

**Novel Aromatics with Corannulene as a Triad  
Building Block, Starburst Core or Polymer End-  
Capping Unit: Synthesis and Properties**

**Dissertation**

zur

Erlangung der naturwissenschaftlichen Doktorwürde

(Dr. sc. nat.)

vorgelegt der

Mathematisch-naturwissenschaftlichen Fakultät

der

Universität Zürich

von

**Daphne Diemer**

aus

Deutschland

Promotionskomitee:

Prof. Dr. Jay S. Siegel (Vorsitz)

Prof. Dr. Kim Baldrige

Prof. Dr. Karl-Heinz Ernst

Prof. Dr. Roland K.O. Sigel

Zürich, 2015

# Table of Contents

<b>TABLE OF CONTENTS</b> .....	<b>XXIV</b>
<b>I INTRODUCTION</b> .....	<b>18</b>
1.1 CORANNULENE – AN INTRODUCTION.....	18
1.1.2 <i>Synthesis and functionalization possibilities</i> .....	20
1.2 A COMPARISON WITH ANALOGUES .....	27
1.3 PROSPECTIVE PROPERTIES AND APPLICATIONS AS MATERIAL .....	29
<b>II OBJECTIVES AND MOTIVATION</b> .....	<b>33</b>
<b>III.1 CORANNULENE AS A TRIAD BUILDING BLOCK</b> .....	<b>35</b>
III.1.1 INTRODUCTION .....	35
III.1.2 SYNTHESIS OF DI-SUBSTITUTED CORANNULENYL-TRIAD COMPOUNDS .....	38
III.1.3 ANALYSIS AND CHARACTERIZATION .....	42
III.1.4 OPTICAL AND ELECTROCHEMICAL CHARACTERIZATION OF THE TRIADS.....	48
<b>III.2 CORANNULENE AS A STARBURST CORE</b> .....	<b>56</b>
III.2.1 INTRODUCTION .....	56
III.2.2 SYNTHESIS OF PENTA-SUBSTITUTED AND MONO-SUBSTITUTED STARBURST STRUCTURES.....	59
III.2.2.1 <i>Synthetic Approach for Penta-Substituted Starbursts</i> .....	59
III.2.2.2 SYNTHESIS OF PENTA-SUBSTITUTED CORANNULENE STARBURSTS.....	62
III.2.2.3 SYNTHESIS OF MONO-SUBSTITUTED ANALOGUES .....	65
III.2.3 ANALYSIS AND CHARACTERIZATION .....	67
III.2.4 OPTICAL AND ELECTROCHEMICAL CHARACTERIZATION OF PENTA-SUBSTITUTED AND MONO-SUBSTITUTED STARBURST STRUCTURES.....	71
<b>III.3 CORANNULENE AS A POLYMER END-CAPPING UNIT</b> .....	<b>81</b>
III.3.1 INTRODUCTION .....	81
III.3.2 SYNTHESIS OF POLYMERIC CORANNULENE.....	84
III.3.3 ANALYSIS AND CHARACTERIZATION .....	88
III.3.4 OPTICAL AND ELECTROCHEMICAL CHARACTERIZATION OF POLYMER END-CAPPING UNIT CORANNULENE .....	92
<b>IV SUMMARY OF THE PROJECTS</b> .....	<b>100</b>
<b>V OUTLOOK</b> .....	<b>102</b>
<b>VI EXPERIMENTAL PART</b> .....	<b>105</b>
VI.1 GENERAL METHODS: .....	105
VI.1.1 <i>Chemicals:</i> .....	105
VI.1.2 <i>Column Chromatography:</i> .....	105
VI.1.3 <i>Inert atmosphere</i> .....	105
VI.2 ANALYTICA TECHNIQUES.....	106
VI.2.1 <i>Cyclovoltammetry (CV):</i> .....	106
VI.2.2 <i>UVVis-Spectrometry:</i> .....	106
VI.2.3 <i>Flurimeter Measurements:</i> .....	106
VI.2.4 <i>NMR Instruments:</i> .....	107

