Contents

Preface.....	xxi
Acknowledgments.....	xxiii
Author.....	xxv
Executive Summary.....	xxvii
Cautions.....	xxix
Chapter 1 Introduction.....	1
The Cannabis Plant.....	1
“Cannabis”—A Comprehensive Term.....	1
The Widespread Misunderstanding That Marijuana Is “Flowers” of <i>Cannabis sativa</i> ...	1
Why Cannabis Is Controversial.....	4
Sexual Reproduction in <i>Cannabis</i>	5
How the Four Kinds of Horses Are Similar to the Four Kinds of <i>Cannabis sativa</i>	6
Wild Plants.....	8
Fiber Plants.....	9
Other So-Called “Hemp”.....	9
“Indian Hemp”.....	10
Oilseed Plants.....	10
Intoxicating Drug Plants.....	11
Genetic Relationships of Different Kinds of Cannabis Plants.....	11
The Criminalization and Suppression of Cannabis.....	12
The Relegitimization of Cannabis.....	14
The Decriminalization and Resurrection of Industrial (Nonintoxicating) Cannabis...	15
“Hemp” vs. “Marijuana”.....	16
The Decriminalization and Resurrection of Medical Cannabis.....	16
The Decriminalization and Resurrection of Recreational Cannabis.....	16
Benefit/Harm Analysis of the Many Ways That Cannabis Is Used.....	17
The Interface of Cannabis Science and Public Policy.....	17
Curiosities of Science, Technology, and Human Behavior.....	19
Chapter 2 Prehuman and Early History of <i>Cannabis sativa</i>	23
The Family Tree and Prehuman Antiquity of <i>Cannabis sativa</i>	23
The Incredibly Parallel Histories of <i>Cannabis</i> and Its Closest Relative, <i>Humulus</i> (Hop).....	23
Uncertainty Regarding the Early Historical Association of <i>Cannabis</i> and People...	26
Location of the Prehuman Distribution Range.....	26
The Habitat of Ancient Wild <i>Cannabis sativa</i>	27
The “Camp-Follower” Model of Early Domestication of <i>Cannabis sativa</i>	27
How Adaptation to Streamside Soils Led to Water-Based Fiber Extraction.....	29
Earliest Geographical Centers of the Four Kinds of Domesticated <i>Cannabis sativa</i> ...	30
Early Old World Geography of Fiber and Marijuana Classes of <i>Cannabis sativa</i>	30
Early Migrations of Fiber and Marijuana Kinds of Domesticated <i>Cannabis sativa</i> ...	31
Curiosities of Science, Technology, and Human Behavior.....	32

Chapter 3	The Ecology of Wild <i>Cannabis sativa</i>	33
	The Nature of “Wildness”.....	33
	Evaluating Wildness in <i>Cannabis sativa</i> Populations	34
	Geography of Wild <i>Cannabis sativa</i>	34
	Habitats and Plant Communities Occupied.....	35
	Climate Limitations	36
	Temperature.....	36
	Water.....	36
	Light Intensity	37
	Photoperiod.....	37
	Edaphic (Soil) Limitations	37
	Seed Ecology.....	38
	Appearance.....	38
	Size	38
	Seed Shedding	40
	Protective Thick Shell.....	41
	Camouflage.....	41
	Germination Behavior	42
	Dormancy	42
	Longevity	42
	Environmental Factors Controlling Germination.....	42
	Seedling Development.....	42
	Seed Distribution Agents.....	44
	Birds.....	45
	Water.....	45
	Mammals	45
	Insects	45
	Allelopathy	46
	Root Ecology.....	46
	Stem Ecology	48
	Phenotypic Plasticity: A Key to Success.....	48
	Biotic Competitors.....	48
	Human Eradication Efforts	48
	Pests and Diseases.....	49
	Curiosities of Science, Technology, and Human Behavior	49
Chapter 4	Sex Expression	51
	What Is “Sex” in Flowering Plants?.....	51
	Maleness and Femaleness in <i>Cannabis</i> in Comparison to Other Flowering Plants....	51
	Differences between Male and Female Cannabis Plants	52
	Male Plants and Their Flowers	53
	Pollen Dispersal.....	54
	Female Plants and the Pollination of Their Flowers	54
	Remarkable Development of Unpollinated Female Flowers.....	55
	Monoecious (“Hermaphroditic”) Kinds of <i>Cannabis sativa</i>	58
	Cross-Fertilization and Self-Fertilization	60
	Genetic Determination of Sex.....	60
	Sex-Associated DNA Markers	60
	Environmental Determination of Sex	60

