

# **ENDOCRINE DISRUPTORS IN THE ENVIRONMENT**

**SUSHIL K. KHETAN**

**WILEY**

# CONTENTS

<b>Foreword</b>	<b>xiv</b>
<b>Preface</b>	<b>xviii</b>
<b>Acronyms</b>	<b>xxi</b>
<b>Glossary</b>	<b>xxvi</b>
<b>1 Environmental Endocrine Disruptors</b>	<b>1</b>
1.1 Introduction, 1	
1.1.1 The Endocrine System, 1	
1.1.2 Endocrine Disrupting Chemicals (EDCs), 3	
1.1.3 Sources of EDCs in the Environment, 4	
1.1.4 Deleterious Effects of EDCs on Wildlife and on Humans, 6	
1.1.5 Endocrine Disruption Endpoints, 6	
1.2 Salient Aspects about Endocrine Disruption, 7	
1.2.1 Low-Dose Effects and Nonmonotonic Dose Responses, 7	
1.2.2 Exposures during Periods of Heightened Susceptibility in Critical Life Stages, 9	
1.2.3 Delayed Dysfunction, 11	
1.2.4 Importance of Mixtures, 11	
1.2.5 Transgenerational, Epigenetic Effects, 12	
1.3 Historical Perspective of Endocrine Disruption, 12	
1.4 Scope and Layout of this Book, 19	
1.5 Conclusion, 20	
References, 21	

<b>PART I</b>	<b>MECHANISMS OF HORMONAL ACTION AND PUTATIVE ENDOCRINE DISRUPTORS</b>	<b>27</b>
<b>2</b>	<b>Mechanisms of Endocrine System Function</b>	<b>29</b>
2.1	Introduction, 29	
2.2	Hormonal Axes, 29	
2.2.1	Hypothalamus–Pituitary–Gonad (HPG) Axis, 31	
2.2.2	The Hypothalamic–Pituitary–Thyroid (HPT) Axis, 33	
2.2.3	The Hypothalamic–Pituitary–Adrenal (HPA) Axis, 34	
2.3	Hormonal Cell Signaling, 35	
2.3.1	Receptors and Hormone Action, 35	
2.3.2	Genomic Signaling Pathway, 36	
2.3.3	Rapid-Response Pathway (Nongenomic Signaling), 38	
2.3.4	Receptor Agonists, Partial Agonists, and Antagonists, 40	
2.4	Sex Steroids, 41	
2.4.1	Physiologic Estrogens, 41	
2.4.2	Androgens, 43	
2.5	Thyroid Hormones, 45	
2.6	Conclusions and Future Prospects, 46	
	References, 47	
<b>3</b>	<b>Environmental Chemicals Targeting Estrogen Signaling Pathways</b>	<b>51</b>
3.1	Introduction, 51	
3.1.1	Gonadal Estrogen Function Disruptors, 52	
3.2	Steroidal Estrogens, 54	
3.2.1	Physiologic Estrogens, 55	
3.2.2	17 $\alpha$ -Ethinylestradiol (EE2), 55	
3.2.3	Phytoestrogens, 57	
3.2.4	Mycoestrogen – Zearalenone (ZEN), 59	
3.3	Nonsteroidal Estrogenic Chemicals, 60	
3.3.1	Diethylstilbestrol (DES), 60	
3.3.2	Organochlorine Insecticides, 62	
3.3.3	Polychlorinated Biphenyls (PCBs), 65	
3.3.4	Alkyphenols, 65	
3.3.5	Parabens (Hydroxy Benzoates), 73	
3.3.6	Sun Screens (Chemical UV Filters), 74	
3.4	Metalloestrogens, 75	
3.4.1	Cadmium (Cd), 76	
3.4.2	Lead (Pb), 76	
3.4.3	Mercury (Hg), 77	
3.4.4	Arsenic (As), 77	
3.5	Conclusion and Future Prospects, 78	
	References, 78	