VI.2.5 Mass Spectrometry:.....	107
VI.3 SYNTHETIC PROCEDURES: .....	108
VI.3.1 General Procedure for Boronic Ester of 75-79: .....	108
VI.3.2 General Procedure for Corannulene as a Triad Building Block (48, 51-54) .....	111
VI.3.3 1,6-Dimethyl-7,10-diethylfluoranthene (58) .....	115
VI.3.4 1,6-bis(dibromomethyl)-7,10-bis(1-bromoethyl)-fluoranthene (Mix of diastereomers) (59).....	116
VI.3.5 Synthesis of 1,6-dibromo-2,5-dimethylcorannulene (60).....	117
VI.3.6 Synthesis of 1,6-di-(bispinacolatoborato)-2,5-dimethylcorannulene (72) 118	
VI.3.7 Synthesis of 3-Decylthiophene (90).....	119
VI.3.8 Synthesis of 2-Bromo-3-decylthiophene (91).....	120
VI.3.9 Synthesis of 2-stannyl-3-decylthiophene (92) .....	121
VI.3.10 Synthesis of bis-3-decylthiophene-(2,2`-bithiophene) (94).....	122
VI.3.11 Synthesis of 5-trimethylsilyl-[ bis-3-decylthiophene-(2,2`-bithio- phene)] (101).....	123
VI.3.12 Synthesis of 5-corannenyl-[bis-3-decylthiophene-2,2`-bithiophene)] (104) .....	124
VI.3.13 Synthesis of 2-stannyl-3-hexylthiophene (99) .....	125
VI.3.14 Synthesis of 2-corannenyl-3-hexylthiophene (103).....	126
VI.3.15 Synthesis of 2-stannyl-3-hexyl-5-phenyl-thiophene (100).....	127
VI.3.16 Synthesis of 2-corannulyl-3-hexyl-5-phenyl-thiophene (102).....	128
VI.3.17 Synthesis of 2-Phenyl-3-hexyl-thiophene (88) .....	129
VI.3.18 Synthesis of 2-Bromo-4-hexyl-5-phenylthiophene (83).....	130
VI.3.19 Synthesis of 2-corannylene-3-hexyl-thiophene (89).....	131
VI.3.20 Synthesis of 2-bromo-4-hexyl-5- corannylene -thiophene) (85) .....	132
VI.3.21 Synthesis of 5-monobromo-[ bis-3-decylthiophene-(2,2`-bithio- phene)] (84).....	133
VI.3.22 Synthesis of 5,5` -dibromo-[ bis-3-decylthiophene-(2,2`-bithio- phene)] (94).....	134
VI.3.23 Synthesis of sym-pentakis(Bpin)corannulene (33).....	135
VI.3.24 Synthesis of sym-penta-2-(3-hexyl-thiophene)-corannulene (95) .....	136
VI.3.25 Synthesis of sym-penta-2-(3-hexyl-5-phenylthiophene)-corannulene (96) .....	137
VI.3.26 Synthesis of sym-penta-2-(3-hexyl-5-corannenyl-thiophene)-corannulene (98).....	139

<i>VI.3.27 Synthesis of Penta-sym-[ bis-3-decylthiophene-(2,2'-bithiophene)]-corannulene (97)</i> .....	140
<i>VI.3.28 Synthesis of Monohalo-corannulene (57, 115)</i> .....	141
<i>VI.3.29 Synthesis of Mono-methyl-corannulene (116)</i> .....	143
<i>VI.3.30 Synthesis of Monobromomethylene-corannulene (117)</i> .....	144
<i>VI.3.31 Synthesis of Pentakis-(trimethylsilylacetylene)-corannulene</i> .....	145
<i>VI.3.32 Synthesis of Mono-ethynyl endcapped P3HT (114)</i> .....	146
<i>VI.3.33 Synthesis of Monocapped coranneryl P3HT (108)</i> .....	147
<i>VI.3.34 Synthesis of di-capped benzyl P3HT (111)</i> .....	148
<i>VI.3.35 Synthesis of Di-capped Phenyl P3HT (110)</i> .....	149
<i>VI.3.36 Synthesis of di-capped corannulene P3HT (107)</i> .....	150
<i>VI.3.37 Synthesis of P3HT (109)</i> .....	151
<b>VII REFERENCES</b> .....	<b>152</b>
<b>A CURRICULUM VITAE</b> .....	<b>156</b>

## List of Figures

I-1	Corannulene [5]-circulene ( <i>l.</i> ) and buckminsterfullerene (C <sub>60</sub> ) ( <i>r.</i> )	18
I-2	Polar aromatic resonance structure of corannulene	18
I-3	Definition A) of four different binding C-C-atoms B) of bowl depth of corannulene	19
I-4:	First starting molecules for failed corannulene synthesis	20
I-5	Graphene sheet with emphasized patterns of fullerene, nanotube and graphite taken from	27
I-6	Curved polyaromatic hydrocarbons (sumanene <b>34</b> , ring structure <b>35</b> , canastane <b>36</b> and pleidannulene <b>37</b> )	28
I-7	Crystal packing; A) Packing of molecules of trifluoromethylated corannulene, B) Packing of 1,2,5,6-tetrakis(3,5-dimethylphenylethynyl)-corannulene; C) Packing of 1,3,5,7,9-pentakis(3,5-dimethylphenylethynyl)-corannulene; D) Packing of tridentate	29
I-8	1,2-bis(corannulenylethynyl)benzene <b>38</b> and 1,4-bis(corannulenylethynyl)benzene <b>39</b> as blue corannulene emitters	30
I-9	left: Structure of the buckycatcher <b>40</b> ; right: crystal complex <b>40</b> with C <sub>60</sub>	31
I-10	Direct complexation of C <sub>60</sub> and corannulene on a Cu(110) surface	31
I-11	Exapmles of corannulene acceptors	32
III-1	Examples of small molecule used as OLEDs (mCP <b>43</b> , TmPyPB <b>44</b> and Ir(mppy) <sub>3</sub> <b>45</b> )	35
III-2	a) Chemical structure of 1,6-diphenylethynyl-2,5-dimethylcorannulene <b>46</b> and 2,7-diphenylethynly-fluorene <b>47</b> ; b) HOMOs of <b>46</b> ( <i>left</i> ) and <b>47</b> ( <i>right</i> ), c) target triad corannulene structure with corannulene as outer building blocks	36
III-3	2,7-dipyrenyl-9-(2-ethylhexyl)carbazole <b>55</b> and 2,7-dipyrenyl-9,9-dihexylfluorene <b>56</b>	37
III-4	Overview of all triad structures: 1,6-dicorannenyl-2,5-dimethylcorannulene <b>48</b> , 2,7-dicorannenyl-9,9'-octyl-fluorene <b>50</b> , 2,7-dicorannenyl-9H-hexyl-carbazole	