Modification of Sex by Hormonal Treatment.....	61
Reduction and Elimination of Males for Human Purposes	61
Culling of Most Male Plants When Seeds Are Produced for Industrial Hemp	61
Culling of All Male Plants for the Purpose of Producing Marijuana	61
Selection of Female-Predominant Monoecious Strains	62
Generation of Seeds Producing “All-Female” Plants.....	62
Use of Environment and/or Hormones by Marijuana Growers to Increase Females.....	63
Cloning of Female Plants	63
Summary of the Demise of Male <i>Cannabis</i> under Domestication	63
Curiosities of Science, Technology, and Human Behavior	64
 Chapter 5	
Photoperiodism.....	67
Introduction to Reproductive Photoperiodism in <i>Cannabis sativa</i>	67
Autoflowering (Day-Neutral) Plants.....	68
Latitudinal Photoperiodic Adaptation.....	69
The Interaction of Photoperiodism, Killing Frosts, and Seed Production.....	71
Photoperiodic Problems for Plants of Northern Origin Grown Close to the Equator	71
Photoperiodic Problems for Plants of Semitropical Origin Grown in Northern Latitudes	72
Photoperiodic Problems for Semiequatorial Drug Strains in Northern Climates	73
Unsuitable Photoperiod May Not Be the Only Cause of Poor Performance	73
Curiosities of Science, Technology, and Human Behavior	74
 Chapter 6	
Shoot and Foliage Architecture.....	75
Anatomy and Morphology	75
Basic Leaf Botany of <i>Cannabis</i>	75
Shoot Architecture of Wild Plants	75
Shoot Architecture of Plants Grown in Different Field Configurations	76
Shoot Architecture of Fiber Crops	78
Reducing the Height of Marijuana Plants	80
“Sea of Green” and “Screen of Green” Cultivation Methods	82
Reducing the Height of Fiber Plants	84
Resistance to Catastrophic Stem Damage.....	84
Foliage Architecture.....	85
Protective Unicellular Hairs.....	87
Cystolithic Trichomes.....	87
Simple Trichomes	88
Curiosities of Science, Technology, and Human Behavior	88
 Chapter 7	
Fiber.....	91
Introduction to Fiber.....	91
History.....	91
Ancient Hemp History.....	91
The Golden Age of Hemp in the Western World	93
The Labor-Intensive Pre-Twentieth Century Period.....	94
The Twentieth Century Great Demise of Hemp in the Western World	94
The Recent Renaissance.....	99

The Two Basic Classes of Stem Fiber: Phloem (Bast) and Xylem (Wood).....	100
Anatomy of the Stem.....	100
The Economically Important Stem Tissues	100
Ambiguities Regarding Stem Tissue Anatomical Terms	101
How the Three Kinds of Fiber Contribute to Stem Strength	102
Xylem Fiber	102
Primary Phloem Fiber	103
Secondary Phloem Fiber	103
Lignification	103
Fiber Qualities	104
Fiber Extraction Technologies.....	105
How Domestication Has Altered <i>Cannabis sativa</i> for Fiber Production.....	109
Economic Products.....	111
Textiles, Fabrics, and Clothing	111
Substrates for Plant Growth.....	113
Horticultural Planting Media.....	113
Biodegradable Mulch.....	113
Cordage Products	113
Pressed and Molded Fiber Products	113
Paper and Specialty Pulp Products.....	114
Building Construction Products	116
Construction Wood Products (Pressboard, Moldings)	117
Concretized and Masonry Construction Products (Stucco, Building Blocks, Tiles)	117
Animal Bedding Based on Hurds.....	120
Plastic Biocomposites.....	121
Compressed Cellulose Plastics	122
Agronomy.....	122
Security Requirements	122
General Growth Requirements.....	123
Root Growth	123
Soil and Fertilization	124
Water Relations.....	125
Temperatures	125
Seed Germination.....	126
Maintaining Seed Viability in Storage.....	126
Planting Requirements	127
Rotations.....	128
Wind, Rain, and Hail Damage	129
Pests.....	129
Weeds.....	129
Higher Plant Parasites.....	129
Mammalian Pests	130
Birds.....	130
Insects	130
Other Invertebrates	130
Fungi.....	130
Bacteria.....	131
Viruses.....	131

