Methods Using a Non-standard Mill and Charge.....	103
3.6.3 Simulation Methods.....	105
3.6.4 Work Index from Rock Mechanics.....	106
3.6.5 Work Index by Chakrabarti’s Statistical Method	107
3.6.6 Work Index of Ore Blends.....	109
3.6.7 Correlations between Comminution Parameters	110
3.7 Work Index and Abrasion	112
3.7.1 Bond’s Abrasion Test (Also Known as Allis Chalmers Abrasion Test).....	113
3.7.2 Metso Abrasiveness and Grindability Test	114
3.7.3 JKMRC Abrasion Test.....	115
3.8 Problems	115
References.....	119
Chapter 4: Jaw Crusher.....	123
4.1 Introduction.....	123
4.2 Design of Jaw Crushers	123
4.2.1 Crusher Sizes and Power Ratings	125
4.2.2 Jaw Crusher Circuits.....	126
4.3 Jaw Crusher Operation	127
4.3.1 Operating Functions	127
4.4 Jaw Crusher Capacity Estimation	129
4.4.1 Rose and English Method.....	130
4.4.2 Taggart Method.....	134
4.4.3 Broman Method.....	139
4.4.4 Michaelson’s Method	140
4.4.5 Comparison of Methods	141
4.5 Critical Operating Speed.....	142

4.6 Power Consumption Estimation	144
4.6.1 Rose and English Method.....	144
4.6.2 Lynch Method.....	146
4.6.3 Andersen and Napier Munn Method	148
4.7 Problems	149
References.....	152
Chapter 5: Gyratory and Cone Crusher.....	153
5.1 Introduction.....	153
5.2 Design of Gyratory Crushers	153
5.2.1 Primary Crusher.....	153
5.2.2 Secondary and Tertiary Cone Crushers	156
5.3 Gyratory Crusher Circuit Design.....	158
5.4 Gyratory Crusher Operation	159
5.4.1 Gyrating Speed of Head	160
5.5 Capacity of Gyratory and Cone Crushers.....	160
5.5.1 Gyratory Crushers	160
5.5.2 Broman Method of Estimating Capacity of Gyratory Crushers.....	161
5.5.3 Rose and English Method of Estimating Capacity of Gyratory Crushers....	162
5.5.4 Cone Crusher Capacity Estimation	163
5.6 Power Consumption of Gyratory and Cone Crushers	163
5.7 Problems	164
References.....	167
Chapter 6: Roll Crushers.....	169
6.1 Introduction.....	169
6.2 Design of Roll Crushers.....	169
6.2.1 Roll Crusher Sizes and Design	170
6.2.2 Roll Design	171
6.2.3 Roll Crusher Circuit Design	174
6.3 Operation of Roll Crushers	174
6.4 Capacity of Roll Crushers.....	175
6.5 Power Consumption of Roll Crushers	176
6.6 High Pressure Grinding Rolls (HPGR).....	176
6.6.1 Circuit Design and HPGR	178
6.7 Operation of HPGR.....	178
6.7.1 Estimation of Operating Pressure	179
6.7.2 Estimation of Nip Angle	180
6.7.3 Estimation of the Roll Gap	181
6.7.4 Roll Speed.....	182
6.7.5 Feed and Product Size	182
6.8 Capacity of HPGR	183
6.9 Power Consumption of HPGR.....	185
6.10 Problems	186
References.....	187

Chapter 7: Tubular Ball Mills.....	189
7.1 Introduction.....	189
7.2 Design of Tubular Mills.....	189
7.3 Operation of Tubular Ball Mills.....	193
7.3.1 Charge Volume	194
7.3.2 Charge Height.....	195
7.3.3 Ball Size at Initial Ball Charge	198
7.3.4 Ball Size as Replacement	201
7.3.5 Ball Wear	203
7.3.6 Ball Bulk Density	206
7.3.7 Ball Size Distribution	206
7.3.8 Mill Rotation and Critical Speed.....	209
7.3.9 Mill Conditions and Initial Ball Charge	213
7.4 Estimation of Mill Capacity.....	215
7.5 Mill Power Draw-Mechanical Methods	218
7.5.1 Rose and Sullivan Method.....	219
7.5.2 Nordberg (Metso) Method.....	220
7.5.3 Blanc Method	222
7.5.4 Bond Method.....	223
7.5.5 Theoretical Mill Power Draw	231
7.5.6 Electrical Drive of Ball Mills	238
7.6 Problems	238
References.....	240
Chapter 8: Tubular Rod Mills.....	241
8.1 Introduction.....	241
8.2 Design of Rod Mills.....	241
8.2.1 Design of Rod Mill–Ball Mill Circuits.....	242
8.3 Operation of Rod Mills.....	244
8.3.1 Rod Mill Charge	244
8.3.2 Rod Length and Diameter for an Initial Charge	245
8.3.3 Rod Diameter at Replacement.....	246
8.3.4 Reduction Ratio in Rod Mills.....	246
8.4 Rod Mill Capacity.....	247
8.5 Rod Mill Power Draft	249
8.5.1 Mill Power Corrections	251
8.6 Rod Mill Drive.....	258
8.7 Problems	259
References.....	262
Chapter 9: Autogenous and Semi-Autogenous Mills	263
9.1 Introduction.....	263
9.2 Design of AG/SAG Mills.....	264
9.2.1 Design of AG/SAG Circuits	266

