Contents

Preface to the Second Edition	xi	Percentages and Rates of Germination	28
Preface to First Edition	xiii	Very Fast Germinating Species	30
		Length of Germination Test Period	31
		Test Viability of Nongerminated Seeds	31
		Germinating Seeds You Know Nothing About	33
1. Introduction		3. Types of Seeds and Kinds of Seed Dormancy	
Purpose	1	Purpose	37
Seed Germination Ecology	1	Types of Seeds	37
A Book on Seed Dormancy and Germination from a Different Perspective	2	Classification of Seed Dormancy	39
Need	2	Hierarchical Classification System	39
Content	3	Nikolaeva's Formula System	41
		Dichotomous Key for Seed Dormancy	41
2. Ecologically Meaningful Germination Studies		Overview of Classes of Seed Dormancy	41
Purpose	5	Physiological Dormancy	41
Definition of Seed Dormancy	5	Morphological Dormancy	63
Guidelines for Laboratory Studies on		Morphophysiological Dormancy	68
Germination Ecology	7	Physical Dormancy	72
Collect Seeds at Maturity	7	Physical Plus Physiological Dormancy	77
Check Seeds for Presence of Embryo	9		
Test and Use Seeds Immediately after Harvesting	10	4. Germination Ecology of Seeds with Nondeep Physiological Dormancy	
Check for Imbibition of Water	12	Purpose	79
Use Intact Natural Dispersal Units	12	Discovery of Dormancy Cycles	79
Replications	13	Changes in the State of Dormancy	80
Statistical Analyses	14	The Dormancy Continuum	86
Petri Dishes	14	Environmental Factors Causing Changes in	
Substrate	14	Dormancy States	87
Placement of Seeds on/in Substrate	16	Temperature	88
Water	17	Darkness	99
pH	17	Light	102
Disinfectants and Fungicides	19	Gases	104
Constant vs. Alternating Temperature Regimes	19	Water	106
Light and Darkness	20	Hydrothermal Time Model and Germination	109
Store Seeds under Natural or Simulated		Inorganic Chemicals	110
Habitat Conditions	26	Organic Chemicals	112
Test Seeds Frequently	27		

5. Germination Ecology of Seeds with Morphophysiological Dormancy

Purpose	119
Levels of Morphophysiological Dormancy	119
Nondeep Simple Morphophysiological Dormancy	119
Intermediate Simple Morphophysiological Dormancy	124
Deep Simple Morphophysiological Dormancy	124
Deep Simple Epicotyl Morphophysiological Dormancy	127
Nondeep Simple Epicotyl Morphophysiological Dormancy	132
Deep Simple or Simple Epicotyl Morphophysiological Dormancy?	133
Deep Simple Double Morphophysiological Dormancy	134
A Special Kind of Simple Double Morphophysiological Dormancy	137
Nondeep Complex Morphophysiological Dormancy	137
Intermediate Complex Morphophysiological Dormancy	139
Deep Complex Morphophysiological Dormancy	140

6. Germination Ecology of Seeds with Physical Dormancy

Purpose	145
Germination Phenology	145
Internal Moisture Conditions of Seeds	145
Artificial Softening of Water-Impermeable Seed (or Fruit) Coat	150
Mechanical Scarification	150
Acid Scarification	150
Enzymes	153
Organic Solvents	153
Percussion	154
High Atmospheric Pressures	154
Wet Heat	155
Dry Heat	157
Dry Storage	159
Radiation	160
Ultrasound	161
Low Temperatures	161
Germination Requirements of Permeable Seeds	162
Imbibition	162
Temperature	164

Light and Dark	164
Moisture Stress	165
Flooding	166
pH	166

Environmental Control of Breaking Physical Dormancy	166
High and High Fluctuating Temperatures	166
Two Steps in Breaking Physical Dormancy with High Temperatures	169
Drying at High Temperatures	171
Fire	172
Low Winter Temperatures	175
Two Steps in Breaking Physical Dormancy with Low Temperatures	176
Incubation on Moist Substrate	176
Burial in Soil in the Field	177
Microbial Action	177
Effects of Animals on Seeds with Physical Dormancy	178
Long-Term Storage of Permeable Seeds with Physical and Physiological Dormancy	181

