CONTENTS

PART I ELECTROPHILIC AROMATIC SULFONATION AND RELATED REACTIONS

1. ELECTROPHILIC SULFONATING REAGENTS	1
I. Sulfur Trioxide	1
II. Sulfuric Acid	2
A. 100% Sulfuric Acid	2
B. Aqueous Sulfuric Acid	2
C. Fuming Sulfuric Acid	4
III. Halosulfonic Acids	5
IV. Sulfur Trioxide Addition Compounds	6
V. Miscellaneous Reagents	7
References	8
2. THE MECHANISM OF ELECTROPHILIC AROMATIC SULFONATION	13
I. Sulfonation with Sulfur Trioxide	13
A. Mechanism	13
B. Orientation and Reactivity	20
II. Sulfonation with Concentrated Aqueous Sulfuric Acid .	20
A. Kinetics and Mechanism	20
B. Substituent Effects	26
III. Sulfonation with Fuming Sulfuric Acid	31
A. Kinetics and Mechanism	31
B. Substituent Effects	37
1. Mercury Catalysis	37
IV. Sulfonation with Halosulfonic Acids	39
A. Chlorosulfonic Acid	39
B. Fluorosulfonic Acid	41
References	41
3. SULFONATION OF MONOCYCLIC AROMATIC HYDRO- CARBONS	47
I. Benzene	51
II. Monoalkylbenzenes	51
III. Polyalkylbenzenes	54
A. Reactivities	56
IV. Miscellaneous Hydrocarbons	58
References	58

4. SULFONATION OF POLYCYCLIC AROMATIC HYDRO-CARBONS	63
I. Theoretical Considerations; Reactivity and Orientation.	63
II. Complications in Sulfonation	67
III. Fused Polycyclic Hydrocarbons	68
A. Naphthalene and Alkyl Derivatives	68
B. Orientation in Monosubstituted Naphthalene Derivatives	70
1. 1-Substituted Naphthalene Derivatives	70
2. 2-Substituted Naphthalene Derivatives	70
3. Comparison with Theoretical Predictions	72
C. Anthracene	72
D. Phenanthrene	73
E. Other Fused Polycyclic Hydrocarbons	74
IV. Biphenyl and Related Compounds	74
A. Structural Considerations	74
B. Bi- and Polyphenyls	76
C. 2,2'-Bridged Biphenyl Derivatives	78
V. Miscellaneous Polycyclic Hydrocarbons	78
A. Azulene	78
B. Ferrocene and Related Compounds	79
References	79
5. SULFONATION OF AROMATIC HALOGEN COMPOUNDS	87
I. Halogenbenzenes	87
A. Fluorobenzenes	89
B. Chlorobenzenes	89
C. Bromo- and Iodobenzenes	91
II. Polycyclic Aromatic Halogen Compounds	91
References	92
6. SULFONATION OF PHENOLIC COMPOUNDS AND AROMATIC CARBOXYLIC ACIDS	95
I. Phenolic and Related Compounds	95
A. Sulfation	95
B. Carbon Ring Sulfonation	96
1. Phenols and Aromatic Ethers	96
2. Naphthols	97
II. Aromatic Carboxylic Acids and Anhydrides	100
A. Reactions with Sulfuric Acid	100
1. Benzoic Acid, Naphthoic Acids, and Derivatives	100
2. ω -Phenylalkanoic Acids	102
B. Sulfur Trioxide Sulfonation	102
References	102