9.3 Operation of AG/SAG Mills	269
9.3.1 Feed Size	269
9.3.2 Mill Volume	270
9.3.3 Mill Charge	272
9.3.4 Mill Speed	273
9.3.5 Effective Grinding Length	273
9.3.6 Ball Wear	273
9.4 AG/SAG Mill Power	274
9.4.1 Normalised (Relative) Mill Power	278
9.4.2 Net Power and No Load Power	279
9.4.3 Mill Power, Load and Mill Operation	280
9.5 Choice of Options between AG and SAG Mills	281
9.6 Problems	283
References	284
Chapter 10: Stirred Mills – Ultrafine Grinding	287
10.1 Introduction	287
10.2 Vertical Mills	288
10.2.1 Flow Pattern of Solid Media in Tower Mills	291
10.2.2 Flow Pattern of Slurry in Tower Mills	291
10.2.3 Mechanics of Grinding in Tower Mills	293
10.2.4 Operation of Vertical Mills	302
10.3 Horizontal Disc Mill – IsaMill	303
10.3.1 Stress Distribution in IsaMills	304
10.3.2 Stress Intensities in IsaMills	305
10.3.3 Effect of Grinding Media Size on Product Size	306
10.3.4 Effect of Grinding Media Hardness on Product Size	307
10.3.5 Effect of Grinding Chamber Volume on Stress Distribution and Product Size	308
10.3.6 Effect of Power Intensity	309
10.3.7 Operation of Horizontal Mills	309
10.3.8 Effect of Slurry Density and Rheology on Grinding Efficiency	311
10.3.9 Effect of Chemicals on Grinding Efficiency	312
10.3.10 Performance of IsaMills	313
10.4 Design Testwork	313
10.4.1 Metso Jar Mill Test	313
10.4.2 IsaMill Signature Plot	314
10.5 Problems	315
References	316
Chapter 11: Mathematical Modelling of Comminution Processes	317
11.1 Introduction	317
11.2 Basis for Modelling Comminution Systems	318
11.2.1 Estimation of the Breakage Function	320
11.2.2 Estimation of the Selection Function	325

11.3 Mathematical Models of Comminution Processes	326
11.3.1 Matrix Model	327
11.3.2 Kinetic Model	329
11.4 Modelling Crushing and Grinding Systems.....	331
11.4.1 Modelling Jaw and Gyratory Crushers	332
11.4.2 Modelling Ball Mills.....	337
11.4.3 Modelling Rod Mills.....	344
11.4.4 Modelling AG/SAG Mills.....	345
11.4.5 Modelling High Pressure Grinding Rolls (HPGR).....	351
11.5 Problems	351
References.....	354
Chapter 12: Screening.....	357
12.1 Introduction.....	357
12.2 Basic Design Features of Screens	357
12.2.1 Surface and Aperture	357
12.2.2 Types of Screens	364
12.2.3 Vibrations and Movement of Straight and Curved Screens	369
12.3 Operation of Straight Screens	370
12.3.1 Basic Considerations.....	370
12.3.2 Material Balance of a Screen in Operation	373
12.3.3 Screen Efficiency and the Tromp Curve	377
12.3.4 Bed Depth	382
12.4 Capacity and Screen Selection of Straight Screens	384
12.5 Operation of Curved Screens	396
12.5.1 Capacity of Curved Screens.....	396
12.5.2 Rapid Method to Determine Sieve Bend Size	398
12.6 Modelling of the Screening Process	399
12.6.1 Two-Process Treatment.....	399
12.6.2 Modelling Sieve Bends	413
12.7 Screening and Crushing Circuits	414
12.8 Problems	415
References.....	419
Chapter 13: Classification	421
13.1 Introduction	421
13.2 Design Features of Mechanical Classifiers	421
13.2.1 Spiral Classifiers	422
13.2.2 Rake Classifiers.....	423
13.2.3 Cone Classifiers.....	424
13.2.4 Bowl Classifiers	426
13.3 Designing the Pool Area of Mechanical Classifiers	427
13.4 Design Features of Centrifugal Classifiers.....	432
13.4.1 Hydrocyclone Classifiers	432
13.5 Operation of Mechanical Classifiers	437