7. Germination Ecology of Seeds in the Persistent Seed Bank

Purpose	187
Aerial Seed Banks	187
Development of Serotiny	187
How Long is Seed Dispersal Delayed?	188
Seed-holding Structures	191
Size of Seed Bank	191
Opening of Seed-holding Structures	192
Lethal Temperatures	193
Seed Dormancy and Germination	193
Soil Seed Banks	195
Formation	195
Spatial Distribution	199
Methodology of Studies	201
Types of Persistent Seed Banks	213
Habitats and Seed Density	220
Seed Size and Shape	225
Longevity of Seeds in the Soil	228
Inferred Age	228
Actual Age	230
Survivorship Curves	231
Impact of Animals on Water-Permeable Seeds Entering the Seed Bank	233
What Can Happen to Seeds in the Soil?	235
Models of Seed Dynamics in the Soil	235
Studies on Seed Bank Dynamics	236
Changes in Dormancy States	238

In situ Germination	239	Germination Requirements	299
Predicting Seedling Emergence	243	Germination Speed	302
Seed Death Due to Aging	245	Storability	303
Seed Death Due to Activities of Predators and Pathogens	249	Secondary Dormancy	303
Seed Death: Effects of Fire	256	Variation in Seed Germination Responses	303
Seed Death Due to Solarization and Composting	257	Types of Variation	303
Seed Death Due to Flooding	258	Common Garden Studies	310
Effects of Seed Banks on Populations	258	Local Adaptation	312
Survival in Risky Environments	259	Factors that Cause Preconditioning Effects	314
Population Stability	260	Carbon Dioxide Levels	314
Population Variability	261	Competition/Maternal Crop Environment	314
Effect of Seed Banks on Selection of Other Traits	263	Day Length	315
Density-escaping Characteristics	264	Herbicides	316
Coexistence of Species	264	Hormones	316
Persistence of Communities	265	Length of Growing Season	317
Restoration of Plant Communities	265	Light Quality	317
Gene Banks and Restoration	265	Mineral Nutrition	318
Restoration Potential of Seed Banks	266	Physiological Age of Plants	319
Seed Rain and Transient Seed Banks	266	Position of Fruit/Seed on Monomorphic Mother Plants	320
Presence of Native and Alien Weeds in Seed Bank	271	Premature Defoliation/Herbivory	322
Presence of Rare Species in Seed Bank	272	Soil Moisture	323
Seed-Related Strategies to Promote Restoration	272	Solar Irradiance	323
		Temperature	324
		Time: Year, Season and Within Season	326
		Ultraviolet Light	327
		Viruses and Fungi	327
		Other Factors	327
8. Variation in Seed Dormancy and Germination within and between Individuals and Populations of a Species		Changes in Seeds as a Result of the Preconditioning Environment	327
Purpose	277	Chemical Compounds	328
Inheritance of Seed Dormancy	277	Seed Size, Color and Shape	329
Species with Heritable Seed Dormancy	277	Structural and Chemical Changes	338
Types of Inherited Seed Dormancy	277	Heritable Changes	340
Selection of Pure Lines	277	Variation in Seeds within a Species	340
Crosses within a Species	278	Mass Seed Collections and Unimodal (Monomorphic) Seed Variation	340
Genes and Gene Mutations	280	Heritability and Unimodal Variation	343
Maternal, Paternal and Embryonic Genotypes	281	Seed/Fruit Heteromorphism	344
Maternal (Non-Mendelian) Influence	283	Genetic Polymorphism	352
Chromosomes	284	Consequences of Seed Variation on Germination and Seedling Size and Survival	353
Inbreeding Depression	285	Cleistogamy, Amphicarp, Geocarp and Seed Germination Ecology	362
Heterostyly	293	Cleistogamous Flowers	362
Pollen (Microgametophyte) Competition (Pollen Load)	293	Amphicarp	363
Number of Pollen Donors (Multiple Paternity)	294	Geocarp	365
Inheritance of Dormancy-Breaking and Germination Characteristics	295	Causes of Cleistogamy	366
Degree of Dormancy	295	Seed Size	368
Dormancy Break	298	Seed Germination	369
		Consequences on Seedling Recruitment	371

