Lis Lis Ab Ab Pro	List of figures List of tables 2 About the editor About the contributors 2 Preface	
Part One		1
1	Wear, friction and prevention of tribo-surfaces by coatings/nanocoatings	3
	Sunil Mohan and Anita Mohan	3
	1.2 Friction of materials	4
	1.3 Wear in metals, alloys and composites	10
	1.4 Materials and their selection for wear and friction applications	12
	1.5 Coatings/nanocoatings and surface treatments	15
	1.6 Conclusion	19
	Acknowledgements References	19
2	An investigation into the tribological property of coatings	
	on micro- and nanoscale	23
	2.1 Drivers of studying the origin of tribology behavior	23
	2.2 Contact at nanometer scale	27
	2.3 Atomic friction with zero separation	37
	2.4 Scratching wear at atomic scale	47
	2.5 Conclusion	54
	References	54
3	Stress on anti-abrasive performance of sol-gel derived nanocoatings Shengzhao Wang	57
	3.1 Classical curvature stress for thin films on plate substrates	58
	3.2 Thermal stress of thin films	61
	3.3 Why do drying films crack?	61
	3.4 Cracks by stress come from constraint of shrinkage	0
	by the substrate	05
	5.5 Kapid sol-get labrication to contront tensile training cracks	00

	3.6 Anti-abrasive $SiO_2$ film in application: self-assembling	
	covalently bonded nanocoating	68
	3.7 Abrasive test	69
	3.8 Anti-abrasive performance of sol-gel nanocoatings	72
	3.9 Conclusion	76
	Acknowledgments	77
	References	77
4	Self-cleaning glass	81
	Krishnan Surekha and Sureshbabu Sundararajan	
	4.1 Introduction	81
	4.2 History of glass	83
	4.3 Self-cleaning glass	84
	4.4 Hydrophilic coating	85
	4.5 Anti-reflective coating	86
	4.6 Porous materials	86
	4.7 Photocatalytic activity of $TiO_2$	88
	4.8 Hydrophobic coatings	89
	4.9 Fabrication of self-cleaning glass	90
	4.10 Application of self-cleaning glasses	99
	Acknowledgements	99
	References	99
5	Sol-gel nanocomposite hard coatings	105
	Ramachandra S.R. Kalidindi and Raghavan Subasri	
	5.1 Introduction	105
	5.2 Sol-gel nanocomposite hard coatings	106
	5.3 Mechanical property studies of sol-gel hard coatings	
	on various substrates	110
	5.4 Possible applications of hard coatings	129
	5.5 Summary	132
	Acknowledgments	132
	References	132
6	Process considerations for nanostructured coatings	137
	Kal Renganathan Sharma	
	6.1 Overview	137
	6.2 Anti-reflection coatings	140
	6.3 Fluidized bed method	143
	6.4 Electroplating	144
	6.5 Nanografting	145
	6.6 Plasma spray coating	145
	6.7 Nanostructuring in thin films	146
	6.8 Electrochemical deposition	147
	6.9 Anti-corrosion coating	149
	6.10 Infrared transparent electromagnetic shielding	149
