# Spectroscopic Methods in Organic Chemistry

Seventh Edition

 Springer

---

# Contents

<b>1</b>	<b>Mass Spectra</b> . . . . .	<b>1</b>
1.1	Introduction . . . . .	1
1.2	Ion Production . . . . .	2
1.2.1	Electron Impact (EI) . . . . .	2
1.2.2	Chemical Ionisation (CI) . . . . .	3
1.2.3	Electrospray Ionisation (ESI) . . . . .	5
1.2.4	Fast Ion Bombardment (FIB or LSIMS) . . . . .	6
1.2.5	Laser Desorption (LD) and Matrix-Assisted Laser Desorption (MALDI) . . . . .	7
1.3	Ion Analysis . . . . .	8
1.3.1	Magnetic Analysers . . . . .	8
1.3.2	Time-Of-Flight (TOF) Analysers . . . . .	8
1.3.3	Quadrupole Analysers . . . . .	9
1.3.4	Ion Cyclotron Resonance (ICR) Analysers . . . . .	10
1.3.5	Ion-Trap Analysers . . . . .	10
1.4	Structural Information from EI Mass Spectra . . . . .	11
1.4.1	The Features of an EI Spectrum . . . . .	11
1.4.2	The Molecular Ion . . . . .	12
1.4.3	Isotopic Abundances . . . . .	13
1.4.4	Identifying the Molecular Ion . . . . .	14
1.4.5	Fragmentation in EI Spectra . . . . .	15
1.5	Fragmentation in CI and FIB Spectra . . . . .	27
1.5.1	Fragmentation in CI Spectra . . . . .	27
1.5.2	Fragmentation in FIB (LSMIS) Spectra . . . . .	28
1.6	Some Examples of Mass Spectrometry in Action . . . . .	30
1.6.1	San Joaquin Oil . . . . .	31
1.6.2	Oleic Acid . . . . .	32
1.6.3	The Oviposition Pheromone . . . . .	33
1.6.4	Identifying Antibodies . . . . .	34
1.6.5	The ESI Spectra of Melittin and the Human Parathyroid Hormone . . . . .	35
1.6.6	ESI-FT-ICR and ESI-FT-Orbitrap Spectra . . . . .	37

1.7	Separation Coupled to Mass Spectrometry	37
1.7.1	GC/MS and LC/MS	37
1.7.2	MS/MS	39
1.8	Interpreting the Spectrum of an Unknown	40
1.9	Internet	41
1.10	Further Reading	41
1.11	Problems	43
1.12	Tables of Data	45
	References	53
<b>2</b>	<b>Ultraviolet and Visible Spectra</b>	<b>55</b>
2.1	Introduction	55
2.2	Chromophores	56
2.3	The Absorption Laws	57
2.4	Measurement of the Spectrum	57
2.5	Vibrational Fine Structure	58
2.6	Selection Rules and Intensity	58
2.7	Solvent Effects	60
2.8	Searching for a Chromophore	60
2.9	Definitions	61
2.10	Conjugated Dienes	62
2.11	Polyenes and Poly-Ynes	64
2.12	Ketones and Aldehydes; $\pi \rightarrow \pi^*$ Transitions	66
2.13	Ketones and Aldehydes; $n \rightarrow \pi^*$ Transitions	69
2.14	$\alpha, \beta$ -Unsaturated Acids, Esters, Nitriles and Amides	70
2.15	Aromatic Compounds	70
2.16	Quinones	77
2.17	Corroles, Chlorins and Porphyrins	77
2.18	Non-conjugated Interacting Chromophores	78
2.19	The Effect of Steric Hindrance to Coplanarity	79
2.20	Internet	80
2.21	Further Readings	81
2.22	Problems	81
	References	83
<b>3</b>	<b>Infrared and Raman Spectra</b>	<b>85</b>
3.1	Introduction	85
3.2	Preparation of Samples and Examination in an Infrared Spectrometer	86
3.3	Selection Rules	88
3.4	The Infrared Spectrum	88
3.5	The Use of the Tables of Characteristic Group Frequencies	90
3.6	Stretching Frequencies of Single Bonds to Hydrogen	91
3.7	Stretching Frequencies of Triple and Cumulated Double Bonds	94