Harvest.....	131
Yields.....	132
Storage.....	133
Breeding.....	133
Cultivars.....	135
Economic Status.....	135
Market Development and Future Needs.....	136
Curiosities of Science, Technology, and Human Behavior.....	139
Chapter 8 Oilseed.....	143
Introduction to Edible Fixed Oil.....	143
Introduction to Hempseed and Hemp Oil.....	144
History.....	146
Oil Extraction and Processing Technology.....	148
Pressure Extraction.....	148
Solvent Extraction.....	149
Nutritional Qualities of Hemp Seed and Oil.....	150
Fatty Acids.....	150
Essential Fatty Acids.....	152
Minor Fatty Acids.....	153
Tocopherols.....	153
Sterols.....	154
Protein.....	154
Arginine.....	154
Phenolics.....	154
Other Significant Dietary Constituents.....	155
Environmental Control of the Development of Fatty Acids.....	155
How Domestication Has Altered <i>Cannabis sativa</i> for Oilseed Production.....	155
Review of Key Information Presented in Previous Chapters.....	155
The Traditional Use of Tall, Highly Branched Plants to Produce Hempseed.....	156
The Use of Short, Compact Plants to Produce Hempseed.....	157
Selection for Seed Characteristics.....	158
Seed Whiteness.....	158
Seed Size vs. Seed Quantity.....	160
Fatty Acid Quality.....	160
Hull Thickness.....	160
Hemp Seed and Oil Culinary Limitations.....	160
Processed Food Products for Humans.....	161
Raw Hempseed Sprouts for Humans.....	162
Recipe Sources.....	163
Animal Feed.....	163
Beneficial Aspects.....	163
Harmful Aspects.....	164
Nutraceutical Extracts (Dietary Supplements), Functional Foods, and Fortified Foods.....	164
Cosmeceutical Products (Nutritional Cosmetics).....	166
Industrial (Nonedible) Products.....	167
Biodiesel.....	168

THC Contamination of Oilseed Products	168
Agronomy	169
Soil and Fertilization	170
Temperatures	170
Planting	170
Pests	170
Harvest	171
Yields	173
Storage	173
Breeding	173
Cultivars	173
The Potential Use of Oilseed Cultivars to Produce CBD and “Highless Marijuana”	174
Economic Status	174
Market Development and Future Needs	175
Curiosities of Science, Technology, and Human Behavior	176
Chapter 9 Essential Oil	179
Introduction to Essential Oil	179
The Nature of Cannabis Essential Oil	179
Possible Plant-Protective Functions of the Essential Oil of <i>Cannabis</i>	181
Value of Cannabis Terpenoids as Commercial Repellents	181
Medical Significance of Terpenes in <i>Cannabis</i>	181
Why Eliminating Terpenes by Irradiating Medical Marijuana May Be Harmful	182
Evolution of Essential Oil in Domesticated <i>Cannabis</i>	182
Odor and Other Organoleptic Qualities of Marijuana	183
Odor Has Become a Key Selling Criterion for Marijuana	184
The Importance of Terpene Odor for Oilseed <i>Cannabis</i>	184
Odor Detection and Law Enforcement	184
Agronomic Production	186
Commercial Products	186
Regulatory Restrictions	187
Economic Prospects	187
Market Potential for Cannabis Essential Oil	187
Breeding Cultivars for Essential Oil Harvest	188
Breeding Marijuana Strains for Attractive Terpene Profile	188
Curiosities of Science, Technology, and Human Behavior	188
Chapter 10 Minor Uses	191
Biomass	191
Merits of <i>Cannabis sativa</i> as a Source of Biomass	191
Biogas	192
Hemp Solid Fuel	193
Nonseed Use of Hemp as Livestock Feed	193
Ornamental Use	193
Hemp as a Protective Companion Plant	195
Natural Pesticides	195
Hemp Jewelry	195
Hempseed as Fish Bait	196

Hempseed as a Growth Medium for Fungi and Other Microorganisms 196
 Hemp as an Agricultural Pollen Barrier 196
 Edible Shoots (Stems and Foliage)..... 197
 Curiosities of Science, Technology, and Human Behavior 197

Chapter 11 Cannabis Chemistry: Cannabinoids in *Cannabis*, Humans, and Other Species 199

