Preface	xvii
List of Abbreviations	xxix
Acknowledgements	xxxix
CHAPTER 1	
Fundamentals of Artificial Intelligence	
<i>Juan Pavón &amp; María Jesús González-Espejo</i>	1
§1.01 A Brief History of AI	1
§1.02 What Is Artificial Intelligence?	6
§1.03 AI Methods and Techniques	8
[A] Multi-agent Systems (MAS)	9
[B] Knowledge Management	10
[C] Machine Learning	12
[D] Other Approaches	17
§1.04 Conclusions	17
CHAPTER 2	
AI and the Law: Regulating Artificial Intelligence	
<i>Moises Barrio Andres</i>	19
§2.01 Introduction	19
§2.02 National Regulatory Frameworks for AI	19
[A] Europe	20
[B] USA	22
[C] Japan	25
[D] China	26

## Table of Contents

---

§2.03	Concluding Remarks	29
CHAPTER 3		
Ethical and Social Issues in Artificial Intelligence		
<i>Virginia Dignum</i>		
§3.01	Introduction: Responsible AI: What Is It and Why Care	33
§3.02	The Interplay Between AI and Ethics	35
	[A] Ethics in Design	35
	[B] Ethics by Design	37
	[C] Ethics for Design(ers)	41
§3.03	Impact: More than Legal	42
§3.04	Roadmap and Conclusions	43
CHAPTER 4		
AI and Labour and Employment		
<i>Caroline Chetrit &amp; María Jesús González-Espejo</i>		
§4.01	Introduction	45
§4.02	Impact on Employment and the Labour Market	45
	[A] Introduction	45
	[B] Impact of AI on the Job Market: Destruction or Not?	46
	[C] A Polarization of the Work Market Will Come with the 4IR Opportunities and Challenges	49
§4.03	AI Impact on the Employee's Life: Work Relationships, People Management	52
	[A] Are We Heading to an 'Augmented' Human Resources Department?	52
	[B] What Should Be the Role of the Human Resources Departments (HRD)?	54
§4.04	The Impact of AI in Labour Law and Practice	54
	[A] Recruitment	55
	[B] Employment Execution	56
	[C] Employment Termination	58
	[D] AI Impact on Labour Law Advice	59
§4.05	Challenges for the Welfare System and Social Partners	60
	[A] The Impact on Social Security Systems	61
	[1] Sustainability of the Funding of the Social Security System and Social Protection of the New Workers	61
	[2] AI Applications Used by Social Security Systems	62
	[B] Role of the Labour Unions as AI Emerges	63
§4.06	Conclusion	65
CHAPTER 5		
AI and Taxation		
<i>María Jesús González-Espejo &amp; Javier Martín Fernández</i>		
§5.01	Introduction	67

---

§5.02	AI as a Support Tool for Tax Advisers	69
§5.03	AI as a Support Tool for Tax Control	70
§5.04	A Case in Point: AVIVA, the Spanish National Tax Agency's VAT Chatbot	74
§5.05	Taxation Challenges Regarding Robotization	75
§5.06	Conclusions	77
CHAPTER 6		
AI and Competition		
<i>Bárbara Román &amp; Julia Suderow</i>		
§6.01	Introduction	79
§6.02	AI and Multilateral Anticompetitive Conduct	81
§6.03	AI and Unilateral Conducts	86
§6.04	Antitrust by Design and Awareness	88
CHAPTER 7		
AI and Intellectual Property		
<i>Caroline Chetrit</i>		
§7.01	Introduction	91
§7.02	Protecting AI: Is the Existing System Adequate and Effective?	93
	[A] Patents or Copyright & Software	94
	[B] Copyright and Algorithms (or Trade Secret Protection)	95
	[C] Copyright and Databases	97
	[D] Trademarks and Industrial Design	98
	[E] Conclusion	98
§7.03	AI Creations and Inventions: Challenging Copyright and Patent	98
	[A] Introduction	98
	[B] AI-Created Works and Copyright	100
	[C] The Protection of AI Works: The Patent	106
§7.04	Conclusions	108
CHAPTER 8		
Legal Responsibility of Intelligent Systems		
<i>Grzegorz J. Nalepa &amp; Michał Araszkiwicz</i>		
§8.01	Introduction	109
§8.02	Distinctive Features of AI-Based Computer Systems	109
§8.03	Legally Challenging Applications of Intelligent Systems	112
§8.04	Design of Intelligent Systems and Its Role in the Legal Analysis	114
§8.05	Legal-Philosophical Outlook on the Problem of Liability Regulation	
	Design of Intelligent Systems	116
§8.06	AI and the Types of Legal Liability	121
§8.07	The Impact of Explainability	124
§8.08	Conclusions	126

## Table of Contents

---

### CHAPTER 9

#### AI and Cybersecurity

*Ignacio Arnaldo*

		127
§9.01	Introduction	127
§9.02	Cybersecurity Primer	128
	[A] Threat Actors	128
	[B] Common Threats	130
	[1] Social Engineering Attacks	130
	[2] Malware (malicious software) and Malware Distribution Networks	131
	[3] Vulnerability Exploits	131
	[C] Targeted Attacks	131
§9.03	Defensive Strategies	133
	[A] Common Security Solutions	133
	[B] Security Operation Centres	134
§9.04	Applications of AI in Cybersecurity	134
	[A] Threat Detection	135
	[1] Malware: File Analysis	135
	[2] The Malicious Domain or URL Detection Problem	136
	[3] Behavioural Analytics	137
	[B] Improving the Efficiency of Cybersecurity Professionals	137
	[C] Offensive AI	139
§9.05	Conclusions	140

### CHAPTER 10

#### AI and Data Protection

*Paloma Aparicio*

		141
§10.01	Introduction	141
§10.02	Data-Driven AI	142
	[A] Data Related to Individuals	143
	[B] Right for Protection	145
	[C] Data Legitimation	147
	[D] Profiling and Automated Decisions	148
	[E] Other Data Challenges	150
§10.03	Roadmap and Conclusions	152

### CHAPTER 11

#### Artificial Intelligence in the Judicial

*María Jesús González-Espejo*

		153
§11.01	The Application of AI in the Judicial Field	153
§11.02	The Main Issues Regarding AI Use in Judicial Systems	157
§11.03	Robot, Judges and Robot Judges	160
§11.04	The Impact of Open Data Regarding Judicial Decisions in AI Development	162

---

§11.05	The French Case: A Veto to Predicting Case Law Tools to Protect Judges' Freedom of Decision	164
§11.06	The PSA: AI Assisting Judges in Their Pretrial Decisions	165
§11.07	Ethics Applied to AI in Judicial Systems	167
§11.08	The Loomis Case: AI's Black-Box and Its Effects in Judicial Application	168
§11.09	Conclusions	169
CHAPTER 12		
Final Conclusions		
	<i>María Jesús González-Espejo &amp; Juan Pavón</i>	171
	An Interview With	179
	Selected Bibliography	197
	Index	201
