Fore	word		x
Char	pter 1.	Historical Evolution of Catalysts for Ammonia Synthesis	1
11	Introdu	iction of Catalysts for Ammonia Synthesis	າ
T · T	111	Co-Mo hydrogenation catalysts	6
	112	Zinc oxide desulfurizer	7
	1.1.3	Hydrocarbon steam reforming catalysts	8
	1.1.4	CO high-temperature shift catalysts	11
	1.1.5	CO low-temperature shift catalysts	14
	1.1.6	Methanation catalysts	15
	1.1.7	Refine catalysts	16
1.2	Histori	cal Retrospect of Catalysts for Ammonia Synthesis	21
	1.2.1	Basic studies on physical chemistry of ammonia	
		synthesis reaction	21
	1.2.2	Realization of ammonia synthesis under high pressure	23
	1.2.3	Development of fused iron catalysts for ammonia synthesis	25
	1.2.4	Development of ammonia synthesis catalysts in China	29
	1.2.5	Development trend of ammonia synthesis catalysts	30
1.3	Develo	pment of Magnetite (Fe ₃ O ₄) Based Fused Iron Catalysts	32
	1.3.1	Magnetite (Fe_3O_4) based fused iron catalysts	32
	1.3.2	Development of Fe_3O_4 based catalysts containing cobalt	32
1.4	Discov	ery of Wüstite Based Fused Iron Catalysts	33
	1.4.1	Search for new breakthrough of the technique	33
	1.4.2	Activity of wüstite $(Fe_{1-x}O)$ based catalysts	39
	1.4.3	Reduction of $Fe_{1-x}O$ based catalysts	42
	1.4.4	Technical characteristics of wüstite-based catalysts	46
	1.4.5	Significance of the $Fe_{1-x}O$ -based catalysts in theory $\ldots \ldots$	49
	1.4.6	Industrial application	50

1.5	Discove	ery of Ruthenium Based Catalysts
	1.5.1	Properties of the elements in the activation of dinitrogen 51
	1.5.2	Properties of the elements in ammonia synthesis
	1.5.3	Alloving effect
	1.5.4	Activated carbon supported ruthenium catalysts
		for ammonia synthesis
Refe	rences .	
Cha	pter 2.	Catalytic Reaction Mechanisms of Ammonia
		Synthesis 67
2.1	Introdu	$action \dots \dots$
	2.1.1	The development of catalysis theory
	2.1.2	The chemical essences of catalysis
	2.1.3	The methodology of catalytic investigation
2.2	Adsorp	otion and Heterogeneous Catalysis
	2.2.1	Adsorption and heterogeneous catalysis
	2.2.2	Non-uniformity of the surface of heterogeneous catalysts 80
	2.2.3	Isotherms of chemisorptions
	2.2.4	Rate of adsorption: Elovich equation
	2.2.5	Chemisorption state
		2.2.5.1 Chemisorption states of hydrogen
		2.2.5.2 Adsorption states of nitrogen
		2.2.5.3 Infrared spectroscopy study of nitrogen
		adsorption $\ldots \ldots $
		2.2.5.4 The study of electronic energy spectroscopy
		for nitrogen adsorption
		2.2.5.5 The study of adsorption of N_2 on non-iron
		metals \ldots 97
2.3	Mechai	nism of Catalytic Ammonia Synthesis Reaction 102
	2.3.1	Elementary reactions
	2.3.2	Catalytic reaction mechanisms for ammonia synthesis 104
		2.3.2.1 The mechanisms of ammonia synthesis reaction 105
		2.3.2.2 The mechanisms of ammonia decomposition 109
		2.3.2.3 Isotope exchanges of N_2
		2.3.2.4 Distinguishing reaction mechanisms
	2.3.3	Analysis of microreaction (intrinsic) kinetics of ammonia
		synthesis
		2.3.3.1 Analysis of reactor
		2.3.3.2 The conclusion of microkinetic analysis
2.4	Kinetic	s of Overall Reactions for Ammonia Synthesis
	2.4.1	General relation between overall reaction and
		elementary steps
	2.4.2	Two-step sequences
	2.4.3	Fundamental hypothesis of Temkin theory 131
	2.4.4	The reaction rate equation of Temkin–Pyzhev
		for ammonia synthesis

	2.4.0	Consequ	ence of Temkin's theory and search		
		for best	catalysts		140
		2.4.5.1	The riddling search for the optimal active site		
			or the best catalyst		140
		2.4.5.2	Difference of catalytic activity on different active		
			site (or catalyst)		142
		2.4.5.3	Interpretation of very large differences		
			in catalytic activity		144
		2.4.5.4	Structure-sensitivity of ammonia synthesis		
			reaction		147
2.5	Appar	ent React	ion Kinetics \ldots		153
	2.5.1	External	l diffusion		154
	2.5.2	Internal	diffusion		156
	2.5.3	Utilizati	on ratio of internal surface		158
	2.5.4	Macroki	netic equation of catalytic reactions		161
2.6	Design	n of Amme	onia Synthesis Reactor		163
	2.6.1	Applied	form of kinetic equation		163
	2.6.2	Mathem	atic model for design of reactor		167
	2.6.3	Distribu	tion between various beds of multi-beds adiabatic		
		reactors	for ammonia synthesis		169
	2.6.4	Fundam	ental data for design of ammonia synthesis reactor.		173
	2.6.5	An exan	aple of simulating design calculation		176
Refe	rences .				177