Glandular Trichomes of *Cannabis*: The Plant’s Drug Factories 199
 Cannabinoids in *Cannabis sativa* 204
 Clarification of the Term “Psychoactive” 204
 Clarification of the Term “Drug” 204
 Basic Chemistry of the Cannabinoids 204
 Decrease of Intoxicant Ability by Transformation of THC to CBN 207
 Variation of Cannabinoids among Different Kinds of Cannabis Plants 208
 Conversion of Nonintoxicant CBD to Intoxicant THC in the Laboratory
 and Possibly in the Human Body 209
 Biosynthesis and Genetics of the Cannabinoids of *Cannabis*..... 209
 Quantitative Variation of Cannabinoids in Different Plant Parts 211
 Quantitative Variation of Cannabinoids in Relation to Length of Growth Period... 212
 Quantitative Variation of Cannabinoids in Relation to Environmental Factors 212
 Quantitative Variation of Cannabinoids in Relation to Stress 212
 Quantitative Variation of Cannabinoids in Relation to Chromosome Doubling 213
 Qualitative Variation of Cannabinoids in Relation to Stage of Plant Development... 213
 Qualitative Variation of Cannabinoids in Relation to Environmental Factors 213
 Nature vs. Nurture in the Determination of Cannabinoids of *Cannabis sativa*... 213
 Environmental Factors Influencing the Qualitative Development
 of Cannabinoids..... 214
 Breeding for High and Low Levels of Cannabinoids..... 215
 High-THC Strains..... 215
 Low-THC Cultivars 215
 THC Test Protocols for Industrial Hemp 216
 Informative Online Websites Regarding THC Sampling Procedures for Hemp ... 217
 Adaptive Purpose of the Cannabinoids 217
 Expanded Definitions of Cannabinoids..... 219
 Curiosities of Science, Technology, and Human Behavior 220

Chapter 12 Nonmedical Drug Usage 223

Reliability of Counterculture Information 223
 The Cannabis Experience 223
 Biphasic Effects 223
 Sequence of Psychological Impacts..... 224
 Pleasant Psychological Effects 224
 Unpleasant Psychological Symptoms 225
 Couchlock..... 225
 Physiological Effects 225
 Health Risks 226
 Concern for Mental Status..... 226
 Cannabis Dependence 227
 Cannabis Withdrawal Syndrome 228
 Marijuana as a “Gateway Drug” 229

Concern for Lung Function	229
Societal vs. Individual Health	230
Driving Risks.....	231
Risk of Contamination and Adulteration of Street Marijuana	232
Risk of Exposure to Indoor Grow-Op Environments.....	233
Risk to Dogs	233
The Great Debate: Is Cannabis Relatively Harmful or Benign?.....	234
Representative Viewpoints That Cannabis Is Relatively Harmful.....	235
Representative Viewpoints That Cannabis Is Relatively Benign	236
Global Usage of Marijuana	237
A Brief History of Nonmedical Psychotropic Usage of Cannabis Drugs	237
Modern Spiritual Usage of Cannabis	240
Cannabiphobia and the Cultural War on Marijuana	241
Growing Public Acceptance of Marijuana.....	241
The Genetic “Improvement” of Marijuana Due to Law Enforcement.....	242
Formal Botanical Nomenclature and “Strains” of <i>Cannabis sativa</i>	244
The Evolution of High-THC Strains.....	244
“Sativa Type” and “Indica Type,” the Two Domesticated Kinds of Marijuana Plants...	245
Selection for Color in Marijuana Strains.....	248
Plant Production	250
Distortion of Botanical and Horticultural Terms by the Marijuana Trade	250
Technologies for Preparing Cannabis Drugs	250
Marijuana.....	251
Traditional Hashish	252
Solvent Extracts	255
Advanced Nonsolvent Technologies for Preparing Concentrates of Gland	
Heads	256
Water Extracts (“Teas”).....	259
Technologies for Smoking and Vaping Cannabis Drugs.....	260
Joints and Blunts.....	260
Simple (Nonfiltering) Pipes.....	261
Water Pipes.....	262
Vaporizers.....	263
Dabbing	264
Edible Cannabis	266
Preferred Modes of Marijuana Consumption.....	268
Fake Marijuana.....	269
Ethical Perspectives of Decriminalization and Legalization of Recreational	
Marijuana	269
Curiosities of Science, Technology, and Human Behavior	270