<b>4</b>	<b>Anti-Androgenic Chemicals</b>	<b>91</b>
4.1	Introduction, 91	
4.2	Testosterone Synthesis Inhibitors, 92	
4.2.1	Phthalates, 92	
4.3	Androgen Receptor (AR) Antagonists, 96	
4.3.1	Organochlorine (OC) Pesticides, 96	
4.3.2	Organophosphorus (OP) Insecticides, 98	
4.3.3	Bisphenol A (BPA), 99	
4.3.4	Polybrominated Diphenyl Ethers (PBDEs), 99	
4.3.5	Vinclozolin (VZ), 100	
4.3.6	Procymidone, 101	
4.4	AR Antagonists and Fetal Testosterone Synthesis Inhibitors, 102	
4.4.1	Prochloraz, 102	
4.4.2	Linuron, 103	
4.5	Comparative Anti-Androgenic Effects of Pesticides to Androgen Agonist DHT, 103	
4.6	Conclusions and Future Prospects, 103	
	References, 104	
<b>5</b>	<b>Thyroid-Disrupting Chemicals</b>	<b>111</b>
5.1	Introduction, 111	
5.2	Thyroid Synthesis Inhibition by Interference in Iodide Uptake, 113	
5.2.1	Perchlorate, 113	
5.3	TH Transport Disruptors and Estrogen Sulfotransferases Inhibitors, 114	
5.3.1	Polychlorinated Biphenyls (PCBs), 114	
5.3.2	Triclosan, 116	
5.4	Thyroid Hormone Level Disruptors, 117	
5.4.1	Polybrominated Diphenyl Ethers (PBDEs), 117	
5.5	Selective Thyroid Hormone Antagonists, 119	
5.5.1	Bisphenols, 119	
5.5.2	Perfluoroalkyl Acids (PFAAs), 120	
5.5.3	Phthalates, 120	
5.6	Conclusions and Future Prospects, 121	
	References, 121	
<b>6</b>	<b>Activators of PPAR, RXR, AhR, and Steroidogenic Factor 1</b>	<b>126</b>
6.1	Introduction, 126	
6.2	Peroxisome Proliferator-Activated Receptor (PPAR) Agonists, 127	
6.2.1	Organotin Antifoulant Biocides, 128	

6.2.2	Perfluoroalkyl Compounds (PFCs),	130
6.2.3	Phthalates,	132
6.3	Aryl Hydrocarbon Receptor (AhR) Agonists,	133
6.3.1	Polychlorinated-Dibenzodioxins (PCDDs) and -Dibenzofurans (PCDFs),	133
6.3.2	Coplanar Polychlorinated Biphenyls,	135
6.3.3	Substituted Urea and Anilide Herbicides,	135
6.4	Steroidogenesis Modulator (Aromatase Expression Inducer),	136
6.4.1	Atrazine,	136
6.5	Conclusions and Future Prospects,	138
	References,	139
<b>7</b>	<b>Effects of EDC Mixtures</b>	<b>146</b>
7.1	Introduction,	146
7.2	Combined Effect of Exposure to Multiple Chemicals,	146
7.3	Mixture Effects of Estrogenic Chemicals,	148
7.4	Mixture Effects of Estrogens and Anti-Estrogens,	151
7.5	Mixture Effects of Anti-Androgens,	152
7.5.1	Anti-Androgens with Common Mechanism of Action,	152
7.5.2	Anti-Androgens with Different Modes of Action,	154
7.5.3	Chronic Exposure of Low Dose Mixture of Anti-Androgens Versus Acute Exposure to High Dose Individual Compounds,	156
7.6	Mixture Effects of Thyroid Disrupting Chemicals,	157
7.7	Mixture Effects of Chemicals Acting via AhR,	158
7.8	Conclusions and Future Prospects,	158
	References,	161
<b>8</b>	<b>Environmentally Induced Epigenetic Modifications and Transgenerational Effects</b>	<b>166</b>
8.1	Introduction,	166
8.2	Regulatory Epigenetic Modifications,	168
8.2.1	Methylation of Cytosine Residues in the DNA and Impact on Gene Expression (Transcriptional Silencing),	168
8.2.2	Remodeling of Chromatin Structure through Post-Translational Modifications of Histone Tails (Determinants of Accessibility),	170
8.2.3	Regulation of Gene Expression by Noncoding RNAs,	173
8.2.4	DNA Demethylation,	174
8.2.5	Assays for Epigenetic Modification,	175
8.3	Epigenetic Dysregulation Effects of Endocrine Disruption,	176
8.3.1	Bisphenol A (BPA): A Case Study,	177
8.3.2	DEHP,	179

