THE CAMBRIDGE HISTORY OF SCIENCE

volume 8

Modern Science in National, Transnational, and Global Context

> *Edited by* HUGH RICHARD SLOTTEN RONALD L. NUMBERS DAVID N. LIVINGSTONE

CONTENTS

	Notes on Contributors	<i>page</i> xiv
	General Editors' Preface	xxv
I	Introduction HUGH RICHARD SLOTTEN	I
PA	RT I TRANSNATIONAL, INTERNATIONAL, AND GLOBAL	7
2	Science and Imperialism since 1870 PRATIK CHAKRABARTI AND MICHAEL WORBOYS	9
	Imperialism Science and "Constructive" Imperialism, 1970, 101 (12
	Science and "Constructive" Imperialism, 1870–1914 The New Colonialism, 1918–1945	14
	Development and Welfare, 1945–2000	20 26
	Conclusion	30
3	The Geomagnetic Project: Internationalism in Science Bet	ween
J	the French Revolution and the Franco-Prussian War NICOLAAS A. RUPKE	32
	The Humboldtians and Terrestrial Magnetism	33
	The Royal Society and Sabine	35
	Internationalism as a Negotiated Process	38
4	International Science from the Franco-Prussian War to	
•	World War Two: An Era of Organization	43
	BRIGITTE SCHROEDER-GUDEHUS	
	International Science as Practice and Ideology	44
	Congresses and Associations	45
	An Era of Organization	47
	Sobering Insights	48
	Community and Competition	50

vi	Contents	
	Getting Tough in International Science	52
	Sizing Up the Era of Organization	54
5	Internationalism in Science after 1940	60
	RONALD E. DOEL World War II and the Early Cold War: 1940–57 Refining the Bipolar World: International Science in the <i>Sputnik</i> Era Crumbling Bipolarity: Internationalism at the End of the Twentieth	61 66
	Century and Beyond	69
	Conclusion	73
6	International Science in Antarctica	75
	Coastal Encounters	76
	Territorial Ambition	78
	Scientific Internationalism	80
	Post-IGY Science	83
	Antarctica's Future	87
7	Missionary Science JOHN STENHOUSE	90
	Early Protestant Missionary Science	91
	The Scope of Missionary Science	93
	Theology and Missionary Science	97
	Spreading Science	98
	Controversy and Conflict	99