Chapter 13 Medical Marijuana: Theory and Practice 275

Introduction to the Controversy	275
How Medical Does Marijuana Have to Be to Qualify as “Medical Marijuana?” ...	275
Medical Marijuana as a Pretext for Nonmedical Use	276
A Brief History of Medical Usage of Cannabis	277
Noncannabinoid Medicinal Components	280
Bias in Research on Medical Marijuana	281
Bias against Euphoric Medicines	282
The Issue of Addiction	283

The Issue of Incapacitation (Reduction in Abilities) while Intoxicated..... 283

Transfer of Bias against THC to Nonintoxicating Cannabinoids..... 284

The Importance of Experimental Design in Evaluating Medical Marijuana 284

The Precautionary Principle in Relation to Medical Marijuana 284

Recent Authorized Medical Marijuana Production and Usage..... 285

Pharmacological Terminology for Marijuana 286

Comparative Therapeutic Value of Pure Chemicals and Herbal Mixtures 287

Medicinal Importance of Combining THC and CBD..... 288

The Accidental Medicinal Value of Indica Type Strains 289

Overview of Medical Marijuana Preparations 289

Medical Marijuana Drug Delivery Systems..... 292

 Safer Respiratory Systems..... 292

 Conventional Smoking..... 292

 Valsalva Maneuver and Prolonged Breath-Holding 293

 Water Pipes 294

 Vaporization..... 294

 Oral Consumption 295

 Synthetic Oral Cannabis Drugs..... 296

 Dermal and Mucosal Drug Absorption..... 298

THC Dosages, Absorption Rates, and Time Course of Effects 298

 Bioavailability..... 298

 Dosages..... 299

 Pharmacokinetics 299

 Blood Concentrations of THC in Relation to Safe Driving..... 300

The Endocannabinoid System as a Basis for Much of the Medical Value
of Marijuana 300

 Overview of the Endocannabinoid System 300

 Introduction to Cell Receptors and G Protein-Coupled Receptors 302

 Endocannabinoids 303

 Endocannabinoid Receptors 304

 Intercellular Communication Involving Endocannabinoids..... 306

 The Broad Range of Compounds Affecting the Endocannabinoid System 309

 Effects of Cannabinoids on Nonendocannabinoid Physiological Systems 309

 Medical Importance of the Endocannabinoid System 309

 Extensive Activity of the Endocannabinoid System Limits Targeted Therapy... 310

Evolution of the Endocannabinoid System and Potential for Nonhuman
Patients 310

The Endocannabinoid System in Relation to the Lack of Overdose Marijuana
Mortality..... 312

 LD₅₀ (Median Lethal Dose)..... 312

 Therapeutic Index..... 313

 Comparative Overdose Lethality of Cannabis and Other Drugs 313

Cannabinoids as a Possible Basis for Eliminating the Need for Herbal Medical
Marijuana 314

Medical Conditions for Which Cannabis Has or May Have Value..... 314

 Alzheimer’s Disease and Other Forms of Dementia..... 315

 Amyotrophic Lateral Sclerosis (Lou Gehrig’s Disease)..... 316

 Anorexia and Appetite Loss 317

 Arthritis and Rheumatism..... 317

 Brain Injury 318

 Cancer..... 319

Cardiovascular Diseases.....	320
Atherosclerosis.....	321
Hypertension.....	321
Ischemia.....	321
Diabetes.....	321
Epilepsy.....	322
Fibromyalgia.....	323
Gastrointestinal Diseases.....	323
Glaucoma.....	324
Headache.....	325
Migraine.....	325
HIV and AIDS.....	326
Huntington's Disease.....	326
Insomnia.....	326
Liver Disease.....	327
Morning Sickness.....	327
Multiple Sclerosis and Spasticity.....	328
Neurodegenerative Diseases.....	329
Neuropathy.....	330
Obesity.....	331
Osteoporosis.....	332
Pain.....	332
Parkinson's Disease.....	333
Psychiatric Disorders.....	334
Addiction.....	335
Anxiety.....	335
Autism Spectrum Disorder.....	335
Attention Deficit/Hyperactivity Disorder.....	336
Bipolar Disorder.....	336
Depression.....	337
Posttraumatic Stress Disorder.....	337
Schizophrenia.....	337
Skin Conditions.....	338
Acne and Seborrhea.....	338
Alopecia.....	338
Dermatitis.....	339
Hirsutism.....	339
Pruritis.....	339
Psoriasis.....	339
Scleroderma.....	339
Tourette's Syndrome.....	339
Medical Application of Specific Cannabinoids.....	340
Tetrahydrocannabinol.....	340
Cannabidiol.....	341
Arthritis.....	342
Cancer.....	342
Diabetes.....	342
Epilepsy.....	342
Inflammatory Bowel Diseases.....	342
Nausea and Vomiting.....	342