- 8.4 Environmental Epigenetic Effects of Heavy Metals Exposure, 179
  - 8.4.1 Cadmium, 180
  - 8.4.2 Arsenic, 180
  - 8.4.3 Nickel, 180
  - 8.4.4 Lead, 181
- 8.5 Transgenerational Inheritance of Environmentally Induced Epigenetic Alterations, 181
  - 8.5.1 DES, 182
  - 8.5.2 Vinclozolin, 183
  - 8.5.3 Methoxychlor, 185
  - 8.5.4 BPA, 185
  - 8.5.5 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin (TCDD), 185
- 8.6 Transgenerational Actions of EDCs Mixture on Reproductive Disease, 186
- 8.7 Conclusions and Future Prospects, 187  
References, 188

**PART II REMOVAL MECHANISMS OF EDCs THROUGH BIOTIC AND ABIOTIC PROCESSES 195**

**9 Biodegradations and Biotransformations of Selected Examples of EDCs 197**

- 9.1 Introduction, 197
- 9.2 Natural and Synthetic Steroidal Estrogens, 199
  - 9.2.1 17 $\beta$ -Estradiol and Estrone, 199
  - 9.2.2 17 $\alpha$ -Ethinylestradiol, 202
- 9.3 Alkylphenols, 205
  - 9.3.1 4-*n*-Nonylphenol (4-NP<sub>1</sub>), 205
  - 9.3.2 4-*tert*-Nonylphenol Isomer 4-(1-Ethyl-1,4-Eimethylpentyl) Phenol (NP<sub>112</sub>), 208
  - 9.3.3 4-*tert*-Nonylphenol Isomer 4-[1-Ethyl-1,3-Dimethylpentyl] Phenol (4-NP<sub>111</sub>), 210
  - 9.3.4 4-*n*- and 4-*tert*-Octylphenols, 212
  - 9.3.5 Bisphenol A, 214
- 9.4 Phthalates, 220
  - 9.4.1 Di-*n*-butyl Phthalate (DBP), 221
  - 9.4.2 *n*-Butyl Benzyl Phthalate (BBP), 222
  - 9.4.3 Di-(2-ethylhexyl) Phthalate (DEHP), 223
  - 9.4.4 Di-*n*-octyl Phthalate (DOP), 226
- 9.5 Insecticides, 226
  - 9.5.1 Methoxychlor, 226
- 9.6 Fungicides, 228
  - 9.6.1 Vinclozolin, 228

- 9.6.2 Procymidone, 231
- 9.6.3 Prochloraz, 232
- 9.7 Herbicides, 232
  - 9.7.1 Linuron, 232
  - 9.7.2 Atrazine, 233
- 9.8 Polychlorinated Biphenyls (PCBs), 236
- 9.9 Polybrominated Diphenyl Ethers (PBDEs), 238
  - 9.9.1 2,2',4,4'-Tetrabromodiphenyl Ether (BDE-47), 238
  - 9.9.2 2,2',4,4',5-Penta-bromodiphenyl Ether (BDE-99), 243
  - 9.9.3 3,3',4,4',5,5',6,6'-Decabromodiphenyl Ether (BDE-209), 243
- 9.10 Triclosan, 245
- 9.11 Conclusions and Future Prospects, 245
  - References, 246

