5.1	Jewish evasion in Almelo and Borne	86
5.2	Percentage of matches per overlap score	90
5.3	County-level deportation rates according to manual and automatic matching	91
5.4	Example buffer: Vriezenveen and Tubbergen	93
5.5	The change in predicted probability of evasion with 90 percent confidence intervals as Catholic proximity moves from its minimum to its maximum value conditional on Catholic strength in region using 2-km buffer. Point	

	estimates are represented by points with 90 percent confidence intervals	96
5.6	The change in predicted probability of evasion with 90 percent confidence intervals as Catholic proximity moves from its minimum to its maximum value conditional on Catholic strength in region using different buffers. Point estimates are represented by points with 90 percent confidence intervals	98
5.7	The change in predicted probability of evasion as Orthodox Protestant proximity moves from its minimum to its maximum value. Point estimates are represented by points with 90 percent confidence intervals	99
5.A1	Catholic strength of Dutch counties in which Jews were living in 1942	104
6.1	Twente, 1940	113
6.2	Religious minorities in Twente, 1942	114

7.3	Rescue networks in Friesland	152
7.4	Rescue networks in Groningen	155
7.5	Minority rescue according to postwar testimonies	156
7.6	Effect of a Catholic community with 90 percent confidence intervals conditional on the Catholic strength in the region	158
7.7	The effect of Orthodox Protestantism on occurrence of rescue activities and arrests with 90 percent confidence intervals	159
7.8	Effect of the Catholic community on membership in resistance organization conditional on the Catholic strength in the region. Point estimates are represented as points with 90 percent confidence intervals	161
7.9	Effect of the Orthodox Protestant community on the membership of KP with 90 percent confidence intervals	161
8.1	Majority rescue networks in Twente	171
8.2	Majority networks in southern provinces	174

8.3	Majority networks in northern provinces	175
8.4	Evasion and proximity to Catholic churches in Twente (counties Jews > 10)	176
8.5	Evasion and proximity to minority churches in Twente (counties Jews > 10)	177
8.6	Secular rescue networks in Twente	180
8.7	Example land-use data: Weerselo and Oldenzaal, 1960	184
8.8	The change in predicted probability of evasion as variable is increased one standard deviation with 90 percent confidence intervals	185
9.1	Percentage of clerics that self-report to have helped Jews	196
9.2	The change in predicted probability of evasion with 90 percent confidence intervals if the number of Protestant Churches increases with one standard deviation	203
9.3	Local strength of Catholicism	206
9.4	Effect of increasing mass attendance one standard deviation	210
9.5	Effect of votes for the Catholic party, 1925	210
9.6	The change in predicted probability of evasion with 90 percent confidence intervals as Catholic proximity moves from its minimum to its maximum value conditional on Catholic church attendance using a 1.25-km buffer	211
10.1	Over- and under-representation of religious minorities among rescuers in other Nazi-ruled countries	218
10.2	The change in predicted probability of deportation with 90 percent confidence intervals as a Catholic village increases one standard deviation conditional on Catholic strength in a German state	222
10.3	Death rate prefectures in rural Rwanda by percentage of the population that is Muslim	230
10.4	Geographical distribution of the French and Flemish in Belgium, 1930	234
10.5	The change in evasion with 90 percent confidence intervals when the percentage of Dutch speakers increases by one standard deviation, Belgium	235
10.6	Overrepresentation of ethnic minorities among rescuers in Belgium	236