13.6	Capacity of Mechanical Classifiers	445
13.7	Operation of Centrifugal Classifiers.....	446
13.7.1	Efficiency of Separation in Hydrocyclones.....	447
13.7.2	Effect of Cyclone Variables on Operation.....	453
13.8	Hydrocyclone Models	455
13.9	Hydrocyclone Capacity	458
13.10	Hydrocyclone Circuits.....	462
13.11	Problems.....	464
	References.....	468
Chapter 14:	Solid – Liquid Separation – Thickening.....	471
14.1	Introduction.....	471
14.2	Design Features of Thickeners.....	471
14.3	Thickener Design-Batch Process	474
14.4	Thickener Design-Continuous Thickeners.....	476
14.4.1	Estimation of Cross-Sectional Area of Tank.....	477
14.4.2	Determination of Critical Point.....	482
14.4.3	Determination of Settling Flux	486
14.4.4	Long Tube Method for Estimating Thickener Dimensions	492
14.4.5	Estimating Height (Depth) of the Compression Layer	493
14.4.6	Estimating the Depth of the Clarifying Zone.....	495
14.4.7	Estimating the Retention Time	495
14.5	Operation of Thickeners.....	500
14.6	Thickeners in Circuits	501
14.7	Problems	502
	References.....	505
Chapter 15:	Solid Liquid Separation – Filtration.....	507
15.1	Introduction.....	507
15.2	Design Features of Filters	508
15.2.1	Batch Processes of Filtration.....	511
15.2.2	Continuous Vacuum Filtration	515
15.2.3	Design Rating of Filters	520
15.3	Operation of Filters	521
15.3.1	Constant Pressure Filtration	523
15.3.2	Constant Volume Filtration	529
15.3.3	Variable Pressure and Variable Volume Filtration.....	531
15.3.4	Compressibility of Deposited Cakes.....	533
15.3.5	Filtration through Compressible Deposits	535
15.3.6	Optimum Operation of Filters.....	538
15.4	Capacity of Continuous Vacuum Filters.....	539
15.5	Washing of Deposited Cake	542
15.5.1	Displacement Model of Washing	543
15.5.2	Diffusion Model of Washing.....	544
15.5.3	Washing Efficiency	546

15.6	Drying of Deposited Cake.....	547
15.7	Optimum Thickness of Cake.....	555
15.8	Filtering Media.....	555
15.9	Filtering Aids.....	556
15.10	Filtration in Mineral Processing Circuits.....	556
15.11	Problems.....	557
	References.....	560
Chapter 16:	Gravity Separation	563
16.1	Introduction.....	563
16.2	Particle Settling Rates	565
16.2.1	The Effect of Particle Size and Shape.....	574
16.3	Gravity Separation Operations.....	578
16.4	Jigs	578
16.4.1	Length of Pulsation Stroke	581
16.4.2	Types of Jigs	583
16.4.3	Operation of Jigs.....	585
16.5	Differential Motion Table Separators.....	587
16.5.1	Differential Motion Shaking Tables.....	587
16.5.2	Stratification and Hindered Settling.....	589
16.5.3	Operating Parameters.....	589
16.5.4	Types of Tables	591
16.6	Flowing Film Concentrators	594
16.6.1	Simple Sluice	595
16.6.2	Strake Table.....	596
16.6.3	Spiral Concentrator.....	597
16.6.4	Cone-Separators or Reichert Cone	599
16.6.5	Centrifugal Separator	599
16.6.6	Mozley Multi-Gravity Separator.....	600
16.7	Dense (or Heavy) Media Separation.....	601
16.7.1	Heavy Liquids.....	601
16.7.2	Pseudo Heavy Liquids	602
16.7.3	Types of Dense Medium Separators	606
16.7.4	Comparison of Dense Medium Separators and Jigs in Coal Processing.....	611
16.8	Gravity Separation Performance.....	612
16.8.1	Sink-Float Analysis.....	613
16.8.2	Washability Curves	616
16.8.3	Tromp Curves	618
16.8.4	Sink-Float Alternatives	623
16.9	Problems	624
	References.....	628
Chapter 17:	Magnetic and Electrostatic Separation	629
17.1	Introduction.....	629
17.2	Atomic Theory of Magnetism.....	629