## **10 Abiotic Degradations/Transformations of EDCs Through Oxidation Processes**

254

- 10.1 Introduction, 254
- 10.2 Natural and Synthetic Estrogens, 256
  - 10.2.1 17 $\beta$ -Estradiol (E2) and Estrone (E1), 256
  - 10.2.2 17 $\alpha$ -Ethinylestradiol (EE2), 260
- 10.3 Bisphenol A, 260
  - 10.3.1 Chlorination with HOCl, 263
  - 10.3.2 Catalytic Oxidation with H<sub>2</sub>O<sub>2</sub>, 263
  - 10.3.3 Oxidation with KMnO<sub>4</sub>, 266
  - 10.3.4 Oxidation with MnO<sub>2</sub>, 267
  - 10.3.5 Treatment with Zero-Valent Aluminum, 267
  - 10.3.6 Ozonation, 267
  - 10.3.7 Fenton Reaction, 270
  - 10.3.8 Photolytic and Photocatalytic Degradation, 272
- 10.4 4-Octylphenol and 4-Nonylphenol, 272
  - 10.4.1 Chlorination, 272
  - 10.4.2 Ozonation, 274
  - 10.4.3 Photocatalytic Degradation, 274
- 10.5 Parabens, 274
  - 10.5.1 Ozonation, 276
  - 10.5.2 Photocatalytic Degradation, 276
- 10.6 Phthalates – Photocatalytic Degradation, 276
  - 10.6.1 Dibutyl Phthalate (DBP), 277
  - 10.6.2 *n*-Butyl Benzylphthalate, 277
  - 10.6.3 Di(2-Ethylhexyl)phthalate (DEHP), 279
- 10.7 Linuron, 279
  - 10.7.1 Treatment with O<sub>3</sub>, UV, and UV/O<sub>3</sub>, 279
- 10.8 Atrazine, 281

- 10.8.1 Fenton Reaction, 281
- 10.8.2 Reaction with Ozone, Ozone/H<sub>2</sub>O<sub>2</sub>, and Ozone/OH Radicals, 282
- 10.8.3 Treatment with δ-MnO<sub>2</sub>, 282
- 10.8.4 Reductive Dechlorination, 282
- 10.8.5 Photocatalytic Degradation, 282
- 10.9 Polybrominated Diphenyl Ether (PBDE) Flame Retardants, 282
  - 10.9.1 Photochemical Degradation, 282
  - 10.9.2 TiO<sub>2</sub>-Mediated Photocatalytic Debromination, 284
  - 10.9.3 Zero-Valent Iron Reductive Debromination, 285
- 10.10 Triclosan, 285
  - 10.10.1 Chlorination with HOCl, 285
  - 10.10.2 Oxidation with KMnO<sub>4</sub>/MnO<sub>2</sub>, 286
  - 10.10.3 Ozonation, 286
  - 10.10.4 Photochemical Transformation, 286
- 10.11 PFOA and PFOS, 289
  - 10.11.1 Modified Fenton Reaction, 289
  - 10.11.2 Sonochemical Degradation, 289
  - 10.11.3 Photocatalytic Reaction, 289
- 10.12 Conclusions, 289
  - References, 290

**PART III SCREENING AND TESTING FOR POTENTIAL EDCs,  
IMPLICATIONS FOR WATER QUALITY  
SUSTAINABILITY, POLICY AND REGULATORY ISSUES,  
AND GREEN CHEMISTRY PRINCIPLES IN THE DESIGN  
OF SAFE CHEMICALS AND REMEDIATION  
OF EDCs** **297**

- 11 Screening and Testing Programs for EDCs** **299**
- 11.1 Introduction, 299
  - 11.2 Endocrine Disruptor Screening Program (EDSP), 300
    - 11.2.1 EDSP Tier 1, 301
    - 11.2.2 EDSP Tier 2, 302
  - 11.3 Assays for the Detection of Chemicals that Alter the Estrogen Signaling Pathway, 304
    - 11.3.1 The ER Binding Assay (USEPA OPPTS 890.1250), 304
    - 11.3.2 ER $\alpha$  Transcriptional Activation Assay (USEPA OPPTS 890.1300; OECD 455), 304
    - 11.3.3 Aromatase Assay (USEPA OPPTS 890.1200), 306
    - 11.3.4 *In vivo* Uterotrophic Bioassay in Rodents (USEPA OPPTS 890.1600; OECD 440), 307

