Contents

| | | |
|----------|--|----------------|
| | <i>Preface</i> | <i>page xi</i> |
| 1 | Introduction | 1 |
| | 1.1 History and Outlook | 2 |
| | 1.2 Dimensionless Groups | 5 |
| | 1.3 Mass and Momentum Balance Equations | 7 |
| | 1.4 Inviscid and Viscous Newtonian Fluids: The Incompressible Euler and Navier–Stokes Equations | 9 |
| | 1.5 Impact at Liquid Surface and Equations of Impulsive Motion | 12 |
| | 1.6 Boundary Layer Equations | 13 |
| | 1.7 Quasi-one-dimensional and Lubrication Approximations in Problems on Drop Impact and Spreading | 15 |
| | 1.8 Wettability | 19 |
| | 1.9 Rheological Constitutive Equations of Non-Newtonian Fluids and Solids | 22 |
| | 1.10 Instabilities and Small Perturbations: Rayleigh Capillary Instability, Bending Instability, Kelvin–Helmholtz Instability, Rayleigh–Taylor Instability | 29 |
| | 1.11 Total Mechanical Energy of Deforming Bodies: Where Is It Lost? | 37 |
| | 1.12 References | 39 |
| 2 | Selected Basic Flows and Forces | 44 |
| | 2.1 Inviscid Flow in a Thin Film on a Wall | 44 |
| | 2.2 Propagation of Kinematic Discontinuity | 52 |
| | 2.3 External Irrotational Flows About Blunt Bodies | 58 |
| | 2.4 Flows Past Arbitrary Axisymmetric Bodies of Revolution | 61 |
| | 2.5 Transient Motion in Inviscid Fluids and Forces Associated with the Added Masses | 63 |
| | 2.6 Friction and Shape Drag | 70 |
| | 2.7 Dynamics of a Rim Bounding a Free Liquid Sheet | 75 |
| | 2.8 References | 82 |

Part I Collision of Liquid Jets and Drops with a Dry Solid Wall

| | | |
|----------|---|------------|
| 3 | Jet Impact onto a Solid Wall | 87 |
| 3.1 | Normal and Inclined Impact of Inviscid Planar Jets onto a Plane Wall | 87 |
| 3.2 | Normal Impact of Axisymmetric Impinging Jet | 91 |
| 3.3 | Hydraulic Jump | 96 |
| 3.4 | References | 98 |
| 4 | Drop Impact onto a Dry Solid Wall | 100 |
| 4.1 | Inviscid Flow on a Wall Generated by Inertia-Dominated Drop Impact | 102 |
| 4.2 | Flow in a Spreading Viscous Drop, Including Description of Inclined Impact and Thermal Effects | 106 |
| 4.3 | Initial Phase of Drop Impact | 120 |
| 4.4 | Maximum Spreading Diameter | 123 |
| 4.5 | Time Evolution of the Drop Diameter: Rim Dynamics on a Wall | 126 |
| 4.6 | Drop Impact onto Spherical Targets and Encapsulation | 128 |
| 4.7 | Outcomes of Drop Impact onto a Dry Wall | 130 |
| 4.8 | The Effect of Reduced Pressure of the Surrounding Gas | 133 |
| 4.9 | Drop Impact onto Hot Rigid Surfaces | 134 |
| 4.10 | Drop Impact with Solidification and Icing | 140 |
| 4.11 | References | 149 |
| 5 | Drop Impact onto Dry Surfaces with Complex Morphology | 155 |
| 5.1 | Drop Splashing on Rough and Textured Surfaces | 156 |
| 5.2 | Drop Impact Close to a Pore | 159 |
| 5.3 | Drop Impact onto Porous Surfaces | 165 |
| 5.4 | Nano-textured Surfaces: Drop Impact onto Suspended Nanofiber Membranes | 177 |
| 5.5 | Drop Impact onto Nanofiber Mats on Impermeable Substrates and Suppression of Splashing | 186 |
| 5.6 | Hydrodynamic Focusing in Drop Impact onto Nanofiber Mats and Membranes | 189 |
| 5.7 | Impact of Aqueous Suspension Drops onto Non-Wettable Porous Membranes: Hydrodynamic Focusing and Penetration of Nanoparticles | 200 |
| 5.8 | Drop Impact onto Hot Surfaces Coated by Nanofiber Mats | 214 |
| 5.9 | Nano-textured Surfaces: Suppression of the Leidenfrost Effect | 223 |
| 5.10 | Bouncing Prevention: Dynamic Electrowetting | 231 |
| 5.11 | References | 247 |

