

# Practical Inductively Coupled Plasma Spectrometry

Second Edition

*John R. Dean*  
Northumbria University  
Newcastle-upon-Tyne  
United Kingdom

**WILEY**

## Contents

About the Author	<i>xiii</i>
Preface	<i>xv</i>
Acknowledgements	<i>xix</i>
Acronyms, Abbreviations and Symbols	<i>xxiii</i>

1	The Analytical Approach	1
1.1	Introduction	1
1.2	Essentials of Practical Work	2
1.3	Health and Safety	3
1.4	SI Units and Their Use	4
1.5	Significant Figures	11
1.6	Calibration and Quantitative Analysis	12
1.7	Making Notes of Practical Work and Observations	13
1.8	Data Analysis	14
1.9	Data Treatment	17
1.10	Data Quality	18
1.11	Data Interpretation and Context	21
1.12	Analytical Terms and Their Definitions	21
1.13	Summary	26
2	Sampling and Storage	27
2.1	Introduction	27
2.2	Sampling Soil	28
2.3	Sampling Water	31
2.4	Sampling Air	32
2.5	Sample Storage	34
2.6	Sample Preservation	36
2.7	Summary	37
3	Sample Preparation	39
3.1	Introduction	39
3.2	Aqueous Samples	40
3.2.1	Liquid–Liquid Extraction	40

- 3.2.1.1 Procedure for APDC Extraction in to MIBK 42
- 3.2.2 Ion Exchange 42
  - 3.2.2.1 Procedure for Batch Ion Exchange Extraction 43
- 3.3 Solid Samples 43
  - 3.3.1 Decomposition Techniques 45
    - 3.3.1.1 Procedure for Acid Digestion A 46
    - 3.3.1.2 Procedure for Acid Digestion B 46
    - 3.3.1.3 Procedure for Microwave Acid Digestion 49
  - 3.3.2 Alternate Decomposition Techniques 49
    - 3.3.2.1 Procedure for Dry Ashing 49
    - 3.3.2.2 Procedure for Fusion 50
- 3.4 Extraction Procedures 51
  - 3.4.1 Procedure for Extractable Mercury from Soil and Sediment 52
  - 3.4.2 Procedure for Speciation of Extractable Mercury from Soil and Sediment 52
  - 3.4.3 Procedure for Arsenic Species Extraction 52
  - 3.4.4 Single Extraction Methods 57
    - 3.4.4.1 Procedure for EDTA Extraction 57
    - 3.4.4.2 Procedure for AA Extraction 58
    - 3.4.4.3 Procedure for Diethylenetriaminepentaacetic Acid (DTPA) Extraction 58
    - 3.4.4.4 Procedure for Calcium Chloride ( $\text{CaCl}_2$ ) Extraction 58
    - 3.4.4.5 Procedure for Ammonium Nitrate ( $\text{NH}_4\text{NO}_3$ ) Extraction 59
    - 3.4.4.6 Procedure for Sodium Nitrate ( $\text{NaNO}_3$ ) Extraction 60
  - 3.4.5 Sequential Extraction 60
    - 3.4.5.1 Procedure for Stage 1 Extraction 62
    - 3.4.5.2 Procedure for Stage 2 Extraction 62
    - 3.4.5.3 Procedure for Stage 3 Extraction 63
  - 3.4.6 CISED 63
    - 3.4.6.1 Procedure for CISED 64
  - 3.4.7 *In Vitro* Gastrointestinal Extraction Method 65
    - 3.4.7.1 Procedure for Gastric Extraction 66
    - 3.4.7.2 Procedure for Gastric + Intestinal Extraction 67
  - 3.4.8 *In Vitro* Simulated Epithelium Lung Fluid Method 67
    - 3.4.8.1 Procedure for Inhalation Bioaccessibility Extraction 69
- 3.5 Summary 69
  - Reference 69
- 3.A Extraction Reagents for Single Extraction Methods 70
  - 3.A.1 Preparation of EDTA, 50 mM 70
  - 3.A.2 Preparation of AA, 0.43 M 70
  - 3.A.3 Preparation of Diethylenetriaminepentaacetic Acid (DTPA), 5 mM 70
  - 3.A.4 Preparation of Ammonium Nitrate ( $\text{NH}_4\text{NO}_3$ ), 1 M 70

