National Bureau of Soil Survey and Land Use Planning
(Indian Council of Agricultural Research)
Amravati Road, Nagpur-440033, Maharashtra, India

Contents

Introduction		
A.	Administrative Setup and People	1
	• Administrative Divisions	3
	• Population	5
B.	The Land, Water and Climate Features	7
	• Geology	9
	• Relief	11
	• Slope	13
	• Physiography	15
	• Forest and Vegetation	19
	• Land Use	21
	• Natural Resource Degradation Index	25
	• Climate	27
	• Ground Water Development	29
	• Irrigation Status	31
	• Irrigation Intensity	33
	• Gross Irrigated to Gross Sown Area	35
C.	Socio Economic Status	37
	• Per Capita net Income	39
	• Human Poverty Index and Human Development Index	41
D.	Soils and Interpretative Maps	43
	• Soil Classification	45
	• Soil Depth	47
	• Surface Texture	49
	• Calcareousness	51
	• Surface Stoniness	53
	• Soil Drainage	55
	• Soil Reaction (pH)	57

• Soil Erosion	59
• Organic Carbon	61
• Fertility Status	63
• Nitrogen Status	65
• Soil Fertility Imbalance	67
E. Agriculture and Livestock Status	69
• Cropping Pattern	71
• Cropping Intensity	73
• Vegetable Crops	75
• Fruit Crops	77
• Per Capita Cultivable and Net Sown Area	79
• Nutrient Consumption	81
• Productivity of Crops	83
• Compound Growth Rate of Cereals and Pulses	85
• Livestock Population	97
• Livestock and Health Management in Drought	99
• Fisheries	104
• Poultry	111
F. Crop Suitability	117
• Soil Suitability Criteria	119
• Suitability for Cotton	121
• Suitability for Citrus	123
G. Important Issues	125
• Low Cost Agro-technology for Important Cropping Systems	127
• Land Use Planning	133
• Crop Management Strategies in Rainfall Aberration	138
H. Appendix	141
• Soil Database	143