- 11.3.5 Pubertal Female Rat Assay (USEPA OPPTS 890.1450), 308
- 11.3.6 Twenty-One-Day Fish Reproduction Assay (USEPA OPPTS 890.1350; OECD 229), 308
- 11.4 Assays for the Detection of Chemicals that Alter the Androgenic Signaling Pathway, 308
  - 11.4.1 AR Binding Assay (Rat Prostate Cytosol) (USEPA OPPTS 890.1150), 309
  - 11.4.2 H295R Steroidogenesis Assay (USEPA OPPTS 890.1550), 309
  - 11.4.3 Hershberger Bioassay in Rats for Androgenicity (USEPA OCSPP 890.1400; OECD 441), 309
  - 11.4.4 Pubertal Male Rat Assay (USEPA OPPTS 890.1500), 310
  - 11.4.5 Strengths and Limitations of Assays for Interference with Androgen Action, 310
- 11.5 Assays for the Detection of Chemicals that Alter the HPT Axis, 311
  - 11.5.1 Amphibian Metamorphosis Assay (OPPTS 890.1100), 311
  - 11.5.2 Strengths and Limitations of Thyroid Disrupting Chemical Assays, 311
- 11.6 The USEPA's EDSP21 Work Plan, 312
  - 11.6.1 The USEPA ToxCast Program, 313
  - 11.6.2 Tox21 HTS Programs, 314
- 11.7 Conclusions and Future Prospects, 316  
References, 317

## **12 Trace Contaminants: Implications for Water Quality Sustainability**

320

- 12.1 Introduction, 320
- 12.2 Trace Contaminants Sources in Water, 321
- 12.3 Wastewater Reclamation Processes, 323
  - 12.3.1 Primary Treatment: Sedimentation/Coagulation, 323
  - 12.3.2 Secondary Treatment: Removal by Physical Methods or Biological Process, 324
  - 12.3.3 Tertiary Treatment: Redox Processes, 325
- 12.4 Indirect Water Reuse Systems, 326
  - 12.4.1 Removal of Trace Contaminants for Potable Water Reuse Applications, 326
- 12.5 Leaching of Contaminants in Water – the Case of Bottled Water, 327
- 12.6 Water Quality Sustainability and Health Effects, 328

12.7	Toxicological Implications, 329	
12.8	Regulatory Structures to Maintain Water Quality, 330	
12.9	Conclusions and Future Prospects, 331	
	References, 333	
<b>13</b>	<b>Policy and Regulatory Considerations for EDCs</b>	<b>339</b>
13.1	Introduction, 339	
13.2	Regulating Paradigm Shift in Conventional Toxicology, 340	
13.2.1	Downward Movement of Safe Thresholds, 341	
13.2.2	Nonmonotonic Low-Dose Effects (Nonthreshold substances), 341	
13.2.3	Sensitivity of Development Periods, 342	
13.2.4	Cumulative Exposures to Multiple EDCs (Exposures can be Additive), 342	
13.2.5	Long Latency Between Exposure and Effect (Delayed Effects), 343	
13.3	Policy Options for EDC Regulation, 344	
13.3.1	Scientific Uncertainty and Precautionary Policy, 344	
13.3.2	Shifting the Burden of Proving Safe Products, 345	
13.3.3	Need to Broaden the Risk Assessment, 346	
13.3.4	Cutting-Edge Bioassays Showing Developmental Endpoints, 346	
13.4	Controversy on Regulatory Framework for EDCs, 348	
13.4.1	Diversity of Viewpoints of the Risk Assessors and the Endocrine Scientists, 348	
13.4.2	A Debate on EU Regulatory Framework for EDCs, 350	
13.5	Conclusions and Future Prospects, 351	
	References, 353