3.8	Stretching Frequencies in the Double-Bond Region . . . . .	96
3.9	Characteristic Vibrations of Aromatic Rings . . . . .	100
3.10	Groups Absorbing in the Fingerprint Region. . . . .	101
3.11	Raman Spectra . . . . .	101
3.12	Internet . . . . .	105
3.13	Further Reading . . . . .	106
3.14	Problems . . . . .	107
3.15	Correlation Charts . . . . .	109
3.16	Tables of Data . . . . .	111
<b>4</b>	<b>1D Nuclear Magnetic Resonance Spectra. . . . .</b>	<b>123</b>
4.1	Nuclear Spin and Resonance . . . . .	123
4.2	Taking a Spectrum . . . . .	125
4.3	The Chemical Shift . . . . .	134
4.4	Factors Affecting the Chemical Shift. . . . .	139
4.4.1	The Inductive Effect. . . . .	139
4.4.2	Anisotropy of Chemical Bonds . . . . .	140
4.4.3	Polar Effects of Conjugation . . . . .	143
4.4.4	Van der Waals Forces. . . . .	145
4.4.5	Isotope Effects . . . . .	146
4.4.6	Estimating a Chemical Shift . . . . .	147
4.4.7	Hydrogen Bonds . . . . .	149
4.4.8	Solvent Effects and Temperature . . . . .	151
4.5	Spin-Spin Coupling to $^{13}\text{C}$ . . . . .	151
4.5.1	$^{13}\text{C}$ - $^2\text{H}$ Coupling . . . . .	152
4.5.2	$^{13}\text{C}$ - $^1\text{H}$ Coupling . . . . .	153
4.5.3	$^{13}\text{C}$ - $^{13}\text{C}$ Coupling . . . . .	159
4.6	$^1\text{H}$ - $^1\text{H}$ Coupling: Multiplicity and Coupling Patterns . . . . .	161
4.6.1	$^1\text{H}$ - $^1\text{H}$ Vicinal Coupling ( $^3J_{\text{HH}}$ ). . . . .	162
4.6.2	AB Systems . . . . .	169
4.6.3	$^1\text{H}$ - $^1\text{H}$ Geminal Coupling ( $^2J_{\text{HH}}$ ). . . . .	174
4.6.4	$^1\text{H}$ - $^1\text{H}$ Long-Range Coupling ( $^4J_{\text{HH}}$ and $^5J_{\text{HH}}$ ) . . . . .	178
4.6.5	Deviations From First-Order Coupling . . . . .	184
4.7	$^1\text{H}$ - $^1\text{H}$ Coupling: The Magnitude of Coupling Constants . . . . .	190
4.7.1	The Sign of Coupling Constants . . . . .	190
4.7.2	Vicinal Coupling ( $^3J_{\text{HH}}$ ) . . . . .	192
4.7.3	Geminal Coupling ( $^2J_{\text{HH}}$ ) . . . . .	199
4.7.4	Long-Range Coupling ( $^4J_{\text{HH}}$ and $^5J_{\text{HH}}$ ). . . . .	201
4.7.5	C-H Coupling ( $^1J_{\text{CH}}$ , $^2J_{\text{CH}}$ and $^3J_{\text{CH}}$ ) . . . . .	201
4.8	Coupling From $^1\text{H}$ and $^{13}\text{C}$ to $^{19}\text{F}$ and $^{31}\text{P}$ . . . . .	202
4.8.1	$^{13}\text{C}$ NMR Spectra of Compounds Containing $^{19}\text{F}$ and $^{31}\text{P}$ . . . . .	202
4.8.2	$^1\text{H}$ NMR Spectra of Compounds Containing $^{19}\text{F}$ and $^{31}\text{P}$ . . . . .	205

---

4.9	Relaxation and Its Consequences	206
4.9.1	Longitudinal Relaxation	207
4.9.2	Transverse Relaxation and Exchange	209
4.10	Improving the NMR Spectrum	215
4.10.1	The Effect of Changing the Magnetic Field	215
4.10.2	Solvent Effects	217
4.10.3	Shift Reagents	220
4.11	Spin Decoupling	221
4.11.1	Simple Spin Decoupling	221
4.11.2	Difference Decoupling	222
4.12	Identifying Spin Systems: 1D-TOCSY	223
4.13	The Nuclear Overhauser Effect	227
4.13.1	Origins	227
4.13.2	NOE-Difference Spectra	229
4.14	The Rotating Frame of Reference	232
4.15	Assignment of CH <sub>3</sub> , CH <sub>2</sub> , CH and Fully Substituted Carbons in <sup>13</sup> C NMR	237
4.15.1	The Attached Proton Test (APT)	237
4.15.2	DEPT	243
4.16	Hints for Structure Determination Using 1D-NMR	245
4.16.1	Carbon Spectra	245
4.16.2	Proton Spectra	246
4.17	Further Information	247
4.17.1	The Internet	247
4.17.2	Further Reading	248
4.18	Tables of Data	251
	References	276
<b>5</b>	<b>2D-Nuclear Magnetic Resonance Spectra</b>	<b>277</b>
5.1	The Basic Pulse Sequence	277
5.2	COSY	281
5.2.1	Cross Peaks from Scalar Coupling	281
5.2.2	Polarisation Transfer	282
5.2.3	The Origin of Cross Peaks	285
5.2.4	Displaying COSY Spectra	286
5.2.5	Interpreting COSY Spectra	287
5.2.6	Axial Signals	291
5.2.7	Gradient Pulses	292
5.2.8	DQF-COSY	293
5.2.9	Phase Structure in COSY Spectra	294
5.3	2D-TOCSY	296
5.4	NOESY	299
