Relational Symplectic Groupoids and Poisson Sigma Models with Boundary

Dissertation

zur

Erlangung der naturwissenschaftlichen Doktorwürde
(Dr. sc. nat.)

vorgelegt der

Mathematisch-naturwissenschaftlichen Fakultät

der

Universität Zürich

von

Iván Guillermo Contreras Palacios

aus

Kolumbien

Promotionskomitee

Prof. Dr. Alberto Cattaneo, Vorsitz
Prof. Dr. Giovanni Felder
Prof. Dr. Thomas Kappeler

Zürich, 2013

Contents

1 Introduction 8
- 1.1 Conventions and notations . . . 8
- 1.2 Motivation . . . 9
- 1.3 Summary of the main results . . . 14
- 1.4 Structure of the thesis . . . 17

2 Symplectic groupoids 18
- 2.1 Symplectic linear algebra . . . 18
  - 2.1.1 Definitions . . . 18
  - 2.1.2 Symplectic reduction . . . 20
  - 2.1.3 Canonical relations . . . 22
- 2.2 Poisson algebras and Poisson manifolds . . . 26
- 2.3 The extended symplectic category . . . 28
  - 2.3.1 Possible alternatives . . . 30
- 2.4 Lie groupoids and symplectic structures . . . 32
  - 2.4.1 Examples of Lie groupoids . . . 32
- 2.5 Lie algebroids . . . 35
  - 2.5.1 Examples . . . 35
  - 2.5.2 Lie algebroid of a Lie groupoid . . . 36
- 2.6 Integrability of Lie algebroids . . . 37
  - 2.6.1 Obstruction for integrability . . . 40
  - 2.6.2 The Poisson case . . . 42

3 Poisson sigma models and the main construction 43
- 3.1 PSM and its phase space . . . 44
- 3.2 Symplectic reduction . . . 47
- 3.3 Relational symplectic groupoids . . . 48
  - 3.3.1 Poisson structure on M . . . 58
  - 3.3.2 The categroid RSGpd . . . 60
- 3.4 Examples of relational symplectic groupoids . . . 62

3.4.1 Symplectic groupoids 62
3.4.2 Symplectic manifolds with a Lagrangian submanifold 63
3.4.3 Powers of symplectic groupoids 64
3.5 The main example: $T^*(PM)$ 65
3.5.1 Smoothness of L_i 69
3.5.2 Lagrangianity of L_i 80
3.6 Relational symplectic groupoids for Poisson manifolds 82
3.6.1 The zero Poisson case 82
3.6.2 The symplectic case 85
3.6.3 The constant case 86
3.6.4 The linear case 87
3.6.5 A non integrable example 89
3.6.6 A non regular example 91
3.7 The extension to the Fréchet category 93

4 Categorical and algebraic features **99**
4.1 Weak monoids 99
4.2 Weak *-monoids 100
4.3 Cyclic weak *-monoids 102
4.4 Frobenius and H*-algebras 103
4.5 Groupoids and relative Frobenius algebras 103
4.5.1 From relative Frobenius algebras to groupoids 104
4.5.2 From groupoids to relative Frobenius algebras 107
4.5.3 Functoriality 109
4.6 Relative H^*- algebras and semigroupoids 112
4.6.1 From relative H^*- algebras to semigroupoids 112
4.6.2 From semigroupoids to relative H^*- algebras 113
4.6.3 Functoriality 114
4.6.4 Semigroupoids Vs groupoids: reduction 115
4.7 Extensions and perspectives 115
4.7.1 Quantization 116
4.7.2 Possible extensions 117
4.7.3 The presence of handles 118

A Dirac structures **120**
A.1 Definitions and examples 120
A.2 Morphisms of Dirac manifolds 122

References **122**
