

CHIRAL ANALYSIS

ADVANCES IN SPECTROSCOPY, CHROMATOGRAPHY AND EMERGING METHODS

Second Edition

Edited by

PRASAD L. POLAVARAPU

Vanderbilt University, Nashville, TN, United States

Preface

xvii

Part One Chirality in Nature 1

1. Chiral Asymmetry in Nature 3

Dilip Kondepudi

- 1.1 Introduction 3
- 1.2 Chirality: terminology and quantification issues 3
- 1.3 Chiral asymmetry in nature 10
- 1.4 Theory of spontaneous chiral symmetry breaking 15
- 1.5 Sensitivity of chiral symmetry breaking transitions to asymmetric interactions 19
- 1.6 Examples of spontaneous chiral symmetry breaking 22
- 1.7 Concluding remarks 25
- References 25

2. Remote Sensing of Homochirality: A Proxy for the Detection of Extraterrestrial Life 29

C.H. Lucas Patty, Inge Loes ten Kate, William B. Sparks, Frans Snik

- 2.1 Introduction 29
- 2.2 Homochirality 30
- 2.3 Chemical and biological mechanisms for creating circular spectropolarimetric signals 35
- 2.4 Considerations for the remote sensing of homochirality in our solar system and beyond 45
- 2.5 Instrumentation 50
- 2.6 Conclusion and outlook 60
- References 61

Part Two Spectroscopic Methods and Analyses 71

3. Light Polarization and Signal Processing in Chiroptical Instrumentation 73

Kenneth W. Busch, Marianna A. Busch

- 3.1 Introduction 73
- Part A—The polarization of light 73
- 3.2 Light as a wave 74

3.3	Types of polarized light	76
3.4	Production of linearly polarized light	81
3.5	Production of circularly polarized light	98
3.6	Production of elliptically polarized light	101
3.7	Photoelastic modulators	101
Part B—Signal handling		105
3.8	Noise in electrical circuits	105
3.9	Noise reduction strategies	108
3.10	Application of phase-sensitive detection in chiroptical instrumentation	123
Appendix A basic optics		126
Appendix B signal handling		136
References		150
4.	Chiroptical Spectroscopic Studies on Soft Aggregates and Their Interactions	153
Vijay Raghavan, Prasad L. Polavarapu		
4.1	Introduction	153
4.2	OR studies	158
4.3	ECD studies	172
4.4	VCD studies	184
4.5	ROA studies	193
4.6	Summary	195
References		195
5.	Vibrational Optical Activity in Chiral Analysis	201
Laurence A. Nafie, Rina K. Dukor		
5.1	Introduction	201
5.2	Definitions of VOA	204
5.3	Measurement of VOA	206
5.4	Theoretical basis of VOA	208
5.5	Calculation of VOA	214
5.6	Determination of AC	216
5.7	Determination of $\epsilon\epsilon$ of multiple chiral species	226
5.8	VOA of solids and formulated products	235
5.9	Summary and conclusions	238
References		239
6.	Raman Optical Activity	249
Saeideh Ostovar pour, Laurence D. Barron, Shaun T. Mutter, Ewan W. Blanch		
6.1	Fundamental principles	250
6.2	Experimental ROA studies	256

6.3	Enhancement of ROA signals	270
6.4	Recent ROA instrumentation developments	273
6.5	Computational modeling of ROA spectra	274
6.6	Concluding remarks: future opportunities	282
	References	284
7.	Chiral Molecular Tools Powerful for the Preparation of Enantiopure Compounds and Unambiguous Determination of Their Absolute Configurations by X-Ray crystallography and/or ¹H NMR Diamagnetic Anisotropy	293
	Nobuyuki Harada	
7.1	Introduction	293
7.2	Methodologies for determining AC and their evaluations	294
7.3	Methodologies for chiral synthesis and their evaluations	297
7.4	Camphorsultam dichlorophthalic acid, CSDP acid (–)-1, and camphorsultam phthalic acid, CPS acid (–)-5, useful for enantioresolution of alcohols by HPLC and determination of their ACs by X-ray crystallography	299
7.5	A novel chiral molecular tool, 2-methoxy-2-(1-naphthyl)-propionic acid {M α NP acid (s)-(+)-2}, useful for enantioresolution of alcohols and determination of their ACs by the ¹ H nmr diamagnetic anisotropy method	312
7.6	Complementary use of CSDP acid (–)-1 and M α NP acid (s)-(+)-2 for enantioresolution of alcohols and determination of their ACs by X-ray crystallographic and ¹ H nmr diamagnetic anisotropy methods	325
7.7	Conclusions	338
	References	339
8.	Chiroptical Probes for Determination of Absolute Stereochemistry by Circular Dichroism Exciton Chirality Method	345
	Kuwahara Shunsuke, Ikeda Mari, Habata Yoichi	
8.1	Introduction	345
8.2	A chiroptical probe for chiral resolution and determination of the absolute configuration of aromatic alcohols	346
8.3	A chiroptical probe for determination of the absolute configuration of primary amines	352
8.4	A chiroptical probe for chirality transcription and amplification by the forming of [2]pseudorotaxanes	358
8.5	Conclusions	363
	References	363

