Contents

2nd edition Acknowledgments	xiii
1st edition Acknowledgments	xv
2nd edition Preface	xvii
1st edition Preface	xix

PART I

1 Discovery and History of Fluoropolymers	1
1.1 Coming of Age of Polymer Science	1
1.2 Roy Plunkett's Story	3
1.3 Commercialization of PTFE	4
1.4 Developmental History of Fluoropolymers	5
References	6
2 Production and Market Statistics	8
2.1 Growth of Fluoropolymers	8
2.2 Regional Consumption of Fluoropolymers	9
2.3 Consumption of Fluoropolymers and PTFE	10
2.4 Trends	11
Further Reading	11
References	11
3 From Fundamentals to Applications	12
3.1 Introduction	12
3.2 Uniqueness of Fluorine	12
3.3 Fluorine Characteristics	13
3.4 What are Fluoropolymers?	17
3.5 Fundamental Properties of Fluoropolymers	18
3.6 Developmental History of Fluoropolymers	18
3.7 Examples of Uses of Fluoropolymers	20
References	22
4 Fluoropolymers: Properties and Structure	24
4.1 Introduction	24
4.2 Impact of F and C—F Bond on the Properties of Polytetrafluoroethylene	24
4.3 Distruping the Linear PTFE Chain: Perfluorinated Ethylene—Propylene Copolymer and Polychlorotrifluoroethylene	27
4.4 Reaction Mechanism	29
4.5 Effect of Solvents on Fluoropolymers	30
4.6 Molecular Interaction of Fluoropolymers: Low Friction and Low Surface Energy	30
4.7 Conformations and Transitions of PTFE	32

4.8 Conformations and Transitions of PCTFE.....	35
References.....	36
5 Operational Classification of Fluoropolymers.....	38
5.1 Introduction.....	38
5.2 TFE Homopolymers	38
5.3 TFE Copolymers.....	40
5.4 CTFE Polymers.....	45
5.5 VDF Polymers	45
5.6 VF Polymers	45
5.7 Process Classification	46
References.....	47
6 Preparation of Tetrafluoroethylene and Other Monomers.....	48
6.1 Introduction.....	48
6.2 TFE Preparation.....	48
6.3 Purification of TFE	60
6.4 Properties of TFE.....	61
6.5 Synthesis of HFP	63
6.6 Properties of HFP	67
6.7 Synthesis of PAVE	68
6.8 Properties of PAVE	70
6.9 Synthesis of CTFE.....	70
6.10 Properties of CTFE.....	72
References.....	73
7 Polymerization Surfactants.....	76
7.1 Introduction.....	76
7.2 Perfluorooctane Sulfonate.....	76
7.3 Issues with PFOS.....	78
7.4 Problem with PFOA.....	79
7.5 EPA Action	83
7.6 Alternative Surfactants for Fluoropolymer Polymerization.....	84
7.7 Summary	90
References.....	90
8 Polymerization and Finishing of Tetrafluoroethylene.....	95
8.1 Introduction.....	95
8.2 Polymerization Mechanism	96
8.3 TFE Polymers	99
8.4 Evolution of Suspension Polymerization of TFE	100
8.5 Preparation of PTFE by Emulsion Polymerization.....	120
8.6 Preparation of Dispersion Grade PTFE.....	135
8.7 Preparation of Fine Powder PTFE.....	138
8.8 CTFE Polymers and Polymerization.....	139
8.9 Characterization of PTFE	143
8.10 Characterization of PCTFE	149
References.....	153

9 Commercial Grades of Fluoropolymers.....	157
9.1 Introduction.....	157
9.2 Granular PTFE.....	157
9.3 PTFE Dispersions.....	157
9.4 Fine Powder PTFE.....	157
9.5 Polychlorotrifluoroethylene Polymers.....	158
References.....	173

