CONTENTS

Preface	xi
Abbreviations	xiii
1 Introduction to LC–MS Technology	1
1.1 Introduction	2
1.2 Analyte Ionization: Ion Sources	3
1.2.1 Electron Ionization	3
1.2.2 Chemical Ionization	7
1.2.3 Atmospheric-Pressure Ionization	13
1.2.4 Electrospray Ionization	16
1.2.5 Atmospheric-Pressure Chemical Ionization and Photoionization	20
1.2.6 Other Ionization Techniques	26
1.3 Mass Spectrometer Building Blocks	28
1.3.1 Introduction	28
1.3.2 Quadrupole Mass Analyzer	32
1.3.3 Ion-Trap Mass Analyzer	33
1.3.4 Time-of-Flight Mass Analyzer	34
1.3.5 Orbitrap Mass Analyzer	35
1.3.6 Other Mass Analyzers	36
1.4 Tandem Mass Spectrometry	37
1.4.1 Introduction	37
1.4.2 Tandem Quadrupole Instruments	39
1.4.3 Ion-Trap Instruments	40
1.4.4 Quadrupole–Linear Ion-Trap Hybrid Instruments	41
1.4.5 Quadrupole–Time-of-Flight Hybrid Instruments	41
1.4.6 Orbitrap Hybrid Instruments for MS–MS and MS ⁿ	41
1.4.7 Other Instruments for MS–MS and MS ⁿ	42
1.4.8 MS–MS and MS ⁿ in the Analysis of Drugs and Pesticides	43
1.5 Data Acquisition	43
1.5.1 Introduction	43
1.5.2 Selected-Ion and Selected-Reaction Monitoring	44
1.5.3 Structure-Specific Screening: Precursor-Ion and Neutral-Loss Analysis	44

1.5.4	Data-Dependent Acquisition	45
1.5.5	Data-Independent Acquisition	45
1.6	Selected Literature on Mass Spectrometry	45
	References	46
2	Interpretation of Mass Spectra	55
2.1	Mass Spectrometry: A Nuclear Affair	55
2.2	Isomers, Isotones, Isobars, Isotopes	56
2.3	Masses in MS	58
2.4	Isotopes and Structure Elucidation	60
2.5	Nitrogen Rule, Ring Double-Bond Equivalent, and Hydrogen Rule	61
2.6	Resolving Power, Resolution, Accuracy	63
2.7	Calculating Elemental Composition from Accurate m/z	66
2.8	Protonated and Deprotonated Molecules and Adduct Ions	67
	References	69
3	Fragmentation of Even-Electron Ions	71
3.1	Introduction	72
3.2	Analyte Ionization Revisited	73
3.3	Fragmentation of Odd-electron Ions	74
3.4	High-energy Collisions of Protonated Molecules	76
3.4.1	General Aspects	77
3.4.2	Selected Examples	79
3.5	Fragmentation of Protonated Molecules	81
3.5.1	Singly-Charged Peptides	82
3.5.2	Protonated Small Molecules: Complementary Fragment Ions	83
3.5.3	Fragmentation of Peptides Revisited	86
3.5.4	Direct-Cleavage Reactions	89
3.5.5	Consecutive Small-Molecule Losses	89
3.5.6	Other Fragmentation Reactions	89
3.5.7	Loss of Radicals from Even-Electron Ions	91
3.5.8	Skeletal Rearrangements in Protonated Molecules	92
3.6	Characteristic Positive-ion Fragmentation of Functional Groups	94
3.6.1	Cleavages of C—C Bonds	94
3.6.2	Alcohols and Ethers	95
3.6.3	Aldehydes and Ketones	96
3.6.4	Carboxylic Acids and Esters	96
3.6.5	Amines and Quaternary Ammonium Compounds	98
3.6.6	Amides, Sulfonyl Ureas, and Carbamates	99
3.6.7	Compounds Containing Phosphorus or Sulfur	101
3.6.8	Miscellaneous Compound Classes	101
3.7	Fragmentation of Deprotonated Molecules	102
3.7.1	High-Energy CID with NICI-Generated Deprotonated Molecules	102
3.7.2	General Aspects	102
3.7.3	Alcohols and Ethers	102
3.7.4	Carboxylic Acid and Esters	103
3.7.5	Amines	104
3.7.6	Amides and Ureas	104
3.7.7	Sulfonamides and Related Sulfones	106
3.7.8	Halogenated Compounds	107
3.7.9	Miscellaneous Compound Classes	108
3.8	Fragmentation of Metal-ion Cationized Molecules	108