9. A Geographical Perspective on Germination Ecology: Tropical and Subtropical Zones

Purpose	375
Evergreen Rainforests	375
Climax Trees	375
Pioneer Trees	433
Dormancy and Germination of Shrubs	439
Dormancy and Germination of Lianas	442
Germination of Herbaceous Species	444
Special Biotic Factor: Seed Dispersal	450
Tropical Mountains	452
Montane Species	452
Seed Dormancy and Germination of Subalpine and Alpine Species	468
Special Factor: Invasive Species	468
Semievergreen Tropical Forests	470
Germination Phenology	470
Dormancy and Germination of Trees	471
Dormancy and Germination of Bamboos and Shrubs	499
Dormancy and Germination of Lianas	501
Dormancy and Germination of Herbaceous Species	503
Tolerance of Seed Damage	507
Tropical Deciduous Forests	508
Dormancy and Germination of Trees	508
Dormancy and Germination of Shrubs	516
Dormancy and Germination of Vines	517
Dormancy and Germination of Herbaceous Species	517
Chlorophyllous Embryos	522
Special Biotic Factor: Seed Predation	523
Tropical Dry Woodlands, Natural Savannas and Grasslands	524
Dormancy and Germination of Trees	525
Dormancy and Germination of Shrubs	536
Dormancy and Germination of Lianas	543
Dormancy and Germination of Herbaceous Species	543
Special Factor: Fire	554
Hot Semideserts and Deserts	557
Dormancy and Germination of Trees	558
Dormancy and Germination of Shrubs	561
Dormancy and Germination of Vines	568
Dormancy and Germination of Perennial Succulents	569
Dormancy and Germination of Herbaceous Perennials	574
Annual Species	577
Special Factor: Water as it Relates to Dispersal	587

Special Factor: Biological Crust	588
Special Factor: Nurse Plants	589

10. A Geographical Perspective on Germination Ecology: Temperate and Arctic Zones

Purpose	591
Sclerophyllous Woodlands with Winter Rain	591
Seed Dormancy and Germination of Trees	592
Seed Dormancy and Germination of Shrubs	598
Seed Dormancy and Germination of Vines	626
Seed Dormancy and Germination of Herbaceous Species	626
Special Factor: Fire	645
Special Factor: Allelopathy	676
Special Factor: Myrmecochory	678
Moist Warm Temperature Woodlands	683
Seed Dormancy and Germination of Trees	683
Seed Dormancy and Germination of Shrubs and Bamboos	699
Seed Dormancy and Germination of Lianas and Vines	706
Seed Dormancy and Germination of Herbaceous Species	708
Special Feature: Myrmecochory	713
Deciduous (Nemoral) Forests	713
Seed Dormancy and Germination of Trees	714
Seed Dormancy and Germination of Shrubs and Bamboos	722
Seed Dormancy and Germination of Vines	728
Seed Dormancy and Germination of Herbaceous Woodland Species	728
Seed Dormancy and Germination of Herbaceous Nonwoodland Species	735
Special Factors	758
Steppes or Grasslands of the Temperate Zones	766
Seed Dormancy and Germination of Trees	766
Seed Dormancy and Germination of Shrubs	766
Seed Dormancy and Germination of Vines	769
Seed Dormancy and Germination of Herbaceous Species	769
Seed Dormancy and Germination of Weeds	788
Special Factors	788
Semideserts and Deserts with Cold Winters	794
Seed Dormancy and Germination of Shrubs	794
Seed Dormancy and Germination of Herbaceous Species	798
Special Factors	803