17.3 Types of Magnetism in Minerals	635
17.3.1 Paramagnetism.....	636
17.3.2 Diamagnetism.....	639
17.3.3 Ferromagnetism	640
17.3.4 Ferrimagnetism and Antiferromagnetism	644
17.4 Magnetic Properties of Some Selected Commercial Minerals	646
17.4.1 Iron Sulphide Minerals	646
17.4.2 Iron Oxide Minerals.....	647
17.4.3 Titanium Oxide Minerals.....	649
17.4.4 Copper Sulphide Minerals	650
17.4.5 Chrome Spinel.....	650
17.4.6 Rare Earths.....	651
17.5 Industrial Roll Design and Methods of Magnetic Separation of Minerals	651
17.5.1 Roll Designs and Force Distribution on Roll Surface.....	652
17.5.2 Magnetic Rolls and Wet Mineral Separation	658
17.6 Electrical Conductivity of Minerals	661
17.6.1 Band Theory of Conductivity	662
17.6.2 Conductivity and Mobility of Electrons in Minerals	664
17.6.3 Semi-Conducting Minerals and Junction Potential	665
17.7 Electrostatic Forces and Mineral Separation	666
17.7.1 Contact or Frictional Charging (Triboelectric Effect)	667
17.7.2 Conductance Charging.....	668
17.7.3 High Tension or Ion Bombardment Charging.....	668
17.8 Practical Separation Units.....	672
17.8.1 Triboelectric Charging	672
17.8.2 Conductance Charging.....	675
17.8.3 Charging by Corona Discharge and Ion Bombardment.....	677
17.8.4 Dielectrophoretic and Electrophoretic Forces and Mineral Particle Separation	681
References.....	686
Chapter 18: Flotation	689
18.1 Introduction.....	689
18.2 Flotation Reagents	691
18.2.1 Collectors	691
18.2.2 Frothers	693
18.2.3 Modifiers.....	694
18.3 Flotation Equipment.....	694
18.3.1 Mechanical Flotation Cells	695
18.3.2 Pneumatic Flotation Cells.....	695
18.3.3 Laboratory Flotation Machines.....	696
18.3.4 Flotation Cell Requirements	696
18.4 Flotation Circuits	698
18.5 Flotation Kinetics.....	701
18.5.1 Batch Flotation.....	701

18.5.2 First-Order Rate Equation.....	702
18.5.3 Second-Order Rate Equation	705
18.5.4 Non-Integral Order.....	710
18.5.5 Experimental Results	710
18.5.6 Continuous Flotation.....	712
18.5.7 Laboratory Testing of Kinetic Relationships	715
18.6 Factors Affecting the Rate of Flotation.....	720
18.6.1 Impeller Speed	720
18.6.2 Air Flowrate.....	720
18.6.3 Particle Size	721
18.6.4 Reagents.....	723
18.7 Application of Kinetic Equations.....	726
18.7.1 Practical Considerations	726
18.7.2 Basic Data for Process Simulation.....	728
18.8 Other Flotation Models	731
18.8.1 Probability Models.....	731
18.8.2 Two-Phase Model	732
18.8.3 Bubble Surface Area Flux.....	734
18.9 Problems	736
References.....	741
Chapter 19: Metallurgical Process Assessment.....	743
19.1 Introduction.....	743
19.2 Analyses of Constituents.....	743
19.3 Definition of Terms	745
19.3.1 Mass or Weight	745
19.3.2 Slurry	746
19.3.3 Grade.....	747
19.3.4 Recovery	747
19.3.5 Distribution	748
19.4 Material Balance	748
19.4.1 Two-Product Formula	750
19.4.2 Three Product Formula	752
19.5 Circulating Load	756
19.6 Problems	761
References.....	762
Chapter 20: Process Control.....	763
20.1 Introduction	763
20.2 Controller Modes.....	764
20.3 Signals and Responses	768
20.4 Input and Output Signals of Controllers	771
20.5 Integration of Processes and Block Diagrams.....	774
20.6 Setting and Tuning Controls.....	776

20.7	Complex Advanced Controllers	779
20.7.1	Error Squared Controllers	779
20.7.2	Ratio Controllers	779
20.7.3	Cascade Controllers	780
20.7.4	Adaptive Controllers	781
20.8	Dead Time Compensation	781
20.9	Instrumentation and Hardware	783
20.9.1	Instrumentation	783
20.9.2	Hardware	784
20.9.3	Other Hardware	787
20.10	Controls of Selected Mineral Processing Circuits.....	787
20.10.1	Controlling Liquid Level in Tanks	787
20.10.2	Crushing Plant Controls	790
20.10.3	Grinding Mill Control in Closed Circuit	790
20.10.4	Thickener Control	794
20.10.5	Control of Hydrocyclone Operation.....	797
20.11	Advances in Process Control Systems	801
20.11.1	Self-Tuning Control (STC)	801
20.11.2	Horizontal Control (Extended).....	802
20.12	Expert Systems.....	805
20.12.1	Fuzzy System of Control.....	805
20.12.2	Neural and Artificial Network Methods (ANN) of Control	808
20.13	Mechanics of Digital Process Control Systems	811
20.13.1	Inputs and Outputs	812
20.13.2	Process Communications and Network.....	812
20.14	Problems.....	813
	References.....	815
Appendix		817
Index.....		839