Neurodegenerative Diseases.....	342
Pain.....	342
Psychiatric Disorders.....	343
Cannabinol.....	343
Other Natural Cannabinoids.....	343
Tetrahydrocannabivarin.....	343
Cannabigerol.....	344
Cannabichromene.....	344
Cautions Regarding Medical Marijuana.....	344
Limitations of Expert Medical Guidance in the Use of Medical Marijuana.....	345
Allergies Due to <i>Cannabis sativa</i>	345
Is Marijuana a Bona Fide Medicine? Tentative Conclusions.....	346
Medical-Ethical Perspectives of Legalization of Medical Marijuana.....	349
Curiosities of Science, Technology, and Human Behavior.....	349
Chapter 14 Medical Marijuana: Production.....	351
The Need for High Standards of Professionalism.....	351
Fundamentals of Marijuana Plant Production.....	351
Overview of Production.....	351
Planting Density and Yields.....	353
Indoor Yields.....	353
Outdoor Yields.....	354
Governmental Production Quotas.....	354
Growth Media.....	355
Vegetative Propagation.....	355
Lighting.....	356
Light Intensity.....	356
Light Quality.....	357
Fluorescent Lighting.....	358
High-Pressure Sodium Lighting.....	358
Metal Halide Lighting.....	358
Light-Emitting Diode Lighting.....	358
Recommended Lighting.....	358
Temperature.....	359
Atmospheric Growth Conditions.....	359
Humidity.....	359
Air-Borne Contaminants in Relation to Stickiness.....	360
Carbon Dioxide Concentration.....	360
Insect Control.....	360
Harvest and Drying.....	361
Processing.....	362
Storage.....	362
Quality Control.....	362
Microbiological Safety and Sterilization.....	363
Monitoring and Controlling the Production of Standardized Herbal Marijuana.....	363
Informative Online Documents and Websites Regarding Production of Medical Marijuana.....	364

Security Considerations.....	365
Biotechnological Approaches of Potential Importance to Medicinal Marijuana	366
In Vitro Production.....	366
Genetic Engineering.....	367
Curiosities of Science, Technology, and Human Behavior	367
Chapter 15 The Commercial Marijuana Revolution.....	371
A Sea Change for Better or Worse	371
Commercial Obscuration of the Distinction between Medical and Recreational Marijuana	371
Physician Gatekeepers for Hire to Provide Legal Access to Pseudopatients	372
Prescription Drugs vs. Over-the-Counter Herbals	373
The Evolution of Physician Acceptance of Medical Cannabis	373
Softening of Medical Opposition	373
Medicine by Popular Vote	374
Profit-Driven vs. Health-Driven Medical Marijuana	374
Patient Financial Reimbursement.....	374
Medical vs. Recreational Marijuana Markets	374
The Role of “Big Tobacco”	375
Professional Niches in the Developing Marijuana Business Sector.....	376
Opposition to Commercialization of Recreational Marijuana	377
Medical Opposition to Recreational Marijuana	377
Political Opposition to Recreational Marijuana	378
Badmouthing the Competition	378
Growing Societal Acceptance of Recreational Marijuana.....	378
The Need for Caution in Legitimizing Recreational Marijuana.....	379
Chronic Consumption.....	379
Effects of Increased Availability of Authorized Cannabis.....	380
Effects on Prevalence of Usage	380
Effects on Health	380
Effects on Crime Rate	380
Financial Guestimates of the Potential Monetary Value of Recreational Marijuana	381
Economic Effects of Legitimizing Recreational Marijuana on the Illegitimate Marijuana Industry.....	382
Costs of Production of Marijuana	383
Elementary Business Hazards: Will the “Pot Boom” Become a “Pot Bubble?”	383
Possible Scenarios of Success or Collapse of Sectors of the Marijuana Market	386
Herbal	386
Extracts	386
Why Not Harvest CBD from Hemp?.....	387
Synthetics	387
Genetically Engineered <i>Cannabis sativa</i>	387
Marketplace Constraints Related to “Cheap Highs”	388
Comparative Costs of Pot and Booze	388
Coexistence of Black and White Markets	389
Absence of Foreign Competition for Authorized Marijuana	389
Consumer Trends.....	389
Market Production Models: Big vs. Small-Scale Businesses.....	389