Boreal Coniferous and Temperate			
Subalpine Zones	806		
Seed Dormancy and Germination of Species in Boreal and North-temperate Subalpine Zones	806		
Seed Dormancy and Germination of Species in South-temperate Subalpine Zones	834		
Special Factors	835		
Arctic and Temperate-Zone Alpine Tundra	837		
Seed Dormancy and Germination of Shrubs	838		
Seed Dormancy and Germination of Herbaceous Species	838		
Special Factors	850		
Mountains	852		
Montane	852		
Woodland (Colline)	862		
11. Germination Ecology of Plants with Specialized Life Cycles and/or Habitats			
Purpose	869		
Parasitic Plants	869		
Holoparasites	869		
A Holoparasite with Chlorophyll: <i>Cuscuta</i>	881		
A Hemiparasitic Member of the Lauraceae: <i>Cassytha</i>	884		
Rooted Hemiparasites Whose Seeds Require a Host Stimulus for Germination: <i>Striga</i> and <i>Alectra</i>	885		
Rooted Hemiparasites Whose Seeds do not Require a Host Stimulus to Germinate	896		
Nonrooted Hemiparasites: Mistletoes	902		
Mycro-Heterotrophic Plants Other Than Orchids	908		
Orchids	910		
Seed Dormancy	911		
Dormancy-breaking Requirements	912		
Germination Requirements	913		
Carnivorous Plants	925		
Seed Dormancy	925		
Longevity of Stored Seeds	927		
Dormancy-breaking Requirements	927		
Germination Requirements	927		
Aquatic (Nonsaline) Plants	929		
Seed Dormancy	929		
Dormancy-breaking Requirements	939		
Germination Requirements	943		
		Halophytes	957
		Salt Marshes and Salt Deserts	957
		Beaches, Cliffs and Foredunes	975
		Marine Angiosperms	980
		Mangroves	986
		Psammophytes of Nonsaline Soils	993
		Seed Dormancy	993
		Dormancy-breaking Requirements	997
		Germination Requirements	998
	12. Biogeographical and Evolutionary Aspects of Seed Dormancy		
		Purpose	1005
		World Biogeography of the Kinds of Seed Dormancy	1005
		Dormancy vs. Nondormancy	1005
		Geographical Distribution of Seed Dormancy	1006
		Environmental Gradients, Seed Dormancy and Life Forms	1007
		Dormancy Profiles: Future Considerations	1009
		Specialized Habitats or Life Cycles	1010
		Rare Species	1011
		Invasive Species	1015
		Theoretical Considerations on the Evolution of Seed Dormancy	1017
		Persistence in Risky Environments	1017
		Escape from Competition	1024
		Survival in Unfavorable Seasons	1027
		Optimizing the Time for Germination	1028
		Seed Dormancy and the Evolution of Other Traits	1033
		Paleoclimate as a Background for the Evolution of Seed Dormancy	1033
		Rainfall Patterns	1034
		Temperature	1035
		Fossil History of Seeds as it Relates to Dormancy	1038
		Fossil Seeds	1038
		Fossil Embryos	1042
		Speculations on Dormancy	1044
		Seed Dormancy and Phylogenetic Position of Family	1045
		Gymnosperms	1045
		Angiosperms	1046
		Seed Dormancy and Presumed age of Plant Families	1046
		Gymnosperms	1046
		Angiosperms	1048

Seed Dormancy and Martin's Family Tree of Seed Phylogeny	1049	Development of Seed Dormancy Classes and Nondormancy	1058
Type of Embryo and Presumed age of Plant Families	1051	Testing Dormancy Evolution Hypotheses	1072
Gymnosperms	1051	Future Studies	1073
Angiosperms	1051		
Origins and Relationships of Seed Dormancy Classes	1051	References	1075
Seed/Embryo Types	1051	Taxonomic Index	1475
Seed Dormancy Classes	1056	Subject Index	1573