PART II

10 Fabrication and Processing of Granular Polytetrafluoroethylene	177
10.1 Introduction.....	177
10.2 Resin Selection	177
10.3 Compression Molding.....	178
10.4 Automatic Molding.....	199
10.5 Isostatic Molding	201
10.6 Ram Extrusion	218
References.....	233
11 Fabrication and Processing of Fine Powder Polytetrafluoroethylene.....	234
11.1 Introduction.....	234
11.2 Resin Handling and Storage.....	234
11.3 Paste Extrusion Fundamentals.....	236
11.4 Extrusion Aid or Lubricant.....	239
11.5 Wire Coating.....	242
11.6 Extrusion of Tubing.....	255
11.7 Unsintered Tape	265
11.8 Expanded PTFE Manufacturing	272
11.9 Fine Powder Resin Selection.....	276
References.....	277
12 Fabrication and Processing of Polytetrafluoroethylene Dispersions.....	278
12.1 Introduction.....	278
12.2 Applications	279
12.3 Storage and Handling	279
12.4 Surfactants.....	280
12.5 Principles of Coating Technology	282
12.6 Dispersion Formulation and Characteristics	286
12.7 Glass Cloth Coating.....	289
12.8 Impregnation of Flax and Polyaramide.....	292
12.9 Coating Metal and Hard Surfaces	293
12.10 PTFE Yarn Manufacturing.....	294
12.11 Film Casting.....	295
12.12 Anti-drip Applications	296
12.13 Filled Bearings.....	297
12.14 Dedusting Powders	297
12.15 Other Applications.....	297
References.....	298

13 Processing of Polychlorotrifluoroethylene.....	300
13.1 Introduction.....	300
13.2 Processing Considerations	300
13.3 Compression Molding.....	303
13.4 Injection Molding	304
13.5 Extrusion	305
13.6 Machining and Joining	306
References.....	306
14 Fluorinated Additives.....	308
14.1 Introduction.....	308
14.2 PTFE Additives.....	309
14.3 Applications of PTFE Additives.....	309
14.4 Feedstock for PTFE Additives	309
14.5 Manufacturing PTFE Additives.....	310
14.6 PTFE-Modified Waxes.....	312
References.....	313
15 Surface Treatment of Polytetrafluoroethylene for Adhesion	314
15.1 Introduction.....	314
15.2 Sodium Etching of Fluoroplastics	314
15.3 Plasma Treatment of Fluoropolymers and PTFE.....	321
15.4 Atmospheric Pressure Plasma Treatment.....	328
References.....	333
16 Filled Fluoropolymer Compounds	336
16.1 Introduction.....	336
16.2 Granular-Based Compounds.....	336
16.3 Fine Powder-Based Compounds.....	346
16.4 Co-coagulated Compounds.....	350
16.5 Processing Compounds.....	353
16.6 Typical Properties of Filled Fluoropolymers	355
16.7 Nanocomposites of PTFE.....	362
16.8 Commercial Products.....	370
References.....	380

PART III

17 Chemical Properties of Fluoropolymers—Polytetrafluoroethylene and Polychlorotrifluoroethylene	382
17.1 Introduction.....	382
17.2 Chemical Compatibility of PTFE.....	382
17.3 Chemical Compatibility of Polychlorotrifluoroethylene.....	387
17.4 Permeation Fundamentals.....	389
17.5 Environmental Stress Cracking	392
17.6 Solubility Parameters.....	395
References.....	395
18 Properties of Tetrafluoroethylene Homopolymers.....	396
18.1 Introduction.....	396
18.2 Crystallinity.....	398