3.A.5	Preparation of Calcium Chloride ( $\text{CaCl}_2$ ), 0.01 M	70
3.A.6	Preparation of Sodium Nitrate ( $\text{NaNO}_3$ ), 0.1 M	71
3.B	Extraction Reagents for the Sequential Extraction Method	71
3.B.1	Preparation of Solution A (Acetic Acid, 0.11 M)	71
3.B.2	Preparation of Solution B (Hydroxylamine Hydrochloride or Hydroxyammonium Chloride, 0.5 M)	71
3.B.3	Preparation of Solution C (Hydrogen Peroxide [ $300 \text{ mg g}^{-1}$ ], 8.8 M)	71
3.B.4	Preparation of Solution D (Ammonium Acetate, 1 M)	71
3.C	Extraction Reagents for the Unified Bioaccessibility Method	72
3.C.1	Preparation of Simulated Saliva Fluid	72
3.C.2	Preparation of Simulated Gastric Fluid	72
3.C.3	Preparation of Simulated Duodenal Fluid	72
3.C.4	Preparation of Simulated Bile Fluid	73
3.D	Extraction Reagents for the <i>In Vitro</i> SELF	73
3.D.1	Preparation of SELF	73
4	Sample Introduction	75
4.1	Introduction	75
4.2	Nebulizers	76
4.3	Spray Chambers and Desolvation Systems	79
4.4	Discrete Sample Introduction	83
4.5	Continuous Sample Introduction	87
4.6	Hydride and Cold-Vapour Generation Techniques	91
4.7	Summary	93
	References	93
5	The Inductively Coupled Plasma	95
5.1	Introduction	95
5.2	Radiofrequency Generators	96
5.3	Inductively Coupled Plasma Formation and Operation	96
5.4	Processes Within the ICP	106
5.5	Signal Processing and Instrument Control	106
5.6	Summary	107
	References	108
6	Inductively Coupled Plasma–Atomic Emission Spectrometry	109
6.1	Introduction	110
6.2	Fundamentals of Spectroscopy	110
6.2.1	Origins of Atomic Spectra	111
6.2.2	Spectral Line Intensity	113
6.2.3	Spectral Line Broadening	114
6.3	Plasma Spectroscopy	116

- 6.4 Spectrometers 118
  - 6.4.1 Sequential Spectrometer 122
  - 6.4.2 Simultaneous Spectrometers 122
- 6.5 Detectors 125
  - 6.5.1 Photomultiplier Tube 127
  - 6.5.2 Charge-Transfer Devices 128
- 6.6 Interferences 130
- 6.7 Summary 131
- References 132
  
- 7 Inductively Coupled Plasma–Mass Spectrometry 133
  - 7.1 Introduction 133
  - 7.2 Fundamentals of Mass Spectrometry 134
    - 7.2.1 Some Terminology 134
  - 7.3 Inorganic Mass Spectrometry 135
    - 7.3.1 The Ion Source: ICP 137
    - 7.3.2 The Interface 138
  - 7.4 Mass Spectrometers 139
    - 7.4.1 Quadrupole Mass Spectrometer 140
    - 7.4.2 High-Resolution Mass Spectrometers 142
    - 7.4.3 Ion-Trap Mass Spectrometer 150
    - 7.4.4 Time-of-Flight Mass Spectrometer 152
  - 7.5 Detectors 153
  - 7.6 Interferences 156
    - 7.6.1 Isobaric Interferences 156
    - 7.6.2 Molecular Interferences 158
    - 7.6.3 Remedies for Molecular Interferences 161
      - 7.6.3.1 Charge Transfer 161
      - 7.6.3.2 Proton Transfer 162
      - 7.6.3.3 Hydrogen-Atom Transfer 162
      - 7.6.3.4 Atom Transfer 162
      - 7.6.3.5 Adduct Formation 162
    - 7.6.4 Non-Spectral Interferences: Matrix-Induced 164
  - 7.7 Isotope Dilution Analysis 165
  - 7.8 Summary 176
  - References 176
  
- 8 Inductively Coupled Plasma: Current and Future Developments 177
  - 8.1 Introduction 177
  - 8.2 Comparison of ICP–AES and ICP–MS 177
  - 8.3 Applications 182
  - 8.4 Current and Future Developments 183
    - 8.4.1 In General, for the ICP 184

8.4.2	For ICP–MS	185
8.4.3	For ICP–AES	189
8.5	Useful Resources	191
	References	198
	Further Reading	198
<b>9</b>	<b>Inductively Coupled Plasma: Troubleshooting and Maintenance</b>	<b>201</b>
9.1	Introduction	201
9.2	Diagnostic Issues	201
9.3	Tips to Reduce...	202
9.3.1	Potential Autosampler Issues	202
9.3.2	Contamination	202