Part II Drop Impacts onto Liquid Surfaces

| | | |
|----------|---|------------|
| 6 | Drop Impacts with Liquid Pools and Layers | 255 |
| 6.1 | Drop Impact onto Thin Liquid Layer on a Wall: Weak Impacts and Self-similar Capillary Waves | 255 |
| 6.2 | Strong Impacts of Drops onto Thin Liquid Layer: Crown Formation | 257 |
| 6.3 | Drop Impact onto Thick Liquid Layers on a Wall: Cavity Expansion | 273 |
| 6.4 | Residual Film Thickness | 283 |
| 6.5 | Drop Impact onto a Deep Liquid Pool: Crater and Crown Formation, the Worthington Jets and Bubble Entrapment | 287 |
| 6.6 | Bending Instability of a Free Viscous Rim on Top of the Crown: Mechanism of Splash | 293 |
| 6.7 | Impact of Drop Train | 310 |
| 6.8 | References | 315 |

Part III Spray Formation and Impact onto Surfaces

| | | |
|----------|--|------------|
| 7 | Drop and Spray Diagnostics | 323 |
| 7.1 | Fundamentals | 323 |
| 7.2 | Non-Optical Measurement Techniques | 329 |
| 7.3 | Direct Imaging | 330 |
| 7.4 | Non-Imaging Optical Measurement Techniques | 340 |
| 7.5 | Measurement Techniques for Liquid Films | 347 |
| 7.6 | References | 350 |
| 8 | Atomization and Spray Formation | 354 |
| 8.1 | Primary Atomization | 355 |
| 8.2 | Secondary Aerodynamic Breakup | 366 |
| 8.3 | Drop–Drop Binary Collisions in Sprays | 377 |
| 8.4 | Secondary Drop Detachment from a Filament | 391 |
| 8.5 | Secondary Electrically Driven Drop Breakup: The Rayleigh Limit | 401 |
| 8.6 | References | 406 |
| 9 | Spray Impact | 412 |
| 9.1 | Spray Impact onto Liquid Films | 417 |
| 9.2 | Description of the Secondary Spray | 440 |
| 9.3 | Correlations for Spray Impact Phenomena | 462 |
| 9.4 | References | 467 |

Part IV Collisions of Solid Bodies with Liquid

| | | |
|-----------|---|-----|
| 10 | Rigid Body Collision with Liquid Surface | 473 |
| | 10.1 Impact of Rigid Body at Liquid Surface | 473 |
| | 10.2 Rigid Body Entry and Penetration into Liquid: The Wagner Problem | 478 |
| | 10.3 Rigid Sphere Entry and Penetration into Liquid | 482 |
| | 10.4 References | 485 |
| 11 | Particle Impact onto Wetted Wall | 487 |
| | 11.1 Motion of a Rigid Immersed Particle near a Wall | 487 |
| | 11.2 Deformation of an Immersed Elastic Particle | 489 |
| | 11.3 Restitution Coefficient | 491 |
| | 11.4 Effect of Particle Material and Surface Properties | 493 |
| | 11.5 References | 495 |

Part V Solid–Solid Collisions

| | | |
|-----------|--|-----|
| 12 | Particle and Long Bar Impact onto a Rigid Wall | 499 |
| | 12.1 Relatively Weak and Strong Impacts, the Split Hopkinson Pressure Bar: Propagation of Elastic Waves in Long Rods – Inertial Effects and Anelastic Material Properties. Strong Impacts and Irreversible Plastic Effects | 499 |
| | 12.2 Impingement of a Rigid/Semi-Brittle Ice Particle | 506 |
| | 12.3 References | 513 |
| 13 | Shaped-charge (Munroe) Jets and Projectile Penetration | 515 |
| | 13.1 Shaped-charge Jet Penetration Depth | 515 |
| | 13.2 Crater Configuration due to Shaped-charge Jet Penetration | 517 |
| | 13.3 Normal Penetration of an Eroding Projectile into an Elastic–Plastic Target | 521 |
| | 13.4 High-Speed Penetration | 542 |
| | 13.5 Quasi-Steady Penetration of an Eroding Projectile | 544 |
| | 13.6 Normal and Oblique Penetration of a Rigid Projectile into an Elastic–Plastic Target | 545 |
| | 13.7 Explosion Welding | 553 |
| | 13.8 References | 564 |
| 14 | Fragmentation | 566 |
| | 14.1 Ice Particle Collision with a Dry Solid Wall | 566 |
| | 14.2 Ice Particle: Fragmentation Threshold for an Impact Velocity | 570 |
| | 14.3 Dynamic Fracture of a Deforming Elastic–Plastic Material | 573 |

| | | |
|------|---|-----|
| 14.4 | Fragmentation of Thick Elastic–Plastic Targets | 577 |
| 14.5 | Fragmentation of an Impacting Projectile | 587 |
| 14.6 | Debris Cloud Produced by Projectile Impact, Vulnerability | 590 |
| 14.7 | Effect of the Energy of the Plastic Dissipation on the Size of the Smallest Fragment | 598 |
| 14.8 | References | 599 |
| | <i>Index</i> | 604 |