18.3	Molecular Weight	400
18.4	Influence of Processing.....	403
18.5	Microstructure and Fracture of PTFE	407
18.6	Mechanical Properties.....	409
18.7	Fatigue Properties	415
18.8	Electrical Properties.....	422
18.9	Thermal Behavior	424
18.10	Flammability Characteristics	430
18.11	Irradiation Behavior.....	431
18.12	Surface Properties	432
18.13	Refractive Index.....	438
18.14	Standard Measurement Methods	438
	References.....	438
19	Properties of Polychlorotrifluoroethylene	441
19.1	Introduction	441
19.2	Crystallinity.....	441
19.3	Mechanical Properties.....	442
19.4	Electrical Properties.....	443
19.5	Thermal Properties.....	443
19.6	Irradiation Behavior	444
19.7	Properties of PCTFE Films	446
19.8	Barrier Properties	448
19.9	Spectroscopic Properties.....	448
19.10	Chemical and Weathering Properties	448
	References.....	452
20	Fabrication Techniques for Polytetrafluoroethylene.....	453
20.1	Introduction.....	453
20.2	Machining	453
20.3	Adhesive Bonding Methods.....	455
20.4	Welding and Joining	456
20.5	Thermoforming	458
20.6	Other Processes.....	460
	References.....	460
21	Applications of Polytetrafluoroethylene and Fluoropolymers	461
21.1	Chemical Processing.....	461
21.2	Piping	461
21.3	Vessels	463
21.4	CPI Components	464
21.5	Self-Supporting Components.....	466
21.6	Trends in Using Fluoropolymers in Chemical Service.....	467
21.7	Semiconductor Processing.....	468
21.8	Electrical Applications.....	470
21.9	Mechanical Applications	471
21.10	Automotive and Aerospace.....	475

21.11 Medical Devices.....	477
21.12 Summary	478
22 Safety, Health, Environmental, Disposal, Recycling, and Economics.....	479
22.1 Introduction	479
22.2 Toxicology of Fluoropolymers	479
22.3 Thermal Properties of PTFE.....	479
22.4 Emission during Processing.....	480
22.5 Safety Measures	481
22.6 Food Contact	485
22.7 Fluoropolymer Scrap and Recycling	485
22.8 Environmental Protection and Disposal Methods	486
References.....	487
Appendix 1: Chemical Resistance of Polytetrafluoroethylene (PTFE).....	488
Appendix 2: Chemical Resistance of Polychlorotrifluoroethylene (PCTFE)	610
Appendix 3: Permeability of Polytetrafluoroethylene (PTFE)	650
Appendix 4: Permeability of Polychlorotrifluoroethylene (PCTFE).....	657
Appendix 5: Melt Creep Viscosity of Polytetrafluoroethylene	660
Glossary	662
Index	692

FLUOROPLASTICS

Volume 2: Melt Processible Fluoropolymers -
The Definitive User's Guide and Data Book

Contents

Preface to Second Edition	xvii
Acknowledgments to Second Edition	xix
1 Introduction to Fluoropolymers	1
1.1 Coming of Age of Polymer Science	1
1.2 Roy Plunkett's Story	2
1.3 Commercialization of PTFE	3
1.4 Developmental History of Fluoropolymers	3
1.5 Trends in Application Development	5
1.6 Globalization: Present and Future	5
References	6
Further Reading	6
2 Production and Market Statistics	7
2.1 Growth of Fluoropolymers	7
2.2 Regional Consumption of Fluoropolymers	8
2.3 Consumption of Fluoropolymers	9
2.3.1 Trends	10
References	10
Further Reading	10
3 From Fundamentals to Applications	11
3.1 Introduction	11
3.2 Uniqueness of Fluorine	11
3.3 Fluorine Characteristics	11
3.3.1 Preparation of Fluorine	13
3.3.2 Organic Chemistry	13
3.4 What are Fluoropolymers?	15
3.5 Fundamental Properties of Fluoropolymers	16
3.6 Developmental History of Fluoropolymers	16
3.7 Examples of Uses of Fluoropolymers	18
References	20
Further Reading	21
4 Fluoropolymers: Properties and Structure	22
4.1 Introduction	22
4.2 Impact of F and C–F Bond on the Properties of PTFE	22
4.3 Copolymers of TFE	24
4.3.1 Perfluorinated Ethylene-Propylene Copolymer	25
4.3.2 Polychlorotrifluoroethylene	25

