# Metrology in Chemistry

 Springer

# Contents

<b>1</b>	<b>Introduction to Metrology</b> . . . . .	1
1.1	Metrology in General . . . . .	1
1.2	Specificity of Chemical Metrology . . . . .	5
1.2.1	Calibration of a Measuring Tool . . . . .	5
1.3	Metrological Requirements in Chemical Measurements . . . . .	11
<b>2</b>	<b>Metrological Infrastructure</b> . . . . .	13
2.1	A Short History of the Development of International Metrology Infrastructure . . . . .	13
2.2	The Development of Modern Metrology and International Infrastructure . . . . .	13
2.3	Metre Convention . . . . .	14
2.4	International Metrological Infrastructure . . . . .	15
2.4.1	International Bureau of Weights and Measures (BIPM) . . . . .	15
2.4.2	The International Organization of Legal Metrology (OIML) . . . . .	17
2.4.3	Regional Metrological Infrastructure . . . . .	19
2.4.4	The National Metrological Infrastructure . . . . .	20
2.4.5	Summary . . . . .	21
<b>3</b>	<b>System of Units</b> . . . . .	23
3.1	The Value of Defined Quantity Is the Quantity Expressed as the Product of Number and Unit of Measurement . . . . .	23
3.2	Conventions for Writing Unit Symbols and Their Names . . . . .	29
3.3	Editorial Requirements with Regard to Writing SI Units . . . . .	30
3.4	Writing the Unit Symbol of Volume . . . . .	31
3.5	Quantities, Units of Measurement and Related Concepts . . . . .	31
3.6	Fundamental Physical Constant . . . . .	32

<b>4</b>	<b>Metrological Traceability</b> .....	35
4.1	Traceability and the Comparability of Results .....	37
4.1.1	The Standard Should Mimic the Measured Quantity to the Best Extent .....	39
4.2	General Requirements for Metrological Traceability .....	45
4.3	Measurement Traceability Over Time .....	46
4.4	Compliance with the Requirements of the Reference Material .....	47
4.5	Metrological Traceability in Practice .....	47
4.6	Summary .....	51
<b>5</b>	<b>Calibration</b> .....	53
5.1	Bracketing Over a Range of Concentrations .....	57
5.2	Evaluation of Recovery with Reference Materials .....	58
5.3	Method of Standard Addition .....	58
5.4	The Advantages of the Standard Addition Method .....	60
5.5	Limitations of the Standard Addition Method .....	60
5.6	The Method of the Internal Standard .....	61
5.7	Internal Standardization .....	62
5.8	The Quality of Calibration of Analytical Procedure .....	63
<b>6</b>	<b>Reference Materials in Chemical Measurements</b> .....	65
6.1	Basic Definitions and Requirements .....	66
6.2	Production of Reference Materials .....	70
6.3	Types of Reference Materials .....	71
6.4	Chemical Substances of a Given Purity .....	73
6.5	Matrix Reference Materials .....	73
6.6	Applicability of Reference Materials .....	73
6.7	Selection of Reference Materials .....	75
6.8	The Type of Reference Material Versus the Type of Sample .....	76
6.9	The Content of the Substance to Be Determined in the Reference Material and the Sample .....	77
6.10	The Uncertainty of the Certified Value and the Expanded Uncertainty of the Measurement Result .....	78
6.11	Proper Use of Reference Materials .....	80
6.12	The Reference Value .....	81
6.13	The Shelf Life of Reference Materials .....	81
6.14	The Use of Certified Reference Materials for Ensuring the Traceability of the Result .....	82
6.15	Summary .....	84