9. Chiral Analysis by NMR Spectroscopy: Chiral Solvating Agents	367
Federica Balzano, Gloria Uccello-Barretta, Federica Aiello	
9.1 Introduction	367
9.2 Low-molecular-weight csas	371
9.3 CSAs involving ion pairing processes	383
9.4 Molecular tweezer csas	389
9.5 Synthetic macrocycle csas	391
9.6 Cyclodextrins	401
9.7 Natural products	406
9.8 Lyotropic chiral liquid crystals	408
9.9 Chiral sensing	409
9.10 Configurational assignments	409
9.11 Conclusions	411
References	412
10. Chiroptical Spectroscopy of Biofluids	429
Vladimír Setnička, Lucie Habartová	
10.1 Introduction	429
10.2 Blood and blood-based derivatives	430
10.3 Hen egg white	446
10.4 Vitreous humor	447
10.5 Urine	447
10.6 Chiroclinics—chiroptical methods as diagnostic tools	452
10.7 Concluding remarks	459
References	460
Part Three Chromatographic and Electromigration Methods	467
11. Chiral Gas Chromatography	469
Rahul A. Patil, Choyce A. Weatherly, Daniel W. Armstrong	
11.1 Introduction	469
11.2 Commercial stationary phases	471
11.3 Non-commercial stationary phases	490
11.4 Conclusions	500
References	500
12. Chiral Liquid Chromatography	507
Muhammad F. Wahab, Choyce A. Weatherly, Rahul A. Patil, Daniel W. Armstrong	
12.1 Introduction	507
12.2 Historical background of chiral liquid chromatography	508

12.3	Interactions in chiral liquid chromatography	509
12.4	Chiral separations in liquid chromatography today	512
12.5	Salient features of chiral liquid chromatography	512
12.6	Major classes of modern chiral stationary phases (CSPs) for liquid chromatography: the " α " of the resolution equation	515
12.7	Packing process of high-efficiency chiral phases (" N " in the resolution equation)	534
12.8	Method development in chiral LC (adjustment of " k " in the resolution equation)	535
12.9	Special detectors in liquid chiral chromatography	536
12.10	Recent developments in enhancing chiral resolution using ultrahigh efficiency supports	539
12.11	Instrumental considerations for fast chiral LC	544
12.12	Future directions and developments in chiral liquid chromatography	558
	References	558

13. Enantioseparations by Capillary Electromigration Techniques **565**

Bezhan Chankvetadze

13.1	Introduction	565
13.2	Separation principle in chiral CE: electrophoretic or chromatographic?	566
13.3	Enantioseparations with charged and uncharged chiral selectors	567
13.4	Enantioselective and nonselective phenomena in chiral CEKC	567
13.5	Similarities and differences between enantioseparations by pressure-driven chromatography and CEKC	569
13.6	Modes of enantioseparations in CEKC	574
13.7	Chiral selectors	584
13.8	Selector–selectand interaction in chiral CE	586
13.9	Mathematical models of CE enantioseparations	589
13.10	Enantioseparations in capillary electrochromatography	593
13.11	Future trends	600
	References	601

14. Recent Developments in Chiral Separations by Supercritical Fluid Chromatography **607**

Roberta Franzini, Alessia Ciogli, Francesco Gasparrini, Omar H. Ismail, Claudio Villani

14.1	Introduction	607
14.2	Chiral stationary phases for SFC	610
14.3	Analytical separations	612
14.4	Ultrafast high-efficient SFC separations	618
14.5	Conclusions	626
	References	626

15. Chiral Separation Strategies in Mass Spectrometry: Integration of Chromatography, Electrophoresis, and Gas-Phase Mobility	631
James N. Dodds, Jody C. May, John A. McLean	
15.1 Introduction	631
15.2 Chromatography and mass spectrometry	633
15.3 Liquid chromatography	635
15.4 Electrophoresis–mass spectrometry	637
15.5 Isomer separations by IM-MS	640
15.6 Conclusions	643
References	644
Part Four Emerging Methods	647
16. Cavity-based Chiral Polarimetry	649
Dimitris Sofikitis, George E. Katsoprinakis, Alexandros K. Spiliotis, T. Peter Rakitzis	
16.1 Introduction	649
16.2 Optical activity	650
16.3 Single-pass polarimetry	652
16.4 Cavity ring-down polarimetry	654
16.5 Cavity ring-down polarimetry with signal reversals	660
16.6 Continuous-wave cavity-enhanced polarimetry with signal reversals	672
16.7 Future outlook and conclusions	675
References	676
17. Quantitative Chiral Analysis by Molecular Rotational Spectroscopy	679
Brooks H. Pate, Luca Evangelisti, Walther Caminati, Yunjie Xu, Javix Thomas, David Patterson, Cristobal Perez, Melanie Schnell	
17.1 Introduction	679
17.2 Basic principles of molecular rotational spectroscopy	682
17.3 Chiral tag rotational spectroscopy for enantiomer analysis	698
17.4 Three-wave mixing rotational spectroscopy for enantiomer analysis	714
17.5 Conclusions	723
References	725
18. Chiral Rotational Spectroscopy	731
Robert P. Cameron, Jörg B. Götze, Stephen M. Barnett	
18.1 Introduction	731
18.2 Chiral rotational spectroscopy	732

18.3	Chiral rotational spectra	734
18.4	Chiral rotational spectrometer	743
	References	747
19.	Chiral Analysis and Separation Using Molecular Rotation	753
	Mirianas Chachisvilis	
19.1	Introduction	753
19.2	Chiral separations in SFs	754
19.3	Chiral separations in REFs	762
19.4	Summary	776
	References	776
	<i>Index</i>	779