7. SULFONATION OF AROMATIC AMINES	107
I. Sulfur Trioxide Complex Formation	107
II. Sulfamation	108
III. Ring Sulfonation	108
A. Chlorosulfonation	108
B. The Baking Process	109
C. Sulfuric Acid Sulfonation of Monocyclic Amines . .	113
1. Primary Amines	113
2. Secondary Amines	113
3. Tertiary Amines	113
4. Quaternary Ammonium Ions	114
D. Sulfuric Acid Sulfonation of Fused Polycyclic Amines	114
References	115
8. SULFONATION OF AROMATIC CARBONYL COMPOUNDS	121
I. Sulfuric Acid Sulfonation.	121
II. Sulfonation under Aprotic Conditions.	124
A. Reactions with Sulfur Trioxide	124
B. Sulfonation with Sulfur Trioxide-Addition Compounds	124
References	126
9. SULFONATION OF AROMATIC SULFONIC ACIDS, SULFONES, AND NITRO COMPOUNDS	129
I. Arylsulfonic Acids	129
A. Monocyclic Sulfonic Acids	129
B. Polycyclic Sulfonic Acids	131
II. Aromatic Sulfones and Arylsulfonyl Halides	132
III. Aromatic Nitro Compounds	132
A. Monocyclic Nitro Compounds	133
B. Polycyclic Nitro Compounds	134
References	134
10. SULFONATION OF HETEROCYCLIC AROMATIC COMPOUNDS	137
I. Nitrogen Heteroaromatic Compounds with a Six- Membered Ring	140
A. Pyridine	141
1. Comparison with Predicted Substitution Patterns	144
2. Bipyridyls	146
B. Quinoline and Isoquinoline	146
1. Comparison with the Theoretically Predicted Substitution Patterns	149

C. Di- and Triazines	149
D. Polycyclic Compounds	150
II. Nitrogen Heteroaromatic Compounds with a Five-Membered Ring	151
A. Pyrrole	151
B. Indole	154
C. Pyrazole and Indazole	154
D. Imidazole and Benzimidazole	155
III. Heteroaromatic Compounds Containing Oxygen	157
A. Furan and Benzofuran	157
B. Pyrones, Coumarine, and Chromone	158
IV. Heteroaromatics Containing Sulfur and Selenium	162
A. Thiophene and Benzo[b]thiophene	162
B. Selenophene	163
V. Heteroaromatic Compounds Containing Two Types of Heteroatoms	166
A. Heteroaromatics Containing Nitrogen and Oxygen	166
B. Heteroaromatics Containing Nitrogen and Sulfur or Selenium	167
VI. 2,2'-Heteroatom Bridged Biphenyls	167
A. Carbazole	169
B. Dibenzofuran	169
C. Dibenzothiophene	170
References	170
11. ELECTROPHILIC REPLACEMENT OF SUBSTITUENTS OTHER THAN HYDROGEN BY SULFO GROUPS	181
References	182
12. ELECTROPHILIC AROMATIC DESULFONATION AND DESULFONYLATION	185
I. Protodesulfonation	185
A. Ionization of Arylsulfonic Acids	185
B. Kinetics and Mechanism of Protodesulfonation	187
C. Benzenesulfonic Acid and Derivatives	192
D. Polycyclic Aromatic Sulfonic Acids	194
E. Heteroaromatic Sulfonic Acids	195
II. Halodesulfonation	195
III. Nitrodesulfonation	199
IV. Miscellaneous Electrophilic Desulfonation	200
V. Electrophilic Desulfonylation	200
References	201

13. ISOMERIZATION OF AROMATIC SULFO COMPOUNDS, AND RELATED REACTIONS	205
I. Isomerization through Migration of the Sulfo Group . .	205
A. Arylsulfonic Acids	205
1. Arylsulfonate Salts	210
B. Arylsulfamic Acid and Diarylsulfamides	210
C. Aromatic Sulfones	211
II. Intermolecular Sulfo Migration	212
III. Isomerization through Alkyl Migration	214
IV. The Jacobsen Reaction	214
A. Polyalkylbenzenes	214
B. Halogenbenzenes and Halogenalkylbenzenes	221
References	226

PART II NUCLEOPHILIC AROMATIC SULFONATION AND DESULFONATION

14. NUCLEOPHILIC AROMATIC SULFONATION	235
I. Sulfodehalogenation	235
II. Sulfonic Acids from Bisulfite Reactions via Intra- molecular Oxidation-Reduction	237
A. Nitro Compounds (Piria Reaction)	237
B. Hydroxynitroso Compounds	241
C. Hydroxyazo Compounds	245
D. Quinones	246
III. Bucherer and Related Reactions	248
IV. Miscellaneous Reactions	251
References	252
15. NUCLEOPHILIC AROMATIC DESULFONATION AND DESULFONYLATION	257
I. Nucleophilic Desulfonation	257
A. Hydroxydesulfonation	257
B. Aminodesulfonation and Related Reactions	259
II. Nucleophilic Desulfonylation	260
A. The Smiles Rearrangement	262
References	274