Market Outlet Formats	390
State Monopoly vs. Private Sector.....	390
“Weed Bars”	391
Pot Restaurants	392
Home Delivery (“Weed on Wheels”)	392
Advertising	393
Potency as a Determinant of Sales Restriction	394
The Age of Majority—A Problematical Determinant of Sales and Consumption Restrictions	394
Legal Considerations.....	394
Cautions	394
International Treaties.....	395
Legal Models.....	395
The Netherlands	395
United States.....	396
Uruguay	396
Other Countries	396
Patents	396
Opium Poppy as a Business Model for Marijuana Production	397
Laughing Gas as a Business Model for Marijuana Production.....	400
The Great Irony: From Counterculture Drug to Mass-Marketed Commodity	401
The Cannabis Roads to Heaven and Hell.....	401
The Precautionary Principle in Relation to Commercial Development of Cannabis.....	401
Reasonable Regulatory Risk Management.....	402
Curiosities of Science, Technology, and Human Behavior	402
Chapter 16 Sustainability.....	405
The Reputation of the Cannabis Plant for Sustainability.....	405
How Major Crops Harm the World and Why <i>Cannabis sativa</i> Can Be Beneficial....	405
Comparative Environmental Friendliness of <i>Cannabis sativa</i> and Other Crops ...	406
Biocide Reduction	407
Using Up Surplus Manure.....	408
Miscellaneous Environmental Advantages.....	408
Environmental Disadvantages.....	409
Saving Trees	410
Bioremediation	411
Wildlife Support.....	412
Environmentally Friendly Commercial Products	412
Hemp vs. Cotton.....	412
Recyclability	413
Carbon Sequestering	413
Thermal Insulation Products.....	414
Erosion Control Blankets.....	414
State Subsidization of Industrial Hemp—Good or Bad?.....	415
Environmental Cost of Indoor Production of Marijuana	415
Ecological Damage from Irresponsible Illegal Cultivation of Marijuana.....	416
The Dangerous Concept of Employing Bioweapons to Eliminate Marijuana Plants...	419
Sustainability Depends on Using Sustainable Methods.....	420
Curiosities of Science, Technology, and Human Behavior	420

Chapter 17	Germplasm Resources.....	423
	Definition of Germplasm.....	423
	<i>In Situ</i> vs. <i>Ex Situ</i> Conservation of Wild Germplasm.....	423
	Private Ownership of Germplasm vs. Long-Term Conservation in Public Collections.....	423
	World Gene Bank Situation.....	424
	Seed Storage in Gene Banks.....	426
	Clonal Storage in Gene Banks.....	426
	Cell and Tissue Storage in Gene Banks.....	427
	Core Collections.....	428
	The Importance of N.I. Vavilov.....	428
	Seed Storage Conditions for <i>Cannabis sativa</i>	429
	The Challenge of Preventing Pollen Contamination of <i>Cannabis sativa</i> Germplasm.....	430
	The Shamefully Inadequate State of Germplasm Preservation of <i>Cannabis sativa</i> ...	430
	The Germplasm Importance of Wild-Growing <i>Cannabis sativa</i>	430
	The Germplasm Importance of Landraces of <i>Cannabis sativa</i>	431
	Chinese Germplasm of <i>Cannabis sativa</i>	432
	World Gene Bank Collections of <i>Cannabis sativa</i>	432
	European “National Collections” of <i>Cannabis sativa</i>	432
	The Vavilov Institute Collection.....	432
	The Gatersleben Collection.....	435
	North American Public Germplasm Collections of <i>Cannabis sativa</i>	435
	Germplasm Collections and the Future of Industrial Hemp.....	436
	Germplasm Resources for Fiber.....	436
	Germplasm Resources for Oilseed.....	436
	Germplasm Resources for Essential Oil.....	437
	Germplasm Collections and the Future of Medicinal and Recreational Marijuana ...	437
	Databases.....	438
	Industrial Hemp.....	438
	Medicinal and Recreational Cannabis.....	439
	Guide to the Most Commonly Grown Industrial Hemp Cultivars.....	439
	Curiosities of Science, Technology, and Human Behavior.....	439
Chapter 18	Botanical Classification and Nomenclatural Issues.....	447
	Theoretical Classification Issues.....	447
	Scientific Classifications Often Differ.....	447
	Scientific Names Are Often Ambiguous.....	449