4.4	Reaction Mechanism.....	27
4.5	Effect of Solvents on Fluoropolymers.....	27
4.6	Molecular Interaction of Fluoropolymers: Low Friction and Low Surface Energy	28
4.7	Conformations and Transitions of PTFE.....	30
4.7.1	Images of PTFE Molecule.....	31
4.8	Conformations and Transitions of PCTFE.....	32
4.9	Conformations and Transitions of FEP Copolymers	33
4.10	Conformations and Transitions of Perfluoroalkoxy Polymer	34
4.11	Conformations and Transitions of Polyvinylidene Fluoride.....	34
4.12	Conformations and Transitions of Ethylene–Tetrafluoroethylene Copolymer.....	35
4.13	Conformations and Transitions of Ethylene–Chlorotrifluoroethylene Copolymer	36
	References.....	36
	Further Reading	38
5	Operational Classification of Fluoropolymers.....	39
5.1	Introduction	39
5.2	TFE Homopolymers	39
5.3	TFE Copolymers.....	39
5.4	CTFE Polymers.....	42
5.5	VDF Polymers	45
5.6	VF Polymers	45
5.7	Process Classification	46
	References.....	47
6	Preparation and Properties of Fluorinated Monomers.....	48
6.1	Introduction	48
6.2	TFE Preparation	48
6.2.1	Review of Developments for TFE Synthesis	51
6.3	Purification of TFE	59
6.4	Properties of TFE.....	62
6.5	Synthesis of HFP	64
6.6	Properties of HFP	69
6.7	Synthesis of PAVES.....	70
6.8	Properties of PAVES.....	72
6.9	Synthesis of CTFE.....	72
6.10	Properties of CTFE.....	74
6.11	Synthesis of VDF.....	75
6.12	Properties of VDF.....	76
6.13	Synthesis of Vinyl Fluoride	76
6.14	Properties of VF.....	77
	References.....	79
7	Polymerization Surfactants.....	83
7.1	Introduction	83
7.2	Perfluorooctane Sulfonate.....	83
7.2.1	Perfluorooctanoic Acid	84

7.3	Issues with PFOS	86
7.4	Problem with PFOA	86
7.4.1	Degradation of PFOA	87
7.4.2	Toxicity of PFOA	89
7.5	EPA Action	90
7.6	Alternative Surfactants for Fluoropolymer Polymerization	91
7.6.1	Special Characteristics of APFO	91
7.6.2	Requirements of Alternative Surfactants	91
7.6.3	Alternative Chemical Structures	93
7.7	Summary	97
	References	98
8	Polymerization and Finishing Melt-Processible Fluoropolymers	102
8.1	Introduction	102
8.2	Polymerization Mechanism for TFE	103
8.2.1	Homopolymerization Reactions	103
8.2.2	Suspension Polymerization	105
8.2.3	Preparation of PTFE by Emulsion Polymerization	106
8.2.4	Copolymer Equation	108
8.2.5	Monomer for Copolymerization with TFE	110
8.2.6	Polymerization of TFE with APFO Replacements	114
8.3	Preparation of PFA Polymers	116
8.3.1	Nonaqueous Polymerization of PFA Polymers	116
8.3.2	Aqueous Polymerization of PFA Polymers	122
8.4	Preparation of Perfluorinated Ethylene–Propylene Copolymers	130
8.5	End Group Stabilization	140
8.5.1	FEP Stabilization	140
8.5.2	PFA Stabilization	145
8.6	Preparation of VDF Polymers	154
8.6.1	Emulsion Polymerization of VDF (PVDF)	156
8.6.2	Suspension Polymerization of VDF	170
8.6.3	Solution Polymerization of VDF	175
8.7	Preparation of ETFE Polymers	178
8.8	Preparation of ECTFE Polymers	191
8.9	Preparation of VF Polymers	196
8.10	Polymerization in Supercritical Carbon Dioxide	198
8.11	Characterization of Fluoropolymers	201
8.11.1	PFA Polymer	201
8.11.2	Fluorinated Ethylene Propylene	201
8.11.3	ETFE Polymer	205
8.11.4	ECTFE Polymer	206
8.11.5	Polyvinylidene Fluoride	206
8.11.6	Polyvinyl Fluoride	208
	References	209
	Further Reading	215