	51, 3,7-dicorannanyl-dibenzothiophene 52, 3,7-dicorannanyl-S,S'-dioxide-dibenzothiophene 53, 3,7-dicorannanyl-dibenzofuran 54	37
III-5	Dendritic Structures in nature such as nerv cells, lungs (human lung) and broccoli plant	56
III-6	Dendrimer generation, comparison of divergent and convergent method (source: internet)	56
III-7:	Pentagonal starburst corannulene ( <i>sym</i> -pentaphenyl-corannulene)	57
III-8	List of thiophene-branches (2-bromo-3-hexyl-thiophene 82, 2-bromo-3-hexyl-5-phenyl-thiophene 83, 5-bromo-[bis-3-decylthiophene-/2,2'-bithiophene]) 84, 2-bromo-3-hexyl-5-corannylene-thiophene 85	63
III-9	Overview of starburst corannulenes (95, 96, 97 and 98)	64
III-10	Thiophene-branches for mono-substituted corannulene	65
III-11	Molecular Structure of some first and second generation of semiconducting polymers	81
III-12	Comparison of regioirregular and regioregular polymerization of P3HT	82
III-13	Bulk heterojunction solar cell (BHJ) ( <i>left</i> ), P3HT and PCBM (p-type material and n-type material ( <i>right</i> ))	83
III-14:	All polymers (n= 14-20): corannulene di-capped P3HT 107; corannulene mono-capped P3HT via an acetylene bridge 108; plain P3HT 109; phenyl di-capped P3HT 110, benzyl di-capped P3HT 111	85
V.1	Tapping mode AFM images of the surface of films of A-B) 107 and C) P3HT copied	102
V.2:	Fibonacci route ( <i>top</i> ) on corannulene and possible target molecules ( <i>down</i> )	103
V.3	Target molecules consisting of corannulene as the main builing block; the upper calculated molecules (blue), below respectively target structures	104

## List of Tables

III-1	Photophysical data of triad structures in chloroform	49
III-2	Photophysical data of triad structures in toluene	49
III-3	Correlation between phosphorescence lifetime, fluorescence lifetime and fluorescence quantum yields	52
III-4	Calculated first reduction potential (B97D/Def2-TZVPP $E^\circ = -\Delta G/nF + E_{\text{ref}}$ reduction potentials, <sup>1</sup> n=1, F=1 eV, <sup>2</sup> Corrected to the Ag/AgCl electrode, -4.52) and measured first reduction potential (Ag/AgCl-electrode as reference, carbon as counter electrode and platinum as working electrode, scan rate 0.1 s <sup>-1</sup> )	55
III-5	Overview of different metal-coupling reaction trials with <b>32</b> to obtain <b>81</b> ; SM = starting material ( <b>32</b> ), C <sub>20</sub> = <b>1</b> , dicoupled (bithiophene side-product), mono-sub = mono-thiophene corannulene, chloro/thio-sub. = mixture of different substitutions containing chloro- or thiophenyl- units	60
III-6	Photophysical data of starburst structures in chloroform (10 <sup>-5</sup> – 10 <sup>-7</sup> M)	72
III-7	Photophysical data of starburst structures in toluene (10 <sup>-5</sup> – 10 <sup>-7</sup> M)	72
III-8	Correlation between fluorescence lifetime and phosphorescence lifetime of starburst structures	77
III-9	Electrochemical study - Measured first reduction potential (Ag/AgCl-electrode as reference, carbon as counter electrode and Pt as working electrode, scan rate 0.1 s <sup>-1</sup> ) with reference to corannulene <b>1</b>	79
III-10	Data in chloroform for polymer recorded in concentration 10 <sup>-5</sup> -10 <sup>-7</sup> M	92
III-11	Data in toluene for polymer recorded in concentration 10 <sup>-5</sup> -10 <sup>-7</sup> M	92
III-12	Electrochemical band-gaps for polymers measured in THF (distilled); Ag+/AgCl-electrode as reference, Platinum-electrode as working electrode and carbon-electrode as counter-electrode, scan rate 0.4 s <sup>-1</sup>	99