3.9	Generation of Odd-electron Ions in ESI-MS, APCI-MS, and APPI-MS	111
3.10	Useful Tables	112
	References	122
4	Fragmentation of Drugs and Pesticides	129
4.1	Fragmentation of Drugs for Cardiovascular Diseases and Hypertension	134
4.1.1	β -Blockers or β -Adrenergic Antagonists	134
4.1.2	Dihydropyridine Calcium Antagonists	137
4.1.3	Angiotensin-Converting Enzyme Inhibitors	140
4.1.4	Diuretic Drugs	142
4.1.5	Angiotensin II Receptor Antagonists	148
4.1.6	Other Antihypertensive Compounds	149
4.1.7	Antiarrhythmic Agents	153
	References	155
4.2	Fragmentation of Psychotropic or Psychoactive Drugs	158
4.2.1	Phenothiazines	158
4.2.2	Other Classes of Neuroleptic Drugs	161
4.2.3	Antidepressants	163
4.2.4	Benzodiazepines	167
4.2.5	Local Anesthetics	173
4.2.6	Barbiturates	173
4.2.7	Anticonvulsant Drugs	174
4.2.8	Other Psychotropic Drugs	175
	References	176
4.3	Fragmentation of Analgesic, Antipyretic, and Anti-Inflammatory Drugs	179
4.3.1	Acetaminophen	179
4.3.2	Salicylic Acid Derivatives	179
4.3.3	Nonsteroidal Anti-Inflammatory Drugs	180
4.3.4	COX-2 Inhibitors	184
	References	186
4.4	Fragmentation of Drugs Related to Digestion and the Gastrointestinal Tract	188
4.4.1	Antidiabetic Drugs	188
4.4.2	Antiulcer Drugs	191
4.4.3	Lipid-Lowering Agents	192
4.4.4	Anorexic Drugs	195
4.4.5	Antiemetic Drugs	196
	References	197
4.5	Fragmentation of Other Classes of Drugs	199
4.5.1	β -Adrenergic Receptor Agonists	199
4.5.2	Histamine Antagonists	199
4.5.3	Anticholinergic Agents	202
4.5.4	Drugs against Alzheimer's Disease: Acetylcholinesterase Inhibitors	204
4.5.5	Antiparkinsonian Drugs	208
4.5.6	Antineoplastic and Cytostatic Drugs	209
4.5.7	Immunosuppressive Drugs	214
4.5.8	X-ray Contrast Agents	216
4.5.9	Anticoagulants and Rodenticides	218
4.5.10	Conclusions	219
	References	220
4.6	Fragmentation of Steroids	222
4.6.1	Introduction	222
4.6.2	Fragmentation of Steroids	223
4.6.3	Fragmentation in 3-Keto- Δ^4 -Steroids	224

4.6.4	Anabolic Steroids	225
4.6.5	Progestogens	227
4.6.6	Corticosteroids	228
4.6.7	Estrogens	234
4.6.8	Steroid Conjugates	236
	References	237
4.7	Fragmentation of Drugs of Abuse	241
4.7.1	Introduction	241
4.7.2	Amphetamine and Related Compounds	241
4.7.3	Cannabinoids	248
4.7.4	Cocaine and Related Substances	250
4.7.5	Opiates	251
4.7.6	Miscellaneous Drugs of Abuse	252
4.7.7	Designer Drugs	255
	References	258
4.8	Fragmentation of Antimicrobial Compounds	262
4.8.1	Sulfonamides	262
4.8.2	Chloramphenicol and Related Compounds	265
4.8.3	β -Lactams	266
4.8.4	(Fluoro)quinolones	273
4.8.5	Aminoglycosides	277
4.8.6	Tetracyclines	279
4.8.7	Nitrofurans	279
4.8.8	Macrolides	281
4.8.9	Miscellaneous Antibiotics	282
	References	284
4.9	Fragmentation of Antimycotic and Antifungal Compounds	289
4.9.1	Imidazolyl Antimycotic Compounds	289
4.9.2	Triazolyl Antifungal Compounds	290
4.9.3	Benzamidazole Fungicides	292
4.9.4	Other Classes of Fungicides	293
	References	296
4.10	Fragmentation of Other Antibiotic Compounds	297
4.10.1	Anthelmintic Drugs	297
4.10.2	Antiprotozoal, Coccidiostatic, and Antimalarial Agents	299
4.10.3	Antiviral Drugs	304
4.10.4	Antiseptics and Disinfectants	309
	References	312
4.11	Pesticides	315
4.11.1	Triazine Herbicides	315
4.11.2	Carbamates	317
4.11.3	Quaternary Ammonium Herbicides	322
4.11.4	Organophosphorus Pesticides	322
4.11.5	Urea Herbicides: Phenylureas, Benzoylphenylureas, and Others	329
4.11.6	Sulfonylurea Herbicides	334
4.11.7	Chlorinated Phenoxy Acid Herbicides	337
4.11.8	Phenolic Compounds	339
4.11.9	Miscellaneous Herbicides	339
	References	345
5	Identification Strategies	351
5.1	Introduction	351
5.2	Confirmation of Identity in Following Organic Synthesis	352

5.3	Confirmation of Identity in Targeted Screening by SRM-based Strategies	353
5.3.1	Environmental Analysis	354
5.3.2	Food Safety Analysis	355
5.3.3	Sports Doping Analysis	355
5.3.4	General Unknown Screening in Toxicology	355
5.4	Confirmation of Identity by High-resolution Accurate-mass MS Strategies	356
5.4.1	Environmental and Food Safety Analysis	356
5.4.2	General Unknown Screening in Toxicology	357
5.4.3	Sports Doping Analysis	357
5.5	Library Searching Strategies in Systematic Toxicological Analysis	357
5.6	Dereplication and Identification of Natural Products and Endogenous Compounds	360
5.7	Identification of Structure-related Substances	361
5.7.1	Drug Metabolites	362
5.7.2	Impurities and Degradation Products	366
5.8	Identification of Known Unknowns and Real Unknowns	366
	References	370
	Compound Index	381
	Subject Index	389