<b>7</b>	<b>Validation of the Measurement Procedure</b> . . . . .	87
7.1	Techniques, Methods and Measurement Procedures . . . . .	89
7.2	Validation of the Analytical Procedure . . . . .	90
7.3	Verification and Validation of Measuring Device . . . . .	91
7.4	Validation of the Measurement Device Software . . . . .	91
7.5	Validation of Procedures for Processing the Results . . . . .	91
7.6	Standardized Versus Laboratory-Developed Procedures . . . . .	92
7.7	Measurement Techniques . . . . .	94
7.8	Validation of Measurement Procedure . . . . .	96
7.9	Optimization and Validation of the Measurement Procedure . . . . .	97
7.10	Criteria for Selecting the Measurement Procedure . . . . .	100
7.11	Validation Parameters . . . . .	100
7.12	The Frequency of Revalidation . . . . .	103
7.13	Selected Parameters of Validation of the Measurement Procedure . . . . .	105
7.14	Selectivity and Specificity . . . . .	105
7.15	Accuracy and Trueness . . . . .	106
7.16	Evaluation of the Accuracy and Precision . . . . .	107
7.17	Evaluation of Recovery . . . . .	108
7.18	The Limit of Detection and Quantitation . . . . .	109
7.19	The Limit of Detection . . . . .	109
7.20	The Limit of Quantitation . . . . .	110
7.21	Robustness . . . . .	110
7.22	Summary . . . . .	112
<b>8</b>	<b>Measurement Uncertainty</b> . . . . .	115
8.1	Measurement and Its Uncertainty . . . . .	117
8.2	The Reliability and Usefulness of the Measurement Results . . . . .	119
8.3	Measurement Results . . . . .	120
8.4	Error Versus Measurement Uncertainty . . . . .	122
8.5	Errors in Measurements of Chemical Quantities . . . . .	123
8.6	Types of Measurement Errors . . . . .	124
8.7	Systematic Errors . . . . .	125
8.8	Random Errors . . . . .	126
8.9	Requirements Concerning the Uncertainty . . . . .	126
8.10	Determination of the Measurement Uncertainty . . . . .	129
8.11	Evaluation of Uncertainty: Requirements in Chemical Measurements . . . . .	134
8.12	Modeling According to the ISO GUM Guide . . . . .	136
8.13	Evaluation of Standard Uncertainty for Each Identified Component of the Measurement Uncertainty . . . . .	137

8.14	Calculating the Type A Uncertainty . . . . .	137
8.15	Calculating Type B Uncertainty . . . . .	137
8.16	Calculating Combined Standard Uncertainty . . . . .	139
8.17	Calculating the Combined Uncertainty (for the Selected Coverage Factor $k$ ) . . . . .	140
8.18	Reporting the Results . . . . .	141
8.19	Evaluation of Uncertainty by Mathematical Model . . . . .	141
8.20	Advantages and Limitations of the Modeling Procedure for Evaluation of Uncertainty . . . . .	146
8.21	Experimental Methods of Evaluation of Uncertainty . . . . .	146
8.22	Conclusions . . . . .	150
<b>9</b>	<b>Managing the Quality Systems . . . . .</b>	<b>155</b>
9.1	Quality Management System . . . . .	156
9.2	Quality Assurance and Quality Control . . . . .	158
9.3	Quality Control . . . . .	160
9.4	Quality Measures . . . . .	160
9.5	Routine and Blind Samples . . . . .	161
9.6	Internal Quality Control . . . . .	161
9.7	The Frequency of Internal Control . . . . .	162
9.8	Control Samples . . . . .	162
9.8.1	Certified Reference Materials and Chemical Standards . . . . .	162
9.8.2	Routine Laboratory Samples . . . . .	163
9.8.3	Blanks . . . . .	163
9.9	Principle of Quality Control . . . . .	164
9.10	Control Charts . . . . .	164
9.10.1	Types of Control Charts . . . . .	165
9.10.2	Shewhart's Chart . . . . .	166
9.10.3	Recovery Control . . . . .	166
9.10.4	Range Control Chart . . . . .	167
9.11	How to Evaluate Control Charts . . . . .	167
9.11.1	CuSum Control Chart . . . . .	169
9.12	Summary . . . . .	169
<b>10</b>	<b>Interlaboratory Comparisons . . . . .</b>	<b>171</b>
10.1	Assigning the Reference Value . . . . .	174
10.2	By Formulation of Synthetic Test Samples . . . . .	174
10.3	The Use of Certified Reference Material . . . . .	174
10.4	The Use of Reference Method . . . . .	175
10.5	Consensus Value (Expert Laboratories) . . . . .	175
10.6	Consensus Value (from Participants) . . . . .	175
10.7	Evaluation of Laboratory Performance (Scores) . . . . .	176

10.8	Percentage Difference ( <i>D</i> -Score) . . . . .	176
10.9	<i>z</i> -Score . . . . .	177
10.9.1	The Assigned Value from Model Equation . . . . .	178
10.9.2	The Assigned Value from PT Round . . . . .	178
10.10	Zeta Score . . . . .	179
10.11	$E_n$ Score . . . . .	179
10.12	Summary . . . . .	179
10.12.1	Pay Attention to the Results of the Laboratory with ID 22 . . . . .	180
10.12.2	Indicators of the Evaluation of Laboratories Participating in Interlaboratory Comparisons . . . . .	182
10.13	Summary . . . . .	182
<b>Index</b>	. . . . .	<b>185</b>