9 Commercial Grades of Melt-Processible Fluoropolymers	216
9.1 Introduction	216
9.2 Perfluoroalkoxy Polymer	216
9.2.1 High-Temperature PFA	216
9.2.2 Nonaqueous Polymerization Media PFA	216
9.3 Fluorinated Ethylene Propylene Polymer	218
9.4 Polyvinylidene Fluoride	219
9.5 Ethylene Tetrafluoroethylene Polymer	227
9.6 Ethylene Chlorotrifluoroethylene Polymer	227
9.7 Terpolymer Fluoroplastics	227
9.8 Polyvinyl Fluoride	227
9.9 Fluoroplastic Films	227
References	232
10 Injection Molding	236
10.1 Introduction	236
10.2 General Considerations	236
10.3 Basic Technology	236
10.4 The Process	237
10.5 Injection Molding Machinery	237
10.5.1 Clamp Unit	237
10.5.2 Injection Unit	239
10.5.3 Power Systems	242
10.5.4 Control Systems	245
10.6 Troubleshooting	247
10.7 Injection Molds	247
10.7.1 Introduction	247
10.7.2 Injection Mold Components	250
10.7.3 Injection Mold Types	250
10.7.4 Injection Mold Feed System	253
10.7.5 Injection Mold Features	259
10.8 Materials of Construction	261
10.9 Rheology of Fluoropolymer Melts	262
10.9.1 Characterization of Rheology of Fluoropolymers	263
10.10 Processing of Fluoropolymers	267
10.10.1 Injection Molding Equipment	267
10.10.2 Process Conditions and Operations	274
10.10.3 Dimensional Stability of Parts	279
References	280
11 Extrusion	282
11.1 Introduction	282
11.2 Fundamentals of Extrusion Processes	282
11.2.1 The Extruder	282
11.2.2 Film Extrusion	285
11.2.3 Sheet Extrusion	290
11.2.4 Fiber Extrusion	291

11.2.5	Multifilament.....	291
11.2.6	Monofilament.....	292
11.2.7	Pipe and Tube Extrusion.....	292
11.2.8	Coextrusion	292
11.3	Fluoropolymer Wire Coating.....	294
11.3.1	Processing Equipment.....	294
11.3.2	Process Control	298
11.3.3	Melt Flow and Fracture	298
11.3.4	Drawdown Ratio	300
11.3.5	Tooling Design.....	301
11.3.6	Shear Rate and Stress Calculation.....	301
11.3.7	Processing Conditions.....	303
11.4	Fluoropolymer Tube Extrusion.....	303
11.4.1	Sizing of Tubes	303
11.4.2	Small Diameter Tubes	307
11.4.3	Medium Diameter Tubes	307
11.4.4	Large Diameter Tubes	307
11.4.5	Heat Shrink Tubes	307
11.5	Fluoropolymer Film Extrusion	308
11.5.1	PVDF Films and Sheets.....	309
11.5.2	ETFE and ECTFE Films	315
11.5.3	Perfluoropolymer Films	316
11.5.4	Polyvinyl Fluoride Films	319
11.6	Fluoropolymer Fibers	328
11.6.1	PVDF Fibers	330
11.6.2	Perfluoropolymer Fibers	337
11.6.3	Ultrafine Fibers	340
11.7	Thermal Stability of Fluoropolymers.....	344
	References.....	345
	Further Reading	347
12	Rotational Molding and Linings	348
12.1	Introduction.....	348
12.2	Background	348
12.3	Basic Process Technology	349
12.4	Rotational Molding Equipment	352
12.4.1	Batch Systems.....	352
12.4.2	Carousel Machines.....	352
12.4.3	Shuttle Machines.....	352
12.4.4	Clamshell Machines.....	353
12.5	Equipment and Process Design	353
12.5.1	Molds.....	353
12.5.2	Mold Surface Preparation.....	355
12.6	Operation of Rotomolding Processes	355
12.6.1	Oven Dwell Time.....	356
12.6.2	Cooling Cycle	357
12.6.3	Venting	358

12.6.4 Part Stripping	358
12.6.5 Rotation Rate and Ratio	358
12.7 Rotolining Process	359
12.8 Rotomolding and Rotolining of Fluoropolymers	360
12.8.1 Ethylene Chlorotrifluoroethylene	361
12.8.2 Ethylene Tetrafluoroethylene	361
12.8.3 Perfluoroalkoxy Polymer	365
12.9 Melting of Polymer and Part Formation	365
12.10 Troubleshooting	366
12.11 Conclusion	367
References	367

16.1	Introduction	475
16.2	Influence of Processing on Fluoroplastics	475
16.3	Mechanical and Dynamic Properties	475
16.3.1	Tensile Properties	475
16.3.2	Moduli	477
16.3.3	Deformation-Under-Load (<i>Creep</i>)	482
16.3.4	Poisson Ratio	491
16.3.5	Flex Fatigue Properties	491
16.3.6	Impact Strength	492
16.3.7	Hardness	492
16.3.8	Friction, Wear, and Abrasion	492
16.4	Thermal Properties	514
16.4.1	Thermal Stability	516
16.4.2	Temperature-Related Properties	518
16.4.3	Thermal Aging	520
16.5	Weatherability	522
16.6	Electrical Properties	532
16.6.1	Perfluoroalkoxy Polymers (PFA and MFA)	533
16.6.2	TFE/HFP Copolymer	534
16.6.3	Polyvinylidene Fluoride	534
16.6.4	Ethylene Tetrafluoroethylene	535
16.6.5	Ethylene Chlorotrifluoroethylene	536
16.7	Optical and Spectral Properties	536
16.8	Radiation Effect	554

16.9 Flammability	557
16.10 Biofilm Formation.....	559
References.....	561
17 Surface Treatment of Fluoropolymers for Adhesion.....	564
17.1 Introduction.....	564
17.2 Sodium Etching of Fluoroplastics	564
17.2.1 Sodium Etching Chemistry of PTFE.....	565
17.2.2 Description of Sodium Etching Processes	568
17.2.3 New Chemistry	570
17.2.4 Elevated Temperature Etching.....	570
17.3 Plasma Treatment of Fluoropolymers and PTFE.....	572
17.4 Atmospheric Pressure Plasma Treatment.....	577
17.5 Corona Treatment	583
17.6 Flame Treatment	584
References.....	586
18 Fabrication of Fluoropolymers.....	589
18.1 Introduction.....	589
18.2 Machining	589
18.2.1 Sawing and Shearing	590
18.2.2 Drilling (Tapping and Threading)	590
18.2.3 Skiving	590
18.3 Adhesive Bonding Methods.....	590
18.3.1 Contact Adhesives	591
18.3.2 Bonding Adhesives	591
18.4 Welding and Joining	591
18.4.1 Welding Techniques.....	592
18.4.2 Welding PTFE.....	615
18.4.3 Welding FEP	618
18.4.4 Welding PFA	618
18.4.5 Welding PVDF.....	620
18.4.6 Welding ETFE	622
18.4.7 Welding ECTFE.....	623
18.5 Heat-Sealing Films	623
18.6 Heat Bonding	625
18.7 Metallization	626
18.8 Piezoelectric and Pyroelectric Films	627
18.8.1 Piezoelectric Films.....	628
18.8.2 Pyroelectric Films.....	631
18.9 Cross-Linking.....	631
18.10 Thermoforming	633
18.11 Other Processes	633
References.....	634
